Thomism were the Cardinals Celestine Sfondrato (d. 1696) and Aguirre (d. 1699); the latter's work "Theology of St. Anselm" in three volumes is replete with deep thought. Among the Franciscans Claudiu̇s Frasen (d. 1680) issued his elegant "Scotus academicus", a counterpart to the Thomistic theology of the School. The works of the School were augmented by Gabriel Boyvin, Krisper (d. 1721), and Kiek (d. 1769). Eusebius Amor (d. 1775), the foremost theologian in Germany, also represented a better type, combining sound conservatism with due regard for modern demands. The Society of Jesus still preserved something of its former vigor and power. So did the Ullstein (d. about 1723), and Martin were the authors of voluminous scholastic works. But now the didactical and pedagogical interests began to assert themselves, and called for numerous textbooks of theology. We mention Platei (d. 1681), Antoine (d. 1743), Pichler (d. 1736), Sardagna (d. 1773), Erber, Monschein (d. 1769), and Gener. But both as regards matter and form all these textbooks were surpassed by the "Theologiae Wirteburgensis", which the Jesuits of Würzburg published in 1766–71. In addition to the old religious orders, we must during this period the new school of Augustinianism, which sought a renewal of the ancient form. Gregory of Rimini rather than that of Ægidius of Rome. Because of the stress they laid on the rigorous element in St. Augustine's doctrine on grace, they were for a time suspected of Baianism and Jansenism, but were cleared of this suspicion by Benedict XIV. To this school belonged the scholarly Lupus (d. 1681) at Louvain and Cardinal Noris (d. 1704), distinguished for his subtle intellect. But its best work on dogmatic theology came from the pen of Lawrence Bert (d. 1766). His fellow-workers in the same field were Belloli (d. 1742) and Bertieri. The latter, falling from the eminence of his youth, was buried in Jansenism, as the names of Quesselin, Lebrun, and Juenin sufficiently indicate.

The Sorbonne of Paris, developing the germs of Jansenism and Gallicanism, ceased to keep abreast of the time. Abstracting, however, from this fact, theology owes works of great merit to men like Louis Habert (d. 1718), du Hamel (d. 1706), L'Herminier, Witasse (d. 1716). Creditable exceptions were Louis Abel (d. 1691) and Martin Grandin, who distinguished themselves by their loyalty to the Church. The same encomium must be said of Habert (d. 1718), who went through the editions of "Préceptes de théologie" and "dogmatics" are numbered among the best theological textbooks. A staunch opponent of Jansenism, he certainly has challenged Gallicanism, had not the law of the realm prevented him. For the rest, the Church depended almost exclusively on Italy in its scientific combat against the pernicious errors of the time. There had a gathered a chosen band of scholars who courageously fought for the purity of the faith and the rights of the papacy. In the front rank against Jansenism stood the Jesuit Dominique Viva (d. 1726), La Fontaine (d. 1728), Alteozzi (d. 1777), and Faure (d. 1775). Gallicanism and Josephinism were hard pressed by the theologians of the Society of Jesus, especially by Zaccaria (d. 1795), Muzarelli (d. 1749), Bolgeni (d. 1811), Roncaglia, and others. The Jesuits were ably seconded by the Dominicans Orsi (d. 1691) and Marnachi (d. 1792). Another champion in this struggle was Cardinal Jean-Baptiste Meissonier, whose epoch belongs the fruitful activity of St. Alphon- sus Liguori (d. 1787), whose popular rather than scientific writings energetically opposed the baneful spirit of the time.

Fourth Epoch: Decay of Catholic Theology (1780–1900).—The Catholic life in the forties naturally brought with it a revival of Catholic theology. Germany especially, where the decline had gone farthest, showed signs of a remarkable regeneration and vigorous health. The external impulse was given by Joseph Görres (d. 1845), the "louder in the faith." When the Church, after the Napoleonic Government's毫米. Archbishop von Droste-Vischering of Cologne on account of the stand he had taken in the question of mixed marriages, the fiery appeals of Görres began to fill the hearts of the Catholics, even outside of Germany, with unwonted courage. The German theologians heard the call and once more applied themselves to a study which was theirs. Döllinger (d. 1890) developed Church history, and Möhler advanced patrology and sym-
bolism. Both positive and speculative theology received a new lease of life, the former through Klee (d. 1840), the latter through Staudenmeier (d. 1855). At the second Ecumenical Council of 1867, Wernher (d. 1888), and Steckl (d. 1895) earned for the despised Scholasticism a new place of honour by their thorough historical and systematic writings. In France and Belgium the dogmatic theology of Cardinal Gousset (d. 1866) of Reims and the writings of Charles Bonnet (d. 1865) exerted great influence. In North America the works of Archbishop Kenrick (d. 1863) did untold good. Cardinal Camille Mazzella (d. 1900) is to be ranked among the North American theologians, as he wrote his dogmatic works while occupying the chair of theology at Woodstock College, Maryland. In England the great Cardinals Wiseman (d. 1865), Manning (d. 1892), and Newman (d. 1890) became by their works and deeds powerful agents in the revival of Catholic life and in the advance of Catholic theology.

In Italy, where the better traditions had never been forgotten, far-seeing men like Sanseverino (d. 1865), Liberati (d. 1892), and Tongiorgi (d. 1865) set to work to restore Scholastic philosophy, because it was found to be the most effective weapon against the errors of the time, i. e. traditionalism and ontologism, which had a numerous following among Catholic scholars in Italy, France, and Belgium. The pioneers of the new movement fell to the lot of two of the famous Jesuit Perrone (d. 1876) in Rome. His works on dogmatic theology, scattered throughout the Catholic world, freed theology of the mistaken ideas which had infected it. Under his leadership a brilliant phalanx of theologians, as Passaglia (d. 1887), Schrader (d. 1876), Cardinal Franzelin (d. 1886), Lampli (d. 1909), and others, continued the work so happily begun and reasserted the right of the speculative element in the domain of theology. Eminent among the Dominicans was Cardinal Zinigradi, an inspiring teacher and fertile author. Thus from Rome, the centre of Catholicism, where students from all countries foregathered, new life went forth and permeated all nations. Germany, where Baader (d. 1841), Günther, and Frohschammer (d. 1893) continued to spread their errors, shared in the general uplift and produced a number of prominent theologians, such as Herderlein (d. 1861), Berlin (d. 1876), Oswald (d. 1903), Knoll (d. 1863), Denninger (d. 1883), v. Schäfer (d. 1880), Bernard Jungmann (d. 1895), Heinrich (d. 1901), and others. But Germany's greatest theologian at this time was Joseph Scheeben (d. 1888), a man of remarkable talent and devotion. In the tradition of the great reawakening the Vatican Council was held (1870), and the Encyclical of Pope Leo XIII on the value of Scholastic, especially Thomistic, philosophy and theology was issued (1879). Both these events became landmarks in the history of dogmatic theology. An energetic activity was put forth in every branch of sacred science and is still maintained. Even though, consulting the needs of the time and the hostile situation, theologians cultivate most assiduously historical studies, such as Church history, Christian archaeology, history of dogma, and history of religious, yet signs are not wanting that side by side with positive theology, Scholasticism also will enter upon a new era of progress. History shows that periods of progress in theology always follow in the wake of great ecumenical councils. After the first Council of Nicaea (325) came the great period of the Fathers; after the Fourth Lateran Council (1215) the great period of the Franciscan; and after the Council of Trent (1545-63) the activity of later Scholasticism. It is not too much to hope that the Catholic Church, which had to be judged indefinitely after a few general sessions, will be followed by a similar period of progress and splendour.
THEOLOGY

On the Prophets cf. C. KÜZEHU, Die Propheten (Stuttgart, 1880); BÜCHE, Die Lehrgebärde, Die Predigt des Propheten, und der Prophet in der Geschichte (2 vols., Freiburg, 1890—). Die Lehre von der Entstehung der Predigt und der Prediger in der Aufklärung (Würzburg, 1892).

Die Lehre von der Entstehung der Predigt und der Prediger in der Aufklärung (Würzburg, 1892).

A. CHRISTOLOGY. — Christology is that part of theology which deals with Our Lord Jesus Christ. In its full extent it comprises the doctrines concerning both the person of Christ and His works; but in the present article we shall limit ourselves to a consideration of the person of Christ. Here again we shall not infringe on the domain of the Old Testament theologian, who present their respective contributions under the headings Jesus Christ, and Messiah; hence the theology of the Person of Jesus Christ, considered in the light of the New Testament or from the Christian point of view, is the proper subject of the present article. The person of Jesus Christ is the Second Person of the Most Holy Trinity, the Son or the Word of the Father, Who "was incarnate by the Holy Ghost of the Virgin Mary and was made man." These mysteries, though foretold in the Old Testament, were fully revealed in the New, and clearly developed in Christian Tradition and theology. Hence we shall have to study our subject under the triple aspect of the Old Testament, the New Testament, and Christian Tradition.

A. Old Testament. — From what has been said we understand that the Old Testament is not considered here as the basis of Christian doctrine, but the Christian theologian. Jesus Christ Himself was the first to use it in this way by His repeated appeal to the Messianic passages of the prophetic writings. The Apostles saw in these prophecies many arguments in favour of the claims and the teachings of Jesus Christ; the Evangelists, too, are familiar with them, though they appeal less frequently to them than the patristic writers do. Even the Fathers either state the prophetic argument only in general terms or they quote single prophecies; but they thus prepare the way for the deeper insight into the historical perspective of the Messianic predictions which began to prevail in the eighteenth and nineteenth centuries. Leaving the statement of the historical development of the Messianic prophecies to the writer of the article Messias, we shall briefly call attention to the prophetic predictions of the genealogy of Christ. Of His birth, His infancy, His names, His offices, His public life, His sufferings, and His glory.

(1) Reference to the human genealogy of the Messias are quite numerous in the Old Testament: He is represented as the seed of the woman, the son of David, the seed of Abraham, Isaac, and Jacob, the son of David, the prince of the priests, the offspring of the narrow of the high cedar (Gen., iii, 1–19; ix, 18–27; xii, 1–9; xvii, 1–9; xxi, 17–19; xxii, 16–18; xxvi, 1–5; xxvii, 1–15; Num., xxiv, 15–19; II Kings, vii, 1–16; I Par., xvii, 1–17; Jer., xxxii, 1–8; xxxiii, 14–26; Ezech., xvii). The Royal Psalmist extols the Divine genealogy of the future Messias in the words: "The Lord hath said to me: Thou art my son, this day have I begotten thee" (Ps. ii, 7). Thus the Prophets and Psalmists prepare the way for the birth of the expected Christ. They locate its place in Bethlehem of Juda (Mich., v, 2–14), they determine its time by the passing of the sceptre from Juda (Gen. xlii, 8–12), by the seventy weeks of Daniel (ix, 24–27), and by the "little while mentioned in the Book of Aggus (xxviii, 5). The Old Testament seers know also that the Messias will be born of a Virgin Mother (Is., vii, 1–17), and that His appearance, at least His public appearance, will be preceded by a precursor (Is., xi, 1–11; Mal., iv, 5–6).

(3) Certain events connected with the infancy of the Messias have been deemed important enough to be the subject of prophetic prediction. Among these are the adoration of the Magi (Pa. lxxii, 1–17), the slaughter of the innocents (Jr., xxxi, 15–28), and the flight into Egypt (Osee, xi, 1–7). It is true that in the case of these prophecies, as it happens in the case of many other of their fulfilment, is their clearest commentary; but this does not undo the fact that the events were really predicted.

(4) Perhaps there is less need of insisting on the predictions of the better known Messianic names and titles, seeing that they involve less obscurity. Thus in the prophecies of Zacharias the Messias is called the Orient, or, according to the Hebrew text, the "bud" (iii, vi, 9–15), in the Book of Daniel He is the Son of Man (vii), in the Prophecy of Malachias He is the Angel of the Testament (ii, 17; iii, 6), in the writings of Isaia He is the Saviour (i, 1; iii, 12; xiii), by the servant of the Lord (xix, 1), the Emmanuel (viii, 1–10), the Prince of peace (ix, 1).

(5) The Messianic offices are considered in a general way in the latter part of Isaias (lxii); in particular, the Messias is considered as prophet in the Book of Deuteronomy (xvii, 9–22); as king in the Canticle of Anna (I Kings, ii, 1–10), and in the royal song of the Psalmist (xlv); as priest in the sacramotal song Melchisedech (Gen., xiv, 14–20) and in the Psalmist's words "a priest forever" (cix); as Goel, or Avenger, in the second part of Isaias (lxxii, 1–6); as mediator of the New Testament, under the form of a covenant of the people (Is., xlii, 1; lxxii, 13), and of the light of the Gentiles (Is., xlix).

(6) As to the public life of the Messias, Isaias gives us a general idea of the fulness of the Spirit investing the Anointed (xi, 1–16), and of the Messianic work (lv). The Psalmist presents a picture of the Good Shepherd (xxxi); Isaias summarizes the Messianic miracles (xxvi); Zacharias explains, "Rejoice greatly, O daughter of Sion," thus predicting Christ's solemn entrance into Jerusalem; the Psalmist refers to this same event when he mentions the praise out of the mouth of infants (viii). To return once more to the Book of Isaias, the prophet foresails the rejection of the Messias through a league with death (xxvi); the Psalmist alludes to the same mystery where he speaks of the stone which the builders rejected (xxvi).

(7) Need we say that the sufferings of the Messias were fully predicted by the prophets of the Old Testament? The general idea of the Messianic victim is represented in the context of the prophecies of His birth, His infancy, His sufferings, and His glory. The Messias was to suffer in the flesh as the Son of Man and that the oblation thou wouldst not" (Ps. xxxiii); in the passage beginning with the resolve "Let us put wood on his bread" (Jer., xi), and in the sacrifice described by the prophet Malachias (i). Besides, the series of the particular events which constitute the history of the Passion has been predicted by the prophets with a remarkable minuteness: the Psalmist refers to His betrayal in the words "the man of my peace supplanted me" (xl), and Zacharias knows of the
"thirty pieces of silver" (xii); the Psalmist praying in the anguish of his soul is a type of Christ in His agony (Ps. lvi); His capture is foretold in the words "pursue and take him" and "they will hunt after the soul of the just" (Ps. lxxv, xxiii); His trial with its fear may be foreshadowed in the words "unjust witnesses have risen up against me, and iniquity hath lied to itself" (Ps. xxvi); His flagellation is portrayed in the description of the man of sorrows (Is., lii, 13; liii, 12) and the words "scourges were gathered together upon me" (Ps. xxxiv); the betrayal is let (it is pictured in the imprisonment of Psalm cviii; the crucifixion is referred to in the passages "What are these wounds in the midst of thy hands?" (Zach., xiii), "Let us condemn him to a most shameful death" (Wisd., ii), and "They have dug my hands and my feet" (Ps. xxvi); the miraculous darkness occurs in Amos, vii; the gall and vinegar are spoken of in Ps. lxvi; the pierced heart of Christ is foreshadowed in Zach., xii. The sacrifice of Isaac (Gen., xxi, 1-14), the scapegoat (Lev., xvi, 1-28), the ashes of purification (Num., xix, 1-10), and the brazen serpent (Num., xx, 4-9) hold a prominent place among the types prefiguring the suffering Messiah. The third chapter of Lamentations is justly considered as the dirge of our buried Redeemer.

(8) Finally, the glory of the Messiah has been foretold by the Prophets of the Old Testament. The context of such phrases as "he shall stand in the beauty of holiness" (Isa. lxii, 1), "My flesh shall rest in hope" (Ps. xxv), "On the third day he will raise us up" (Osee, v, 15, vi, 3), "O death, I will be thy death" (Osee, xiii, 6-15a) and "I know that my Redeemer lieth" (Job, xix, 23-27) referred the devout Jewish worshipper to something more than a merely earthly restoration, the fulfillment of which began to be realized in the Resurrection of Christ. This mystery is also implied, at least typically, in the first fruits of the harvest (Lev., xxii, 9-14) and the deliverance of Jonas from the belly of the fish (Jon., ii). Nor is the Resurrection of the Messiah the only element of Christ's glory predicted by the Prophets. Ps. lxvi refers to the Ascension; Joel, ii, 28-32, to the coming of the Paraclete; Is., lx, to the call of the Gentiles; Mic., iv, 1-7, to the conversion of the Synagogue; Dan., ii, 27-47, to the kingdom of the Messiah as compared with the kingdom of the world. Other characteristics of the Messianic kingdom are typified by the Song of Solomon (Ex., xxxi, 13-36); Num., ix, 15-23, the mercy-seat (Ex., xxxii, 17-22; Ps. lxix, 9), Aaron the high priest (Ex., xxviii, 1; xxx, 1; Num., xxxi, 29-40), the manna (Ex., xvi, 1-15; Ps. lxvii, 24-25), and the rock of Horeb (Ex., xvii, 5-7; Num., xx, 10-11; Ps. civ, 1). A Canticle of Thanksgiving for the Messianic blessings is found in Is., xii.

The Books of the Old Testament are not the only source from which the Christian theologian may learn the Messianic ideas of pre-Christian Jewry. The Sybiline oracles, the Book of Enoch, the Book of Jubilees, the Book of Baruch, the Fourth Book of Enoch, and several Talmudic and Rabbinic writings are rich depositories of pre-Christian views concerning the expected Messiahs. Not that all of these works were written before the coming of Christ; but, though partially post-Christian in their authorship, they preserve a picture of the Jewish world of thought, dating back, at least in its outline, centuries before the coming of Christ.

(3) New Testament.—Some modern writers tell us that there are two Christs, as it were, the Messias of faith and the Messiah of history. They represent the Lord and Christ, Whom God exalted by raising Him from the dead, as the subject of Christian faith; and Jesus of Nazareth, the preacher and worker of miracles, as the theme of the historian. They assure us that it is quite impossible to persuade even the least experienced critic that Jesus taught, in formal terms and at one and the same time, the Christology of Paul, that of John, and the doctrines of Nicene, of Ephesus, and of Chalcedon. Otherwise the history of the New Testament cannot be represented as anything else than to be quite inconceivable. The Fourth Gospel is said to lack the data which underlie the definitions of the first ecumenical councils and to supply testimony that is not a supplement, but a corrective, of the portrait of Jesus drawn by the Synoptics. These two accounts of the life of Jesus are not mutually exclusive: if Jesus spoke and acted as He speaks and acts in the Synoptic Gospels, then He cannot have spoken and acted as He is reported by St. John. We shall here briefly review the Christology of St. Paul, of the Catholic Epistles, of the Fourth Gospel, and of the Synoptics. Thus we shall give the reader a complete Christology of the New Testament and at the same time the data necessary to control the contents of the Modernists. The Christology will not, however, be complete in the sense that it extends to all the details concerning Jesus Christ taught in the New Testament, but in the sense that it gives the essential characteristics taught in the whole of the New Testament.

(1) Pauline Christology.—St. Paul insists on the truth of Christ's real human and Divinity, in spite of the fact that at first sight the reader is confronted with three of the most enigmatic ideas of the human world, and the Mediator. But then the latter is both Divine and human, both God and man.

(a) Christ's Humanity in the Pauline Epistles.—The expressions "form of a servant", "in habit found as a man", "in the likeness of sinful flesh" (Phil., ii, 7; Rom., viii, 3) may seem to impair the real humanity of Christ in the Pauline teaching. But in reality they only describe a mode of being or hint at the presence of a higher nature in Christ not seen by the senses, or they contrast Christ's human nature with the nature of that sinful race to which it belongs. On the other hand the Apostle plainly speaks of our Lord manifested in the flesh (I Tim., iii, 16), as possessing a body of flesh (Col., i, 22), as being "made of a woman" (Gal., iv, 4), as being born of the seed of David according to the flesh (Rom., i, 3), as belonging according to the flesh to the race of Israel (Rom., i, 3). As a New Jew, Jesus Christ was born under the Law (Gal., iv, 4). The Apostle places no emphasis on Our Lord's real share in our physical human weakness (II Cor., xiii, 4), on His life of suffering (Heb., v, 8) reaching its climax in the Passion (Ibid., i, 5; Phil., iii, 10; Col., i, 24). Only in two respects did Our Lord's humanity differ from the rest of men: first in his entire unadulterated nature (II Cor., v, 21; Gal., ii, 17; Rom., viii, 3); secondly, in the fact that Our Lord was the second Adam, representing the whole human race (Rom., v, 12-21; I Cor., xv, 45-49).

(b) Christ's Divinity in the Pauline Epistles.—According to St. Paul, the superiority of the Christian revelation over all other Divine manifestations, and the perfection of the New Covenant with its sacrifice and priesthood, are derived from the fact that Christ is the Son of God (Heb., i, 1 sqq.; v, 5 sqq.; ii, 5 sqq.; Rom., i, 3; Gal., iv, 4; Eph., iv, 13; Col., i, 12 sqq.; ii, 9 sqq.; etc.). The Apostle understands the expression "Son of God" not as merely moral dignity, or a merely external relation to God which began in time, but an eternal and immanent relation of Christ to the Father. He contrasts Christ with, and finds Him superior to, Aaron and his successors, Moses and the prophets (Heb., v, 5 sqq.; Heb., i, 6 sqq.; iii, 1-6; i, 1). He raises Christ above the choirs of angels, and makes Him their Lord and Master (Heb., i, 3; 14; ii, 2-3), and seats Him as heir of all things at the right hand of the Father (Heb., i, 2-3;
Gal., iv, 14; Eph., i, 20–21). If St. Paul is obliged to use the terms "form of God," "image of God," when he speaks of Christ's Divinity, in order to show the personal distinction between the Eternal Father and the Son (I Tim., iii, 16), yet Christ is not merely the image and glory of God (I Cor., xi, 7), but also the first-born before any created beings (Col., i, 15), in Whom, and by Whom, and for Whom all things were made (Col., i, 16), in Whom the fulness of the Godhead resides with that actual reality which we impute to the presence of Jesus in the material bodies perceptible and measurable through the organs of our senses (Col., ii, 9), in a word, "who is over all things, God blessed for ever" (Rom., ix, 5).

(2) Christology of the Catholic Epistles.—The Epistles of St. John will be considered together with the other writings of the New Testament in the next paragraph. Under the present heading we shall briefly indicate the views concerning Christ held by the Apostles St. James, St. Peter, and St. Jude.

(a) The Epistle of St. James.—The main practical scope of the Epistle of St. James does not lead us to expect that Our Lord's Divinity would be formulated in it as doctrine of faith. This doctrine is, however, implied in the language of the inspired writer. He proffers to stand in the same relation to Jesus Christ as to God, being the servant of both (i, 1); he applies the same term to the God of the Old Testament as to Jesus Christ (passim). Jesus Christ is the only mediator, the only law-giver, the only priest, the only lamb, the only Saviour, who can save and can destroy (iv, 12); the faith in Jesus Christ is faith in the Lord of glory (ii, 1). The language of St. James would be exaggerated and overstrained on any other supposition than the writer's firm belief in the Divine Christology of Jesus Christ. St. Peter, the author of the Second Epistle, dwells on the Servant of God in his own person as the servant and the apostle of Jesus Christ (I Pet., i, 1; II Pet., i, 1), who was predicted by the Prophets of the Old Testament in such a way that the Prophets themselves were Christ's own servants, heralds, and organs (I Pet., i, 10–11). It is the pre-existent Christ who moulds the utterances of Israel's Prophets to proclaim their anticipations of His advent. St. Peter had witnessed the glory of Jesus in the Transfiguration (II Pet., i, 16); he appears to take pleasure in multiplying His titles: Jesus Our Lord (II Pet., ii, 2), our Lord Jesus Christ (ibid., i, 14, 16), the Lord and God, the Lord Jesus Christ (ibid., i, 1), Whose power is Divine (ibid., i, 3), through whose promises Christians are made partakers of the nature of God (ibid., i, 4). Throughout his Epistle, therefore, St. Peter feels, as it were, and implies the Divinity of Jesus Christ.

(b) The Epistle of St. Jude.—St. Jude also is interested in the history of the Church as the history of the Servant of Christ, through union with whom Christians are kept in a life of faith and holiness (1); Christ is our only Lord and Saviour (4). Who punished Israel in the wilderness and the rebel angels (5), Who will come to judgment surrounded by myriads of angels (6), and to Whom Christians look for the mercy which He will show them at His coming (21), the issue of which will be life everlasting. Can a mere human Christ be the subject of this language?

(3) Johannine Christology.—If there were nothing else in the New Testament to prove the Divinity of Christ, the first fourteen verses in the Fourth Gospel would suffice to convince a believer in the Bible of that dogma. Now the doctrine of this prologue is the fundamental idea of the whole Johannine theology. The Word made flesh is the same with the Word Who was in the beginning, on the one hand, and with the Word Who was with God, and who was God, on the other. The whole Gospel is a history of the Eternal Word dwelling in human nature among men.

The teaching of the Fourth Gospel is also found in the Johannine Epistles. In his very opening words the writer tells his readers that the Word of life has become manifest and that the Apostles had seen and heard and handled the Word incarnate. The denial of the Son implies the loss of the Father (I John, ii, 23), on which account the author of the Epistle states that Jesus is the Son of God, God abideth in him and he is in God" (ibid., iv, 15). Towards the end of the Epistle the writer is still more emphatic: "And we know that the Son of God is come: and he hath given us understanding that we may know the true God and the true way to the Father. This is the true God and life eternal" (ibid., v, 20).

According to the Apocalypse, Christ is the first and the last, the alpha and the omega, the eternal and the almighty (i, 8; xxxi, 6; xxxii, 13). He is the king of kings and lord of lords (xix, 16), the lord of the unseen (xxi, 10; xii, 1; xiv, 4) in the centre of the seat of heaven (v, 6); He receives the adoration of the highest angels (v, 8); and, as the object of that uninterrupted worship (v, 12), He is associated with the Father (v, 13; xviii, 14).

(4) Christology of the Synoptics.—There is a real difference between the Evangelists and St. John in their respective representations of our Lord. The truth presented by these writers may be the same, but they view it from different standpoints. The three Synoptists set forth the humanity of Christ in its obedience to the law, in its power over nature, and in its tenderness for the weak and afflicted; the Fourth Gospel sets forth the life of Christ as the exemplification of the aspects which belong to it as human, but as being the adequate expression of the glory of the Divine Person, manifested to men under a visible form. But in spite of this difference, the Synoptists by their suggestive implication practically anticipate the teaching of the Fourth Gospel. This is implied, first, in the Synoptic use of the title Son of God as applied to Jesus Christ. Jesus is the Son of God, not merely in an ethical or theocratic sense, not merely as one among many sons, but He is the only, the well-beloved Son of the Father, so that His Sonship is unshared by any other, and is absolutely unique (Matt., iii, 17; xvii, 5; xxii, 41; cf. iv, 3, 6; Luke, iv, 3, 9); it is derived from the fact that the Holy Ghost was to come upon Mary, and the power of the Most High was to overshadow her (Luke, i, 35). Again, the Synoptists imply Christ's Divinity in their account of His nativity and in making of Him the Son of God and His accompanist; He is conceived of the Holy Ghost (Luke, i, 35), and His mother knows that all generations shall call her blessed, because the mighty one had done great things unto her (Luke, i, 48). Elizabeth calls Mary blessed among women, blesses the fruit of her womb, and marvels that herself should be visited by the mother of her Lord (Luke, iv, 42–43). Gabriel greets Our Lady as full of grace, and blessed among women; her Son will be great, He will be called the Son of the Most High, and of His kingdom there will be no end (Luke, i, 28, 32). As new-born infant, Christ is adored by the shepherds and by the wise men, representatives of the Jewish and the Gentile world. Simeon sees in the child his Lord's salvation, the light of the Gentiles, and the pride and glory of his people Israel (Luke, ii, 30–32). These accounts hardly fit in with the limits of a merely human child, but they become intelligible in the light of the Fourth Gospel.

The Synoptists agree with the teaching of the Fourth Gospel concerning the person of Jesus Christ not merely in their use of the term Son of God and in their accounts of Christ's birth with its surrounding details, but also in their narratives of Our Lord's doctrine and miracles, of His death and Resurrection, and in the subjects which they often apply to Christ, is used in such a way that it shows in Jesus Christ a self-consciousness for which the human element is not something primary, but something secondary and superinduced. Often Christ is simply called Son (Matt., xi, 27;
(2) The Divinity of Christ.—Even in Apostolic times the Church regarded a denial of Christ's Divinity as eminently anti-Christian (I John, ii, 22-23; iv, 3; II John, 7). The early martyrs, the ancient Fathers, and the first ecclesiastical authorities agreed that the Incarnation of Christ's Divinity. Still, the Ebionites, the Theodotians, the Arctopontians, and the Photinians looked upon Christ either as a mere man, though singularly enlightened by Divine wisdom; or as the appearance of a son emanating from the Divine Being according to the Gnostic theory, or again as a manifestation of the Divine Being such as the Theistic and Panetheistic Sabellians and Pataphysians admitted; or, finally, as the incarnate Word indeed, but the Word conceived after the Arian manner as a creature mediating between God and the world, at least not essentially identical with the Father and the Holy Ghost. Though the definitions of Nice and of the subsequent councils, especially of the Fourth Lateran, deal directly with the doctrine concerning the Most Holy Trinity, still they also teach that the Word is consubstantial with the Father, and that the Incarnation of Christ is the Lord of the material and moral universe; as supreme lawmakers He revises all other legislation; as final judge He determines the fate of all. Blot the Fourth Gospel out of the Canon of the New Testament, and you still have in the Synoptic Gospels the idea of the Incarnation of Jesus Christ which we now draw out of the Four Gospels; some points of the doctrine might be less clearly stated than they are now, but they would remain substantially the same.

(C) Christian Tradition.—Biblical Christology shows that one and the same Jesus Christ is both God and man. While Christian tradition has always maintained this triple thesis that Jesus Christ is truly man, that He is truly God, and that the God-man, Jesus Christ, is one and the same person, the heretical and erroneous tenets of various religious leaders have forced the Church to insist more expressly now on the one, now on another element of her Christology. A classified list of the principal errors and of the subsequent ecclesiastical utterances will show the development of the Church's doctrine with sufficient clearness. The reader will find a more lengthy account of the principal heresies and councils that treated of them respectively in the next chapter.

(1) Humanity of Christ.—The true humanity of Jesus Christ was denied even in the earliest ages of the Church. The Docetist Marcion and the Priscillianists grant to Jesus only an apparent body; the Valentinians, a body brought down from Heaven. This doctrine of Apophasis deny either that Jesus had any human soul at all, or that He possessed the higher part of the human soul; they maintain that the Word supplies either the whole soul in Christ, or at least its higher faculties. In more recent times it is not so much Christ's true humanity as His real nature that has been denied. According to the Christian creed deals with the ideal, not with the historical Jesus; according to Jacob, it worships Jesus not as an historical person, but as a religious ideal; accordingly to Fichte there exists an absolute unity between God and man, and Jesus was the first to see and teach it; according to Schelling, the incarnation is an eternal fact, which happened to reach in Jesus its highest point; according to Hegel, Christ is not the actual incarnation of God in Jesus of Nazareth, but the symbol of God's incarnation in humanity at large. Finally, certain recent Catholic writers distinguish between a Christian history and a historical Christ thus destroying in the Christ of faith His historical reality. The Present Synod (Propos. 29 sq.) and the Encyclical "Pascendi dominici gregis" may be consulted on these errors.

(3) Hypostatic Union.—His human nature and His Divine nature are in Jesus Christ united hypostatically, i.e., united in the hypostasis or the person of the Word. This dogma has been defined by various councils and ecumenical councils; e.g., by the Councils of Nicaea, after 325; by the Council of Chalcedon in 431; by the Council of Nicaea in 787; by the Council of Constantinople, A.D. 559; by the Council of Carthage in 430 and by the Council of Ephesus, A.D. 431; the Catholic doctrine was again insisted on in the Council of Chalcedon and the second Council of Constantinople. It follows that the Divine and the human nature are physically united in Christ. The Monophysites, therefore, believed that in this physical union either the human nature was absorbed by the Divine, according to the views of Eutyches; or that the Divine nature was absorbed by the human; or, again, that out of the physical union of the two resulted a third nature by a kind of physical mixture, as St. John, or, at least, according to St. Chrysostom, as the completion of the composition. The true Catholic doctrine was upheld by Pope Leo the Great, the Council of Chalcedon, and the Fifth Ecumenical Council, A.D. 553. The twelfth canon of the last named council excludes also the view that Christ's moral life developed gradually, attaining its completion only after the Resurrection, The Adoptionists renewed Nestorianism in part because they considered the Word as the natural Son of God, and the man Christ as a servant or an adopted son of God, thus granting its own personality to Christ's human nature. This opinion was rejected by the eleventh canon of the Fourth Lateran Council of Frankfort (794), and by Leo III in the Roman Synod (799). There is no need to point out that the human nature of Christ is not united with the Word, according to the Socinian and rationalistic
views. Dorner shows how widespread among Protestants these views are, since there is hardly a single notable man engaged in the science of theology who has not in some way been influenced by the teaching of the Church. Among the Monophysites, the Monothelites, the Nestorians, and the Sixth Council, both the schismatic Greeks and the Reformers of the sixteenth century wished to retain the tradition of their Church concerning the Word Incarnate; but the earliest followers of the Nestorians and the Monophysites in Asia Minor and Persia, including both the Nestorian and the Monophysite heresies. The Ubiquitarians, for example, find the essence of the incarnation not in the assumption of human nature by the Word, but in the divinization of human nature by the Word, and in the sharing of the properties of the Divine nature. The subsequent Protestant theologians, however, and the new Syllabus and the Encyclical "Paschendi dominici gregis".

II. MORAL THEOLOGY. — Moral theology is a branch of theology, the science of God and Divine things. The distinction between natural and supernatural theology rests on a solid foundation. Natural theology is the science of God Himself, in so far as the human mind can by its own efforts reach a definite conclusion about God and His nature: it is also the subject of the science of theology, without any further modification, is invariably understood to mean supernatural theology, that is, the science of God and Divine things, in so far as it is based on supernatural Revelation. Its subject-matter embraces not only God and His essence, but also His actions and His eternal purpose, and the guidance by which we are led to God, our supernatural end. Consequently, it extends much farther than natural theology; for, though the latter informs us of God's essence and attributes, yet it can tell us nothing about His free works of salvation. The knowledge of all these truths is necessary for every man, at least in its broad outlines, and is acquired by Christian faith. But this is not yet a science. Dogmatic theology demands that the knowledge won through faith, be deepened, strengthened, so that the articles of faith be understood and defended by their reasons and be, together with their conclusions, arranged systematically.

The entire field of theology proper is divided into dogmatic and moral theology, which differ in subject-matter and in method. Dogmatic theology has as its object the scientific and methodical investigation of the doctrines of faith, moral theology the moral precepts. The precepts of Christian morals are also part of the doctrines of faith, for they were announced or confirmed by Divine Revelation. The subject-matter of dogmatic theology is those dogs and maxims which are designed to enrich the knowledge necessary or convenient for man, whose destination is supernatural. Moral theology, on the other hand, is limited to those doctrines which discuss the relations of man and his free actions to God and his supernatural end, and propose the means instituted by God for the attainment of that end. Consequently, dogmatic and moral theology are two closely related parts of universal theology. Inasmuch as a considerable number of individual doctrines may be claimed by either discipline, no sharp line of demarcation can be drawn between the two. The subject-matter of the dogmas is close to that of the moral law; and in actual practice, however, a division and limitation must be made in accordance with practical needs. Of a similar nature is the relation between moral theology and ethics. The subject-matter of natural morals or ethics, as contained in the Decalogue, has been included in positive, Divine Revelation, and hence has passed into moral theology. Nevertheless, the argumentative processes differ in the two sciences, and for this reason a large portion of the matter is disregarded in moral theology and referred to ethics. For instance, the refutation of the false systems of the modern ethicists is generally treated under ethics, especially because these systems are refuted by arguments drawn not so much from faith, as from reason. Only in so far as moral theology requires a defence of revealed doctrines, does it concern itself with false systems. However, it must discuss the various requirements of the natural law, not only because its law has been confirmed and defined by positive revelation, but also because every violation of it entails a disturbance of the supernatural moral order, the treatment of which is an essential part of moral theology.

The field of moral theology, its contents, and the boundaries which separate it from kindred subjects, may be briefly indicated as follows: moral theology includes everything relating to man's free actions and the law, or supreme, end to be attained through them, as far as we know the same by Divine Revelation; in other words, it includes the supernatural end, the rules, or norm, of the moral order, the human actions, whether, their harmony or disharmony with the laws of the moral order, their consequences, the Divine aids for their right performance. A detailed treatment of these subjects may be found in the second part of St. Thomas's "Summa theologica", a work still unrivalled as a treatise on moral theology.

The position of moral theology in universal theology is briefly sketched by St. Thomas in the "Summa theologica", I, Q. i, a. 7 and Q. ii in the proemium and in the prologus of I-II; likewise by Fr. Suarez in the proemium of his commentaries on the I-II of St. Thomas. The subject-matter of the "Summa theologica" is, man as a free agent.

"Man was made after the image of God, by his intellect, his free will, and a certain power to act of his own accord. Hence, after we have spoken of the pattern, viz. of God, and of those things which proceeded from His Divine power according to His will, we must now
turn our attention to His image, that is, man, inasmuch as he also is the principle of his actions in virtue of his free will and his power over his own actions." He includes all this in theology, not only because it is viewed as the object of positive Divine Revelation (I, Q. i, a. 3), but also because God always is the principal object, for "theology treats all things in the God, either in Himself or are directed towards God as their origin or last end" (I, Q. i, a. 7). "Since it is the chief aim of theology to communicate the knowledge of God, not only as He is in Himself but also as the beginning and end of all things and particularly of rational creatures," ... "we speak first of the tendency of the rational creature towards God," etc. (I, Q. ii, proem.). These words point out the scope and the subject-matter of the moral part of theology.

Suárez, who prematurely calls this tendency of the creatures towards God the return of the creatures to God, shows that there is no contradiction in designating man created after the image of God, endowed with reason and free will and exercising these faculties, as the object of moral theology, and God as the object of entire theology. "If we are asked to name the proximate object of moral theology, we shall undoubtedly say that it is man, that is, free agent, who serves and is served by his own actions; but if we are asked in what respect this object must be treated chiefly, we shall answer that this must be done with respect to God as his last end."

A detailed account of the wide range of moral theology may be found in the analytical index of Pars Secunda of St. Thomas's "Summa theologica." We must confine ourselves to a brief summary. The first question treats of man's last end, eternal happiness, its nature and possession. Then follows an examination of human acts in themselves and their various subdivisions, of voluntary and involuntary acts, of interior and exterior acts and their consequences; the passions in general and in particular; the habits or permanent qualities of the human soul, and the general questions about virtues, vices, and sins. Under this last title, while enquiring into the causes of sin, the author embodies the doctrine on original sin and its consequences. This portion might, however, be with equal right assigned to dogmatic theology in the stricter meaning of the word. Although St. Thomas regards sin chiefly as a transgression of the law, and in particular of the "lex aeterna" (Q. ii, a. 6), still he places the rejection of the laws and the crimes are the highest end, not in their relation to the proximate ends which man may and must pursue, as for instance political, social, economical. Economics, politics, social science are separate fields of science, not subdivisions of moral science. Nevertheless, these special sciences must also be guided by morals, and must subordinate their specific principles to those of moral theology, at least so far as not to clash with the latter.

One circumstance must not be overlooked. Moral theology considers free human actions only in their immediate order, and not as temporary means subordinate to the highest end, not in their relation to the proximate ends which man may and must pursue, as for instance political, social, economical. Hence moral theology surveys all the individual relations of man and passes judgment on political, economical, social questions, not with regard to their bearings on politics and economy, but with regard to their influence upon a moral life.

This is also the reason why there is hardly another science that touches other spheres so closely as does moral theology, and why its sphere is more extensive than that of any other. This is true inasmuch as moral theology has the eminently practical scope of instructing and forming spiritual directors and confessors, who must be familiar with human conditions, in their relation to the moral law, and advise persons in every state and situation.

The manner in which moral theology treats its subject-matter, must be, as in theology generally, chiefly positive, that is, drawing from Revelation and theological sources. Without the latter foundation, reason also comes into play quite extensively, especially since the whole subject-matter of natural ethics has been raised to the level of supernatural morals. It is true reason must be illumined by supernatural faith, but when illumined its duty is to explain, prove, and defend most of the principles of moral theology.

From what has been said it is manifest that the
chief source of moral theology is Sacred Scripture and Tradition together, with the teachings of the Church. However, the following points must be observed regarding the Old Testament. Not all precepts contained in it are universally valid, as many belong to the ritual and special law of the Jews. These statutes never obliged the non-Jewish world and have simply been abrogated by the New Covenant, so we must use them strictly and never apply them. The Decalogue, however, with the sole change in the law enjoining the celebration of the Sabbath, has passed into the New Covenant a positive Divine confirmation of the natural law, and now constitutes the principal subject matter of Christian morality. Moreover, it cannot be said that all of the Old Testament did not stand on the high moral level to which Christ elevated the New Covenant. Jesus Himself mentions things which were permitted to the Jews “on account of the hardness of their hearts”, but against which He applied again the law at first imposed by God. Hence, not everything that was tolerated in the Old Testament and its writings, is tolerated now; on the contrary, many of the usages approved and established there would be counter to Christian perfection as counselled by Christ. With these limitations, the writings of the Old Testament are sources of moral theology containing examples of and exhortations to heroic virtues, from which the Christian moralist, following in the footsteps of Christ and His Apostles, may well draw superb models of sanctity.

Apart from Sacred Scripture, the Church recognizes also Tradition as a source of revealed truths, and hence of Christian morals. It has assumed a concrete shape chiefly in the writings of the Fathers. Furthermore, the decisions of the Church must be regarded as a source, since they are based on Holy Writ and Tradition; they are the proximate source of moral theology, because they contain the final judgment about the meaning of the Sacred Scripture as well as the decisions of the Fathers. These include the long list of condemned propositions, which must be considered as danger signals along the boundary between lawful and illicit, not only when the condemnation has been pronounced by virtue of the highest Apostolic authority, but also when the congregation of bishops by a conciliar act issues a general, doctrinal decision in questions bearing on morals. What Pius IX wrote concerning the meetings of scholars in Munich in the year 1863 may also be applied here: “Since there is question of that subjection which binds all Catholics in conscience to submit to the teaching of the Church by devoting themselves to the speculative sciences; let the members of this assembly recall that it is not sufficient for Catholic scholars to accept and esteem the above-mentioned dogmas, but that they are also obliged to submit to the decisions of the papal congregations as well as to those teachings which are, by the constant and universal consent of Catholics, so held as theological truths and certain conclusions that the opposite opinion even when not heretical, still deserves some theological censure.” If this is true of the dogmatic doctrines in the strict sense of the word, we might say that it is still more true of moral questions, because for them not only absolute and infallibly certain, but also morally certain decisions must be accounted as obligatory norms.

The words of Pius IX just quoted, point to another source of theological doctrines, and hence of morals, viz., the universal teachings of the Catholic schools. For these are the channels by which the Catholic doctrines on faith and morals must be transmitted without error, and which have consequently the nature of a source. From the unamnious doctrine of the Catholic schools follows naturally the conviction of the universal Church. But since it is a dogmatic principle that the whole Church cannot err in matters of faith and morals, the consent of the various Catholic schools must offer the guarantee of infallibility in these questions.

Moral theology, to be complete in every respect, must accomplish in moral questions what dogmatic theology does in questions pertaining to dogma. The latter has to explain clearly the truths of faith and proves here to be much more fruitful, in so far as possible, to show their accordance with reason, defend them against objections, trace their connexion with other truths, and, by means of theological argumentation, deduce further truths. Moral theology must follow the same processive questions of morals.—It is evident that all these methods of dogmatic theology must be followed in moral theology in such a way as to exhaust the subject, except by a series of monographs. It would take volumes to sketch but the beauty and the harmony of God’s dispositions, which transcend the natural law, but which God enacted in order to elevate man to a higher plane and to lead him to his supernatural end in a future life—and yet all this is embraced in the subject of supernatural morals. Nor is moral theology confined to the exposition of those duties and virtues which cannot be shirked if man wishes to attain his last end; it includes all virtues, even those of Christian perfection, of the life of contemplation and their practice, not only in the ordinary degree, but also in the ascetical and mystical life. Hence, it is entirely correct to designate ascetiscm and mysticism as parts of Christian moral theology, though ordinarily they are treated as distinct sciences.

The task of the moral theologian is by no means completed when he has explained the questions indicated. Moral theology, in more than one respect, is essentially a practical science. Its instructions must extend to moral character, moral behaviour, the completion and issue of moral aspirations, so that it can offer a definite norm for the completion of life. For this purpose, moral examples of the individual cases which arise and determine the limits and the gravity of the obligation in each. Particularly those whose office and position in the Church demand the cultivation of theological science, and who are called to be the teachers and counsellors, must find in it a practical help. And inspiration must enable the future judge and lawyer to administer justice in individual cases, so must moral theology enable the spiritual director or confessor to decide matters of conscience in varied cases of everyday life; to weigh the violations of the natural law in the conscience of Divine Revelation; to know whether to warn, excommunicate and pronounce against those who have fallen from the moral level. Many of these tasks are assigned to the collateral science of pastoral theology; but this also treats a special part of the duties of moral theology, and falls, therefore, within the scope of moral theology in its widest sense. The purely theoretical and speculative treatment of the moral questions must be supplemented by casuistry. Whether this should be done separately, that is, whether the subject matter should be taken casuistically before or after theoretical, or whether the method should be at the same time both theoretical and casuistical, is unimportant for the matter itself; the practical feasibility will decide this point, while for written works on moral theology the special aim of the author will determine it. However, it must be pointed out that the training of Catholic priests, would not do full justice
to the end at which he must aim, if he did not unite the casuistical with the theoretical and speculative elements.

What has been said so far, sufficiently outlines the concept of moral theology in its widest sense. Our next task is to follow up its actual formation and development.

Moral theology, correctly understood, means the science of supernaturaly revealed morals. Hence, the study of moral theology is an additional duty and moral perversion, or the concept of an absolute duty which forces itself with unrelenting persisency on all who have attained the use of reason. Without God, an absolute duty is inconceivable, because there is nobody to impose obligation. I cannot oblige myself, because I cannot be my own superior; Still less can I oblige the whole human race, and yet I feel myself obliged to many things, and cannot but feel myself absolutely obliged as man, and hence cannot but regard all those who share human nature with me as obliged likewise. It is plain then that this obligation is not from a higher being, who is superior to all men, not only to those who live at present, but to all who have been and will be, nay, in a certain sense even to those who are merely possible. This superior being is the Lord of all, God. It is also plain that although this Supreme Lawgiver can be known by natural reason, neither He nor His law can be sufficiently known without a revelation on His part. Hence it is that moral theology, the study of this Divine law is actually cultivated only by those who faithfully cling to a Divine Revelation, and by the sects which sever their connexion with the Church, only as long as they retain the belief in a supernatural Revelation through Jesus Christ.

Wherever Protestantism has thrown this belief overboard, there the study of moral theology as a science has suffered shipwreck. To-day it would be merely lost labour to look for an advancement of it on the part of a non-Catholic denomination. In the seventeenth and eighteenth centuries there is no main effort to be found who made an attempt at it. J. A. Dornen states in Herzog, "Real-Encyclopädie", IV, 364 sq. (s. v. "Ethik"), that prominent Protestant writers upholding "theological morals" have grown very scarce since the eighteenth century. However, this may be the correction of those who still cling to a positive Protestantism, we may name Martensen, who recently entered the lists with deep conviction for "Christian Ethics"; the same, though in his own peculiar manner, is done by Lemme in his "Christian-Ethik" (1858); both attribute to it a scope wider and objectively other than that of natural ethics. A few names from the seventeenth and eighteenth centuries may here suffice: Hugo Grotius (d. 1645), Pufendorf (d. 1694), and Christian Thomasius (d. 1728), all see the difference between theological and natural morals in that the former is also positive, i.e. Divinely revealed, but with the same subject matter as the latter. This last assertion could spring only from the Protestant view which has staked its all on the "fides fiducialis"; but it can hardly acknowledge a range of duties widened by Christ and Christianity. Other writers of a "theologia moralis" based on this "natural religion"—thus he speaks of it—were Bodin, whose work is between crusius, and Jerem. Fr. Reuse. A logical result of Kantianism was the denial of the very possibility of moral theology, since Kant had made autonomous reason the only source of obligation. On this point Dornen says (loc. cit.): "It is true that the autonomy and the autocracy of the moral being separates morals and re-

ligion"; he would have been nearer the mark, had he said: "they destroy all morals". Generally speaking the modern Liberal Protestants hardly know any other than a moral code, and whether they speak of "religious" morals, they find its last explanation in man, religion, and God or Divine Revelation being taken in their Modernistic sense, that is subjective notions of whose objective value we have no knowledge and no certainty.

There remains only one question to be discussed: What has been the actual development and method of moral theology in the Church? and here we must first of all remember that the Church is not an educational institution or a school for the advancement of the sciences. True, she esteems and promotes the sciences, especially theology, and scientific schools are founded by her; but this is not her only, or even her chief task. She is the authoritative institution, founded by Christ for the salvation of mankind; she speaks with power and authority to the whole human race, to all nations, to all classes of society, to every age, communicates to them the doctrine of salvation unadulterated and offers them her aids. It is her mission to urge upon educated and uneducated persons alike the acceptance of truth, without regard to its scientific study and establishment. After this has been accepted on faith, she also promulgates and urges, as circumstances, the scientific investigation of the truth, but she retains supervision over it and stands above all scientific aspirations and labours. As a result, we see the subject matter of moral theology, though laid down and positively communicated by the Church, treated differently by ecclesiastical writers according to the requirements of times and circumstances.

In the first years of the early Church, when the Divine seed, nourished by the blood of the martyrs, was seen to sprout in spite of the chilling frosts of persecution, when, to the amazement of the hostile world, it grew into a mighty tree of heavenly plantation, there was hardly leisure for the scientific study of Christian doctrine. Hence morals were at first treated in a popular, parenetic form. Throughout the Patristic period, hardly any other method for moral questions was in vogue, though this method might change in connection with the current controversies. For instance, it led to the detailed discussion of individual virtues and duties. One of the earliest works of Christian tradition, if not the earliest after the Sacred Scripture, the "Didache" or "Teaching of the Apostles", is chiefly of a moral-theological nature. It is hardly more than a code of conduct for believers, who still did not regard as principal duties arising from the Divine institution of the means of salvation and from the Apostolic institutions of a common worship—in this respect valuable for dogmatic theology in its narrow sense. The "Pastor" of Hermas, composed a little later, is of a moral character, that is, it contains a ethical exhortation to Christian morality and to serious penance if one should have relapsed into sin.

There exists a long series of occasional writings bearing on moral theology, from the first period of the Christian era; their purpose was either to recommend a certain virtue, or to exhort the faithful in general for certain times and circumstances. Thus, from Tertullian (d. about 240) we have: "De spectaculis", "De idololatria", "De corona militae", "De patientia", "De oratione", "De peneiamte", "Ad uxorem", not to take into consideration the great number of works in which he dwells on the Christian" philosophy and which are indeed of interest for the history of Christian morals, but cannot serve as guides in it. Of Origen (d. 254) we still possess two minor works which bear on our question, viz., "De martyrio", parenetic in character, and "De oratione", moral and dogmatic in content; the latter meets the objec-
tions which are advanced or rather reiterated even to-day against the efficacy of prayer. Occasional writings and monographs are offered to us in the precious works of St. Cyprian (d. 258); among the former is the "Catechismus", the latter the "De martyro", in a certain sense also "De lapsis", though it bears rather a disciplinary and judicial character; to the latter class belong: "De habitu virginum", "De oratione", "De opere et eleemosynis", "De bono patientie", and "De seolo et livore". At least the "Catechismus" and the "De martyro" are the books seems to belong to an earlier work, the "Pedia-gogus" of Clement of Alexandria (d. about 217). It is a detailed account of a genuine Christian's daily life, in which ordinary and every-day actions are measured by the standard of supernatural morality. The "fairly complete" account of Christian morals also in his other works, particularly in the "Stromata"; but this work is principally written from the apologetic standpoint, since it was intended to vindicate the entire Christian doctrine, both faith and morals, against pagan and Jewish philosophies.

In subsequent years, when the persecutions ceased, and the Churches began to believe more, not only exegetical writings and apologies written to defend Christian doctrine against various heresies, but also numerous moral-theological works, principally sermons, homilies, and monographs. First of these were the orations of St. Gregory of Nazianzus (d. 391), of his "Discourses", while for practice John Chrysostom (d. 406), of St. Augustine (d. 430), and above all the "Catecheses" of St. Cyril of Jerusalem (d. 386). Of St. John Chrysostom we have "De sacerdotio"; of St. Augustine, "Confessiones", "Sollertia", "De cathesicandis rudibus", "De disciplinis", "De institutione morum", while for practice, the "Catecheses" of John Chrysostom (d. 406), of St. Augustine (d. 430), and above all the "Catecheses" of St. Cyril of Jerusalem (d. 386). Of St. John Chrysostom we have "De officiis", a work which, imitating Cicero's "De officiis", forms a Christian counterpart of the pagan's purely natural discussions. A work of an entirely different character was the "Expositio in Job", seu moralium lib. XXXV", of Gregory the Great (d. 604). It is not a systematic arrangement of the various Christian duties, but a collection of moral instructions and exhortations based on the Book of Job; Alas (Handbuch der Patrologie, 92) calls it a "fairly complete" account of morals.

More systematic is his work "De cura pastorali", which was intended primarily for the pastor and which is considered even to-day a classical work in pastoral theology.

Having broadly outlined the general progress of moral theology during the Patriarchal era, we must supplement it by detailing the development of a very special branch of moral theology and its practical application. For moral theology must necessarily assume a peculiar form when its purpose is restricted to the administration of the Sacrament of Penance. The chief result to be attained was a clear notion of the various sins and their species, of their relative grievousness and importance, and of the penance to be imposed for them. In order to ensure uniform procedure, it was necessary for ecclesiastical superiors to lay down more detailed directions; then the "offices" were fixed, whereas before, only rough outlines were left to incumbrances. Writings of this kind are the pastoral or canonical letters of St. Cyprian, St. Peter of Alexandria, St. Basil of Cappadocia, and St. Gregory of Nyssa; the decreals and synodal letters of a number of popes, as Siricius, Innocent, Celestine, Leo I, etc.; canons of several ecumenical councils. These decrees were collected at an early date and used by the bishops and priests as a norm in distinguishing sins and in imposing ecclesiastical penance on their sins.

The ascendency of the so-called "penitential books" dated from the seventh century, when a change took place in the practice of ecclesiastical penance. Till then it had been a time-honoured law in the Church that the three capital crimes: apostasy, murder, and adultery were to be atoned for by an accurately determined penance, which was public at least for public sins. This atonement, which consisted chiefly in severe fasts and public, humiliating practices, was accompanied by various religious ceremonies under the strict supervision of the Church; it included four distinct stations or classes of penances and at times lasted from fifteen to twenty years. At an early period, however, the capital sins mentioned above were divided into sections, according as the circumstances were either aggravating or attenuating, and a correspondingly longer or shorter period of penance was set down for them.

Where the laws of the Church, uncertain and unpractical, gained on the uncivilized and dominated by fierce passions, were received into the bosom of the Church, and when, as a result, heinous crimes began to multiply, many offences, akin to those mentioned above, were included among sins which were subject to canonical treatment. Of these, especially the crimes against the Church's sacredness, the priest determined the pence, its duration and modes, by the canons. The seventh century brought with it a relaxation, not indeed in canonical penance, but in the ecclesiastical control; on the other hand, there was an increase in the number of crimes which demanded a fixed penance if discipline was to be maintained; besides, many hereditary rights of a particular nature, which had led to a certain mitigation of the universal norm of penance, had to be taken into consideration; substitutes and so-called redemptions, which consisted in pecuniary donations to the poor or to public utilities, gradually gained entrance and vogue; all this necessitated the drawing up of comprehensive lists of the various crimes and of the penances to be imposed for them, so that a certain uniformity among confessors might be reached as to the treatment of penances and the designation of the various crimes.

There appeared a number of "penitential books". Some of them, bearing the sanction of the Church, closely followed the ancient canonical decrees of the popes and the councils, and the approved statutes of St. Basil, St. Gregory of Nyssa, and others; others were merely private works, which, recommended by the renown of their authors, found a ready circulation, others again went far too far in their decisions and hence constrained ecclesiastical superiors either to reprehend or condemn them. A more detailed account of these works will be found in another article.

These books were not written for a scientific, but for a practical, juridical purpose. Nor do they mark an advance in the science of moral theology, but rather a standing still, nay, even a decadence. Those centuries of migrations, of social and political upheavals, offered a soil little adapted for a successful cultivation of the sciences, and though in the ninth century a fresh attempt was made to raise scientific studies to a higher level, still the work of the subsequent centuries consisted rather in collecting and renewing treasures of former centuries than in adding to them. This is true of moral-theological questions and of other scientific problems. From this stagnation theology in general and moral theology in particular rose again to new life towards the end of the twelfth and the beginning of the thirteenth century. A new current of healthy development was noticeable.
in moral theology and that in two directions: one in the new strength infused into the practice of the confessors, the other in renewed vigour given to the speculative portion.

With the gradual dying out of the public penances, the "penitential books" lost their importance, and more. The confessors were less concerned about the exact measure of penances than about the essential object of the sacrament, which is the reconciliation of the sinner with God. Besides, the "penitential books" were by far too defective for teaching confessors how to judge about the various sins, their causes, how to avoid them, and other morals. St. Raymond of Penafort wrote towards the year 1236 the "Summa de comitatibus et matrimonio". Like his famous collection of decretals, it is a repertory of canons on various matters, i.e. important passages from the Fathers, councils, and papal decisions. More immediately adapted for actual use was the "Summa de casibus conscientiae", which was written about 1317 by an unknown member of the Order of St. Francis at Asti in Upper Italy, and which is, therefore, known as "Summa Astensana" or "Summa Astensis". Its eight books cover the whole subject matter of moral theology, and it adheres to the canons and decisions both indispensable for the pastor and confessor: Book I, the Divine commandments; II, virtues and vices; III, contracts and wiles; IV–VI, sacraments, except matrimony; VII, ecclesiastical censures; VII, matrimony. The fourteenth and fifteenth centuries produced a number of similar "summa" for confessors; all of them, however, discarded the arrangement in books and chapters, and adopted the alphabetical order. Their value is, of course, widely different. The following are the most important and most popular among them: The "Summa confessorum" of the Dominican Johannes Trebula (d. 1314), which was published a few years previous to the "Summa Astensis"; its high reputation and wide circulation was due to its revision by another member of the Dominican Order, Bartholomäus of Pisa (d. 1347), who arranged it alphabetically and supplemented its canonical parts; it is commonly known as the "Summa Pisana". This work served as the foundation for the "Summa angelica", a clear and concise treatise, composed about 1476 by the Franciscan Angelus Cerelus, called "Angelus a Clavasio" after his native city, Chiavasso. Its great popularity is attested by the fact that it went through at least thirty-one editions from 1476 to 1520. A like popularity was enjoyed by the "Summa casuum" of the Franciscan, J. B. Trovamala, which appeared a few years later (1484) and, after being revised by the author himself, in 1495, bore the title of "Summa rossela". One of the last and most renowned of these "summae" was probably the "Summa Silvestria" of the Dominican Silvestre Prierias (d. 1553), after which moral theology began to be treated in a different manner. The "summa" here mentioned, being exclusively written for the practical use of confessors, did not spurn the more exact and refined; but the fundamental, serious, thorough, scientific study, which produced not only writings of this kind, but also other systematic works of a profound scholarship.

The twelfth century witnessed a busy activity in speculative theology, which centred about the cathedral and monastic schools. These produced men like St. Bernard, Richard of St. Victor, and especially Hugh of Saint-Victor, a pupil, Peter the Lombard, called the Master of the Sentences, which flourished in the cathedral school of Paris towards the middle of the century, and whose "Libri sententiarium" served for several centuries as the standard text-book in theological lecture-halls. In this respect, as in others, they fought against the fundamental dogmas and mysteries of the Christian faith began to appear, the moral part of the Christian doctrine received scant treatment; Peter the Lombard incidentally discusses a few moral questions, as e.g. about sin, while speaking of creation and the original state of man, or more in particular, while treating of original sin. Other questions, e.g. about the freedom of our actions and the nature of human actions in general, are answered in the doctrine on Christ, which was devolved upon the assent of Christ. Even the renowned commentator of the "Sentences", Alexander of Hales, O. Min., does not yet seriously enter into Christian morals. The work of constructing moral theology as a speculative science was at last undertaken and completed by that great master of the thirteenth century, St. Thomas. To what degree the "Summa theologica" referred above is from this master-piece, of which the second part and portions of the third pertain to morals, there are several minor works extant which bear a moral and ascetical character; the last-named branch was cultivated with extraordinary skill by St. Bonaventure of the Franciscan Order, though he did not equal the systematic genius of St. Thomas.

This and the subsequent centuries produced a number of prominent theologians, some of whom contested various doctrines of Aquinas, as Duns Scotus and William of Ockham, and others for whom this latter devoted himself to the practice of the confessional and the ordinary work of the pastor. His "Summa theologica" belongs specially to our subject. It went through several editions, and A. Ballerini's revision of it, which appeared in 1740 at Florence, contains four folios. The third volume treat's chiefly of ecclesiastical law; it discusses at great length the position of the Church and its penal code. A few chapters of the first volume are devoted to the psychological side of man and his actions. The remainder of the whole work is a commentary, from the purely moral standpoint, on the "Summa theologica", to which it constantly refers. It is not a mere theoretical explanation, but is so replete with juridical and casuistical details that it may be called an inexhaustible fountain for manuals of casuistry. How highly the practical wisdom of Antoninus was esteemed even during his lifetime, is attested by the surname "Antoninus consiliorium", Antoninus of good counsel, given to him in the Roman Breviary.

A new life was breathed into the Catholic Church by the Council of Trent. Reformation of morals gave a fresh impetus to theological science. These will gradually the religious and speculative aspect of the "Summa theologica", which had risen at the time of St. Thomas; the desire of solid advancement had frequently given place to seeking after clever arguments on unimportant questions. The sixteenth century witnessed a complete change. Even before the council convened, there were eminent scholars of a serious turn of mind as Thomas of Vio (usually called Cajetanus), Victoria, and the two Sotos, all men whose solid knowledge of theology proved of immense benefit to the Council itself. Their example was followed by a long series of excellent scholars, especially Dominicans and members of the newly-founded Societates imperiales. In this sphere of moral theology which was now taken up with renewed zeal. In former centuries, Peter the Lombard's "Sentences" had been the universal text-book, and more prominent theo-
logic works of subsequent ages professed to be nothing else than commentaries upon them; henceforth, however, the "Summa theologica" of St. Thomas was followed as guide in theology and a large number of the large works of the period, the theologorum tomus quatuor of Gregory of Valentia (q. v.). It is well thought out and shows great accuracy; vols. III and IV contain the explanation of the "Prima Secunda" and the "Secunda Secundae" of St. Thomas. This work was succeeded, at the end of the sixteenth and the beginning of the seventeenth century, by a number of similar commentaries; among them stand out most prominently those of Gabriel Vásquez, Lessius, Suárez, Becanus, and the works of Thomas Sanchez "In decalogue" as well as "Con-silia moralis", which are more casuistical in their method; the commentaries of D. D. Ó Beirne, which have appeared in recent time; and those of Medina (see Medina, Bartholomeu; Probabilism).

Prominent among all those mentioned is Francis Suárez, S.J., in whose voluminous works the principal questions of the "Secunda" of St. Thomas are developed. The treatise on dogmatic theology, which is a work of positive knowledge. Almost every question is searchingly examined, and brought nearer its final solution; the most varied opinions of former theologians are extensively discussed, subjected to a close scrutiny, and the final decision is given with great circumspection, moderation, and moderation. A large folio treat of laws; several folio volumes are devoted to treatises which do indeed belong to morals, but which are inseparably connected with other strictly dogmatic questions about God and His attributes, viz., "De gratia divina"; they are to-day assigned everywhere to dogma proper; a third series gives the entire doctrine of the sacraments (with their function of marriage) from their dogmatic and moral side. Not all of the various virtues were examined by Suárez; besides the treatise on the theological virtues, we possess only that on the virtuous of religion. But if any of Suárez's works may be called classical it is the last-named, which discusses in four volumes the whole subject "De religione". Within the whole range of "religion", including its notion and relative position, its various acts and practices, as prayers, vows, oaths, etc., the sins against it, there can hardly be found a dogmatic or casuistical question that has not been either solved or a solution has not at least been attempted. Of the last two volumes one treats of religious orders in general, the other of the "Institute" of the Society of Jesus.

In the course of the seventeenth and eighteenth century, there appeared a number of similar, though conciser, works which treat moral-theological questions as a part of universal theology with the genuine spirit of Scholastic science. There are those of Tanner, Coninck, Platel, Gotti, Billuart, and many others, the mere enumeration of whom would lead us too far afield. We must, however, mention one to conclude: On Dei gratia, the author of which advanced both speculative and practical theology, and especially practical morals, John de Lugo. Endowed with uncommon, speculative genius and clear, practical judgment, he in many instances pointed out entirely new paths towards the solution of moral questions. Speaking of his moral theology, St. Alphonus styles him "by all odds leader after St. Thomas". The works that have come down to us are: "De fide", "De insaniae contracta", "De justitia et misericordia", "De sancti et sani in generis", "De baptismo et eucharistia", and "De poenitentia". It is above all the volume "De poenitentia" which, through its sixteenth disputation, has become the classical handbook for casuistical moral theology and particularly for the specific distinction of sins; de se and de somniis casibus (the posthumous "Responsa moralia", a collection of answers given by de Lugo in complicated cases of conscience. This is not the place to point out his eminence as a dogmatist; suffice it to say that many far-reaching questions receive original solutions, which, though not, heretofore accepted, have yet shed considerable light on these subjects.

The method which Lugo applies to moral theological questions, may well be called mixed, that is, it is both speculative and casuistical. Such works of a mixed character now grow common, they treat the whole subject as a matter of general principle, as far as it is serviceable for the confessor and the pastor, in this mixed manner, though they insist more on casuistry than did Lugo. A type of this kind is the "Theologia moralis" of Paul Laymann (d. 1636); in this category may also be named the "Theologia dogmatica" and a work of the "De mentalia" of Sporer (d. 1663), the "Conferentia" of Elbel (d. 1756), and the "Theologia moralis" of Reuter (d. 1762). Almost numberless are the manuals for confessors, written in a simple casuistical form, though even these justify their conclusions in general reasons, after legitimizing them by an appeal to external authority. They are not infrequently the fruit of thorough, speculative knowledge and extensive reading. One of the most solid is probably the "Manuale confessiorum et peniten-gium" of Azpilcueta (1494-1568), the great canonist, commonly known as "Doctor Navarrus"; further more, the "Instructio sacrosancti" or "Summa caeasum conscientiae" of Cardinal Tolet (d. 1596), which was highly recommended by St. Francis of Sales. One other work must also be mentioned, viz., the so-called "Medulla theologiae moralis" of Hermann Busenbaum (d. 1658), which has become famous on account of the very extensive and extensive (in less than twenty years during the lifetime of the author) and the number of its commentators. Among these are included Claude Lacroix, whose moral theology is considered as one of the most valuable of the eighteenth century, and St. Alphonus Ligouri, with whose name an entirely new epoch of moral theology commences.

Before entering upon this new phase, let us glance at the development of the so-called systems of morals and the controversies which sprang up among Catholic scholars, as well as at the casuistical method of treating moral theology as a whole. Precisely the casuistry of moral theology around which these controversies centre, and which has experienced severe attacks in our own day. These attacks were for the most part confined to Germany. The champions of the adversaries are J. B. Hirschcr (d. 1865), Döllinger, Reusch, and a group of Catholic scholars who, in the years 1901 and 1902, demanded a "reform of Catholic moral theology", though all were not moved by the same spirit. In Hirschcr it was the zeal for a supposedly good cause, though he was implicated in theological errors; Döllinger and Reusch attempted to destroy the authority of the Church and their refusal to acknowledge the papal infallibility by holding up to the ridicule of the world ecclesiastical conditions and affairs which they thought militated against that infallibility; the latest phase of this opposition is mainly the result of mis-
understandings. In order to elucidate the accusations brought against casuistry, we use the wholly unjustifiable criticism which Hirschler launched against Scholastic theology in general in his work of 1848. On the Relation between General and Theological Scholasticism; it is quoted approvingly by Dollinger and Reusch (Moralreitigkeiten, 13 sqq.)—

(1) "Instead of penetrating into the spirit which makes virtue what it is and underlies everything that is good in this world, in other words, instead of beginning with this, they start with innumerable statutes and clauses, confuse and oppress the hearer by the overflowing measure of duties, half-duties, non-duties." In other words, the Scholastics oppress and confuse by an unnecessary multiplication of duties and non-duties.

It is contrary accorded with the spirit of Mosaiism than with that of Christianity when Christian morality is treated less as a doctrine of virtues than of laws and duties, and when by adding commandment to commandment, prohibition to prohibition, it gives us a full and shaken measure of moral rules instead of building up on the Christian spirit, deriving everything from it and pointing out all particular virtues in its light." Or briefly, casuistry promotes exterior sanctimoniousness without the interior spirit.

(4) "Those who treat morals from the standpoint of casuistry, assign an important part to the distinction between grave and light laws, grave and light duties, serious and slight transgressions, mortal and venial sins. . . . Now, the distinction between grievous and venial sins is not without a solid foundation, and if it is chiefly based on the different qualities of the will, and if, besides, the various degrees of gravity, whereby malice and malice are measured, e.g., of a purely good and strong will, of one less pure and less strong, of a weak, inert, impure, malicious, perverted will, then nobody will raise his voice against it. But it is wholly different when the distinction between mortal and venial sins is taken indefinitely, and based on the gravity and lightness of the commandments. . . . Such a distinction between mortal and venial sins, founded on the material differences of the commandments and the prohibitions, is a source of torment and anxiety for many. . . . True morality cannot be advanced through such a doctrine. . . . The necessity of the Church, of the heavenly law, which is the foundation of the Church, in the name of the church, becomes a mortal sin, and vice versa, that an action which is in itself morally sinful, that is, constitutes a grave violation of the moral law, may be only a venial sin. Nevertheless, all theologians, also casuists, consider a correct conscience a great boon and hence endeavor, by their casuistic discussions, to contribute towards the formation of correct consciences, so that the subjective estimate of the morality of certain actions may coincide, as far as possible, with the objective norm of morality.

When, lastly, various opponents of the casuistic method object that they appeal exclusively with sins and their analysis, with the "dark side" of human life, let them remember that it is physically impossible to say everything in one breath, that just as in many other arts and sciences, Scholasticism and casuistry know only individual good acts and individual virtues, without inquiring into the foundation common to all virtues. Before treating the individual virtues and the individual duties, St. Thomas gives us a whole volume of discussions of a general nature, of which he himself, of course, preserves the profound speculations at the end, the goodness and malice of human actions, the eternal law.

The second accusation, that the Scholastic casuistry confines the mind by its mass of duties and non-duties, can only mean that the Scholastic casuistry acts there up arbitrarily and contrary to truth. The complaint can only refer to those works and lectures which aim at the instruction of the clergy, pastors, and confessors. The reader or hearer who is confused or oppressed by this "mass of duties etc." shows by this very fact that he has not the talent necessary for the office of confessor or spiritual guide, that he should therefore choose another vocation.

The third charge, directed against Judicial hypocrisy which neglects the fostering of the interior life, is refuted by every work on casuistry, however extensive it may be, by its own raison d'etre. Generally that, without the state of grace and a good intention, all external works, no matter how difficult and heroic, are valueless in the sight of God. Can the necessity of the internal spirit be brought out more clearly? And even if, in some cases, the external fulfillment of an intention is only the minimum demanded by God or the Church, without which the Christian would incur eternal damnation, yet this is not banishing the internal spirit, but designating the external fulfillment as the low-water mark of morality.

Lastly, the fourth charge springs from a very grave theological error. There can be no doubt, in judging the heinousness of sin and in distinguishing between mortal and venial sins, the subjective element must be taken into consideration. However, every compendium of moral theology, no matter how casuistical, meets this requirement. Every manual distinguishes sins which arise from ignorance, weakness, malice, without, however, labelling all sins of weakness as venial sins, or all sins of malice as mortal sins; for there are surely minor acts of malice which cannot be said to cause the death of the soul. Every manual also takes cognizance of cases in which the subject is not able to judge with deliberation, knowledge, or freedom: all these, even though the matter be grave, are counted as venial sins. On the other hand, every manual recognizes venial and grievous sins which are such by the gravity of the matter alone. Or who would, abstracting from everything else, put the chief lie on a par with the denial of faith? But even in these sins, mortal or venial according to their object, the casuists lay stress on the personal dispositions in which the sin was actually committed. Hence, their universal principle: the result of a subjectively erroneous conscience may be to subject the action of the person to the penalty of being a venial, becomes a mortal sin, and vice versa, that an action which is in itself morally sinful, that is, constitutes a grave violation of the moral law, may be only a venial sin. Nevertheless, all theologians, also casuists, consider a correct conscience a great boon and hence endeavor, by their casuistic discussions, to contribute towards the formation of correct consciences, so that the subjective estimate of the morality of certain actions may coincide, as far as possible, with the objective norm of morality.
a division of labour may also be advantageous for the science of moral theology, that the particular portion of manuals and lectionaries devoted to the education of skilled confessors and that this purpose may very well be fulfilled by centring attention on the dark side of human life. Nevertheless, it must be granted that this cannot be the only purpose of moral theology: a thorough discussion of all the fundamental questions of Christian morals; it comprises those principles of the moral order by which the relations of man to himself, to God, to his neighbour, and to the various communities are regulated; it embraces the doctrine of the last end of man and of the supernatural means of attaining it. These ends are only the subject of a small number of objectively obscure and doubtful laws or duties that appeal to Probabilism or Antiprobabilism for a decision. However, as has been said, since the middle of the seventeenth century, the interest of moral theologians centred in the question about Probabilism or Antiprobabilism.

Just as far as from the historical point of view the greatest advance was noticeable at the time of the Council of Trent. That more stress was laid on casuistry in particular, finds its explanation in the growing frequency of sacramental confession. This is freely conceded by our adversaries. Dollinger and Reusch say (op. cit., 19 seq.): “The fact that casuistry underwent a further development after the sixteenth century, is connected with further changes in the penitential discipline. From that time on until the custom prevailed of approaching the confessional more frequently, regularly before Communion, of confessing all one’s sins, and of seeking the confessor’s advice for all troubles of the spiritual life, so that the confessor became more and more a spiritual father and guide.” The confessor needed this schooling and scientific training, which alone could enable him to give correct decisions in complex cases of human life, to form a correct estimate of moral goodness or defect, duty or violation of duty, virtue or vice. Now, it was inevitable that the confessor should meet cases where the existence or exact measure of the obligation remained obscure even after careful examination, where the moralist was therefore confronted by the question what the final decision in these cases should be: whether one was obliged to consider oneself bound when the duty was obscure and doubtful, or how one could remove this doubt and arrive at the definite conclusion that there was no strict obligation. That, as we have already seen, is the very nature of an obligation, to exist, must first be proved, had always been known and had been variously expressed in practical rules: “In dubiis benignior sequenda,” “odiosa sunt restringenda,” etc. The basic principle, however, for solving such dubious cases, lay in the certitude the certitude of the morality of an action was not always kept clearly in view. To establish this universal principle, was equivalent to establishing a moral system; and the various systems were distinguished by the principle to which each adhered.

The history of Probabilism is given under this title, suffice it to say here that from the middle of the seventeenth century when the violent discussion of this question begins, the development of moral theology coincides with that of Probabilism and of other Probabilistic systems; although these systems touch only a small portion of morals and of moral truths and nothing is farther from the truth than the opinion, so widespread among the adversaries of Catholic morals, that Probabilism gave a new shape and a new spirit to the whole of moral theology. Probabilism and the other systems of morals are concerned with the certitude of truths; they are useful; hence they abstract entirely from the wide sphere of certain, established truths. Now, the latter class is by far the larger in moral theology also; were it not so, human reason would be in a sorry plight, and Divine providence would have bestowed little care on the moral, the visible creatures and on their higher set goods, even in the supernatural order, in which a full measure of gifts and graces was showered upon those ransomed in Christ. The certain and undisputed portion includes all the fundamental questions of Christian morals; it comprises those principles of the moral order by which the relations of man to himself, to God, to his neighbour, and to the various communities are regulated; it embraces the doctrine of the last end of man and of the supernatural means of attaining it. Hence this end is only the subject of a small number of objectively obscure and doubtful laws or duties that appeal to Probabilism or Antiprobabilism for a decision. However, as has been said, since the middle of the seventeenth century, the interest of moral theologians centred in the question about Probabilism or Antiprobabilism.

At first there was a lack of clearness with regard to Probabilism and the questions connected with it. Conflicting definitions of opinion, probability, and certitude, could not but cause confusion. When one, for any reason or necessity of speaking, multiplied, it was inevitable that some individuals should take the word “probable” in too wide or in too lax a sense, although there can be no doubt that in itself it means “something acceptable to reason”, in other words, since reason can accept nothing unless it has the appearance of truth, “something based on reasons which generally lead to the truth”. Hence it is that opinions were actually advanced and spread as practicable which were little in accord with the demands of the Christian Faith, and which brought down upon them the censure of the Holy See. We refer particularly to the theses condemned by Alexander VII on 24 Sept., 1665, and on 18 March, 1666, and by Innocent XI on 2 March, 1679. It is not Probabilism that must be made responsible for them, but the vagaries of a few Probabilists.

As a result of these condemnations, some theologians thought thereby to be opposed to the system itself and to side with Probabilism. Previous to this turn of affairs, the Janenists had been the most pronounced adversaries of Probabilism. But they, too, had received a setback when Innocent X condemned (31 May, 1653) in the “Augustinus” of Jansenius, that man’s strength on the one hand, and, on the other hand, the strength now at their disposal, cannot keep cer-
tain commandments of God, even if they wish and endeavour to do so; besides, they are without the help of grace which might make it possible for them" was taken from the work and rejected as heretical and blasphemous. Now Probabilism was least reconcilable with this Jansenistic thesis, which could be maintained the easier the stricter the probabilistic views laid upon men's conscience were and the severer the system proclaimed as solely justified was. Consequently, the adherents of the Jansenistic doctrine endeavoured to attack Probabilism, to throw suspicion on it as an innovation, to represent it even as leading to sin. A group of cautiously worded Probabilistic writings too far in their laxity, gave an opportunity to the Jansenists to attack the system, and soon a number of scholars, notably among the Dominicans, abandoned Probabilism, which they had defended till then, attacked it and stood up for Probabilism; some Jesuits also opposed Probabilism. But by far, the majority of the Jesuit writers as well as a vast number of other orders and of the secular clergy, adhered to Probabilism. An entire century was taken up with this controversy, which probably has not its equal in the history of Catholic theology.

Fortunately, the views on the negative side of this controversy are not the popular writings. Nevertheless, exaggerated theories caused a glaring inequality and much confusion in the administration of the Sacrament of Penance and in the guidance of souls. This seems to have been the case particularly in France and Italy; Germany probably suffered less from Rigorism. Hence it was a blessing of Divine Providence that there arose a man in the middle of the eighteenth century, who again insisted on a gentler and milder practice, and who, owing to the eminent sanctity which he combined with solid learning, and which raised him soon after his death to the honour of the Church, he ecclesiastically, thereby definitively establishing the milder practice in moral theology.

This man is Alphonsus Maria Liguori, who died in 1787 at the age of 91, was beatified in 1816, canonized in 1839, and declared Doctor Ecclesiae in 1887. In his youth Liguori had been imbued with the stricter principles of moral theology; but, as he himself confesses, the experience which a missionary life extending over fifteen years gave him, and careful study, brought him to a realization of their falseness and evil consequences. Chiefly for the younger members of the Congregation of the Mission, and in the light of his fervent zeal, he worked out a manual of moral theology, basing it on the widely used "Medulla" of the Jesuit Hermann Busenbaum, whose theses he subjected to a thorough examination, confirmed by internal reasons and external authority, illustrated by adverse opinions, and here and there modified. The work, entirely Probabilistic in its principles, was first published in 1748. Received with universal applause and lauded even by popes, it went through its second edition in 1753; edition after edition then followed, nearly every one showing the revising hand of the author; the Italian, the Latin, the English, published during the lifetime of the saint, appeared in 1785. After his beatification and canonization his "Theologia moralis" found an even wider circulation. Not only were various editions arranged, but it almost seemed as though the further growth of moral theology would be restricted to a reiteration and to copious revisions of the works of St. Alphonsus. An excellent critical edition of the "Theologia moralis St. Alphonsi" is that of Léonard Gaudé, C.S.S.R. (Rome, 1905), who has verified all the quotations in the work and illustrated it with scholarly annotations. A work of this character"Probabilistic moral theology can pass without ample references to the writings of St. Alphonsus. Hence it would be impossible to gain a clear insight into the present state of moral theology and its development without being more or less conversant with the system of the saint, as narrated in the article Probabilism. The controversy, which is still being waged about Probabilism and Aæquiprobabilism, has no significance unless the latter oversteps the limits set to it by St. Alphonsus and merges into one-sided views. Moreover, though the controversy has not yet been abandoned the theologian and every-day practice it is doubtful if there is any one who follows other rules in deciding doubtful cases than those of Probabilism. This ascendency of the milder school in moral theology over the more rigorists again followed when Alphonsus was canonized and when the Church protected that Divine Providence had raised him up as a bulwark against the errors of Jansenism, and that by his numerous writings he had blazed a more reliable path which the guides of souls might safely follow amid the conflicting opinions either too lax or too strict. During his lifetime the saint was forced to enter several literary disputes on account of his works on moral theology; his chief adversaries were Concina and Patuzzi, both of the Dominican Order, and champions of Probabilism.

The last decades of the eighteenth century may well be called a period of general decadence as far as the sacred sciences, moral theology included, are concerned. The frivolous spirit of the French Encyclopedists had infected, as it were, the whole of Europe. The Revolution, which was its offspring, choked all scientific life. A few words about the state of moral theology during this period may suffice. Italy was torn asunder by the dispute about Rigorism and a milder practice; in France, Rigorism had received the full rights of citizenship through the Jansenistic movement and held its own till late in the nineteenth century; Germany was swayed by a spirit of shallowness and reportorialism. France threatened by the attack of the rationalistic and natural principles. The "general seminaries" which Joseph II established in the Austrian states, engaged professors who did not blush to advance heretical doctrines and to exclude Christian self-restraint from the catalogue of moral obligations. Other German institutions, too, offered their chairs of theology to professors who had imbibed the ideas of "enlightenment", neglected to insist on Catholic doctrines of faith and, putting aside the supernatural life, sought the end and aim of education in a merely natural morality. But in the second half of the nineteenth century the turbulence had spent itself, quiet had again followed the turmoil, the political restoration of Europe had been begun. A restoration also of the ecclesiastical spirit and learning was also inaugurated and the gradual rise of moral theology became noticeable. Apart from the purely ascetical side, there are three divisions in which this new life was plainly visible: catechism, popular instruction, pastoral work.

Though it is the purpose of catechetical teaching to instruct the faithful in the entire range of Christian religion, in the doctrines of faith no less than in those of morals, yet the formation of the faithful may be discussed with respect to the duties and the way by which man is destined to obtain his last end. Hence, the catechetical treatment of religious questions may be regarded as a portion of moral theology. During the period of "enlightenment", this branch had been degraded to a shallow moralizing along natural lines. But that it rose again in the course of the past century to a lucid explanation of the sum-total of the Christian doctrine, is attested by numerous excellent works, both catechisms and extensive discussions. To these may be added the more thorough manuals of Crist"Probabilistic moral theology can pass without ample references to the writings of St. Alphonsus. Hence it would be impossible to gain a clear insight into the present state of moral theology and its development without being more or less conversant with the system of the saint, as narrated in the article Probabilism. The controversy, which is still being waged about Probabilism and Aæquiprobabilism, has no significance unless the latter oversteps the limits set to it by St. Alphonsus and merges into one-sided views. Moreover, though the controversy has not yet been abandoned the theologian and every-day practice it is doubtful if there is any one who follows other rules in deciding doubtful cases than those of Probabilism. This ascendency of the milder school in moral theology over the more rigorists again followed when Alphonsus was canonized and when the Church protected that Divine Providence had raised him up as a bulwark against the errors of Jansenism, and that by his numerous writings he had blazed a more reliable path which the guides of souls might safely follow amid the conflicting opinions either too lax or too strict. During his lifetime the saint was forced to enter several literary disputes on account of his works on moral theology; his chief adversaries were Concina and Patuzzi, both of the Dominican Order, and champions of Probabilism.

The last decades of the eighteenth century may well be called a period of general decadence as far as the sacred sciences, moral theology included, are concerned. The frivolous spirit of the French Encyclopedists had infected, as it were, the whole of Europe. The Revolution, which was its offspring, choked all scientific life. A few words about the state of moral theology during this period may suffice. Italy was torn asunder by the dispute about Rigorism and a milder practice; in France, Rigorism had received the full rights of citizenship through the Jansenistic movement and held its own till late in the nineteenth century; Germany was swayed by a spirit of shallowness and reportorialism. France threatened by the attack of the rationalistic and natural principles. The "general seminaries" which Joseph II established in the Austrian states, engaged professors who did not blush to advance heretical doctrines and to exclude Christian self-restraint from the catalogue of moral obligations. Other German institutions, too, offered their chairs of theology to professors who had imbibed the ideas of "enlightenment", neglected to insist on Catholic doctrines of faith and, putting aside the supernatural life, sought the end and aim of education in a merely natural morality. But in the second half of the nineteenth century the turbulence had spent itself, quiet had again followed the turmoil, the political restoration of Europe had been begun. A restoration also of the ecclesiastical spirit and learning was also inaugurated and the gradual rise of moral theology became noticeable. Apart from the purely ascetical side, there are three divisions in which this new life was plainly visible: catechism, popular instruction, pastoral work.

Though it is the purpose of catechetical teaching to instruct the faithful in the entire range of Christian religion, in the doctrines of faith no less than in those of morals, yet the formation of the faithful may be discussed with respect to the duties and the way by which man is destined to obtain his last end. Hence, the catechetical treatment of religious questions may be regarded as a portion of moral theology. During the period of "enlightenment", this branch had been degraded to a shallow moralizing along natural lines. But that it rose again in the course of the past century to a lucid explanation of the sum-total of the Christian doctrine, is attested by numerous excellent works, both catechisms and extensive discussions. To these may be added the more thorough manuals of Cristo...
vents us from placing these writings in the second of the above-mentioned classes, since their aim is the instruction of yet the the educated laymen. It is true these works belong exclusively, even less than the catechetical, to moral theology, since their subject-matter embraces the whole of the Christian doctrine, yet the morally destructive tendencies of Atheism and the new moral questions brought forward by the conditions of our times, impressed upon writers the importance of moral instruction in manuals of Catholic faith. The last decades in particular prove that this side of theology has been well taken care of. Various questions bearing on Christian morals were extensively treated in monographs, e.g. the social question, the excessive use of money, the Church's doctrine on usury, the woman question, etc. To quote single works or to enter on the different subjects in detail would exceed the limits of this article.

The third line along which we noted an advance was called the pastoral, that is, instruction which has as its special aim the education and aid of pastors and confessors. That this instruction is necessarily, though not exclusively, casuistic, was mentioned above. The scarcity of priests, which was keenly felt in many places, occasioned a lack of time necessitating an instructive and scientifically founded instruction of the candidates for the priesthood. This circumstance explains why scientific manuals of moral theology, for decades, were merely casuistic compendia, containing indeed the gist of scientific investigations, but lacking in scientific argumentation. The correctness of ecclesiastical doctrine had been insured and facilitated by the approbation with which the Church distinguished the works of St. Alphonsus. Hence, many of these compendia are nothing else than recapitulations of St. Alphonsus's "Theologia moralis", or, if following a plan of their own, betray on every page that their authors had at hand St. Alphonsus's "Manual of the Holy Soul". Two notable manuals have since been published on moral theology and which are frequently used even to-day: the Scavini's "Theologia moralis universa", and the shorter "Compendium theologiae moralis" by Jean-Pierre Gury, together with the numerous revisions which appeared in France, Germany, Italy, Spain, and North America.

We must not, however, deceive ourselves by concluding that, owing to the ecclesiastical approbation of St. Alphonsus and his moral writings, moral theology is now settled forever and, so to speak, ex cathedra. Nevertheless, we must see that all individual questions have been solved correctly, and therefore the discussion of certain moral questions remains still open. The Apostolic See itself, or rather the Sacred Penitentiary, when asked, Whether a professor of moral theology may quietly follow and teach the opinion which St. Alphonsus Liguori teaches in his Moral Theology", gave an affirmative answer on 5 July, 1831; it added, however, "but those must not be reprehended who defend other opinions supported by the authority of reliable doctors". He who would conclude the guarantee of absolute correctness from the ecclesiastical approbation of the saints' works, would make the Church contradict herself. St. Thomas of Aquin was at least solemnly approved for the whole field of theology as St. Alphonsus for moral theology. Yet, e.g., on the subject of the efficacy of grace, which enters deeply into morals, St. Alphonsus differed from St. Thomas; St. Alphonsus opposed the view that the result of God's grace is efficacious in all of our free acts; St. Thomas, however, insisted that grace effects the will. The case of Alphonsus's and St. Thomas's views is not an isolated one. The Church teaches that faith is necessary, but it does not determine what the content of faith is. A person might believe in the very existence of God and still do all that is within his power, at least, to the contrary. This is the teaching of St. Thomas. According to St. Alphonsus, however, faith is a complete habit of the will, so that not only the content is known, but the will is bound to believe it. The same might be said of other questions. In our own days, Antonio Ballerini above all made a simple use of this freedom of discussion, first in his annotations to Gury's "Compendium theologiae moralis", which were reissued and edited after his death by Domini- nic Palmieri. It rendered an eminent service to casuistry; for though we cannot approve of everything in it, the careful and thorough treatment of various opinions has been carefully sifted and fully discussed.

Lately, attempts have been made to develop moral theology along other lines. The reformers assert that the casuistical method has choked every other and that it must give place to a more scientific, systematic treatment. It is evident that a more scientific treatment does not come up to the demands of moral theology, and as a matter of fact, during the last decades, the speculative element was more and more insisted on even in works chiefly casuistic. Whether the one or the other element should prevail, it is clear that the current thinking about the subject is that work intends to satisfy. If there is question of a purely scientific explanation of moral theology which does not intend to exceed the limits of speculation, then the casuistical element is without doubt speculative, systematic discussion of the questions belonging to moral theology; casuistry then serves only to illustrate the theoretical explanations. But if there is question of a manual which is intended for the practical needs of a pastor and confessors and their education, then the solid, scientific portion of general moral-theological questions must be supplemented by solid, extensive casuistry. Nay, when time and leisure are wanting to add ample theoretical explanations to an extensive casuistical drill, we should not criticize him who would under these circumstances insist on the latter at the expense of the former; it is the more necessary in actual practice.

III. Pastoral Theology, the science of the care of souls. This article will give the definition of pastoral theology, its relations to other theological sciences, its history, sources, and methods.

A. Definition.—Pastoral theology is a branch of practical theology; it is essentially a practical science. All branches of theology, whether theoretical or practical, pursue in one way or another to make priests "the ministers of the living waters and the servants of God" (I Cor. iv. 1). Pastoral theology presupposes other various branches; accepts the apologetic, dogmatic, exegetical, moral, juridical, ascetical, liturgical, and other conclusions reached by the ecclesiastical student, and scientifically applies these various conclusions to the priestly ministry.

B. Relation to Other Theological Sciences.—Dogmatic theology establishes the Church as the depository of revealed truth and systematizes the deposit of faith which Christ entrusted to His Church to hand down to all generations; pastoral theology teaches the priest his part in this work of Catholic and Christian tradition of revealed truth. Moral theology explains the laws of God and of the Church, the means of grace and hindrances thereto; pastoral theology teaches the practical bearing of these laws, means, and hindrances upon the daily life of the priest, alone and in touch with his people. Canon law collects, correlates, and preserves the moral laws of the Church; pastoral theology applies those laws to the care of souls. In brief, pastoral theology begins where the other theological sciences leave off; takes the results of them all and makes these results effective for the salvation of souls through the ministry of the priesthood established by Christ. It gives life to the laws of the Church;

C. History.—The name pastoral theology is new:
the science is as old as the Church itself, as appears from the manifold instructions given by Jesus to His Apostles for the care of souls (P. 6:1, 9; Lk. 10:17; Acts 1:8). In the pastoral letters of St. Paul and the very detailed instructions they give to Timothy and to Titus in regard to the sacred ministry. The writings of the Fathers, from the Apostolic age onward, are replete with pastoral instruction. St. Ignatius of Antioch (ad Rom., 10, 11) and St. Ignatius of Loyola (Compendio super institutione sacerdotii) gives several homilies concerning this subject—see, for instance, "Ad Magnesiam" (Harnack's ed., Patres apostolici, II, 29). The letters of St. Cyprian (a. d. 248) are of many, them, either wholly or in part written about the care of souls (cf. P. L., IV, 155, sqq.); "Qui Antistes?" ("Ecclesia cliemit!"); "Quid esse petit sacerdotum?" etc. His "De lapsis" (P. L., IV, 477) is a classic among pastoral instructions. St. Gregory Nazianzen (a. d. 389), explaining his flight to Pontus, tells his ideas of the care of souls in "Oratio apologetica de fuga sua," a work sometimes called "De sacerdotio" (P. L., XXXV, 408), and sets down pastoral care as a great science and art, "Ars quaedam artium et scientiae sacerdotii mihi esse videtur hominem regere.

Other landmarks in the history of pastoral theology are St. Ambrose, "De officiis ministrorum" (P. L., X, 143); St. John Chrysostom, "De catechumenis" (P. G., XLVII, 623); St. Isidore of Seville, "De institutione clericorum"; "De institutionibus monachorum"; "De regulis clericorum" (P. L., LXXXIV, 25, 45, 77); St. Bernard's letters and treatises "De consideratione," "De moribus episcoporum," "De conversione ad clericis" (P. L., CLXXII, 727, 802, 855). The great classic among pastoral works on the care of souls is "Regula pastoralis liber" (P. L., LXXVII, 13), written by St. Gregory the Great (a. d. 590) to John, Bishop of Ravenna.

During the Middle Ages, there was not yet a separated and systematized science of pastoral theology. Scholasticism did not recognize this science apart from other branches of theology. Dogmas and moral were so taught as to include the application of their conclusions to the care of souls. Still, even then writings of the great Doctors of the Church were at times purely pastoral; such were the "Opusculum," 17-20, of St. Thomas Aquinas; "St. Bonaventura; "De sacris ministriis," "De ordinibus," "De regimine animarum," "Confessionale;" the "Summa theologica" (Books II, III), together with the "Summa confessionalis" of St. Antoninus, Bishop of Florence. At the same time, writers on mystical theology (see V. MYSTICAL THEOLOGY) have often referred to the doctrine of the Church. Not until the period of the Counter-Reformation did the science of pastoral theology take its present systematized form. During the latter half of the fifteenth century, in certain places, pastoral duties were very much neglected. By the dawn of the sixteenth century, the care of souls was in the hands of a few priests and not a few bishops a lost or a never-acquired art, with the result that the laity were ready to throw off what was deemed to be a useless clerical yoke. In such places, a reform of the clergy, if it was necessary. The Council of Trent itself to bring about a true reformation of the priesthood. Catholic bishops and theologians followed the lead of the council. The result was the treatment of the care of souls as a science by itself. During the following centuries of true reform and battle with false reform, the most scientific treatises on pastoral duties and rights were written. John of Aiciniana, "De concordia et controversiis, etc." (Institutiones praeceptum, Neumayr (Virt apostolicus), Possessin (Praxis cura), Segneri, Olier, Molins, Toledo (De instructione sacerdotum), Cardinal Cajetan, St. Charles Borromeo (Instructio pastoralis), the works of St. Francis de Sales, of Serafino of Ligouri, of St. Zeno of Trastevere (De Sacramentis et sacris officiis), Pius IX, "Il Monitore Ecclesiastico," the "Bollettino della Congregazione per la Propaganda Fide" (Rome, 1893, 1907). A handy reference work in this matter is Ferraris, "Prompta bibliotheca," together with its supplement edited by Buecheroni (Rome, 1885). Ojetti, "Synopsia rerum moralium et juris pontificii," (Prato, 1904), is also used. For the study of the pastoral laws and practices and their application, necessary information may be obtained from Law, "De religiosis et missarionis supplementa et monumenta," together with the periodical supplements thereto (Bruges, 1904—), and Dom Basile, "Constitution de Leon XIII sur les institutio pour l' "Anacta eclesiastica," (Rome, 1893-1911); "Il Monitore Ecclesiastico," (Rome, 1876); "The American Ecclesiastical Review," (Philadelphia, 1889); "The Irish Ecclesiastical Record" (Dublin, 1865); "La Nouvelle Revue Théologique," (Travaini, 1887); "Zeitschrift für katholische Theologie" (Innsbruck, 1877).

E. Contents. From the days when St. Gregory the Great wrote his classic "Regula pastoralis liber," the duties that make for the care of souls have been conveniently divided into the functions of the minister of the sacred mysteries, and of the
Theology: Ascetical Theology

As a branch of theology, ascetics may be briefly defined as the scientific exposition of Christian asceticism. Asceticism (from the Greek “askew” in Latin as “ascetica”), taken in its literal signification, means a polishing, a smoothing or refining. The Greeks used the word to designate the exercises of the athletes, whereby the powers dormant in the body were developed and the body itself was trained to its full natural beauty. The end for which this training, which was undertaken was the laurel-wreath bestowed on the victor in the public games. Now the life of the Christian is, as Christ assures us, a struggle for the kingdom of heaven (Matt., xii, 12). To give his readers an object-lesson of this spiritual battle and moral endurance, Paul, who had been trained in the Greek fashion, uses the picture of the Greek pentathlon (I Cor., ix, 24). The exercises to be assumed in this combat tend to develop and strengthen the moral stamina, while their aim is Christian perfection leading up to man’s ultimate end, union with God. The human nature having been weakened by original sin and ever inclining toward what is evil, this end cannot be reached except at the price of overcoming, with God’s grace, many and serious obstacles. The moral struggle then consists first of all in attacking and removing the obstacles, that is the evil concupiscences (concupiscence of the flesh, concupiscence of the eyes, and pride of life), which effects of original sin serve to try and test man (Trid., Sess. V, De peccato originali). This first duty is called by the Apostle Paul the putting off of “the old man” (Eph., iv, 22). The second duty, in the words of the same Apostle, is to “put on” the “new man,” according to the image of God (Eph., iv, 24). The new man is Christ. It is our duty then to strive to become like unto Christ, seeing that He is “the way, and the truth, and the life” (John, xiv, 6), but this endeavour is based on the supernatural order and, therefore, cannot be accomplished without Divine grace. Its foundation is that wherein we are adopted as sons of God through the imparting of sanctifying grace. Thenceforth, it must be perfected by the supernatural virtues, the gifts of the Holy Ghost, and actual grace. Since, then, ascetics is the systematic treatise of the striving after Christian perfection, it may be defined as the scientific exposition of the acquired perfections that consists in expressing within ourselves, with the help of Divine grace, the image of Christ, by practising the Christian virtues, and applying the means given for overcoming the obstacles. Let us subject the various elements of this definition to a closer examination.

A. Nature of Christian Perfection.—(1) To begin with, we must reject the false conception of the Protestants who fancy that Christian perfection, as understood by Catholics, is essentially negative asceticism (cf. Seberg in Herzog-Hauck, “Realencyclopaedie fur Prot. Theologie”, III, 120), and that the double notion of asceticism by the Protestant Reformers. There can be no doubt as to the Catholic position, if we but hearken to the clear voices of St. Thomas and St. Bonaventure. For these masters of Catholic theology, who never tired of repeating that the ideal of asceticism upheld by them was the ideal of the Catholic past, of the Fathers, of Christ Himself,
emphatically state that bodily asceticism has not an absolute but only a relative value. St. Thomas calls it a "means to an end", to be used with discretion. St. Bonaventure says that bodily austerities "prepare, foster, and preserve perfection" (ad perfectionem preparans et ipsam promovens et conservans; "Apolog. pauperum", V, c. viii). In proof of his thesis, he shows that to put an absolute value on bodily asceticism would lead to Manichaeism. He also points to Christ, the ideal of Christian perfection, who was less austere in fasting than John the Baptist, and to the founders of religious orders, who prescribed fewer ascetic exercises for their communities than they themselves practised (cf. J. Zahn, "Völkermoral", p. 126 sqq.). On the other hand, Catholics do not deny the importance of ascetic practices for acquiring Christian perfection. Considering the actual condition of human nature, they declare these necessary for the removal of obstacles and for the liberation of man's moral forces, thus claiming for asceticism a positive character. A like value is put upon those exercises which restrain and guide the powers of the soul. Consequently, Catholics actually fulfil and always have fulfilled what Harnack sets down as a demand of the Gospel and what he pretends to have ignored: man’sGoods and he may, to yield to the battle against mammon, care, and selfishness, and practise that charity which loves to serve and to sacrifice itself" (Harnack, "Essence of Christianity"). The Catholic ideal, then, is by no means confined to the negative element of asceticism, but is of a positive nature.

(2) The essence of Christian perfection is love. St. Thomas (Opusc. de perfectione christ., c. ii) calls that perfect which is conformable to its end (quod attingit ad finem suum). Now, the end of man is God, and what unites him, even on earth, most closely with God is love (cf. Prov., xx., 17; Col., iii., 14), the other virtues being subservient to love or are its natural prerequisites, as faith and hope. Love seizes man's whole soul (intellect, will), sanctifies it, and fuses new life into it. Love lives in all things and all things live in love and through love. Love imparts to all things the measure and character of love, thus giving to the last end. "Love is thus the principle of unity, no matter how diversified are the particular states, vocations, and labours. There are many provinces, but they constitute one realm. The organs are many, but the organism is one" (Zahn, i., c. 146). Love has, therefore, the outside the call of the conscience and of the operation (Col., iii., 14) and the fulfilment of the law (Rom., iii., 8). That Christian perfection consists in love has ever been the teaching of Catholic ascetical writers. A few testimonies may suffice. Writing to the Corinthians, Clement of Rome says (Ep. I Cor., xlix., 1): "It was love that made all the elect perfect; without love nothing is acceptable to God" (ex tā ἀγάπη ἐγείροντας πάρει ἐκεῖνος τοῦ θεοῦ, δύο αὐτή ἀναπόθεσαν ἐκείνος τῷ θεῷ; Funk, "Patr. apost.", p. 163). The "Epistle of Barnabas" insists that the way of light is "the love of him who created us" (ἐγὼ ἐλέησέν με σύ, θεό; Funk, i., c. 91), a love of our neighbour which does not even spare our own life (δύναται τῷ πρόσκοποι σου οὐκ ἐκεῖνος τὸν Υἱόν σου, and it affirms that perfection is nothing else than "love and joy over the good works which testify to justice" (ἀγάπη ἑρμηνευμένη καὶ ἀναλλοίωτα θείω δικαίωσις μαρτυρία). St. Ignatius never inquires in his letters whether the party are living in the light and not in the way, being the end and aim of faith ("Ad Ephes., ix, xiv; "Ad Philad.", ix; "Ad Smyrn., vii.). According to the "Didache", love of one's neighbour is the beginning of the "way of life" (c. i), and in the "Epistle to Diognetus" active love is called the fruit of belief in Christ. The "Pastor" of Hermas acknowledges the same idea when he sets down "a life for God" (μικρὸς ὁ λόγος) as the sum-total of human existence. To the Apostolic Fathers may be added St. Ambrose (De fuga sanctorum, c. 12, 35-36) and St. Augustine, who regards perfect justice as tantamount to perfect love. Both St. Thomas and St. Bonaventure speak the same language, and their authority is so overpowering that the ascetical writers of all subsequent centuries have faithfully followed in their footsteps (cf. Luth., "Die Kirchl. Lehre von den evang. Räten", Paderborn, 1907, pp. 26-99).

However, though perfection is essentially love, it is not true that any degree of love is sufficient to constitute moral perfection. The ethical perfection of the Christian consists in the perfection of love, which requires such a dimension in "mortisom" (Rom., viii., 29), and ease even though many obstacles obstruct our path" (Muts, "Christl. Ascetik", 3rd ed., Paderborn, 1909). But this disposition of the soul supposes that the passions have been subdued; for it is the result of a laborious struggle, in which the moral virtues, steeled by love, force back and quell the evil inclinations and habits, supplanting them by good inclinations and habits. Only then has it really become "a man's second nature, as it were, to prove his love of God at certain times and under certain circumstances, to practise virtue, and, as far as human nature is concerned, to bear against the slightest taints" (Muts, i., c. p. 43). Owing to the weakness of human nature and the presence of the evil concupiscence (James peccati: Trid., xx, 6 can. xxiii), a perfection that would exclude every defect cannot be attained in this life without a special privilege (cf. Prov., xx, 9; Eccles., viii; 21; James, iii., 2). Likewise, perfection, on this side of the grave, will never reach such a degree that further growth is impossible, as is clear from the mind of the Church and the nature of our present existence (status vici); in other words, our perfection will always be relative. As St. Bernard says: "An unflagging zeal for advancing and a continual struggle for perfection is itself perfection" (Inde fessus proficiendi studium et iugis conatus ad perfectionem, perfecto reputatur; "Ep. ec. ad Abbatem Guarium"). Since perfection consists in love, it is not the privilege of one particular state, but may be attained by them as a first step, attained in every state of life (cf. Perfection, Christian and Religious). Consequently it would be wrong to identify perfection with the so-called state of perfection and the observance of the Evangelical counsels. And as St. Thomas rightly observes, there are perfect people outside the call of the conscience and of the organism, and perfection may be attained in the men within them (Summa theol., ii., 11, Q. cxxxiv, a. 4). True it is that the conditions for realizing the idea of a Christian life are, generally speaking, more favourable in the religious state than in the secular avocations. But not all are called to the religious life, nor would all find in it their contentment (cf. Counsels, Evangelical). To sum up, the end is the same, the means are different. This sufficiently answers Harnack's objection (Essence of Christianity) that the Church considers the perfect imitation of Christ possible only for the monks, while she accounts the life of a Christian in the world as barely sufficient for the attainment of the last end.

(3) The ideal, to which the Christian should conform and towards which he should strive with all his powers both natural and supernatural, is Jesus Christ. His justice should be our justice. Our whole perfection would be so perfect if we imitated the Christians in the full sense of the word ("until Christ be formed in you"); Gal., iv., 19). That Christ is the supreme model and pattern of the Christian life is proved from Scripture, as e.g. from John, xiii. 15, and Peter, i., 21, where imitation of Christ is directly recommended, and from Eph., iii., 19, where the
Theology 615

Apostle extols the excellent knowledge of Jesus Christ, for whom he has suffered the loss of all things, count- ing them but as dung, that he may gain Christ. Of the numerous testimonies of the Fathers we only quote that of St. Augustine, who says: "Finis ergo noster perfectio nostra esse debet; perfectio nostra Christus" (P. L., XXXVI, 628; cf. also "In Psalm., 26." 10:1). Ignatius: the Church, with its purity, shadow nothing one-sided. His Divinity guarantees the purity of the model; His humanity, by which He became similar to us, makes the model attractive. But this picture of Christ, unmarred by addition or omission, is to be found only in the Catholic Church and in no other faith, just as there is none other there in its ideal state. For the same reason, the Church alone can give us the guarantee that the ideal of the Christian life will always remain pure and unadulterated, and will not be identified with one particular state or with a subordinate virtue (cf. Zahn, L. c., p. 124). An unprejudiced examination proves that the ideal of Catholic life has been preserved in all its purity through the centuries and that the Church has never failed to correct the false touches with which individuals might have sought to disfigure its unblemished beauty. The individual features and the fresh colors for outlining the living picture of Christ are to be found in the source of Revelation and the doctrinal decisions of the Church. These tell us about the internal sanctity of Christ (John, i, 14; Col., ii, 9; Heb., i, 9; etc.). His life overflowing with grace, of whose fulness we have all received (John, i, 16). His life of prayer (Mark, i, 35; iii, i; Luke, v, 16; vi, 12; ix, 18; etc.). His decision to be our heavenly Father (Matt., xi, 26; John, iv, 34; v, 30; vii, 26, 29). His intercourse with men (Matt., iv, 10; cf. I Cor., ix, 22). His spirit of unselfishness and sacrifice, His patience and meekness, and, finally, His asceticism as revealed in his fastings (Matt., iv, 2; vi, 17)." 

B. Dangers of the Ascetic Life.—The second task of ascetical theology is to point out the dangers which may frustrate the attainment of Christian perfection and to indicate the means by which they can be avoided successfully. The first danger to be noticed is evil concupiscence. A second danger lies in the allurements of the visible creation, which occupy man's heart to the exclusion of the highest good; to the same class belong the enticements of the sinful, corrupt world (1 John, v, 19), that is, those men who promulgate vicious and ungodly doctrines and thereby dim or deny man's sublime destiny, or who are furnishing their own tempers and by their example give a false tendency to man's sensuality. Thirdly, ascetics acquaint us not only with the malice of the devil, lest we should fall a prey to his cunning wiles, but also with his weakness, lest we should lose heart. Finally, not satisfied with indicating the general means to be used for waging a victorious combat, ascetics offer us particular remedies for special temptations (cf. Muth, "Ascetik," 2nd ed., p. 107 sqq.).

C. Means for Realizing the Christian Ideal.—(1) Prayer, above all, in its stricter meaning, is a means of attaining perfection; special devotions approved by the Church and the sacramental means of sanctification have a special reference to the striving after perfection (frequent confession and communion). Ascetics prove the necessity of prayer (2 Cor., iii, 5) and teach the mode of praying with spiritual purpose, justifying the art of meditating according to the various methods of St. Peter of Alcantara, of St. Ignatius, and other saints, especially the "tres modi ordinati" of St. Ignatius. An important place is assigned to the examination of conscience, and justly so, because ascetics warn against neglect or poor performance. Without this regular practice, a thorough purification of the soul and progress in spiritual life are out of the question. It centres the searchlight of the interior vision on every single action: all sins, whether committed with full consciousness or only half voluntarily, even the negligences which, though not sinful, lessen the perfection of the act, all are carefully scrutinized (peccata, omissiones, negligentia; cf. "Exercitia spiritualia," of St. Ignatius). The other ascetics distinguishes a twofold examination of conscience: one general (examen generale), the other special (examen particularare), giving at the same time directions how both kinds may be made profitable by means of certain practical and psychological aids.

Ascetics encourage the Blessed Sacrament (visitation eucharistica), a practice meant especially to nourish and strengthen the divine virtues of faith, hope, and charity. It also inculcates the veneration of the saints, whose virtuous lives should spur us on to imitation. It is plain that imitation cannot mean an exact copying. What ascetics propose as the imitation of its natural matur is the removal or at least the lessening of the contrary excesses in our own lives and the lives of the saints, the perfecting, as far as is possible, of our virtues, with due regard to our personal disposition and the surrounding circumstances of time and place. On the other hand, the observation that some saints are more to be admired than imitated must not lead us, by the mistake of letting our works be weighted with the ballast of human comfort and ease, so that we at last look with suspicion on every heroic act, as though it were something that transcended our own energy and could not be reconciled with the present circumstances. Such a supposition must be forbidden if the heroic act could not at all be made to harmonize with the preceding development of our interior life. Christian ascetics must not overlook the Blessed Mother of God; for she is, after Christ, our most sublime ideal. No one has received grace in such fulness, no one has cooperated with grace so faithfully as she. It is for this reason that the Church praises her as the Mirror of Justice (speculum justitiae). The mere thought of her transcendent purity suffices to repel the alluring charms of sin and to inspire pleasure in the wonderful lustre of virtue.

(2) Self-Denial. Ascetics teaches us (cf. Matt., xvi, 24-25). Without it the combat between spirit and flesh, which are contrary to each other (Rom., vii, 23; I Cor., ix, 27; Gal., v, 17), will not lead to the victory of the spirit (Imitatio Christi, I, xxv). How far self-denial should extend depends on the actual condition of human nature after the fall of Adam. The inclination to sin dominates both the will and the lower appetites; not only the intellect, but also the outer and the inner senses are made subservient to this evil propensity. Hence, self-denial and self-control must extend to all these faculties. Ascetics reduces self-denial to exterior and interior mortification: exterior mortification is the mortification of sensuality and the senses; interior mortification consists in the purification of the faculties of the soul (memory, imagination, intellect, will) and the mastering of the passions. However, ascetics distinguish between "mortes" taken in the sense of the stunting of the "strong, full, healthy" (Schell) life; what it aims at is that the sensual passions do not gain the upper hand over the will. It is precisely through taming the passions by means of mortification and self-denial that life and energy are strengthened and freed from the faults which, while the masters of asceticism recognize the necessity of mortification and self-denial and are far from
THEOLOGY 616

deeming it “criminal to assume voluntary sufferings” (Seeberg), they are just as far from advocating the so-called “non-sensual” tendency, which, looking upon the body and its life as a necessary evil, proposes to avert its noxious effects by willful weakening or even mutilation (cf. Schneider, *Göttliche Weltordnung*, 237, in *Sitzth. d. k. Akad. d. Wiss. Berlin* 1900, p. 537). On the other hand, Catholics will never befriend the gospel of “healthy sensuality”, which is only a pretty-sounding title, invented to cloak unrestricted concupiscence.

Special attention is devoted to the mastering of the passions, because it is with them above all else that one is to be safeguarded most endlessly. Scholastic philosophy enumerates the following passions: love, hatred, desire, horror, joy, sadness, hope, despair, boldness, fear, anger. Starting from the Christian idea that the passions (*passiones*, as understood by St. Thomas) are inherent in human nature, ascetics affirm that they are neither sicknesses, as the Stoics, the Reformers, and Kant maintain, nor yet harmless, as was asserted by the Humanists and Rousseau, who denied original sin. On the contrary, it insists that in themselves they are indifferent, that they may be employed for good and for evil. As they need not be employed only by the use to which the will puts them. It is the purpose of ascetics to point out the ways and means by which these passions can be tamed and mastered, so that, instead of goading the will to sin, they are rather turned into welcome allies for the accomplishment of good. And since the passions are inordinate in as far as they turn to illicit things or exceed the necessary bounds in those things which are licit, ascetics teach us how to render them innocuous by averting or restraining them, or by turning them to loftier purposes.

The will, is subordinated to the striving after perfection. Untiring labour runs counter to our corrupt nature, which loves ease and comfort. Hence labour, if well-ordered, persistent, and purposeful, implies self-denial. This is the reason why the Catholic Church has always looked upon labour, both manual and mental, as an ascetic means of no small value (cf. Cassian, “De inst. carp.,” X, 24; St. Benedict, Rule, xlviii, ii; Basil, “Reg. fusius tract.” c. xxxvii, 1-3; “Reg. brevius tract.” c. lxii; Origen, *Contra Celsum*, I, 28). St. Basil is even of the opinion that piety and avoidance of labour are inseparable from the Christian ideal of life (ibid., p. 386). Hence the *Die Ethik des hl. Augustinus*, 1909, p. 264).

(4) Suffering, too, is an integral constituent of the Christian ideal and pertains consequently to ascetics. But its real value appears only when seen in the light of faith, which teaches us that suffering makes us like unto Christ, we being the members of the mystic body of which He is the head (I Peter, ii, 21), that suffering is the channel of grace which heals (*sanat*), preserves (*conservat*), and tests (*probat*). Finally, ascetics teach us how to turn sufferings into channels of heavenly grace.

They are subjected to a thorough discussion. As is proved in dogmatic theology, our soul receives in justification supernatural habits, not only the three Divine, but also the moral virtues (Trid., *Sess. VI, De justifi.*, c. vii; Cat. Rom., p. 2, c. 2, n. 51). These supernatural powers (virtues infausa) are in the natural faculties, the moral virtues (virtues acquirsa) constituting with them one principle of action. It is the task of ascetics to show how the virtues, taking into account the obstacles and means mentioned, can be reduced to practice in the actual life of the Christian, so that the perfect man is the image of Christ in a perfect state in us. Conformable to the Brief of Leo XIII, “Testem benevolentiam” of 22 Jan., 1899, ascetics insist that the so-called “passive” virtues (meekness, humility, obedience, patience) must never be set aside in favour of the “active” virtues (devotion to duty, scientific activity, social and civilizing labour); for this would be tantamount to denying that Christ is the perpetual model. Rather, both kinds must be harmoniously joined in the life of the Christian. The imitation of Christ is never a mere act, nor does it blunt the initiative in any field of human endeavour. On the contrary, the practice of the passive virtues is a support and aid to true activity. Besides, it not rarely happens that the passive virtues reveal a higher degree of moral energy than the active. The Brief itself refers us to Matt. xx, 28; Rom. v, 24; Phil., ii, 8; Heb., xiii, 8 (cf. also Zahn, l. c., 166 sqq.).

D. Application of the Means in the Three Degrees of Christian Perfection.—Imitation of Christ is the duty of all who strive after perfection. It lies in the very nature of this formation after the image of Christ that the process is gradual and must follow the laws of moral energy; for moral perfection is the terminus of a laborious journey, the crown of a hard-fought battle. Ascentes divides those who strive after perfection into three groups: the beginners, who have just advanced; the perfectionists, who have passed down three stages or ways of Christian perfection: the purgative way, the illuminative way, the unitive way. The means stated above are applied with more or less diversity according to the stage which the Christian has reached. In the purgative way, when the appetites and inordinate passions still possess considerable strength, mortification and self-denial are to be practiced more extensively. For the seeds of the spiritual life will not sprout unless the tares and thistles have first been weeded out. In the illuminative way, when the mists of passion have been lifted to a certain extent, the practice of virtues in imitation of Christ are to be insisted on. During the last stage, the unitive way, the soul must be confirmed and perfected in conformity with God’s will (“And I live, now not I; but Christ liveth in me”: Gal., ii, 20). Care must, however, be taken not to mistake these three stages for wholly separate portions of the striving after virtue and perfection. Even in the second and the third stages there occur at times violent struggles, while the joy of being united with God may sometimes be granted in the initial stage as an inducement to further advance (cf. Muts, “Aszetik,” 2nd ed., 94 sqq.).

E. Relation of Ascentes to Moral Theology and Mysticism.—All these disciplines are concerned with the Christian life and its last end in the next world; but they differ, though not totally, in their mode of treatment. Asceetical theology, which has been separated from moral theology and mysticism, has for its subject-matter the striving after Christian perfection; it shows how Christian perfection may be attained by earnestly exercising and schooling the will, using the specified means both to avoid the dangers and allurements and sinning with greater intensity. Moral theology, on the other hand, is the doctrine of the duties, and in discussing the virtues is satisfied with a scientific exposition. Mysticism treats essentially of “union with God” and of the extraordinary, so-called mystic prayer. Although also those phenomena, such as ecstasy, vision, revelation, fall within its scope, yet they are by no means essential to the mystical life (cf. Zahn, “Einführung in die christl. Mystik”, Paderborn, 1908). It is true that mysticism includes also matter of ascetics, such as the endeavour of purification, vocal prayer, etc.; but this is done because these great extats, meditated upon as preparatory to the mystical life and must not be discarded even in its highest stage. Nevertheless, the
mystical life is not merely a higher degree of the ascetic life, but differs from it essentially, the mystical life being a special grace granted to the Christian without the least conception of an external part.

F. Historical Development of Asceticism.

(1) Holy Writ abounds in practical instructions for the life of Christian perfection. Christ himself has drawn its outlines both as to its negative and positive requirements. His imitation is the supreme law (John, vii, 12; xii, 26), charity the first commandment (Matt., xxii, 36-38; John, xv, 17); the right intention is which that imparts value to the exterior works (Matt., v-vii), while self-denial and the carrying of the cross are the conditions for His discipleship (Matt., ii, 38; xvi, 24; Mark, vii, 24; Luke, ix, 23; Gal., vi, 3-4; Heb., x, 36); and His exhortations (Matt., xvi, 30; Mark, ix, 28) Christ recommended fasting. He inculcated sobriety, watchfulness, and prayer (Matt., xxiv, 42; xxv, 13; xxvi, 41; Mark, xiii, 37; xiv, 37). He pointed to poverty as a means of gaining the kingdom of heaven (Matt., vi, 19; xii, 22; Luke, vi, 20; viii, 14; xii, 33; etc.) and counselled the rich youth to relinquish everything and to follow Him (Matt., xix, 21). That this was a counsel and not a strict command, given in view of the particular attachment of the youth to the things of this world, is shown by the very fact that Christ had twice spoken of the eternal "destinements", and that he recommended the renunciation of all earthly goods only on the renewed inquiry after the means that lead to perfection (cf. Lutz, l.c., against the Protostaus Th. Zahn, Bern, Weiss, Lemme, and others). Celibacy for God's sake was praised by Christ as worthy of a special heavenly reward (Matt., xix, 12). Yet marriage is not condemned, but the words, "All men take not this word, but they to whom it is given", imply that it is the ordinary state, celibacy for God's sake being merely a counsel. Indirectly, Christ also commended voluntary obedience as a means for attaining the most intimate union with God (Matt., xviii, 4; xx, 22, 25). What Christ had outlined in his teachings the Apostles continued to develop. It is especially in St. Paul that we find the two elements of Christian asceticism brought out in well-defined terms: mortification of the flesh and imitation of Christ. In Rom., vi, 13; II Cor., iv, 16; Gal., v, 24; Col., iii, 5, union with God in all our thoughts, words, and deeds (I Cor., x. 31; Gal., vi, 14; Col., iii, 13-17), and active love of God and our neighbour (Rom., viii, 35; I Cor., xiii, 3) as the positive element.

(2) The Father and Doctors of the Church explained particular features of the Christian life in a more coherent and detailed manner. The Apostolic Fathers called the love of God and man the sun of Christian life, which, animating all virtues with its vital rays, inspires content of the world, beneficence, immaculate purity, and self-sacrifice. The Didache, as a manual for catechumens, thus describes the way of life: "First, thou shalt love God, who created thee; secondly, thou shalt love thy neighbour as thyself; whatever thou wishest that should not be done to thee, do not to others." Similarly, "The Epistle of Barnabas," written at the end of the second century, represents the Christian life under the figure of the two ways, of light and that of darkness. Two Epistles, which purport to contain the works of St. Ignatius of Antioch, must have been written in the third century, exalt the life of virginity, if grounded on the love of God and accompanied by the corresponding works, as heavenly, divine, and angelic. We also mention St. Ignatius of Antioch, of whose letters St. Polycarp says that they contain "faith and patience and all edification in the Lord", and the "Pastor" of Hermas, who in the twelve commandments inculcates simplicity, truthfulness, chastity, meekness, patience, continence, confidence in God, and perpetual struggle against sin and the worst conceits. The first treatises on Christian asceticism begin to show a more scientific character. In the writings of Clement of Alexandria and Gregory the Great ("Moral., XXXIII," c. xxvii; cf. also Cassian, "Coll., IX, XV") there may be observed traces of the threefold degree which was afterwards systematically developed by Dionysius the Areopagite. In his "Stromata," Clement sets forth the full beauty and grandeur of "true philosophy". It is particularly remarkable that this author delineates, even in its details, what is now known as ethical culture, and that he endeavours to harmonize his exposition with the teachings of the Lord. The life of the Christian is to be ruled in all things by temperance. Following out this idea, he discusses in a casuistic form food and drink, dress and love of finery, bodily exercises and social conduct. Beginning with the fourth century, a twofold line of thought is discernible in the works on Christian life: one speculative, laying stress on the union of the soul with God, the Absolute Truth and Goodness; the other practical, aiming principally at instruction in the practice of the Christian virtues. The speculative element prevailed in the mystical school, which owes its systematization to Pseudo-Dionysius and which reached its highest perfection in the fourteenth century. The practical element was emphasized in the ascetical school with St. Augustine as its chief representative, in whose footsteps followed Gregory the Great and St. Bernard.

It may suffice to detail the principal points on which the writers prior to the medieval-scholastic period dwelt in their instructions. On prayer we have the works of Macarius the Egyptian (d. 385) and of Tertullian (d. 220), who supplemented his treatise on prayer in general by an explanation of the Lord's Prayer. To these two must be added Cyprian of Carthage (d. 258), who wrote "De oratione dominica", and St. Chrysostom (d. 407). Penance and the spirit of penance were treated by Tertullian (De poenitentia), Chrysostom ("De compunctione cordis", De poenitentia"), and Cyril of Jerusalem (De poenitentia, De negatione corruptionis) in his "Catechesis". That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone christianino" and in his "Confessions". Chastity and virginity were treated by Methodius of Olympus (d. 311) in his "Convivium", a work in which the ten virgins of the parable are given absolutely equal instruction. That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone christianino" and in his "Confessions". Chastity and virginity were treated by Methodius of Olympus (d. 311) in his "Convivium", a work in which the ten virgins of the parable are given absolutely equal instruction. That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone christianino" and in his "Confessions". Chastity and virginity were treated by Methodius of Olympus (d. 311) in his "Convivium", a work in which the ten virgins of the parable are given absolutely equal instruction. That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone christianino" and in his "Confessions". Chastity and virginity were treated by Methodius of Olympus (d. 311) in his "Convivium", a work in which the ten virgins of the parable are given absolutely equal instruction. That the life of the Christian is a warfare is amply illustrated in St. Augustine's (d. 430) "De agone thousand and eight years, the Church has regarded the moral superiority of Christianity over the ethical tenets of pagan philosophy. The same subject is discussed by the following Fathers: Cyprian (d. 258); Gregory of Nyssa (d. 394) in his "De virginitate"; Ambrose (d. 397), the indefatigable eulogist and champion of the virgin life; Jerome in his "Adversus Helvidium de virginitate" and "Ad Eustachium"; Chrysostom (d. 407) in his "De virginitate", who, though extolling virginity as a heavenly life, yet recommends it only as a counsel; Augustine in his works "De continenti", "De virginitate", "De bono virginitatis".

On patience we have the works of Cyprian, Augustine, and Tertullian's "De patientia", in which he speaks of this virtue as an invalid might speak of health to console himself. Chrysostom's "De jejunio et eiecmosyna" discusses fasting. Almsgiving and the "De opere monachorum" by St. Augustine. Nor are treatises on the different states of life wanting. Thus St. Augustine's "De bono conjugal" treats of the married state; his "De bono viduieta" of widows. A frequent subject was the priesthood. Gregory of
Nasianus, in his "De fuga," treats of the dignity and responsibility of the priesthood; Chrysostom's "De incertitudine animae," a testament to the uncertainty of the human soul, with surpassing excellence; St. Ambrose in his "De officiis," while speaking of the four cardinal virtues, admonishes the clerics that their lives should be an illustrous example; St. Jerome's "Epistolae ad Nepotianum" discusses the dangers to which priests are exposed; finally, the "Regula pastoralis" of Gregory the Great inculcates the prudence indispensable to the pastor in his dealings with different classes of men. Of prime importance for the monastic life was the "De institutis cornubiorum" of Cassian. But the standard work from the eighth to the thirteenth centuries was the Rule of St. Benedict, which found numerous commentators. Of the saint or rather his Rule St. Bernard says: "Ipse dux noster, ipse magister et legifer noster est." (Serm. in Nat. S. Benedict., n. 2). Illustrations of the practice of Christian virtues in general were the "Expositio in beatam Job" of Gregory the Great and the "Collationes Patrum" of Cassian, in which the various elements of Christian perfection were discussed in the form of dialogues.

(3) The Medieval-Scholastic Period.—The transition period up to the twelfth century exhibits no specially noteworthy advances in ascetical literature. To the endeavour to gather and preserve the teachings of the Fathers we owe Alcuin's "De virtutibus et vitiiis." But when in the twelfth century speculative theology was celebrating its triumphs, mystical and ascetical theology, too, showed a healthy activity. The results of the former could not but benefit the latter by placing Christian morality on a scientific basis and throwing ascetical theology itself into a scientific form. The pioneers in this field were St. Bernard (d. 1155) and Hugh and Richard of St. Victor. St. Bernard, the greatest mystic theologian of the twelfth century, and behind a private correspondence among ascetical writers, so that Harnack calls him the "religious genius" of the twelfth century. The basic idea of his works, especially prominent in his treatise "De gratia et libero arbitrio," is that the life of the Christian should be a copy of the life of Jesus. Like Clement of Alexandria, he, too, lays down precepts for the regulation of the necessities of life, as food and dress, and for the implanting of God's love in man's heart, which would sanctify all things ("Apologia," "De praecepto et dispensatione"). Many are the steps by which love ascends to perfection; the love for God's sake. Among his ascetical writings are: "Liber de dilectione Deo," "Tractatus de gradibus humilitatis et superbiae," "De moribus et officio episcoporum," "Sermo de conversione ad clericos," "Liber de consideratione.

Frequent allusions to St. Augustine and Gregory the Great are scattered through the pages of Hugh of St. Victor (d. 1141), so much so that he earned the distinction of being called a second Augustine by his contemporaries. He was undoubtedly the first to give to ascetical theology a more or less definite, ascetical character. The essence of his works is love. But what he aimed at above all in his writings was to lay bare the psychological bearings of mystical and ascetical theology. Noteworthy are his works: "De vanitate mundi," "De laude caritatis," "De modo orandi," "De meditazione." His pupil, Richard of St. Victor (d. 1179), though more ingenious, has yet the same utility, except in his work "De exterminatione malit et promotione boni." The great theologians of the thirteenth century, who were no less famous for their scholastic "Summe" than for their ascetical and mystical writings, brought ascetical teaching to its perfection and gave it the determinant shape that has retained as a standard for all future times. No other epoch furnishes such convincing proof that true science and true piety are rather a help than a hindrance to each other. Such a pure, apostolic teacher of the great Thomas, who was the first to join Aristotelian philosophy with theology and to make philosophy the handmaid of theology, was at the same time the author of excellent works on ascetics and mysticism, as, e. g., "De adhocracy," the riposte against the mystic germinans, and "Paradisi animae," which was conceived along practical lines. To St. Thomas we owe the ascetic work "De perfectione vitae spirituali"; in it he explains the essence of Christian perfection so lucidly that his line of argumentation may even in our days be a model. All his other works, too, contain ample material of value both for ascetics and for mysticism.

The Seraphic Doctor, St. Bonaventure, "treats of mystical theology", to use the words of Leo XIII, "in a manner so perfect that the unanimous opinion of the most expert theologians regards him as the prince of mystic theologians." Of his authentic works the following deserve to be mentioned: "De perfectione evangeli," "Collationes de septem donis Spiritus sancti," "Incendium amoris," "Sollioquium," "Lignum vitae," "De praeparatione ad Misseam," "Apologia," "Laudos et psalmodiae." From the pen of David of Augsburg, a contemporary of St. Bonaventure, we possess an ascetic instruction for novices in his book entitled "De exterioris et interioris hominis compositione." He leads the reader along the three well-known ways, purgative, illuminative, and unitive, purposing to make the reader a spiritual man. By severely disciplining the faculties of the soul and subordinating the flesh to the spirit, man must restore the original order, so that he may not only do what is good, but likewise do it with ease. There remains to be mentioned the "Summa de vitia et virtutibus" of Perelius (d. 1570). The fourteenth century is characterized through and through by the mystics. Among the works which this period produced, Henry Suso's "Booket of Eternal Wisdom" deserves special mention on account of its highly practical value. Pre-eminent in the fifteenth century were Gerson, Dionysius the Carthusian, and the author of the "Imitation of Christ." Reclaiming the spirit of the mystic writers of the fourteenth century, Gerson attached himself again to the great scholastic writers, thus avoiding the vagaries which had become alarmingly frequent among the mysteries. His "Considerationes de theologia mystica" shows that he belongs to the practical school. In the spiritual life of the Carthusian is esteemed as a highly gifted teacher of the spiritual life. Both mysticism properly so called and practical asceticism owe valuable works to his pen. To the latter category belong: "De remedial tentationem," "De via purgativa," "De oratione," "De studio spirituali et pace interna," "De quatuor novissimis.

The "Imitatio Christi," which appeared in the middle of the fifteenth century, deserves special attention on account of its lasting influence. "It is classic in its ascetical function and perfect in its artistic style" (Hummel, "Die Schönheit der K. Morals"., Munich-Glabbach, 1911, p. 74). In four books it treats of the interior spiritual life in imitation of Jesus Christ. It pictures the struggle which man must wage against his inordinate passions and perverse inclinations, the indulgence of which sullies his conscience and robs him of joy and peace; of the importance of the spirit and all is vanity, except to love God and serve Him alone" (Vanitas vanitatum et omnia vanitas praeter amare Deum et illi soli servire: I, i). It advises mortification and self-denial as the most efficacious weapons in this struggle. It teaches man to actualize God's kingdom in his soul by the practice of virtues according to the example of Jesus Christ.
It finally leads him to union with Christ by exciting love for him as well as by pointing out the frailty of all creatures: "It is necessary to leave the beloved thing for the beloved one; to despise all things in order to be lovable above all things" (Opus. de lectu. dexter. delectu. reliquere, quia Jesus vult solus super omnia amari: II, xviii). The thoughts of the "Imitation" are thrown into epigrams so simple that they are within the mental grasp of all. Though the book betrays the author's weakness in certain logical, philosophical, and theological, but also in the secrets of the mystical life, yet this fact never obtrudes itself on the reader, nor does it obscure the meaning of the contents. There are a number of quotations from the great doctors Augustine, Bernard, Bonaventure, and Thomas, from Aristotle, Ovid, and Seneca; yet these do not mar the impression that the whole work is the spontaneous outburst of an intensely glowing soul. It has often been said that the teachings of the "Imitation" are "unworldly" and show little appreciation for science. But, to judge the work aright, one must take into consideration the peculiar circumstances of the time. Scholasticism had entered on a period of decline and had lost itself in intricate subtleties; mysticism had gone astray; all classes had been more or less infected with the spirit of licentiousness. It is conditions like these that give us the key to interpret phrases such as the following: "I would rather feel than think," or "more than define it." (Opt magis sentire compunctionem quam scire ejus definitionem) or "This is the highest wisdom: through contempt of the world to strive for the kingdom of heaven." (Ista est summum sapientes: per contemptum mundi tendere ad resque celestia.)

The writings of St. Teresa arouse our admiration by the simplicity, clearness, and precision of her judgment. Her letters show her to be an enemy of everything that smacks of eccentricity or singularity, sham piety or indiscriminate zeal. One of her principal works, the "Way to Perfection," though written primarily for nuns, also contains appropriate instructions for those who wish to contemplate. When, during the first year of her contemplation, she yet insists that not all are called to it and that there is greater security in the practice of humility, mortification, and the other virtues. Her masterpiece is the "Castle of the Soul," in which she expounds her theory of mysticism under the form of a dialogue between a soul and a "Castellan." The soul repudiates with the beauty of the diamond or crystal is the castle; the various chambers are the various degrees through which the soul must pass before she can dwell in perfect union with God. Scattered throughout the work are many hints of inestimable value for asceticism as applied in everyday life. This fact is undoubtedly due to the well-founded conviction of the saint that even in extraordinary states the ordinary means must not be set aside altogether, so that illusions may be guarded against (cf. J. Zahn, "Introduction to Mysticism," p. 213).

In his "Exercitia spiritualia" St. Ignatius has left to posterity not only a grand literary monument of the science of the soul, but also a method unparalleled in its practical efficacy of strengthening the will-power. The booklet has appeared in numberless eds. and is one of the "castles" in the "Castle of the Soul" (Meschel). The four weeks of the Exercises acquaint the exerctant with the three degrees of the spiritual life. The first week is taken up with cleansing the soul from sin and from its inordinate attachment to creatures. The second and third weeks lead the exerctant along the illuminative way. The portrait of Christ, the most lovable of all men, is outlined before his eyes, so that he can contemplate in the image of the Saviour the fulfillment of the meditations and the supreme model of all virtues. The meditations of the fourth week, the subject of which are the resurrection etc., lead to union with God and teach the soul to rejoice in the glory of the Lord. It is true, there are many rules and regulations, the sequence is not without its pertinacity, the management of the meditations follows the laws of psychology; yet these exercises do no violence to the free will, but are meant to strengthen the faculties of the soul. They do not, as has often been asserted, make the exerctant a powerless instrument in the hands of the confessor, nor are they meant to create a flight to heaven, accomplished by means of a compulsion which intends a rapid advance in perfection by a mechanical process (Zöckler, "Die Tugendlehre des Christentums," Gütersloh, 1904, p. 335). Their marked intellectualism, so frequently objected to, in no way constitutes a hindrance to mysticism (Messerl. Jesusitenaussee u. deutsche Mystik in "Stimmen aus Maria-Lasch", 1912). On the contrary, they make man's moral will truly free by removing the hindrances, while, by cleansing the heart and by accustoming the mind to meditative prayer, they are an excellent preparation for the mystical life. Louis of Granada, O. P. (d. 1588), also belongs to this period. His "Castaleia" may justly be styled a book full of consolation for the erring. His "El memorial de la vida cristiana" contains instructions which take the soul from the very beginning and lead her to the highest perfection. Louis of Blois (Bloisius), O. S. B. (d. 1568), is of a mind kindred to St. Bernard. His "Monnie spirituale" is the best known of his numerous works. Thomas of Jesus (d. 1582) wrote the "Passio of Christ" and "De oratione dominica.

A great number of ascetical works sprang up during the seventeenth century. Among them St. Francis of Sales stands out most prominently. According to Linseemann, the publication of his "Philothae" was an event of historical importance. To make piety attractive and to adapt it to all classes whether living in Court circles, in the world, or in a monastery, this was his aim and in this he succeeded. Of a mild nature, he never allowed the ascetics to drudge the habits and particular circumstances of the individual. Though unwavering in his ascetical principles, he yet possessed an admirable facility for adapting them without constraint or rigidity. In the practice of mortification he recommends moderation and adaptation to one's state of age, rank, circumstances. Love of God and of man: this he puts down as the motive power of all actions. The spirit of St. Francis pervades the whole of modern asceticism, and even to-day his "Philothae" is one of the most widely read books on asceticism. "Theotimus" is another work of his, treated in the first six chapters of the love of God, the rest being devoted to mystical prayer. His letters, too, are very instructive. Attention may be called to the new edition of his works (Œuvres, Annecy, 1891 sqq.). "II combattimento spirituale" of Scipoli (d. 1610) was spread very widely and earnestly recommended by Francis de Sales.

To the same period belong the following authors and works: Bellarmine, S. J. (d. 1621): "Gemitus columbus"; "De ascensione mentis in Deum"; "De arte bene moriendo". Alphonso Rodrigues, S. J. (d. 1616): "Exercitii spiritualium" (3 vols., Seville, 1609), which has frequently been re-edited and translated into nearly all languages. John of Jesus-Mary, O.C.D. (d. 1615): "Teologia mystica" (Naples, 1607), highly esteemed by Bellarmine and Francis de Sales. Alvarado de Pala, S. J. (d. 1620): "De vita spirituali ejusque per-
fectione" (1608); "De exterminatione malii et promotione boni" (1613); "De inquisitione pacis" (1617), which was frequently re-edited. Gaudier, S.J. (d. 1619; new ed., 3 vols., Turin, 1903-4). La Puente, S.J. (d. 1624): "Guia espiritual" (Valladolid, 1609), containing, according to his own statement, a brief epitome of the spiritual life both active and contemplative (prayer, meditation, trials, mortification, practice of virtue). "De la Perpetuation del Cristii en todas sus estados" (1612). Both works have been highly esteemed by all ascetical men and have been translated into many languages. Lessius, S.J. (d. 1623): "De perfectionibus morbusque divinis", a work distinguished both for its scientific and ascetical spirit. Nicholas Leignier, S.J. (d. 1638), past-master in the spiritual life, whose saintly personality is reflected in his writings (new ed., Cracow, 1889 sqq.): "De exteriori corporis compositione"; "De quatuor visis perveniendi ad perfectionem"; "De humanarum passionum dominio"; "De mediis ad virtutem"; "De causis et remediis in oratione". Greatly valued is his book of meditations: "De piis erga Deum et coeli affectibus"; it has been translated into several languages. Schorrer, S.J.: "Synopsis theol. ascet." (Dillingen, 1682; rare edition). Godinez, S.J.: "Practica de la regia" (La Maba, de los Angeles, 1681), of which we have a Latin edition together with a commentary by de la Reguera, S.J. (Rome, 1740).

Surin, S.J. (d. 1665), wrote his important "Catechismus spirituale" at a time when he was subject to interior trials (cf. Zahn, "Mystik", p. 441). The book appeared in many editions and translations, but was placed on the Index. The edition of Fr. Fellon, S.J. (1730), and the latest edition of Fr. Bouix (Paris, 1882) probably do not fall under this prohibition, because in them the errors have been corrected. At the Surin's death, a "Lettres" (ed. fondements de la vie spirituelle" (Paris, 1687); "Lettres spirituelles" (ib., 1693); "Dialogues spirituels" (ib., 1704). Gaspar Druzbicki, S.J. (d. 1662), is the author of a considerable number of ascetical works both in Polish and in Latin, many of which were translated into other languages. Complete editions of his works: one published at Ingolstadt (1732) in two folios, the other at Kalisz and Pozen (1681-91). Among his numerous works are: "Lapsis lydii boni spiritus"; "Considerationes de soliditate verum virtutis"; "De sublimitate perfectionis"; "De perpective ad perfectionem"; "Vegetatis religiosa"; Th., "Mystica theologa Divi Thome" of Thomas a Vallaegorna, O.P. (d. 1665), published at Barcelona (1662 and 1672) and at Turin (1890), is almost exclusively made up of quotations from St. Thomas and is a rich storehouse of ascetical material. From the pen of Cardinal Bona, O. Cist. (d. 1674), we have: "Principi et documents vita et christiane" (Rome, 1673) and "Manuductio ad oeculum" (Rome, 1672 and 1678), both of which works, remarkable for their simplicity and practical utility, were frequently re-edited; the still valuable "De sacrificio Missae" (ib., "De discrezione spirituum"; "Horologium asceticium", Complete editions of his works appeared at Antwerp, Turin, Venice, Morotius, O. Cist., in his "Cursus vitae spirituales" (Rome, 1674; new ed., Ratibson, 1891), follows closely the lead of St. Thomas. The "Summa theologiae mysticae" (new ed., 3 vols., Freiburg, 1674), is the book most read and of greatest use. Suytorius, Cardinal de la Trinidad (d. 1671), the philosopher among the mystic writers. He wrote in the spirit of St. Thomas, following definite scientific principles and showing their practical application in the spiritual life. Anthony of the Holy Ghost, O.C.D. (d. 1674), was a disciple of the author just named. His "Directorium mysticum" (new ed., Paris, 1904), dominated by the spirit of his master, was written for the instruction of his pupils. He is also the author of the following works: "Seminaria" (3rd ed., Augsburg and Wurzburg, 1750), "Irriguum virtutum" (Wurzburg, 1723), "Tractatus de clericoac saceptruum et pastorum dignitate", etc. (Wurzburg, 1676).

In the course of the eighteenth century a number of valuable works on asceticism and mysticism were published. To Neumeyer, S.J. (d. 1765), we owe the "Idea theol. ascet." a complete, scientifically arranged epitome. Rogacci, S.J. (d. 1719), wrote "Del uno necessario", an instruction in the love of God, which ranks high in ascetical literature and was translated into several languages. His literary productions, and widely read even to-day, is Scaramelli's (d. 1752) "Direttorio ascetico". The author treats asceticism apart from mysticism. A treatise on the virtues is contained in Dirink, S.J., "Semita perfectionis" (new ed., Paderborn, 1890). Designed along broad lines is the "Trinum perfection" (3rd ed., Augsburg, 1728) by Michael of St. Catherine. Katzenberger, O.F.M., wrote "Scientia salutis" (new ed., Paderborn, 1901). Schram's "Institutiones theol. mysticas" (2 vols.) combines asceticism with mysticism, though the author is at his best in the ascetical works. Nicholaus Lignani, of the Roman College, called the "Apostolic Man", published a large number of ascetical works, full of heavenlyunction and tender-hearted piety. The best-known and most important of them are: "Pratica di amar Gesu Cristo" (1768); "Visita al SS. Sacramento", perhaps the most widely read of all his ascetical works: "La vera sposa di Gesu Cristo" (1769), a sure guide to perfection for countless souls.

An exhaustive list of Catholic ascetical writers is given in Migne, "Encycl. theologique", XXVI; "Dict. d'ascétisme", II, 1467.

Non-Catholic authors: Otto Zöckler, "Die Jugendlehre des Christentums, geschieht dargestellt" (Göttingen, 1904). W. Hermann, "Der Verkauf des
THEOLOGY

FRANK X. MÜTZ.

MYSTICAL THEOLOGY.—Mystical theology is the science which treats of acts and experiences or states of the soul which, though produced by grace or the influence of the Holy Spirit, go beyond the limits of ordinary prayer, life, or industry even with the ordinary aid of Divine grace. It comprises among its subjects all extraordinary forms of prayer, the higher forms of contemplation in all their varieties or gradations, private revelations, visions, and the union growing out of these between God and the soul, known as the mystical union. As the science of all that is extraordinary in the relations between the Divinity and the human spirit, mystical theology is the complement of ascetical, which treats of Christian perfection and of its acquisition by the practice of virtue, particularly by the means of prayer and the other means of the spiritual life. The experiences sought for as a result of mystical theology are doctrinal as well as experimental, as it not only records the experiences of souls mystically favoured, but also lays down rules for their guidance, which are based on the authority of the Scriptures, on the teachings of the Fathers of the Church, and on the explanations of theologians, many of them eminent as mystics. Its rules and precepts are usually framed for the special use of those who have occasion to direct souls in the ways of mysticism, so as to preserve them from error while facilitating their advancement. It must therefore take note of the erroneous ideas of the Quemism (q. v.) or Semiquemism, and of the self-deception or delusion of souls that mistake the powers of darkness for those of light or the promptings of their own self-seeking for Divine communications. It is this part of the science that necessitates inquiry into various phases of occultism, diabolism, etc., in which writers like Gorres have gone so extensively. Mystical theology has a nomenclature all its own, seeking to express acts or states that are for the most part purely spiritual in terms denoting analogous experiences in the material order. Usually it does not employ part of the ordinary language, but is imparted by spiritual masters in their personal direction of souls, or inculcated, as in seminaries and novitiates, by special conferences and courses of spiritual reading. Preliminary to the study of mystical theology is a knowledge of the four ordinary forms of prayer: vocal, mental, affective, and the prayer of simplicity (see PRAYER). The last two, namely the prayer of simplicity, border on the mystical. Prayer is often called active or acquired contemplation to distinguish it from passive or higher contemplation, in which mystical union really consists.

Mythical theology begins by reviewing the various descriptions of extraordinary contemplation, contained in the works of mystics and of writers on mystical subjects, and the divisions which help to describe its various phases, indicating chiefly whether it consists in the enlargement or elevation of knowledge, or of absorption in the Divine vision, or, again, whether the cherubic, i.e., intellectual, or seraphic, i.e., affective, element predominates. The objects of contemplation are set forth: God, His Attributes, the Incarnation, and all the Sacred Mysteries of the Life of our Lord. There is a supernatural order; every creature of God in the natural order, animate or inanimate, particularly the Blessed Virgin, the angels, the saints, Providence, the Church. In analyzing the causes of contemplation, what may be called its psychology next comes up for consideration, in so far as it necessitates the ordinary or exceptional use of any human faculty, of the senses of the body, or of the powers of the soul. On God’s part, grace must be considered as a principle, or cause, of contemplation, the special or spiritual graces (gratiae theologiae, or the virtues, theological as well as moral, the gifts of the Holy Spirit. The closing chapter in this part of the science dwells on the fruits of contemplation, especially the elevation of spirit, joy, charity, zeal; on the influence that may contribute to its duration, in virtue of the individual soul. It next treats in detail of the preliminary or preparatory dispositions for contemplation, of natural or moral aptitude, solitude, prayer, mortification or self-denial, corporal and spiritual, as a means of soul-purification; these topics, however, belong more properly to the domain of ascetical theology.

What strictly comes within the province of mystical theology is the study of the processes of active and passive purification through which a soul must pass to reach the mystical union. Although the active processes are also treated to some extent in ascetical theology, they are the special subject of mystical theology. The experiences sought for are the means of conversion to contemplation. They comprise purity of conscience, or aversion even to the slightest sin; purity of heart, the heart being taken as the symbol of the affections, which to be pure must be free of attachments to anything that does not lead to God; purity of the spirit, i.e., of the imagination and memory; and purity of action. It is to these processes that the well-known term “night” is applied by St. John of the Cross, since they imply three things which are as night to the soul in so far as they are beyond or contrary to its own lights, viz., the practice of pleasures, the use of means of human knowledge, and God as incomprehensible, or darkness, to the unaided soul. Passive purifications are the trials encountered by souls in preparation for contemplation, known as desolation, or dryness, and weariness. As they proceed sometimes from God and sometimes may be produced by the Evil Spirit, rules for the discernment of spirits are set down to enable directors to determine their source and to apply proper means of relief, especially should it happen that the action of the Evil One tends to possession or obsession. These passive-preparatory operations affect the soul when every other object of contemplation is withdrawn from it, except its own sins, defects, frailties, which are revealed to it in all their enormity. They put the soul in the “obscurate night”, as St. John of the Cross calls it, or in the “great desolation”, to use the phrase of Father Baker. In this state the soul experiences many trials and temptations, even to infidelity and despair, all of which are expressed in the peculiar terminology of writers on mystical theology, as well as the fruits derived from resisting them. Chief among these fruits is the purification of spirit, until the soul is reduced to a state that it feels as if wounded and languishing, with the desire to love Him still more intensely. The first difficulty mystical writers encounter in their treatises on contemplation is the proper terminology for its degrees, or the classification of the experiences of the soul as it advances in the mystical life. Experiences are further affected by this extraordinary form of prayer. Ribert in “La Mystique Divine” has a chapter (x) on this subject, and the present writer treats it in chapter xxix of his “Grace of Interior Prayer” (tr. of the sixth edition). Scaramelli follows this order: the prayer of expectation, the Examen, the spiritual silence; the prayer of quiet; the immersion of love; the spiritual sleep; the anguish of love; the mystical union of love, and its degrees from simple to perfect union and spiritual marriage. In this union the soul experiences
various spiritual impressions, which mystical writers try to describe in the terminology used to describe sense impressions, as if the soul could see, hear, touch, or enjoy the savour or odour of the Divinity. Ecstatic union with God is a further degree of prayer. This and the state of rapture require careful observation to be made by the mystic, as the soul has no means of testing them. Here again mystical writers treat at length the deceits, snare, and other arts practised by the Evil One to lead souls astray in the quest for the mystical union. Finally, contemplation leads to a union so intimate and so strong that it can be experienced only by the mystic. Spiritual marriage (see MARRIAGE, MYSTICAL). The article on contemplation (q. v.) describes the characteristics of the mystical union effected by contemplation. No treatise of mystical theology is complete without chapters on miracles, prophecies, revelations, visions, all of which have been treated under their respective headings.

As for the history or development of mysticism, it is as difficult to record as a history of the experiences of the human soul. The most that can be done is to follow its literature, mindful that the most enthusiastic mystical experiences are not always experienced in human speech, and that God, the Author of mystical states, acts upon souls when and as He wills, so that there can be no question of what we could consider a logical or chronological development of mysticism as a science. Still, it is possible to review what mystical writers have said at certain periods, and especially what St. Teresa did to treat for the first time mystical phenomena as a science. Before her, mystics were concerned principally with ecstasies, visions, and revelations; she was the first to attempt a scientific analysis of the process of mystical union brought about by contemplation. As the contributions of each writer to mystical theology by each of the writers in the following list has been sufficiently noted in the articles on them, it will suffice here to mention the titles of some of their characteristic works.

**Famous Mystics Prior to the Nineteenth Century.**

**Aug. Poulian.**

**Theonas,** Bishop of Alexandria from about 283 to 301 (Eusebius, “Chronicle,” Ann. Abr. 2299, St. Jerome’s version). In his time Achilles, who had been appointed presbyter of the Episcopate of Strassburg, together with Pierius, became celebrated (Euseb., “Hist. ecc.,” I, 333). The celebrated letter of Theonas to Luidius, chamberlain to Diocletian, which has often
been quoted as giving such a lifelike description of the position of a Christian in the imperial Court has been pronounced, first by Batiffol and then by Harnack, to be a forgery. Their verdict is endorsed by Bardenhewer. It was first published from what purported to be a transcript made by Jérôme Vignier, by Dacierius in his “Spicilegium” Thomas is commemorated in the Roman Martyrology on 27 August. St. Athanasius in his apology to Constantinus speaks of a church dedicated by his predecessor, St. Alexander, to Thomas. The same church is alluded to in the “Acta SS. Pachomii et Sylvii.”

F. J. BACHUS.

Theophanes, Saint, chronicler, b. at Constantinople, about 758; d. in Samothrace, probably 12 March, 817, on which day he is commemorated in the Greek menologies and in the Roman Martyrology. He was the son of Isaac, imperial governor of the island of Cos and of the Sea of the Thracian, of Theodora, of whom nothing is known. After the early death of his parents he came to the Court of Constantine Copronymus. He was married at the age of twelve, but induced his wife to lead a life of virginity, and in 799, after the death of his father-in-law, they separated with mutual consent to embrace the religious state, she choosing a convent on an island near Constantinople, while he entered the monastery called Polychoenus in the district of Sigrano near Cyzicus. Later he built a monastery on his own lands on the island Calonymus (now Cala自制). After six years he returned to Constantinople and took the name of “of the great acre”, and governed it as abbot. As such he was present at the second General Council of Nicea, 787, and signed its decrees in defence of the sacred images. When the Emperor Leo the Armenian again began his iconoclastic warfare, he ordered Theophanes to be brought to Constantinople and tried in vain to induce him to condemn what had been sanctioned by the council. Theophanes was cast into prison and for two years suffered cruel treatment; he was then banished to Samothrace, where, overwhelmed with afflictions, he lived only seventeen days, and then many of his miracles after death. At the urgent request of his friend George Synneculus (d. 810), Theophanes undertook the continuation of his chronicle, during the years 810-15 (P. G., CVIII, 55). He treated of the time from the year 284-513, and made use of material already prepared by Syncellus, probably also the extracts from the works of Socrates, Sozomenus, and Theodoret, made by Theodore Lector, and the city chronicle of Constantinople. The work consists of two parts, the first giving the history, arranged according to years, the other containing chronological tables, full of inaccuracies and therefore of little value. It seems that Theophanes had only prepared the tables, leaving vacant spaces for the proper dates, but that these had been filled out by some one else (Hurter, “Nomencl.”, I, Innsbruck, 1903, 735). The first part, though lacking in historical precision and criticism, which could scarcely be expected from a man of such ascetical disposition, was the majority of Byzantine chronicles (Krumbacher, “Gesch. der byz. Litt.”, 1897, 342). The Chronicle was edited at Paris in 1655 by Goar; again at Venice in 1729 with annotations and corrections by Combes. A Latin version was made by Anastasius Bibliothecarius, and both were issued by Leipsig, 1833.

FRANCIS MERSHMAN.

Theophanes Kerameus (Κεραμεύς, potter), Archbishop of Rossano in Calabria (1129-52), a celebrated homiletic writer. His sermons, ninety-one of which are known in manuscript, are mostly exegetical, and written in Greek, which was then still extensively spoken in Sicily and Southern Italy. They are remarkable for their simplicity and naturalness, and are masterpieces of oratorical skill and, for those times, rare examples of lucid and unforced expositions of biblical texts. They were first edited, together with a Latin translation and extensive annotations, by Francesco Scorzo, S.J. (Paris, 1644), which edition is reprinted in P. G., CXXXII, 125-785. A new edition was prepared by Gregory Palamas (Jerusalem, 1890). The fact that various other individuals also bore the surname "Kerameus" has given rise to a controversy concerning the authorship of these homilies. Scorzo, their first editor, falsely supposed Theophanes Kerameus to have lived in the ninth century and to have been Bishop of Taormina. A work entitled "L'abbaye de Rossano" (Paris, 1891), XXXI, 36-56, holds that part of the homilies were written by the Calabrian monk John Philagathos, a disciple of Abbot Bartholomaeus of Grottaferrata (d. c. 1050).

MICHAEL OTT.

Théophane Vénard, Blessed (Jean-Théophile VÉNARD), French missionary, b. at St-Loup, Diocese of Poitiers, 1829; martyred in Tonkin, 2 Feb., 1861. He studied at the College of Doué-la-Fon- taine, Montmorillon, Poitiers, and the Paris Seminary for Foreign Missions which he entered as a sub-deacon. Ordained priest 5 June, 1852, he departed for the Far East, 19 Sept. After fifteen months at Hong Kong he arrived at his mission in West Tonkin, where the Christians had recently been tried by a series of persecutions under Minh-Menh, a monster of cruelty. Shortly after Father Vénard's arrival a new royal edict was issued against Christians, and bishops and priests were obliged to flee and find refuge in caves, and Father Vénard, whose constitution had always been delicate, suffered almost constantly, but continued to exercise his ministry at night, and, more boldly, in broad day. On 20 Nov., 1860, he was betrayed and captured. Tried before a mandarin, he refused to apostatize and was sentenced to be beheaded. He remained a captive until 2 Feb., and during this interval lived in a cage, from which he wrote to his family beautiful and consoling letters, joyful in anticipation of his crown. His bishop, Mgr Retord, wrote of him at this time: "Though in chains, he is as gay as a little bird!"

On the way to martyrdom Father Vénard chanted psalms and hymns. To his executioner, who coveted his clothing and asked what he would give to be killed promptly, he answered: "The longer it lasts the better it will be!" His head, after exposure at the top of a pole, was secured by the Christians and now venerated in Tonkin. The body rests in the crypt at the Missions Etrangeres, Paris. Other precious relics are in the hands of the martyr's brother, Canon Eusebius Vénard, cure of Assas Deux Sèvres, France, who possesses, also, most of the martyr's letters, incautiously given to the Pope in a letter addressed to his father, Théophane refers thus to his approaching sacrifice: "A slight sable-cut will separate my head from my body, like the spring flower which the Master of the garden
THEOPHILANTHROPISTS

THEOPHILANTHROPISTS

Theophanites, or "Friends of God and Man", a deistic sect formed in France during the latter part of the French Revolution. The legal substitution of the Constitutional Church, the worship of Reason, and the cult of the Supreme Being in place of the Catholic Religion had practically resulted in atheism and immorality. With a view to offsetting these results, some disciples of Rousseau and Robespierre regarded religion, while others, like the Montesquieu and Robespierre's civic virtue (régne de la vertu) would be combined. Chemin wrote the "Manuel des théophiliants", and Hady offered his institute for the blind as a provisional place of meeting. When, later, the Convention turned over to them the little church of Saint-Pothin at Pithiviers, the sect would soon have a few followers and protectors; still its progress was slow till La Révellière-Lépeaux, an influential member of the Directory, took up its cause. But it was only after the Revolution of 18 Fructidor, which left him master of the situation, that his sympathy bore fruit. Then was the apogee of Theophanthropism. Blended in a way with the culte d'adéquité, it came into possession of some of the great churches of Paris like Notre-Dame, St-Jacques du Haut-Pas, St-Médard etc.; it took a conspicuous part in all the national celebrations, and from the metropolis passed into the provinces, chiefly the Department of Yonne. The movement thus became the object of a strong attack, especially on the part of Catholics but also from Constitutionalists and Philosophers, was gradually taking hold of the masses when the overthrow of the Directory brought it to an abrupt end. The First Consul set his face against the new religiousism and they disbanded. Sporadic attempts at reviving Theophanthropism were made in the course of the nineteenth century. In 1829, Isambert circulated a manifesto for the purpose of grouping the French deists, but nothing came of it. In 1854 Henri Carle founded l'alliance religieuse universelle with "la liberté conscience" as its organ. After the society and periodical disappeared during the Franco-Prussian war. In 1882, Décembre and Vallières, through "la fraternité universelle" and many similar publications, sought directly to reorganize the sect, but the attempt failed and, in 1890, Décembre confessed the impossibility of rousing public interest. Camerlynck's voluminous book, "Thésauries", published at Paris in 1900, had a similar aim and met a similar fate.

Theophanthropism is described in the "Manuel du théophanthropisme", of which there were new editions made as the work progressed. The governing body of the sect was the Grand Masters, who were elected by the secret society, and consisted of Fusée, the first president, Collin, the first vice-president, Saucier, former president, and Duval, former vice-president. The publication of "l'Alliance religieuse universelle" was halted by order of the government, but it was resumed under the name of "la Fraternité universelle" in 1882. In 1890, Décembre confessed the impossibility of rousing public interest. Camerlynck's voluminous book, "Thésauries", published at Paris in 1900, had a similar aim and met a similar fate.

The publication of "l'Alliance religieuse universelle" was halted by order of the government, but it was resumed under the name of "la Fraternité universelle" in 1882. In 1890, Décembre confessed the impossibility of rousing public interest. Camerlynck's voluminous book, "Thésauries", published at Paris in 1900, had a similar aim and met a similar fate.

Theophanthropism is described in the "Manuel du théophanthropisme", of which there were new editions made as the work progressed. The governing body of the sect was the Grand Masters, who were elected by the secret society, and consisted of Fusée, the first president, Collin, the first vice-president, Saucier, former president, and Duval, former vice-president. The publication of "l'Alliance religieuse universelle" was halted by order of the government, but it was resumed under the name of "la Fraternité universelle" in 1882. In 1890, Décembre confessed the impossibility of rousing public interest. Camerlynck's voluminous book, "Thésauries", published at Paris in 1900, had a similar aim and met a similar fate.
that animated the sect, the political intrigues hiding under the mask of religion. Pope Pius VII, 17 May, 1800, placed an interdict on the churches that had been desecrated by the deistic rites, and Cardinal Consalvi, in the course of the negotiations regarding the Concordat, recommended the persecution of the Theophilanthropiste's profanation of the Catholic temples.

J. F. Sollies.

Theophilus, Bishop of Antioch. Eusebius in his "Chronicle" places the name of Theophilus against that of Pope Soter (169-77), and that of Maximinus, Theophilus's successor, against the name of Eleutherus (177-93). This does not mean that Maximinus succeeded Theophilus in 177, but only that Theophilus and Maximinus flourished respectively in the times of Soter and Eleutherus. Lightfoot and Hort showed that Eusebius, having no such precise chronological data for the bishops of Antioch as he had for those of Alexandria and Carthage, placed the names of the Antiochenes bishops against those of contemporary Roman bishops (Lightfoot, "St. Ignatius," etc., II, 468 sq., and "St. Clement," etc., I, 224 sq.). When therefore we find in the third book of Theophilus, Ad Autolycum, that the writer was alive after the death (180) of Marcus Aurelius, it does not follow, as even writers like Harnack and Bardenhewer suppose, that Eusebius made a chronological blunder.

The "Ad Autolycum," the only extant writing of Theophilus, is an apology for Christianity. It consists of three books, with separately written parts at different times, and corresponds exactly to the description given of it by Eusebius as "three elementary works" (Hist. eccl., IV, xxiv). The author speaks of himself as a convert from heathenism. He treats of such subjects as the Christian idea of God, the Scripture accounts of the origin of man and the world, and the Old Testament myths. On some occasions he refers (in connexion with the early chapters of Genesis) to an historical work composed by himself. Eusebius (op. cit.) speaks of refutations of Marcion and Hermogenes, and "catachretic books." To these St. Jerome (De vir. illust., xxv) adds commentaries on Proverbs and the Gospels. He speaks of the latter in the prologue to his own commentary on the Gospels, and also in his epistle "Ad Algasiam," where we learn that Theophilus commented upon a Diatessaron or Gospel Harmony composed by himself ("Theophilus . . . quattuor Evangelistarum in unum opus compendiarii." A long quotation in the same epistle is all that survives of this commentary, for Zahn's attempt to identify it with a Latin commentary ascribed in some MSS. to Theophilus has found no supporters.

Battifolle, Anciennes littératures chrétiennes, Iii, viii, 101-2; Zahn, Forschungen zur Gesch. des N.T., I, 116, Harnack, Alchrist. Lit., 406 sq.; Iadem, Chronologie, I, 319 sq.; Bardenhewer-Briant, Patrologie (St. Louis, 1906), 65-6. For Theophilus's name during the Byzantine period see Newman, Classics of Rise and Success of Arianism in Tract. Theol. and Eccles. (London, 1916); Ad Autolycum, the text of which was first published by Harnack in 1901 (in the Zürich, 1840; the latest ed. by Otto, Corp. apol., VIII (Gera, 1881). English tr. by Flower (London, 1860), and in Clarke, Lexicon (London, 1861). The supposed Constitutions of Theophilus, which were first printed at Leyden and by P. Schott (Hanover, 1674), are not genuine. The words "Contra Rufinum" in the epistle are the real title. For reasons regarding John of Jerusalem see Bardenhewer.

F. J. Bacchus.

Theophilus, Patriarch of Alexandria (388-412). Concerning the extraction and early life of Theophilus we have but scanty information. He had a sister of similar temperament and St. Cyril, his successor, was her nephew. Hydatius ("Chron.", I and II) calls him a "most learned man," and dedicated to him an Easter table for 100 years. St. Jerome informs us that he did not come forward as a public teacher before 385 ("Contra Rufinum," III, 18, in P. L., XXIII, 492). After his election to the Patriarchate of Alexandria (388) he showed himself a man of great mental gifts and capacity, but at the same time extremely violent and unscrupulous in the choice of his means. His name is connected with three important historical events: the decay of paganism in Egypt, the Origenistic controversy, and the deposition and banishment of St. John Chrysostom. About 390 Theophilus deprived the pagans of Alexandria of a temple, probably with the consent of the Emperor Theodosius I, and apparently destroyed several other temples (Socrates, V, 16; Ammian, XXII, xi, 7). A riot ensued, and a number of Christians were slain. With Theophilus at their head, the Christians retaliated by destroying the celebrated temple of Serapis, on the orders of the patriarch erected a church. He also erected a magnificent church at Canope. In 391 or 392 Theophilus was requested by the Synod of Capua to exert his influence to end the schism at Antioch. However, he failed to establish peace, and it was only in 396 that St. John Chrysostom, with the approval of Theophilus, succeeded in re-establishing ecclesiastical communion between Flavian and Rome.

Until 399 Theophilus was regarded as a friend of Origen and the Origenists. Many of the so-called Origenist monks were among his best friends; some of them he appointed to ecclesiastical dignities: for example, he named Isidore archbishop and patriarch aecomonios, and raised others to the episcopate. In the quarrel between Johannes Rufinus and Ephiphanios-Jerome he took the side of the first (Socrates, VI, 10), informed Jerome through Isidore in 396 that he should show more respect for the authority of his bishop, John of Jerusalem (Epp. ixii and lxiii; "Contra Rufinum," III, 17; "Contra Johannem Hieros."), and accused St. Epiphanius of anthropomorphism. He also banished the Egyptian bishop Paulus, an opponent of the Origenists, and reproached Jerome for the honor of Theophilus, Jerome, "Cont. Rufinum," III, 17 and 78). Between 399 and 400 Theophilus suddenly altered his attitude; the chief motive for the change seems to have been a personal quarrel with the archbishop Isidore, well known as a friend of the Origenists. Isidore had taken charge of a sum of money and, in accordance with the express request of the donor, did not inform Theophilus, who suffered from a "mania for building" and avarice (St. Isidore Pelus., Ep. i, 152). The patriarch heard of the matter, however, and did not shrink from the vilest slanders against Isidore and the acts of violence (Pall., vii, 7). Isidore found protection with his friends, the monks of Nitria, whereupon Theophilus turned against them also. At first he set the anthropomorphistic-minded monks, the enemies of the Origenists, against them, although he had condemned their views in his Easter letter of 399 (Soxomnem, VIII, 11; Cassian, "Coll. X, 2), then directed against them his Easter letter of 401 (P. L., XXI, 773), and finally condemned Origenism at the Synod of Alexandria in 401.

Then placing himself at the head of soldiers and armed servants he marched against the monks, burned their dwellings, and in 402 was himself hounded out (Pall., vii; Socrates, VI, 7; for Jerome's congratulations to Theophilus see Jerome, Ep. lxxvi). The monks, about 300 in number, proceeded first to Palestine, where the majority of them settled near Scythopolis; the four Tall Brethren meanwhile pro-
seceded to Constantinople to seek protection and justice from St. John Chrysostom and the emperor. Theophylactus was summoned to Constantinople to answer their charges, and thus begins his connexion with the transcendent, which, e. g. The finality of the individual soul in his and the public interest (see John Chrysostom, Saint). At the Synod of the Oak in 403 Theophylactus concluded an equitable peace with the persecuted monks, and on his return to Alexandria is said to have again received the books of Origen (Socrates, VI, 17). That Theophylactus may have been really very "broad-minded", is shown by the fact that he consecrated the Philosopher Symesius bishop about 410, although the latter had not yet been baptized, and had stipulated that, as bishop, he might retain his wife and adhere to his Platonic views (pre-existence of soul, allegorical explanation of the Resurrection, etc.). As a writer Theophylactus did not attain much prominence. In addition to his Easter letters, of which three are extant in a Latin translation by Jerome (P. L., XXII, and P. G., LXV, 53 sq.), he wrote "one large volume against Origen" (Gennadius, 33), of which some fragments are preserved (c. Diodor. exed. et v. vet. patr.""). VII, 501–52; P. G., LXV, 33–88; Zahn, "Vor- schungen zur Gesch. des neutest. Kanons", II, Er- langen, 1883, p. 234 sqq.). The Canons ascribed to Theophylactus are in Pitra, "Jurius eccles. Graecor. hist. et monum.", I (Rom, 1864), 546–649. Inauthentic and spurious works were attributed to Theophylactus's name (Gennadius, 33; "Legi et tres libros suo nomine titulatos, sed lingua incomnasonem est. Non valde credidi").

CHRYS. BAUR.

Theosophy, Theosòphía, wisdom concerning God, is a term used in general to designate the knowledge of God supposed to be obtained by the direct intuition of the Divine essence. In method it differs from the knowledge of the known objects; it consists in revelation, and from philosophy, which is the knowledge of Divine things acquired by human reasoning. It is often incorrectly confounded with mysticism, for the knowledge of divine things is the essence of the Divinity, the aspiration for the invisible, and hence a natural manifestation of the religious spirit. By intuitive illumination the initiated Theosophists are considered to be in harmony with the central principle of the universe. This knowledge of the secret forces of nature, of the true relation between the world and man, frees them from the ordinary limitations of human life, and gives them a peculiar power over the hidden forces of the macrocosm. Their exceptional faculties are alleged as experimental proof of their superior science; they are the only guarantee of the truth of their teaching. They are said to transmit this truth by way of revelation. Thus theology applies to tradition, but not in the Christian sense.

(1) India is the home of all theosophic speculation. Oltramare says that the directive idea of Hindu civilization is theosophic. Its development covers a great many ages, each represented in Indian religious literature. There are formed the basic principles of theosophy. Knowledge of the occult laws in nature and of the universe, hostility to established religion are not all equally apparent in each age, but are present conjunctively or separately through the whole course of its history. The early Brahmanic writings contain the germ, which have gradually developed into a rich vegetation of ideas and beliefs. These ideas are organised into systems, not however homogeneous or autonomous but mixed with other belief. Then they leave the schools to act upon the masses, either in forming a new faith, e. g. the Jainism, or in adhering to the religions already existing, e. g. Hinduism. Thus the Upanishads teach: that the individual soul is identical with the universal soul, hence the doctrine of advaita, i. e. non-duality; that the individual existence of the soul is a state of suffering, hence the doctrine of samadhi, i. e. metempsychosis; that the individual soul is delivered from suffering by its reunion with the universal soul, a reunion realized by seizing the consciousness of identity with it, hence the doctrine of moksa, i. e. salvation. The basic doctrines of the Vedanta and Saushiya systems are monistic Pantheism, intuition as the supreme means to reach truth, metempsychosis, the world of sense is only a very little part of the category of things, the theory and method of salvation strictly intellectual. These systems developed from the Upanishads. The final development is the Yoga. Yoga, i. e. "one who sits motionless," refers to the exercises practised to free the soul from the body, which to it is like a string to a bird. Some of these exercises were to rid one's self of moral faults (though the masters do not agree as to what these faults are); to sit in certain painful postures, check the breath, and reduce desire by etymological circulation, to place the nose in the body in particular part of the body, and so gradually acquire mastery over it; or, rather, let the soul, the true self, acquire mastery over the body; to starve and learn to subsist on air, or even without it; to concentrate thought by meditation, i. e. to think of nothing. Theravada, the highest state of which is the cataleptic trance samadhi, in which mind is suppressed but the soul is in full activity. In this state the person is a mahatma, i. e. master-soul and can enjoy a temporary release from the body which leaves it to go roaming about, performing wonderful feats on material nature and controlling other less powerful souls. This latter was the secret of the Yoga's real power and was supposed to be done by a transfer of soul. When the soul re-enters the body, the Yoga wakes and is like other people. By repeated exercises the soul can become so strong that it can leave the body entirely; and according to the older Yoga teaching, it flies to heaven where it enjoys great happiness, riding in a celestial car attended by lovely women and music; but with the latter Yogas, on breaking all bodily bonds it formed immediate absorption into the Supreme Soul.

(2) Theosophic teaching comes to the front in the third period of Greek philosophy. Hence it is found in the Jewish-Greek philosophy with the neo-Platonists. The theosophic atmosphere due to the influence of the Orient is plainly shown in Plotinus. The Gnostic systems reveal more theosophy than theology, and in the Jewish Kabbala is found a theosophy mixed with various forms of magic and occultism. The Renaissance brought into modern thought neo-Platonism and the Kabbala, e. g. Reuchlin (d. 1492), Agrippa (d. 1535), Cardano (d. 1576), Paracelsus (d. 1540), Wespel (d. 1588). More important is the teaching of Jakob Böhme (d. 1624). He taught that the "eternal dualism" of God is the ultimate cause of all evil; that there is a "dark" negative principle in God, which evil element makes manifest. His goodness. Without this there would be no revelation. Further, were it not for this principle, God could not be known. Himself. The influence of Böhme on Schelling, Hegel, and the Positivists is considerable. Theosophic principles colour the philosophy of Swedenborg, and are found in the group of modern thinkers, especially neo-Hegelian, who claim that the existence of God is known by direct intuition or by a special faculty of the soul.
A new importance of these teachings in modern thought is due to the school of Modern theosophy dating from the foundation of the Theosophical Society in New York, 1875. She is the chief and only authority for the revelation of so-called Tibetan occultism. A. P. Sinnett however uses the term Esoteric Buddhism. They claimed to have the true solution for the problems of the universe and of man from the Upanishads, the Buddhist Sutras through Oriental studies, mahatmas, the faithful depositories of a profound and superhuman wisdom. In fact, a great part of their nomenclature is derived from India, and they seek there for a justification of teachings-drifting about in modern thought and derived to a great extent, if not wholly, from neo-Platonic and Jewish sources through the Renaissance. The objects of the society are: to form the nucleus of a universal brotherhood of humanity without distinction of race, creed, sex, caste, or colour; to encourage the study of comparative religion, philosophy, and science; to investigate the unexplained laws of nature and the powers latent in them. Meanwhile, the teaching was continued and propounded by her disciples Mrs. Besant, Col. Olcott, A. P. Sinnett, and others.

Modern theosophy claims to be a definite science. Its teachings are the product of thought, and its source is consciousness, not any Divine revelation. As a science it is supposed to be based on investigation and experimentation of the occult laws in nature and in human life. Only those qualified for the inquiry can grasp these laws, and they gain from this knowledge certain superhuman powers. Mrs. Besant calls it the great synthesis of life, i. e. of religion, science, philosophy, as scientific knowledge, proclaimed in a new form suited to the present time. Its aim is that spirit is and can become the master of matter. Hence it is considered as a protest against materialism which teaches that thought and feeling are the results of the aggregations of matter. They believe, on the contrary sees in matter an instrument of life, and in thought the creative and moulding power of matter.

The basic teaching of theosophy is the universal brotherhood of humanity. Hence springs the preaching of toleration to all persons and to all varieties of belief, e. g. Buddhists, Christians, Atheists. It considers the different religions as methods adopted by man in the search for God. They are of necessity various, because men differ in temperament, type, needs, and stages of evolution. Hence they are different and imperfect expressions of truth. As such it says: "We cannot afford to lose any of the world’s religions, for each has its partial truth and its characteristic message which the perfect man must acquire." Hence theosophy appeals to men as the great peacemaker, for it teaches that all religions mean one and the same thing, or rather that they are all true, and developed gradually from the primitive comparative mythology which tries to show that religion was originally the fruit of man’s ignorance and will disappear with the increase of knowledge, whereas in fact religion comes from Divine knowledge, i. e. theosophy.

The principle of universal brotherhood rests upon the "solidarity" of all living, of all that is, in the one life and one consciousness. Solidarity springs from the belief in the immanence of God, the only and universal external life by the Oriental sages, mahatmas, the faithful depositories of a profound and superhuman wisdom. In fact, a great part of their nomenclature is derived from India, and they seek there for a justification of teachings-drifting about in modern thought and derived to a great extent, if not wholly, from neo-Platonic and Jewish sources through the Renaissance. The principle of universal brotherhood rests upon
ow ideas in art that were introduced one hundred and fifty years later. His first authenticated portrait is that of his patron and fellow-countryman Cluvio, now at Naples; his last, that of a cardinal, in the National Gallery. His first important commission in Spain was to paint the reredos of the Church of Santo Domingo el Diego at Toledo. He may have been drawn to Spain in connexion with the work in the Escorial, but he made Toledo his home. The house where he lived is now a museum of his works, saved to Spain by one of her nobles.

His earliest important work is “El Espolio”, which adorns the high altar in Toledo, but by far
BURIAL OF THE CONDE D’ORGAZ

Thera (or Santorin), Diocese of (Santorino), in the Cyclades. About the year 2000 b.c., the extinguished volcanoes of the island renewed its activity, destroyed the population, and a portion of the island which was engulfed in the sea. In 236 b.c. another eruption separated the island of Therasia from Thera; in 196 b.c. the islet of Hieria sprung up (Paleo-Kalmeni); and in A.D. 46 appeared Thias which was afterwards swallowed up by the islet of Amygdale. In 1570 a portion of the island of Sifnos was covered in; in 1573 and 1711 two new islands arose; in 1866 there was a new volcanic eruption which lasted two years. The ancient town of Thera has been discovered at Haghios-Stephanos, near Messa- vou; the Ptolemies established an important garrison there. Some time after the eruption of the year 20 B.C., the island was called Callirhoe, and was repeopled by the Phoenicians, then by the Dorians who named it Thera about the year 620 B.C.; it became successively a tributary of Sparta, Athens, the Ptolemies, and finally the Romans. It is believed that Christianity was already introduced there in the second century and that certain tombs belonged to that epoch (Hiller von Gärtringen, "Thera," III, 195); a very old church dedicated to Saint Michael and other very ancient churches have been found there. The See of Thera was a suffragan of Rhodes in the seventh and tenth centuries (Gelzer, Ungedruckt. "Texte der Notitia episcopatum," 542, 558). It became a metropolitan see in the eighteenth century and after the incorporation of the island with the Kingdom of Greece it was reduced in 1833 to a bishopric, which rank it still holds.

Le Quien (Oriens christ., I, 941) and Hiller von Gärtringen (Thera, III, 193) give a list of twenty Greek bishops, of whom the greater part are posterior to the sixteenth century; this list could easily be completed. In 1207 the island fell into the power of a Latin lord, himself subject to the Duke of Naxos; the population decreased continually and in 1457 they were no more than 300 persons. In 1566 Thera was under the domination of the Turks and took the name of Deir-Menlik. It received the name of Santorin only in the Middle Ages from Saint Irene, to whom the island had a special devotion. A Latin diocese, suffragan of Naxos, was established there; a number of bishops are known, who belonged principally to the fourth and fifth centuries (Le Quien, op. cit., III, 1007-12; Eubel, "Hierarchia catholica medii aevi," I, 456; II, 252; III, 309). Thera, in the district of the Cyclades, numbers 15,000 inhabitants, of whom 400 are Catholics; 8 secular priests; 1 parish; 2 churches with a resident priest; and 6 chapels. There is also a house of Lazarists belonging to the Society of Charity and another to the Dominican Sisters. The bishop has jurisdiction also over the islands of Ios, Amorgos, Siphnos, Seriphos, and Melos; the last only has Catholic inhabitants.

S. Vailhé.

Thessalonians, Epistles to, the, two of the canonical Epistles of St. Paul. This article will treat the Church of Thessalonica, the authenticity, canonicity, time and place of writing, occasion, and contents of the two Epistles to that Church.

I. The Church of Thessalonica.—After Paul and Silas had, during the Apostle's second missionary journey, left Philippi, they proceeded to Thessalonica (Acts xvii, 5); there Paul strengthened the Church, but he did so, because there was in the city a synagogue of the Jews (Acts, xvii, 2). Thessalonica was the capital of the Roman Province of Macedonia; it was a free city, ruled by a popular assembly (cf. Acts, xvii, 5, 10; Acts xix, 41) and magistrates (cf. Verse 6, Acts xvi, 19). St. Paul at once began to preach the Gospel to the Jews and proselytes. For three successive sabbaths...
ne explained the Scriptures in the synagogue, opening up the way and gradually leading his hearers to the tremendous truth that there was need the Christ should die and rise again from the dead, and that Jesus whom Paul preached was in very truth this Christ. Some of the Jews believed and took sides with Paul and Silas. It would seem that Paul stayed in Berea for three weeks, explaining the reading of Codex Bezae (fifth century), and the Vulgate and Coptic Versions (Acts, xxvi, 4), he converted a large number not only of proselytes (τοίσ μετιστοι) but of Gentile Greeks (εἰς Ἐλλάδα). In the first place, it is unlikely that a large number of those who listened to him were converted; the three weeks devoted to the synagogues; for Paul did manual labour and day, so as not to be burdensome to his converts (1 Thess., ii, 9). Secondly, these converts from idolatry (1 Thess., i, 9) would scarcely have become, after so brief an apostolate, a “pattern to all that believe in Macedonia and in Achaia” (1 Thess., i, 7).

Thirdly, the Church of Philip sent armed forces to Paul at Thessalonica (Phil., iv, 16), a fact which seems to indicate that his sojourn there was longer than three weeks. Be this as it may, the signal success of Paul's apostolate among Jews, proselytes, and pagans, together with the conversion of “not a few noble ladies” (Acts, xvii, 4) aroused the Jews to a fury of envy; they gathered together a mob of idlers from the agora and set the whole city in tumult; they beset the home of Jason, found the Apostle away, dragged his host to the tribunal of the archons and charged him with harbouring traitors, men who set Jesus up as king in place of Caesar. That night the brethren made good the escape of their teacher to Berea. There the Gospel of Paul met with a much more enthusiastic reception than that accorded to it by the synagogue of Thessalonica. That city, therefore, too, stirred up the mob against him. He left Silas and Timothy to complete his work and went to Athens (Acts, xvii, 1-15).

II. FIRST EPISTLE. A. Authenticity. (1) External Evidence. (a) II Thess.—The strongest external evidence in favour of the authenticity of I Thess. is II Thess., which, whatsoever be its date of composition, is the very earliest document that clearly presupposes I Thess. to have been written by Paul. (b) Manuscripts.—The evidence of MSS. alone is such as to set the authenticity of this letter beyond all doubt. The Greek text of the Codex Sinaiticus (fourth cent.), Cod. Vaticani (fourth cent.), and Cod. Alexandrinus (fifth cent.) is in the Old Latin and Syriac versions, which trace its authenticity down to the middle of the second century.

(c) The Apostolic Fathers give evidence of very early use of the Epistle as Sacred Scripture. St. Ignatius of Antioch (d. A.D. 110-17, according to the chronology of Harnack which we shall follow in this article), in “Eph.”, X, i, probably uses the ἀπολογίαι προσεκάλειας, “pray without ceasing”, in 1 Thess., v, 17; and undoubtedly had in mind I Thess. i, 4, when he refers to the “day of the Lord.” St. Polycarp thought of θέλω ὑμὶν καθαρίσειτε ἄλλα θεία, “I will that ye please not man but God.” Because St. Ignatius, as the other Apostolic Fathers, cites from memory, without the exactness of later Fathers and without ever mentioning the name of the sacred writer quoted, Dr. Inge, the Lady Margaret professor of divinity in the University of Cambridge, says: “The evidence that Ignatius knew I Thessalonians is almost nil” (cf. “The New Testament in the Apostolic Fathers”, Oxford, 1905, p. 74). Against such scepticism, the clear use of St. Paul by the Apostolic Fathers is of no avail. Harnack, who cannot be suspected of being a Paulinite, and the Ignatian of Antioch possessed a collection of the Pauline Epistles; and that by the year 117, St. Polycarp of Smyrna had a complete collection (eine ganz Sammlung) thereof before him and verbally lived therein (cf. Chronologie der altchristlichen Literatur, I, 249, note 2). In the “Pastor” of Hermas (A.D. 140), we find the phrase of I Thess., v, 13, “Be at peace among yourselves” (εἰς ἑαυτοὺς ἐν καρδίᾳ) several times, used almost as it occurs in the Alexandrian text (see 1 Thess., VIII, vii, 2; “Vis.”, III, vi, 3; III, ix, 2; III, xii, 3).

The Apologetic Fathers are clear and to the point. St. Ireneaus (A.D. 181-204) cites I Thess., v, 23, expressly attributing the words to the Apostle’s First Epistle to the Thessalonians (“Contra Haereses”, V, i, in F. G., VIII, 138 and 139); and six verses of the Apostle (ibid., V, xxx, 2 in F. G., VII, 1205). Tertullian quotes at length passages from each of the five chapters of I Thess. to prove the thesis of the resurrection of the body (“Libro de resurrecciones carnis”, xxiv, in P. L., II, 874); and uses the Epistle against Marcion (“Adv. Marcionem”, V, xv in P. L., II, 541). St. Clement of Alexandria (A.D. 190-210) very often cites this brief letter—cf. “Pedagogus”, I, v, 19 (Stahlin’s ed., I, 101) and “Stromata”, I, i, 6 (Stahlin’s ed., II, 5) for I Thess., ii, 5-7; “Stromata”, II, xi, 4, IV, xii (Stahlin’s ed., II, 138 and 280), for an appeal to the Epistle for the argument of six verses (3-8) of the same chapter; “Pedagogus”, II, ix, III, xii, IV, xxii (Stahlin’s ed., I, 206 and 288, and P. G., VIII, 1352) for the appeal to almost every verse of I Thess., v, i. c. verses 5, 8, 13, 15, 19, 22; “Stromata”, I, xi (Stahlin’s ed., II, 34) for a quotation from the same chapter. So strong is the external evidence in favour of the authenticity of I Thess. as to convince all scholars save only those, on account of internal evidence, deny to Paul the authenticity of all his Epistles.

(2) Internal evidence.—In I Thess. all the main ideas of the doctrine of the Resurrection of Jesus Christ (i, 10; iv, 14; v, 10); His Divinity and Sonship of the living God (i, 9, 10); the resurrection of our bodies (iv, 15-18); the mediatorship of Christ (v, 10); the call of the nations to the Kingdom of Christ, which is the Church (ii, 12), sanctification by the indwelling of the Holy Spirit (iv, 8); the plain and direct style, the writer’s affectation concern for his spiritual children, his impatience of Judaizers, the preponderance of personal over doctrinal statements, the frank and honest self-revelation of the writer—all these distinctly Pauline characteristics argue strongly for the authenticity of this letter.

Baur, the prime mover of neo-Tübingen ideas, was the first to wave aside recklessly all external evidence and seriously to attack the authenticity of I Thess. from internal evidence (cf. “Der Apostel Paulus”, ed. 2, II, 94). He was followed by Nowack, “Der Ursprung des Christentums” (Leipzig, 1857), II, 313; Volkmar, “Mose, Prophezie und Himmelfahrt” (Leipzig, 1867), 114; and Van der Vries, “De beider brieven aan de Thessalonienschen” (Leiden, 1865). The reasons which impel Baur and his followers are trivial. The lack of the discussion of the last things, the teaching on Paul. We have noted that the main ideas of Paul’s teaching are included in this short letter. Moreover, the letter is a most touching revelation of the great heart of St. Paul and as much alone is befitting the outspoken Apostle. (ii) The Epistle is a clumsy forgery. The author has worked up his story from Acts and Vatican Codex (cf. Harnack, “Wie weit fortgeschritten war das, was gefasst zu denken was unter die Thessalonen mit der ills they wrought upon the Church of Judea. It is un-Pauline to set Jewish Christians up as an example to Gentile converts (Baur, op. cit., 482). These purely subjective objections are too broad-minded to be tied down to the narrow ideas of Baur. True, in his later letters—to the Romans...
was written during the eighteen months Paul stayed at Corinth, i.e. in the year 48 or 49, according to the chronology of Harnack, "Chronologie der alchristlichen Literatur," (Leipzig, 1887), i, 117; in the year 53 or 54 according to the commonly received date of Pauline chronology. Both letters are generally considered to be the earliest extant writings of St. Paul. Some few now deem it proved that Paul wrote to the South Galatians even before he wrote to the Thessalonians, cf. Zahn, "Einleitung in das Neue Testament" (Leipzig, 1897), I, 138.

D. Occasion.—Having arrived at Athens, Paul at once set himself to convert the Jews, proselytes and Gentiles of that city. Among the latter he met with unusually small success. The Epicureans and Stoics for the most part rated him as a talkative lounging in the agora and either berated him with ridicule upon the Hill of Areos or waved him aside (Acts, xvii, 16-32). Meanwhile he trembled for the Church of Thessalonica. So long as he had been there, only the Jews strove to set his work at naught; now in his absence, the Gentiles joined the Jews (1 Thess., ii, 15), and Saul took upon himself to make a vigorous and effective war upon Paul's converts, both in Thessalonica and among the children. Paul yearned mightily to see their face once more. In his intense affection and concern, he breaks away from his wonted first plural: "We will have to come to you, even I, Paul, and that once and again; but Satan hinders us (1 Thess., ii, 18). The hindrance wrought by Satan was probably in the form of an arrest return given by Jason and some friends (Acts, xvii, 9). Being unable to follow the yearnings of his heart, Paul sent Timothy to save the flock from the ravaging wolves (1 Thess., ii, 2). The Acts make no mention of this legation of Timothy from Athens to Thessalonica. Not long after, Paul writes for Corinth (Acts, xviii, I). Thither Timothy, who returned from Thessalonica, brought back an eyewitness's testimony as to the conditions of the faithful of that city. Rendel Harris, in "The Expositor," (1898), 167, thinks that the Thessalonians sent Paul a letter by Timothy and, to make his theory, appeals to I Thess., i, 2, 5; ii, 1, 5, 9-13; iii, 3-4. There may be some ground for such conjecture in "We also" (καὶ ἡμεῖς) of I, ii, 13; "Also I" (ἐπίσημο) of I, iii, 5, and in "you have a good remembrance of us always" (ἐγνώρισεν ὑμᾶς γνώρισθε) of i, iii, 6. Be this as it may, whether by letter over by word, Timothy fully informed Paul of the needs of the Christian community at Thessalonica; and these needs were the occasion of the first Epistle to that community.

E. Contents.—No other letter of Paul to a Church is so free and easy and epistolary as is this letter; it defines strict doctrinal analysis and is more pastoral than doctrinal. Merely for the sake of a division, we may consider chapters i and iii as personal, chapters iv and v as doctrinal.

(1) Personal part—a missionary's free outpouring of a noble heart's yearnings. He is filled with joy at hearing how they stand fast by the faith which he preached to them (i, 2, 3); fondly talks about his labours and about his stay with them (i, 9-12); thanks God for the way they received from him the word of God (ii, 13-16); definitely hints at his apprehensions for them, by telling how at Athens he yearned to see them, how he sent Timothy in his stead, how relieved he now is that Timothy's message has brought him peace of mind (ii, 17-19, 10). Then follows a brief and beautiful prayer which sums up the yearnings of the great soul of the Apostle (iii, 11-13).

(2) Doctrinal part.—With this prayer ends what is meant to be free and epistolary. Now follows a little phrase of transition—"For the rest, therefore, brethren"—and a thoroughly Pauline and direct exhortation upon how they "ought to walk and to please God" by purity (iv, 1-8), brotherly love (iv, 9-10), and peaceful toil (verse 11). The peace of everyday toil had been disturbed by a fanatical
lethargy due to the supposed oncoming Parousia. Hence the eschatological passage that follows. The brethren who have died will have no part in the Second Coming just as they that are now alive (verses 12-17); the time of the Parousia is uncertain, so that watchfulness and not lethargy are needed (v, 1-11). The letter ends with a series of pithy and pointed exhortations to respect for their religious teachers, and to the observance of the general rules. A common feature of Christianity as a whole is emphasized (v, 12-22); the Apostolic benediction and salutation, a request for prayers and the charge that the letter be read in public (verses 23-28).

III. Second Epistle. A. Authenticity. (1) External Evidence.—MS. evidence is the same for II Thess. as for I Thess. so too is the eschatological character. The Apostolic and Apologetic Fathers are more clearly in favour of II Thess. than of I Thess. St. Ignatius, in Rom., x, 3, cites a phrase of II Thess., iii, 5, eis to epistheuomen to kuriou, "in the presence of Christ." St. Polycarp (XI, 3) refers the letter expressly to Paul, although, by a slip of the memory, he takes it that the Apostle glories (II Thess., i, 4) in another Macedonian Church, that of the Philippian; elsewhere (XI, 1) Polycarp uses II Thess., iii, 15. St. Justin (about a.d. 160), in a "Dialog." xxxii (P. G., VI, 544), seems to have in mind the eschatological language of this letter. Besides it is seen that Paul and Pauline in the Canon of Marcellus (about a.d. 140).

(2) Internal Evidence.—The literary dependence of II Thess. on I Thess. cannot be gainsaid. The writer of the former must have written the latter, and that too not very long thereafter. II Thess., ii, 15, and iii, 6, are to be explained by I Thess., iv, 1-8 and 11. The style of the two letters is admittedly identical; the prayers (i, iii, v, 23; ii, iii, 16, iii, 16), greetings (i, i, 1; ii, i, 2, 1, 2), thanks (i, 2; ii, i, 3), and transitions (i, ii, i, 3, ii, 1) are remarkably alike in form. Two-thirds of II Thess. is like to I Thess. in vocabulary and style. Moreover, the structure of the Epistle, its subject-matter, and its affectionate outbursts of prayer for the recipients and of exhortation are all decidedly Pauline characteristics. The argument from internal evidence is so strong as to have won over such critics as Harnack (Chronologie, I, 2), Lohse (Einleitung), Elliger, Ellendt, Baur, Weiser, and others deny the force of this argument from internal evidence. Its very similarity to I Thess. in vocabulary, and style, and in subject-matter, is held by the author himself to be Pauline; the author was a clever forger, who, when his sheet was turned up, took it as it lay. The letter has been no motive assigned for such a forgery; no proof given that any post-Apostolic writer was so cunning as to palm off this letter as a Pauline imitation. Eschatology of Paul.—The chief objection is that the eschatology of II Thess. contradicts that of I Thess.: the letter is in this un-Pauline. In I Thess., iv, 14-5, the writer says the Parousia is imminent; in II Thess., ii, 2-12, iii, 11, the writer sets the Parousia a long time off. Non-Catholic who hold the Pauline authorship of the two letters generally admit that Paul predicted the second coming would be within his own lifetime and deem that the signs narrated in II Thess., ii, as preludes to that coming do not imply a long interval nor that Paul expected to die before these signs occurred. Catholics insist that Paul cannot have said the Parousia was to be during his lifetime. Had he said so he would have erred; the inspiration of the Church would have corrected the error of the Holy Spirit more than of Paul. True, the Douay Version seems to imply that the Parousia is at hand: "Then we who are alive, who are left, shall be taken up together with them in the clouds to meet Christ, into the air, and so shall we always be with the Lord" (I Thess., iv, 16). The Vulgate is no clearer: "Nos, qti vivimus, quireuidem sumus" etc. (iv, 15-17). The original text solves the difficulty: "quiescimus in pace." The eschatology of II Thess. is not Hellenistic syntax, but parallels the Attic. The sentence is conditional. The two participles present stand for two futures preceded by en; the participles have the place of a prothesis. The translation is: "We, if we be alive—if we be left—(on earth), shall be taken up etc." The Armenian text reads: "in me, I in thee, out of me, thou out of me" (cf. Moulton, "Grammar of New Testament Greek,") Edinburgh, 1906, I, 230). St. Paul is here no more definite about the time of the Parousia than he was in I Thess., v, 2, where he wrote that "the day of the Lord shall so come, as a thief in the night." There is a similarity in Paul's eschatology; the very same indeterminateness about the date of the Parousia of the two letters, the eschatological sayings of Jesus as related in the Synoptics (Matt., xxiv, 5-45; Mark, xiii, 7-37; Luke, xxii, 30-36). "Of that day or hour no man knoweth, neither the angels in heaven, nor the Son, but the Father" (Mark, xiii, 32). In the deposit of faith given by the Father to the Son, to be given by the Son to the Church, the time of the Parousia was not contained. We readily admit that St. Paul did not know the time of the Parousia; we cannot admit that he knew it wrong and wrote it wrong as the inspired Word of God and a part of the deposit of faith. For the further proof that the apocalyptic character of ii, 2-12, is post-Pauline and dependent upon so late a composition as the Apocalypse of John (a.d. 93-96) or, worse still, upon the Nero redivivus story (Tacitus, "Hist.", II, viii), we answer that this assertion is entirely gratuitous. St. Paul got his apocalyptic ideas from the very same source as John, that is either from revelation to himself or from the Old Testament or from tradition. Most of the details of his apocalyptic description of the Parousia are given in other apocalypses (I John, ii, 18; Matt., xxiv, 24; Luke, xxii, 8; Mark, xiii, 22; Deut., xiii, 1-5; Ezek., xxxvii and xxxix, Dan, vii-xi, xi, xii). The man of sin, Antichrist, Belial, the well-nigh complete triumph of evil just before the end of time, the almost general apostasy, the portents, and other items are features familiar to Old-Testament and New-Testament apocalyptic writings.

C. Canon.—The canonicity of II Thess. has been treated together with that of I Thess.

D. Occasion.—The eschatology of I Thess. had been misunderstood by the Thessalonians; they took it, the day of the Lord was at hand (ii, 2); they were overwrought by the exaggerations of some meddlers and perhaps by a forged letter which purported to have come from Paul (ii, 2; iii, 17). Moreover the disorderly conduct of some (iii, 6, 11) gave the Apostle no little concern; this concern he showed by the letter.

E. Contents.—The three chapters into which the letter is now divided, aptly analyze the thought. In the first chapter are a greeting, thanksgiving for the faith and love of the Thessalonians, and an assurance of divine recompense to all who love the Lord. In the second chapter is the main thought of the letter—the eschatology. Certain signs are detailed which must precede the Parousia. Until these signs appear, there is no reason for terror or taking leave of their senses. The third chapter is the usual Pauline request for prayers, a charge to avoid the
disorderly, a truly Pauline allusion to the example he set them, and the final identification of the letter by a greeting written with his own hand.

Of the Greek Fathers whose commentaries on I and II Thessalonica have come down to us, St. John Chrysostom is by far the most scholarly; Theodoret is pithy and to the point. Theodoret's name, however, for 440 years, he taught the Apostle to his ideas. Euthalius the Deacon depends on Theodoret's work; John Damascene on St. John Chrysostom. Among the Latin Fathers, the best known are Isidore of Seville (560-636) and Augustine (354-430). The latter's Sermon 8 (to the fortieth year of his faith; Primarius (about 550) collated the expositions of Ambrose, Pelagius, St. Augustine, and St. Jerome.

The greatest of the later commentators of more recent times are: Justinian (Lyons, 1612), a Lapide (Adenw, 1614), Cajetan (Rome, 1520), Salamon (Bologna, 1582), Keiser (Münster, 1632), McKet (Edinburgh, 1738), Monier (Paris, 1830), Mauvray (Paris, 1878), Roefert (Paris, 1885), Johannes (Berlin, 1886), Frit. Lübben (Ratisbon, 1887), P.L. (Paris, 1890), Picon (Paris, 1837), Peronne (Paris, 1881), Tournay (Paris, 1910). The chief Protestant commentaries of importance are: Adler (1889), Findlay (1904), Milligan (1905), Schmiedel (1892), B. Wrix (1898).

WALTER DRUM.

Thessalonica (SALONIKI), titular metropolis in Macedonia. It was at first a village called Alia, situated not far from Axios, the modern Vardar; it subsequently took the name of Therma, from the thermal springs on which it was located. In 1243, on which it was situated was then called the Thermaic Gulf. After having sheltered the fleet of King Xerxes and having belonged to the Athenians during the Peloponnesian War, Therma passed to the kings of Macedonia after the death of Alexander. Cassander, the son of Antipater, having enlarged the village and transported thither the inhabitants of the neighbouring villages, called it Thessalonica, in honour of his wife. Thenceforth the city grew steadily in importance. Unsuccessfully besieged by Amilcar Paulus, it only opened its gates after the victory of Pydna which took place in 168 B.C. The kingdom was then divided into four districts, each of which had its capital and its convent. Thessalonica was the capital of the second district. In 146 B.C. Macedonia was made a single province with Thessalonica as capital. This was the arrangement until the third and fourth century of our era, when four provinces were again formed. The proconsul had his residence at Thessalonica, as did later the prefect of Illyricum Orientale, who first resided at Salonica. During the civil war civil war

Thessalonica was the principal headquarters of Pompey and the Roman Senate; during the second it supported Antony and Octavian against the Triumvirate being from them after the battle of Philippi the title of free city and other advantages, being allowed to administer its own affairs and obeying magistrates called poliarchs.

Thessalonica received the title of colonia under the Emperor Valerian. Theodosius the Great punished the revolt of its inhabitants (390) by a general massacre in which 7000 were slain. In 479 the Goths attacked the city. Between 675 and 681 the Slavs unsuccessfully besieged Thessalonica four times. On 31 July, 904, a Musulman corsair, Leo of Tripoli, captured and set fire to the city, then the second in the empire, captured and pillaged it, and took away a great many prisoners. A dramatic account of the affair was written by a priest of Thessalonica, John Caramenites, who was an eyewitness (Schlumberger, "Nicéphore Phocas", Paris, 1865; Christian of Slavonia, who joined the fleet of 200 ships and by land with an army of 50,000 men; the city was captured, and all resistance from the Greeks perished with death. In the following year the city was recaptured by the Byzantines; the metropolitan Eustathius wrote an account of the campaign in a homily, which was read during the Lent of 1186. In 1204, after the Latins had occupied Constantinople and a portion of the Byzantine Empire, Boniface, Marquis of Montferrato, proclaimed himself King of Thessalonica, setting up an independent empire, the rival of that of Nicaea, with Theodore Comnenus as first sovereign. He was defeated in 1230 at Klokotnitsa by the Bulgar Tzar, Assen II, and most of his empire passed into the hands of the Bulgars. Thessalonica with the remaining cities was given to Theodore's brother, the Emperor Manuel.

In 1242 after a successful campaign against the Emperor of Thessalonica, John Vatatzes, Emperor of Nicaea, forced John Angelo to take only the title of despot and to declare himself vassal. After the battle of Vachtemi in 1243 Thessalonica, independent and annexed to the Empire of Nicaea which in 1261 was once more removed to Constantinople. Unable to defend it against the Turks, the Greeks in 1423 sold Thessalonica to the Venetians, the city being captured 28 March, 1430, by the Sultan Murad and definitively incorporated in the Ottoman Empire. It was the scene of unheard-of cruelties on the part of the Turks. In order to weaken the Greek element, so powerful in the city and in that part of Macedonia, the Sublime Porte offered a refuge about the end of the sixteenth century to the Jews driven from the area and soon they numbered over 120,000 inhabitants; the remainder of the population consists of Turks, Greeks, Bulgarians, Armenians, and nearly 3000 Catholics. The parish is directed by the Lazarists, the schools by the Christian Brothers. Thessalonica, which is the capital of a vilayet, grows constantly in importance, owing to its situation and its commerce, as well as to the part it played in the two military revolutions of 1908 and 1909 which modified the administrative régime of the Turkish Empire.

The establishment of Christianity in Thessalonica seems to date from St. Paul's first journey to the city (see THESAULONIANS, EPISTLES TO THE). Sosipater and Aristarchus, companions of St. Paul, were natives of Thessalonica (Acts, xx, 4); Demas who abandoned the Apostle to go thither, seems likewise to have been born there (II Tim., iv, 9). According to Origen, who repeats an ancient tradition ("Comment. in Ep. ad Rom.", in P. G., XIV, 1289), Gaulus was the first Bishop of Thessalonica. Four persons of this name are mentioned in the New Testament, but the Gaulus of Origen would be a native of Corinth (I Cor., i, 14). Melito of Sardes relates that Antinius Plutus wrote to the Thessalonians not to tolerate in their city the terrors of the Christians (Cusebuis, "Hist. eccl.", IV, 26). Alexander assisted at the Council of Nicaea in 325, at Tyre in 335, and at the consecration of the Holy Sepulchre in the same year. At the end of the same century Aelius Euthydemus the Great, a Deacon who has compiled a list of the Greek titulars of the city of Thessalonica and of those who belong to it. Father Petit continued his task and gives a biographical account of more than 130. The most famous were: Rufus, who in the early fifth century a c. 700 was a convert and assiduously between the papacy and the Eastern Churches; Eusebius, the correspondent of St. Jerome; Theodorus of Ancyra, who wrote a work in ten books against the Monophysites; John, who early in the seventh century compiled the first book on the miracles of St. Demetrius; St. Joseph,
brother of St. Theodore the Studite, and the victim in 332 of the Iconoclast persecutions; Leo the Philosopher, professor at the Magnaura, the master of Photius, and of all the literary celebrities of the period; Michael Chunoos, the author of several canonical treatises in the twelfth century; Basil of Achrida, who took part in the theological discussions with the envy of Photius or of the Emperor of the West, Eustachius, the celebrated scholastic of Homer; Gregory Palamas, the defender of the Hesychast theories and the bitter enemy of the Catholics in the fourteenth century, who is still regarded as one of the greatest doctors of the Schismatic Church; Isidore of Cion, a Canonist, d. in 1202, a year before the capture of the city by the Turks.

When Illyricum Orientale, comprising the two civil Dioceses of Dacia and Macedonia, was ceded by Gratian in 379 to the Empire of the East, Pope St. Damasus in order to retain jurisdiction over these distant provinces appointed the Bishop of Thessalonica his vicar Apostolic. In this capacity the bishop presided at the local councils of the various provinces, judging and solving difficulties, save in more serious matters, wherein the decision was reserved to the pope. He also confirmed the election of metropolitans and suffragans, bishops and priests, and heard and pronounced on causes presented to him.

Finally, he occupied a privileged place at the ecumenical councils and signed their decisions immediately after the patriarchs. He thus enjoyed the prerogatives of a patriarch, even to holding the title, but was subject to the Patriarch of Rome. The Bishop of Constantinople sought to modify this organization by inducing Theodosius II to pass a law (14 July, 421) which attached all the bishops of Illyria to the Byzantine Church, and by having this law inserted in the Code (439); but the popes protested against this injustice and prevented the application of the law. Under Ulpian 535 the vicar of Illyricum Orientale was made a cardinal. The province of Thessalonica continued to occupy the six others: Macedonia Prima, Thessalia, Achaia, Creta, Nova and Vetus Epirus. Matters remained so until 732 when the Emperor Leo the Isaurian, after his excommunication by the pope, connected all the bishops of Illyria with the Patriarchate of Constantinople, and Theologia continued to be independent of Rome. Thessalonica was dependent on the Church of Byzantium.

After the establishment of the Latin Kingdom of Thessalonica in 1205 Nivel de Chérisy, Bishop of Soissons, who had taken an active part in the Fourth Crusade, was appointed by Innocent III (10 December, 1206) first Latin archbishop of the city. He died in the following year; his successors were at first residential and afterwards titular (see list in Le Quen, "Oriens Christ." III, 1089-96; Eubel, "Hierarchia catholica mediæ ævi", I, 510; II, 275). From a letter of Innocent III written in 1212 we learn that Thessalonica had then eleven suffragans. Apart from the saintly bishops mentioned above Thessalonica had other saints: Agape, Irene, and Chionia, martyred under Diocletian; Agathodorus, deacon, and Theodulus, rector, martyred under Diocletian; Anysea, maid of Maximus, protector of the city, from whose tomb flowed an oil which worked miracles, and whose superb basilica has been converted into a mosque; David, solitary (sixth century); Theodora, d. in 892; etc. The Vicariate Apostolic of Macedonia, for the Bulgars, whose titular residence is Thessalonica, was established in 1833. It has upwards of 6000 Catholics, 26 residential stations, 33 secular priests, most of them married, 10 Lazarist priests, 21 churches and chapels, 27 primary schools for boys and girls with 1110 pupils. The seminary, directed by the Lazarists, is at Zeitenlik, near Thessalonica. The Sisters of Charity and the Bulgarian Eucharistine Sisters also have schools and orphanages.

Le Quen, Oriens christ., II, 27-66; Tafel, De Thessalonicae civitatis aetate (Berlin, 1839); Brücher, Observations critiques et sur les monuments de la ville de Thessalonique en Histoire de l'Église des Dames de Cluny (Paris, 1844); De Thessalonica in Echos d'Orient, IV, V, VI, and VIII; Duchesne, L'Illyricum ecclésiastique in Byzantinae Zeitschrift, I, 531-50; Mucchi, Novelle archiache in Echos d'Orient, XIV, 29-36; Missiones catholicae (Rome, 1907), 798; Chasté, Encyclopédia biblica, s. v. S. VAILLÉE.

Thessate, titular see of Numidia. The city seems to have had some importance even prior to Christianity. During the first century of our era the Legio III Augusta resided there before being transferred to Lambassia. It was made a colonia probably under Trajan. There is mention of a council held there by the Donatists. Among its saints were St. Lucius, his bishop, who in 256 assisted at the Council of Carthage and died for the Faith two years later; St. Maximilianus, martyred 12 March, 296; St. Crispina, martyred 5 December, 304. Some of the old bishops are known: Rupin, who was exiled in 411; Felix exiled by the Vandals in 484; Palladius mentioned in an inscription. It was rebuilt by the patrician Solomon at the beginning of the reign of Justinian, and he built a tomb there which still exists. Under the Turks Thessate had a garrison of janizaries. Since 1851 it has been occupied by the French. Under the name of Tebessa it is the capital of a canton of the Department of Constantine in Algeria. It has 7000 inhabitants of whom about 1200 are Europeans. It has a Catholic parish. Tebessa is very rich in ancient monuments, among them being a triumphal arch of Caracalla, a temple, and Christian basilicas of the fourth century 216 feet long by 72 feet wide, near which are buried a number of pious persons.

S. VAILLÉE.

Thibaris, titular see in Byasaena (Africa), not mentioned by any ancient author. The official list of the Roman Curia places it in Byasaena, but in reality it belonged to Africa Proconsularis. An inscription fixes the exact site at the ruins now called Henshir Hamamet, in a plain watered by the Wady Tibr which has retained the name of the city. The ruins are situated about five miles north-east of Djebba, near the Djebel Gorra Tunisia. There are galena and calamine mines at Djebba. The former were worked even in ancient times and are mentioned in a letter from St. Cyprian to the faithful of Thibaris (Ep. 11). The chief ruins are those of an aqueduct and a Christian church. Nearby is the monastery dedicated to St. Joseph of Tibr, where the White Fathers receive chiefly Algerian Kabyles. Two bishops of Thibaris are known: Vincent, present at the Council of Carthage in 256, and Victor, at the Conference of Carthage in 411, where his rival was the Donatist, Victorion.

S. PÉTRIDÈS.

Thibaut de Champagne.—Thibaut IV, Count of Champagne and King of Navarre, a French poet, b. 1201, at Troyes; d. 8 July, 1253. He was the posthumous son of Thibaut III, Count of Champagne and Blois, and Blanche, sister of Sancho VII, King of Navarre. He had to defend his rights to his countship first in 1221 against his brother, then against his uncle, Airé, Queen of Cyprus. During the minority of Louis IX, he first sided with the
nobles against Blanche of Castile, but he soon separated from them, and being attacked by them, he was defended by the queen. In 1234, his uncle Sancho VII having died childless, he succeeded him as King of Navarre. He was the leader of the crusade organized in 1239 by Gregory IX, and landed at Acre on the first of September, fought several un-successful battles, and after his troops were decisively defeated at Gaza, he left Syria on 1 September, 1240. In order to assure the seal of the nobility for the defense of the Holy Land, he composed four songs, known as Crusade songs, which rank among his best; their literary value is equal to their Christian inspiration. Very little is known of his life after he returned from his

campaign in Palestine. There is some uncertainty concerning the place where he died, at Provins, Troyes, or in Navarre. He is regarded as one of the greatest lyrical poets of the thirteenth century. His rhythms are most harmonious, his combinations of metres show a real skill, while his expressions are full of refinement and true sentiment. His verses have been published, under the title of "Poesies du Roi de Navarre", by Lévesque de la Ravallière (Paris, 1742). They consist of sixty-six poems, divided as follows: thirty-nine love songs, twelve jeux-partis, or debating songs, four Crusade songs, and eight serventeins. Dante and Petrarch had the greatest regard for this poet and spoke of him in most laudatory terms.

LOUIS N. DELAMARRE.

Thierry of Freiburg (or of Saxony), a philosopher and physician of the Middle Ages, and a member of the Order of Saint Dominick. With a degree of certainty identify him with Frater Theodoricius, who in 1283, was named prior of the convent of Würzburg, but there is abundant evidence that at the Chapter General held at Strasburg (1293) he was made superior general of the province of Germany, holding this post until 1296. In 1297 we find him at Paris, teaching the "Sentences" of Peter Lombard; in 1303, at Coblenz; and in 1304, at Toulouse, taking part in the Chapter General of his order. In 1310, the Chapter General of Plessis appointed him Victorius Provinciae Teutonicae, while awaiting the nomination of a new provincial. Nothing is known of his after life.

Thierry was a very active writer. A list of the works of Dominican authors, compiled in 1330, ascribes to him thirty-one different treatises, twenty-one of which are still in existence, on the most diverse subjects of theology, metaphysics, and cosmology. But the one which especially redounds to the glory of Thierry is that composed in 1304, "De Fride", for the Chapter General of Toulouse, at the request of Améric de Plessis, superior-general of the order. Therein with wonderful clearness Thierry describes the different reflections and refractions of every ray which forms either the first or second rainbow. This experiment was made with a spherical drop of water. Further-
was seeking assistance for defeated France. On 8 Feb. 1871, he was elected deputy by twenty-six departments, and nine days later the National Assembly almost unanimously elected him chief executive. He negotiated the Treaty of Frankfort and induced the Assembly of Bordeaux (1 March, 1871) to ratify the peace preliminaries. The rigorous measures by which he constrained the Commune of Paris made him enemies for him. It is still a debated question whether he might have saved the life of Mgr Darboy by consenting to release the revolutionist Blanqui. Several episcopal nominations made under Thiers by the philosopher Jules Simon, minister of public worship, redounded to the glory of the French episcopate. After the treaty with Germany (15 March, 1872) for the evacuation of French territory the National Assembly declared that Thiers deserved well of his country. But the defeat at Paris of his friend Rémusat by the Radical Barodet and the subsequent disturbances among the Monarchists in the Assembly induced Thiers to resign his office 24 May, 1873. He was succeeded by MacMahon. Having thus given up power Thiers took his seat in the Left Centre of the Assembly amid the applause of the Left; and although the advanced members of the Left, because of his official position, treated him as a "sinister old man," he upheld with all his strength and prestige during his last years a policy designed to bring about the defeat of the Right and of MacMahon. His long career sometimes seems inconsistent. After having contributed by his historical works to the prestige of Napoleon I and by his vote to the election of the future Napoleon III to the presidency of the Republic, he became the adversary of the Empire. After having supported anti-religious Liberalism under the Restoration and the monarchy of July, he supported the Catholic claims under Charles X and during his exile under the Third Republic he assisted the anti-clerical parties. But the unity of his life consisted in his always being the defender of a certain category of ideas, aspirations, and interests proper to a social class—the bourgeoisie; and his book on the right of ownership (1818), besides being very interesting as a document, is the expression of an individualistic conception, more pagan than Christian, of the right of ownership, one which is the very antithesis of social Christianity. He was buried with the rites of the church.

GEORGES GOYAU.

Thietmar of Merseburg. See Dithmar.

Thignica, titular see in Numidia. The Roman Curia's official list of titular sees places Thignica in Numidia. It belonged to Proconsular Africa. In 1934, the tracts are called Ain Tounga, south-west of Testour, Tunisia. They are very extensive and cover the summit and slopes of a series of hills. One inscription calls it "Civitas Thignicensis" and states that it was divided into three parts, another that it became a municipium at the beginning of the third century under the name of "Thignonum Herculeum Fruglerum Thignica." Towards the centre of the ruins is a Byzantine fortress, trapezoidal in shape, flanked by five square towers. Here an inscription makes mention of the procurator Domitius Zemophilus (320-32), famous in the annals of Carthage. Among the ruins is the triumphal arch, a temple, a Christian church, the remains of the enclosure, etc. Despite the splendour and importance of this town we know only one bishop, Aulfidus, who assisted in 411 at the Conference of Carthage where he had a Donatist rival.

S. PÉTRIDIS.

Thijm, Joseph Albert Alberdingk, b. at Amsterdam, 8 July, 1820; d. there, 17 March, 1889. After finishing his studies in his native city, he took up a commercial career. But this prosaic occupation did not smother his talents. Art and literature had a great attraction for him. He made editor-in-chief of the literary world as an art critic in the "Spectator" in 1842, and immediately attracted great attention by his views and his style. The following year he published an essay on the spelling of hybrid words, in which he came out as a philologist. In his poems, which are numerous and take rank with what is best in the Dutch poetry of the nineteenth century, he shows that he is a disciple of Bilderdijk. This he himself declares in his celebrated poem "U min ik, Oude met uw strevegeheelde trekken" ("I love you, old one, with your rugged features"). In his triple capacity of art critic, philologist, and poet, he wrote from 1842 to 1889 that he not only led the way for Catholics and laid the foundation of Catholic literature, but became one of the foremost writers of the Netherlands of the nineteenth century.

His whole activity, all his writings, bear the stamp of Catholicity. No one attacked Catholic art or Catholic history without having to reckon with Thijm. "Nil nisi per Christum" was his motto. By his writings and the earnest character of his Catholicism Thijm played one of the most influential roles in the Catholic revival. To him is due no less than to Dr. W. Lüth, and Mgr. J. Smits, first editor-in-chief of "De Tyd," the restoration of the hierarchy in the Netherlands. In 1852 Thijm sent a memorial to Rome setting forth the historic reasons for considering Utrecht to be the traditional archiepiscopal see of Holland, and the anxiety of the Catholics at that time that the historic tradition be not broken. Besides the periodical "Dietische Warande" which he edited from 1855 to 1886, the people's almanac for the Catholics of the Netherlands (1852-80), and numerous collections in defence of the Church and church history, his most important works are: "Het Voorgebied," "Palet en Haard," "Erten van den Vondel," "Verspreide Verhalen," "Kerstvierden," "De la Littérature Néerlandaisë," "Karolingische Veshalen," "De Heilige Linie." His last efforts were devoted to the preparation of a complete edition of the works of van den Vondel.

Alberdingk Thijm (Amsterdam, 1896); Bakker, Het literair ambacht in Nederland en Kreken (Harlin, 1881); Leenemans, Historie van de lezeren "Maatschapjë van Letterkdere van Leiden" (Leiden, 1889).

P. ALBERS.

Thijm, Peter Paul Maria Alberdingk, brother of the foregoing, b. at Amsterdam, 21 Oct., 1827, d. at Louvain, 4 Feb., 1883. He made his studies in his home city, at first at the Gymnasium, and later at the Athengium, from which he graduated in letters and history in 1857. For some years he was instructor in history in Maestricht. After being called to a professorship in the University of Louvain in 1870, he succeeded in establishing a chair for the special study of the Church history in the Flemish language. Although not as gifted as his elder brother, he had a great deal of the latter's enthusiasm for literature and art and was an ever ready champion of the Christian ideal in art. This savant of artistic temperament and zeal contributed not a little to the revival of the Flemish writer. The ruins are his birthplace. He was President of the Association Tijd en Vlijt and of Constantius Buter. He was also a member.
of the Flemish Academy, and, for a time, its President. From 1888 on, Paul Thijm edited the periodical "Dietse Warande", which was in this way transferred to the care of the young priest. It was thus, for instance, that the scholars of the Academy of Ghent were led to the "De H. Willibrord, Apostel der Nederlanden" (1867); "Karel de grote en zijne eeuw" (1866); "Gestichten van liefdadigheid in België, van Karel den Grote tot aan de XVI eeuw", awarded a prize by the Royal Academy of Brussels (1889); "Scheets der Algemeene Geschiedenis" (1870); "Verae Spes van H. Marnix" (1876); "Spiegel van Nederlandsche letteren" (1877).

P. ALBERS.

Thimelby, Richard (alias Abbot), missionary priest, b. in Lincolnshire, England, 1614; d. at St. Omer's, Belgium, 7 Jan. 1672. He entered the Society of Jesus in 1632. Having taught philosophy and theology at Liège for about sixteen years, he was sent to England where he laboured for the most part in his native county. In 1666 he became Master of Novices at Ghent, and Rector of St. Omer's, Belgium, in 1668. He remained until his death. A translation of Father Binet's "Treatise on Purgatory" was edited by Father Anderdon in 1874. He also wrote a controversial work entitled "Remarks on Stillingsfleet" (London, 1762).

EDWARD F. SPILLANE.

Third Orders.—I. GENERAL—Third Orders signify in general lay members of religious orders, i. e. men and women who do not necessarily live in community and yet can claim to wear the habit and participate in the good works of some great order.

A. Origin.—The general idea of lay people affiliated to religious orders, as seen in the Benedictine Oblates (q. v.) or confraters (Taunton, "Black Monks of St. Benedict", London, 1897, I, 60–63; for Norbertines cf. Hurter, "Papst Innocenz III", Schaffhausen, 1845, IV, 148), is too natural for there to be any need to seek its origin. Founders and benefactors of monasteries were in a spiritual family and were clothed in death in some religious habit. So too the Templars had a whole system whereby layfolk could partake in some sort in their privileges and in the material administration of their affairs (English Hist. Rev., London, April, 1910, 227). But the essential nature of the tertiary is really an innovation of the thirteenth century. At that date many of the laity, impatient of the indolent and sometimes scandalous lives of the clergy in lower Europe, were seized with the idea of reforming Christendom by preaching. This admirable intention caused the rise of the Vaucouleurs of Valère de Lyon ("Anecdotes Historiques tirés du Recueil inédit d'Etiene de Bourbon, O.P.", ed. by Lecocq de La Manche, Paris, 1878, 290–314), and under somewhat more curious conditions the Frères Humiliati. The Vaucouleurs were at first welcomed by the pope, Alexander III, who authorised their preaching, but as they were unacquainted with the clerical teaching and had pursued no clerical studies, their sermons were not seldom dogmatically inaccurate and eventually defiantly heretical. The Humiliati also soon became suspect and were forbidden by Lucius III to preach, till in 1207 Innocent III gave a section of them permission to resume their work, provided that they limited themselves to moral questions. They did not venture on doctrinal subjects ("De articulis fidei et sacramentis ecclesiae", cf. Denifle, O.P., "Archiv für Litteratur und Kirchengeschichte des Mittelalters", I, 419). Moreover some became priests, were gathered into a cloister, and took up religious life. The others remained outside, yet spiritually dependent on the clerical portion, and now for the first time in history called a Third Order, Terziario Ordinario (Mandonnini, "Les Origines de l'Ordre des Penitentia"; the bull is to be found in Tiraboschi, "Vetere Humiliatorum monumenta", II, Milan, 1766–68, 139).

B. Division.—The Third Orders can each be divided into (a) regulars, i. e. living in convents, and (b) seculars, i. e. living in the world. Of these the first take vows, the latter can only make a solemn promise (except that Carmelite Tertiaries apparently take some sort of vows of obedience and chastity, cf. Angelus a S.S. Corde, O.C.D., "Manuale juris communis Regularium", Ghent, 1899, q. 1067), which, however, does not determine the character of the confraternities and constitutes them legally a religious order (Constitution of Leo XIII, "Misericors Dei Filiius").

C. Members.—Any Catholic may join a Third Order, but may not at once belong to more than one, nor may he without grave cause leave one for another. The laying aside of the distinctive sign or prayers for any space of time does not in itself put an end to membership with a Third Order, but the deliberate wish to dissociate oneself from it is sufficient to produce that effect (S. Cong. Indulg., 31 Jan., 1899).

Privileges.—The Order participates in all the indulgences granted to the First and Second Orders (S. Cong. Indulg., 28 Aug., 1903), but not in those granted to the Secular Third Order (ibid.). This latter no longer participates in any privileges save those directly granted to itself (S. Cong. Indulg., 31 Jan., 1893; S. Cong. Indulg., 18 July, 1902; S. Cong. Indulg., 28 Aug., 1903).

BIRDS JARRETT.

II. THIRD ORDER OF OUR LADY OF MOUNT CARMEL.—Soon after the Order of Our Lady of Mount Carmel was established in Europe in the thirteenth century, lay persons, not bound by religious vows, seem to have attached themselves to it more or less. There is evidence of the existence of a "Confrarie N.-D. du Mont-Carmel" at Toulouse in 1273, and of a "Compagnia di Santa Maria del Carmino" at Bologna in 1280, but the exact nature of these bodies is uncertain owing to a lack of documents. Somewhat later mention is frequently made of trade-guilds having their seat in churches of the order, members of which served as the clergy. Thus the master-bakers, innkeepers and pastry-cooks at Nîmes, the barbers and surgeons of the same town, who were also connected with the Dominicans, the goldsmiths at Avignon. Benefactors of the order received letters of fraternity with the right of representation in the privileges and good works of the friars. Others, under the name of bizzocche and mantellate, wore the habit and observed the rule, e. g. "M. Piccola nostra Pinsochaera" at Florence in 1305. Others again became recluses in the anchorages attached to Carmelite churches, and made profession in the form: "Ego, annis tertio et anchoereticam vitam vocatus offero me, coram Deo, Patri et Filio et Spiritui Sancto, et promitto me in servitio Dei secundum Scripturam sacram Novi et Veteris Testamenti more anchoreticae vitae usque ad mortem permaneunum." Among the tertiaries not
living in community must be mentioned Blessed Louis Morboli of Bologna (d. 1495), whose death occurred at the middle of the fifteenth century, when a community of Beguines at Guelders sought affiliation to the order, and Blessed John Soreth, General of the Carmelites, obtained a Bull (7 Oct., 1452) granting the superiors of his order the faculties enjoyed by the Hermitage of St. Augustine and the Dominicans of canonically establishing convents of "virgins, widows, beguines and mantellate". Further legislation took place in 1476 by the Bull "Mare magnum privilegium et sub Bene dicti XIII and his successors. The rule observed by these houses, whether living in or gathered into communities, was originally that of the friars with modifications as required by their status. Theodor Stratus, General of the Calced Carmelites, composed in 1635 a new rule, revised in 1678, which is still observed among the tertiaries of the Calced and the Discalced Carmelites. It prescribes the recitation of the canonical office, or else of the Little Office of the Blessed Virgin, or, in its place, of the Pater noster and Ave Maria to be said thirty-five times a day, five times in lieu of each of the canonical hours; also half an hour's meditation morning and evening; fasting on all Fridays and also on Wednesdays and Saturdays from 14 September till Easter, abstinence during Advent and Lent, and various works of mortification, devotion, and charity. Superiors may in their discretion dispense from some of these obligations.

It is impossible to estimate even approximately the number of tertiaries living in the world. Besides these there are numerous corporations of tertiaries established in different countries, viz. two communities of tertiary brothers in Ireland (Drumcondr and Clondalkin near Dublin) in charge of an asylum for the education of boys and young men; two communities of native priests in British India belonging partly to the Latin and partly to the Syro-Malabar rites; four houses of Brothers of Christian Education in Spain. Far more numerous are the communities of nuns, namely twenty-three in India (Latin and Syro-Malabar rites) for the education of native girls, and four convents in Syria in connexion with the missions of the Order; two congregations of tertiaries in Spain with nineteen and forty-eight establishments respectively, and one unattached, for educational work. In Spain there are also tertiarys called "Carmelites of the Sacred Heart" devoted to works of charity with 150 establishments. The Austrian congregation of nuns numbers twenty-seven houses, while the most recent branch, the Carmelite Tertiaries of the Sacred Heart, founded at Berlin towards the end of the last century for the care and education of orphans and neglected children, have spread rapidly through Germany, Holland, England, Switzerland, Italy, Austria, and Hungary, and have twenty houses. In Italy there are three different congregations with thirty-two convents. There are smaller branches of the tertiaries in South America with two houses at Santiago, Chile, in Switzerland with four convents, and in England with one.

Bullarium Carmelitanum (Rome), 1715 seq.: Catalogus con generally with one.

Benedict Zimmermann.

III. THE THIRD ORDER SECULAR OF THE ORDER OF OUR LADY OF MOUNT CARMEL has been introduced into the United States. There are at present two congregations, with 125 members.

Ferdinand Heckmann.

IV. THIRD ORDER OF ST. DOMINIC.—Origin.—This was one of the earliest developments of St. Francis's Ordo de Penitentia. It was not indeed the primal organism from which the Friars Preachers evolved, but rather represents that portion of the Order of Peniten tia which was influenced by this order. At first vaguely constituted and living without system or form, its members gradually grew more and more dependent on their spiritual guides. The maxims was reached, and the work of St. Francis received its final perfection, when Mution de Zamora, the seventh master-general of the Friars Preachers, formulated a definite rule in 1285. By this the Ordo de Penitentia was to be ruled in each local centre by a Dominican priest (Federici, "Istoria de cavaliere Gaudenti", Venice, 1787, Codex Diplomaticus, II, 35) and was to be subject to the obedience of the master-general. Whether more or less there was to be any of those vague transitions and extravagant vagaries (ibid., 28) which disfigured in history these Orders of Penance. Henceforward this branch was linked to the fortunes of the Friars Preachers, wore their habits of black and white (with few minor differences varying according to time and country), and was to participate in all their good works. They were not called a third order indeed until after the thirteenth century (Mandonnet, "Les règles et le gouvernement de l'ordo de Penitentia", Paris, 1902, p. 207) but continued to be called as "of St. Dominic" until the addition of "of St. Dominic", that is "The Brothers and Sisters of the Penance of St. Dominic".

Simultaneously with them there came into being another and very different institution which, however, subsequently amalgamated with the Ordo de Penitentia to form the Dominican Third Order. This was a military order, called the Militia Jesu Christi (soldiers of Jesus Christ) created for the defence of the Church against the Albigenses. It owed its origin to Bishop Fouquies of Toulouse, Simon de Montfort (Federici, "Istoria de cavaliere Gaudenti", Codex Diplomaticus, II) for boycott of the title of St. Dominic, then a canon of St. Augustine. This connexion with the founder of the Friars Preachers is first definitely propounded by Bl. Raymund of Capua, who became a Dominican about 1350. But the truth of this assertion is borne out by several other indications. As early as 1235, Gregory IX confided the Militia to the care of Bl. Jordan of Saxon, second master-general, by a Bull of 18 May (Federici, op. cit., 10); and in the same year he decreed for the knights a habit of black and white (op. cit., 14). Further, when the Militia was brought across the Alps into Italy, it was always connected with some Dominican church (op. cit., I, 13). Lastly, it was very largely influenced by a famous Dominican, Fra Bartolomeo of Braganza, or of Vicenza, as he is sometimes called (op. cit., I, 12, 42, etc.). Originally working side by side and independent of each other, owing to the fact that both received the same spiritual administration of the Friars Preachers, they appear to have been merged together at the close of the thirteenth century. This is what Raymund of Capua implies as the result of his researches. So too their ultimate coincidence is hinted at by Honorius III in 1221 when he designates the Militia "nomine penitentia" (Federici, Codex Diplomaticus, and a comparison also of the rules of the two institutions: that of Gregory IX for the Militia in 1235 (op. cit., 12-16) and that of Mution de Zamora for the Order of Penance of St. Dominic in 1285 (op. cit., 28) would lead one to think that there was only considerable difference that could be cited against this identity is that Mution de Zamora expressly forbids the carrying of arms. But this is in reality but a further proof of their approximation, for it allows for the one exception which could properly apply to the Militia (not to the Friars Preachers) (ibid., 22). This amalgamation is admitted by the Bollandists to have become general in the fourteenth
century (Acta Sanctorum, Aug. I, 418—422). From this double movement therefore, i.e. from the Ordo de Penitentia S. Dominici and the Militia Jesu Christi, there developed the Third Order. Though its source is therefore anterior to the First Order, its full perfection as an organized society, with a distinctive habit, a definite rule, and a declared *ethos* or spirit, is due to the genius of the children of St. Dominic. They took up the work of St. Francis and, with their characteristic love of order and systematic arrangement, brought it into something compact and symmetrical. From them this idea of subjection to a First Order was taken up by the Franciscans and has been adopted by all subsequent Third Orders.

And thus the work of the Third Order and its definite spirit may be summed up by saying that it was established first to help in reform of church discipline. Its initial purpose was the preaching of penance; but under Dominican influences it rather leaned to the intellectual aspect of the Faith and based its message to the world on the exposition of the Creed; it was to reform church discipline by the more widespread knowledge of the mysteries of faith. Secondly, to defend the Church. Originally this was a military necessity, demanding physical force with which to restrain equally material opposition. The third was the common prayer: the medieval ideal of Christ’s Mystical Body which has captivated all spiritual-minded people implies a harmony of prayer. To achieve this end the contemplative and monastic orders were begun; and the Third Order of St. Dominic endeavours to link pious souls to this great throng of religious (Prouter, “The Dominican Tertiary’s Daily Manual”, London, 1900, 15-20).

**Reformation.**—Only for one period in its history was there any real fear of suppression. Many held that the condemnation passed on the Beguines and Beghards at the Council of Vienna in 1312 applied no less to the Orders of Penance. In consequence the master-general petitioned Pope John XXII in 1326 to settle definitely the difficulty. As a result he answered by a Bull of 1 June, 1326 (Cum de Mulieribus), which is a long eulogy on the work of the Dominican Third Order. After the plague of 1348, a great deal of laxity and disorganization crept into the Third Order, and through the whole of the fifteenth century the order was almost in abeyance. The influence of St. Catherine of Siena gave a powerful impetus to the movement in Italy and her work was carried on by Bl. Clara Gambacorta (d. 1419) and Bl. Maria Mancini (d. 1431). This new spiritual vigour reached across the Alps to the south of Germany where the movement was almost abnormal (Heimbucher, “Die Orden und Kongregationen der katholischen Kirche”, Paderborn, 1907, II, 169-177). But there has never been any reform in the sense of a separate organization with a change of rule or habit. As in the First Order, there has been a peculiar gift of unicity which has enabled it to last undivided for seven hundred years.

**Divisions.**—The Third Order as it exists to-day can be divided into two categories: regular, i.e. comprising Tertiaries, whether men or women, who live in community and wear the habit externally; and secular, i.e. whether married or single, cleric or lay, who live their lives like others of their profession, but who privately take up practices of austerity, recite some liturgical Office, and wear some symbol of the Dominican habit. The origin of the conventual women Tertiaries has never been very clearly worked out. It is in the *Manual of the Order of Third Order of St. Dominic*, London, 1871, 9. But if the view taken above of the origin of the Third Order in the Ordo de Penitentia be correct, we are forced to the conclusion that the communities of women established by St. Dominic at Prouille, St. Sisto, etc. were really of this Third Order. Their constitutions, approved first for St. Sisto, though previously observed at Prouille, expressly speak of the nuns as “de Penitentia S. Mariae Magdalenae” (“Anal. Ordo Tertiarii Pred.”, RV, 528 sqq.). It would seem then that the Ordo de Penitentia did not exclude convents of enclosed nuns from its ranks, and this was due probably to St. Dominic himself. Very much later came a conventional order of men, originated by the genius of Père Écume de Brey. He conceived that the monastic spirit of the Dominican Order fitted it especially for the task of training the youth. But he knew how impossible it was for his preaching associates to tie themselves down to schoolwork among boys; as a consequence, he began, in 1552, a Third Order of men, wearing the habit, living in common, yet without the burdens of monastic life. The rule was approved provisionally in 1553 and definitely in 1588 (for the rule cf. “Acta Capituli Generalis Ord. Pred.”, Rome, 1904, 106 sqq.). But by far the greatest portion of the Third Order consists of secular Tertiaries. These are of every rank of society, and represent the old Ordo de Penitentia and the old Militia. In certain countries they are grouped into chapters, having a lay prior and sub-prior or priorex and sub-priorex, and hold monthly meetings. Since the Rule of Muno de Zamora (1288), they have always been subject to a master-general appointed by the Dominican provincial. For the actual recreation of the habit the master-general can give faculties to any priest. The full habit is the same as that of the members of the First and Second Orders, but without the scapular (granted, however, to communities since 1667). Though the habit is not worn during life many procure it so that they may be buried in the recognized dress of St. Dominic’s children.

**Extent.**—It is practically impossible to obtain, even in a vague way, the number of the secular Dominican Tertiaries. No general register is kept, and the records of each priory would have to be searched. From the time of St. Louis—who wished to join the Dominican and Franciscan Orders (Acta Sanctorum, August, V, 545), and is represented in old illuminations, sometimes in the habit of one, sometimes in the habit of the other (Chapotin, “Histoire des dominicains de la province de France”, Rouen, 1898, p. 497), but probably never joined a priory—nothing can be stated only that with the rise and fall of the First Order’s greatness rose and fell the number of the Tertiaries. In England during the thirteenth century very many are said to have become Tertiaries. But of this nothing for certain can be specified. At the time of St. Catherine of Siena, in the middle of the fifteenth century, the women Tertiaries (women secular Tertiaries) made difficulties about receiving her to the habit as they included at the date only widows (Gardner, “St. Catherine of Siena”, London, 1907, II), and there were no men at all in the Third Order in Italy at that date (Acta Sanctorum, April, III, 1851). Under Bl. Raymond of Capua, her confessor and, after her death, twenty-third master-general, attempts were made to re-establish the order and no doubt much was done (Mortier, “Maîtres généraux”, III, 605-606). But by the time of St. Antoninus (d. 1450) the numbers had again dwindled down to insignificance (“Summa Moralis”, Verona, 1750, III, 25, 5, 5, pp. 1291-2). Just previous to the Reformation there were a few isolated notices; thus Bl. Adrian Fortescue, the martyr, notes in his diary: “Given to the Black Friars of Oxford to be in their fraternity 121” (“Letters and Papers of the Reign of Henry VI”, London, 1810, 78). But these give us no ground at all for any surmise as to statistics. In America the first canonized saint (St. Rose of Lima, d. 1617) and the first beatified negro (Bl. Martin Porres, d. 1639) were both Dominican Tertiaries, and later in France were men like M. Olier and Bl. Grignon de Montfort.
Then came the influence of Laicresque, from whose time there dates a new enthusiasm in the Third Order ("Annae Dominicanae"); Paris, 1910, 149-65. Of the regular Tertiaries it is easier to speak more definitely. The numbers of all the sixteen approved congreations existing in 1902 are given, and they amount to some 7000 nuns ("Analecta Ord. Frad., Rome, 1905, 251). To these must be added another 7000 of nuns not yet definitively authorized by Rome. But every year fresh convents are opened and the numbers continually increase. In England they began under Mother Margaret Halahan (d. 1688) in 1842, and now in all the separate groupings there are 22 convents with some 500 sisters. The United States is at first unrecorded, but in 1861 it is marked. Founded in 1846 by Mother Amalie Barth (d. 1895), the congregation in 1902 included 34 convents and over 2000 nuns. In 1876 they passed into California, where they are rapidly increasing. In Ireland they have many establishments, especially for educational purposes, for their work is as varied as the needs of humanity require. Some are encloed, others teach, visit the sick, nurse the lepers, look after old people, take care of penitent girls, work among the poor in the slums, etc. As for the congregation of teaching men, they have been greatly disorganized since the foundation from which they comprise but a half-dozen colleges in Fribourg, San Sebastian, and South America, and do not amount to more than 100 members in all. Finally, a citation from Faber's "Blessed Sacrament" (2nd ed., p. 565) may be made: "Those who are conversant with, indeed who find the strength and consolation of their lives in, the Acts of the Saints well know that there is not a nook in the mystical Paradise of our heavenly spouse where the flowers grow thicker or smell more fragrantly than this order of multitudinous child-like saints. Nowhere in the Church does the Incarnation Wholly delight in being with the children of men in more touching simplicity, with more unearthly sweetness, or more spouse-like familiarity than in this, the youngest family of Saint Dominic."

BEDE JAHERTT.

V. THIRD REGULAR OF ST. DOMINIC, IN THE UNITED STATES.—Congregations of Women.—A. Sisters of St. Dominic:—

(1) Congregation of St. Catherine of Siena, with mother-house at St. Catherine of Siena Convent, Springfield, Kentucky. Founded in 1892 by Rev. Thomas Wilson, O.P. Sisters, 300; novices, 30; postulants, 7; academics, 6; schools, 13; pupils, 5000. By this congregation were founded: (a) Congregation of Dominican Tertiaries of the Blessed Virgin, with mother-house at St. Mary's of the Springs, Sheppard, Ohio; in 1893. Sisters, 195; novices, 26; academics, 3; schools, 12; pupils, 4493. From this congregation were founded (i) Congregation of mother-house at Sacred Heart Convent, Galveston, Texas. Sisters and novices, 81; postulants, 3; schools, 6; pupils, 1138. (b) Congregation with mother-house at the Convent of the Sacred Heart, Springfield, Illinois, in 1873. Sisters, 120; schools, 19; pupils, 4000, academy, 1. (2) Congregation with mother-house at St. Cecilia's Convent, Nashville, Tennessee. Founded in 1860 by sisters from St. Mary's, Somerset, Ohio. Sisters, 98; novices, 15; academies, 1; orphan asylums, 1; institutions for young ladies, 2; schools, 6; pupils, 1042. (3) Congregation of the Most Holy Name of Jesus, with mother-house at San Rafael, California. Founded in 1913 by Most Rev. Joseph Alemany, O.P., Archbishop of San Francisco, at Benicia, California. Sisters, 135; academies, 3; schools, 6.

(4) Congregation of the Holy Rosary, with mother-house at St. Clara's Convent, Sinaiawa, Wisconsin. Founded in 1847 by Rev. Samuel Ch. Massuchelli, O.P. Sisters, 650; college, 1; academies, 9; schools, in 1891; pupils, 14,300. (5) Congregation of the Holy Cross, with mother-house at Holy Cross Convent, Brooklyn, New York. Founded in 1853 by 4 sisters from Holy Cross Convent, Ratibison, Bavaria. Sisters, 518; novices, 25; postulants, 17; training school, 1; academics, 3; schools, 53; hospitals, 2; in 1891, 1; pupils, 17,750. From this congregation were founded: (a) Congregation of the Most Holy Rosary with mother-house at Mission San Jose, California, in 1876. Sisters, 193; novices, 20; postulants, 16; academy, 1; orphan asylums, 1; schools, 9; pupils, 2950. (b) Congregation of the Immaculate Conception, with mother-house at Great Bend, Kansas, in 1902. Sisters, 17; novice, 1; postulant, 1; hospital, 1; school, 1; pupils, 194. (6) Congregation with mother-house at Holy Rosary Convent, Second Street, New York City. Founded in 1859 by sisters from Holy Cross Convent, Ratibison, Bavaria. Sisters, 800; academies, 8; hospitals, 2; schools, 60; pupils, 25,000. From this congregation were founded (a) Congregation with mother-house at Great Rapids, Michigan, in 1877. Sisters, 187; novices, 50; postulants, 15; high school, 1; academics, 2; orphan asylums, 1; schools 32; pupils, 5000. (b) Congregation with mother-house at St. Dominic's Convent, Blauvelt, New York. Sisters, 139; novices, 11; postulants, 3; schools, 8; asylums, 1. (c) Congregation with mother-house at St. Dominic's Academy, Jersey City, New Jersey, in 1882. Sisters, 215; academics, 3; schools, 21; pupils, 4427. From this congregation were founded: (i) Congregation with mother-house at St. Thomas Aquinas Convent, Tacoma, Washington, in 1888. Sisters, 52; schools, 3; pupils, 300. (7) Congregation with mother-house at St. Joseph's Convent, Adrian, Michigan. Sisters, 180; novices, 25; academics, 3; schools, 29. (8) Congregation with mother-house at St. Catherine of Siena's Convent, Racine, Wisconsin. Founded in 1862 by Mother Benediceta Bauer and Sister Thomasina Ginker from Holy Cross Convent, Ratibison, Bavaria. Sisters, 286; postulants, 24; academics, 2; homes for ladies, 1; academy. Congregation with mother-house at St. Mary's Convent, New Orleans, Louisiana. Founded in 1860 by sisters from Cabra, Dublin, Ireland. Sisters, 57; academics, 2; schools, 2; pupils, 565. (10) Congregation with mother-house at Reno, Nevada; founded by sisters from New Orleans, Louisiana. Sisters, 4. (11) Congregation with mother-house at St. Catherine of Siena Convent, Fall River, Massachusetts. Founded in 1891 by sisters from Carrollton, Missouri. Sisters, 52.

B. Dominican Sisters of the Third Order of St. Dominic:—

Congregation with mother-house at the Convent of Our Lady of the Rosary, 63rd Street, New York City. Founded in 1867 by Father Rochford, O.P. Sisters, 160; novices, 10; postulants, 5; academy, 1; orphan asylums, 2; schools, 11; pupils, 4000. (2) Third Order of the Lady of the Sacred Heart was introduced into the United States by the early Dominican missionaries. There are at present congregations of Dominican Tertiaries in almost all the churches in charge of Dominican Fathers, numbering from 100-500 members, and many hundred tertians throughout the country not belonging to any congregation.

HEIMBUCHER, Die Orden u. Kongregationen (2nd ed., Pader-
and sisters have to assemble in a church designated by the ministers, and a religious has to give them an instruction (7); they also exercise the works of charity with their brothers (8); whenever a member dies the whole confraternity has to be present at the funeral and to pray for the departed (9); everyone has to make his last will three months after his reception; but the number of brothers to whom any gifts or other persons are to be settled personally, if any disputes arise with local authorities the ministers ought to act with the counsel of the bishop (10). No heretic or anyone suspected of heresy can be received, and women only with the consent of their husbands (11); the ministers have to denounce shortcomings to the bishop, who will punish the culprits. One year two new ministers and a treasurer are to be elected; no point of the rule obliges under pain of sin (12). On account of the prohibition of arms and unnecessary oaths, the followers of this rule came into conflict with local authorities, a fact of which we have evidence in many papal Bulls all through the thirteenth century, issued to safeguard the privileges of the Tertiaries (see list of these Bulls in Mandronet, "Les Règles", 146-47).

Wadding ("Annales Min.", ad a. 1321, n. 13) gives another longer redaction of the rule, which is almost identical with the one given by the first Bull of Nicholas IV through the Bull "Supra montem", 17 Aug., 1289. This last form has for long been considered as the work of St. Francis, whilst Karl Müller denied any connexion of St. Francis with it. If we compare the rule published and approved by Nicholas IV with the oldest text of 1221, we see that they substantially agree, slight modifications and different dispositions of chapters (here 20 in number) excepted. Through a most interesting text published by Golubovich (Arch. Franc. Hist., II, 1909, 20) we know now that this Rule of Nicholas IV was approved on the petition of some Italian religious communities and submitted to the approbation by Guerrini (Arch. Franc. Hist., I, 1908, 544 sq.) proves that there existed in the thirteenth century Third Order Confraternities with quite different rules. On the whole, it can safely be affirmed that until Nicholas IV there was no Rule of the Third Order generally observed, but besides the one quoted above, and probably the most widely spread, there were others of more local character. The same might be said as to the government of the confraternities. Besides their own officials, they had to have a visitor, who seems to have been usually appointed by the superiors of the Friars Minor. In 1262 at a provincial chapter of the Friars Minor were to assume the direction of the Tertiaries in Italy and Sicily (Bull. Franc., I, 464), but about twenty years later when St. Bonaventure wrote his question: "Why do not the Friars Minor promote the Order of 'Penitente'"? (Op. om., VIII, 308) the contrary had practically prevailed. Nicholas IV introduced unity of rule and of direction into the Third Order, which henceforward was entrusted to the care of the Friars Minor.

If we except a few points, bearing especially on fasting and abstinence, mitigated by Clement VII in 1526 and Paul III in 1547, the rule of life, which Nicholas IV remained in vigour till 1883, when Leo XIII, himself a tertiary, through the Apostolic Constitution "Misericors Dei Filius", modified the text, adapting it more to the modern state and needs of the society. All substantial points, however, remained; only the daily canonical prayers were reduced as also the fasts and abscences, whilst the former statute of confession and communion thrice a year was changed into monthly communion. Other points of the modified Rule of Leo XIII are of great social and religious importance, such as the prohibition of pom in dressing, of frequenting theatres of doubtful and keeping reading matter and books at variance with faith and morals. The direction is entrusted to
the three branches of the First Order: Friars Minor, Conventuals, Capuchins, and to the Regular Third Order. By delegation, confraternities can be established and directed by any parish priest. Those who for serious reasons cannot join a confraternity may be received as single tertiaries. Finally, great spiritual privileges are granted to all members of the Third Order.

The beneficial influence of the secular Third Order of St. Francis cannot be highly enough appreciated. Through the prohibition against carrying arms a deadly blow was given to the feudal system and to the everlasting factions of the time. By means of the confraternity's munificence, through the admission of poor and rich, nobles and common people, the social classes were brought nearer each other. How far the religious ideal of St. Francis was carried out by the secular Third Order we may judge from the great number (about 75) of saints and blessed of every condition it produced. It may suffice to mention: St. Elizabeth of Hungary; St. Louis, King of France; St. Ferdinand, King of Castile; St. Elizabeth of Portugal; St. Rosa of Viterbo; St. Margaret of Cortona; Bl. Umbiliana Cerchi; Bl. Angels of Foligno; Bl. Raymond Lullius; Bl. Luchesius of Poggio; etc. All these and many more, as the descendants of the original tertiaries of St. Francis; St. Ivo; and in our times Bl. Jean-Baptiste Vianney, the curé of Ars; of names celebrated in history for literature, arts, politics, inventions, etc., Dante, Giott, Petarch, Cola di Rienzo, Columbus, Vasco da Gama, Cervantes, Lope de Vega, Thomas More, Goya, Boccaccio, Galileo, Giordano Bruno, finally, Lady Georgiana Fullerton. Popes Pius IX and Leo XIII were members of the Third Order, as also is Pope Pius X. Since the adaptation of the rule by Leo XIII the Third Order has grown more active than ever. At present the total number of members is about two and a half millions, spread all over the world. National and local congresses have been held in different countries: seven in the period from 1894 to 1908 in France, others in Belgium, some in Italy, the first general congress in Assisi (1895), many local ones from 1909 to 1911; others have been held in Spain, the last one at Santiago in 1909; in Argentina the last one at Buenos Aires in 1906; in India, Canada, and in Germany and Austria, in the last two instances in connexion with general congresses of Catholics. There exist almost in all civilized languages numerous monthly periodicals which, whilst keeping up the union amongst the different confraternity institutions, give the true earnest of the spirit of its members. The "Acta Ordinis Frat. Min.", XXVI, Quaracchi, 1907, 255-58, gives the names of 122 such periodicals. French periodicals are indicated by P. B. Ginnet, O.F.M., "Le Tiers Ordre et le Prêtre", Vanves, 1911, p. 51 sq.; German periodicals by Moll, O.M. Cap., "Wegweiser in die Literatur des Dritten Ordens", Ratisbon, 1911. In Italy even a regular newspaper was founded, "Rinascita Francescana", Bologna, 1910; another in Germany, "Allgemeine deutsche Tertiären-Zeitung", Wiesbaden, 1911.

We may mention also the special organs for direction of the Third Order, e.g., "Der Ordenbrief" edited and published at Innsbruck by the Tyrosole Franciscans, "Revue ascédotoled du Tiers-Ordre de Saint François", published by French Capuchins. Both reviews appear once every two months.

B. Third Order Regular (Male and Female). (1) Its origin and general development until Leo X. The origin of the Regular Third Order, both male and female, can be traced back to the second half of the thirteenth century, but no precise date can be indicated. It was organized, in different forms, in the Netherlands, in the south of France, in Germany, and in Italy. Pope Innocent III, who held the See of Bologna, where the Franciscans had their house of meeting, gradually withdrew entirely from the world and so formed religious communities, but without the three substantial vows of religious orders. Other religious associations such as the Beguines (women) and Beghards (men) in the Netherlands, sometimes passed over to the Third Order, as has been clearly shown from recent study. Towards the end of the thirteenth and the beginning of the fourteenth century there was suspicion of heresy in these free religious unions of the Third Order (biocchi), as we can infer from the Bull of John XXII "Sancta Romana", Dec., 1317 (Bull. Franc., V, 134). More than a century later St. John of Capistran (1456) had to defend the Tertiaries in a special commission, v. "Histoire d'ordres religieux". Francischi; printed with other minor works of the saint at Venice in 1580. Throughout the fourteenth century the regular tertiaries of both sexes had in the most cases no common organization; only in the following century we can observe single well-ordered religious communities with solemn vows and a common head. Martin V submitted in 1428 all tertiaries, regular and secular, to the direction of the Minister-General of the Friars Minor (Bull. Franc., VII, 715), but this disposition was soon revoked by his successor Eugene IV. We meet thus in the same fifteenth century with the regular tertiaries of both sexes, male and female, divided into distinct tertiaries with the three vows in Italy, Sicily, Dalmatia, Spain, Portugal, France, Germany, and in the Netherlands. Contemporaneously there existed sister congregations of the Third Order with solemn vows, for instance, the Grey sisters of the Third Order, spread in Italy, Spain, Portugal, and Canada, etc. The Netherlands, whose remarkable statutes of 1483 have recently been published by H. Lemartre in "Arch. Franc. Hist.", IV, 1911, 713-31, and the congregation still existing founded at Foligno in 1397 by Blessed Angelina of Marcianno (1435). Leo X, in order to introduce uniformity into the numerous congregations, gave in 1521 a new form to the rule of chapters, retaining of the rule as published by Nicholas IV all that could serve the purpose, adding new points, especially the three solemn vows, and insisting on subjecting to the First Order of St. Francis. For this last disposition the Rule of Leo X met with resistance, and never was accepted by some congregations, whilst it serves till the present day as the basis of the constitutions of many later congregations, especially of numerous communities of sisters.

(2) Single congregations after Leo X, of women.—The two Italian congregations, the Lombardic and Sicilian, which had constituted themselves into separate institutions, in the course of the fifteenth century, were united by Paul III, and since Sixtus V enjoyed entire independence from the First Order. It had then already 11 provinces. In the seventeenth century the congregations of Dalmatia and the Netherlands (of Zeppern) were united with the Italian family. In 1734 Clement XIII confirmed their statutes. Whilst the French Revolution swept away all similar congregations, the Italian survived with four provinces, of which one was in Dalmatia. In 1906 a small congregation of Tertiary lay brothers in the Balearic Islands and a little later two convents with colleges in the United States joined the same congregation, which in 1908 numbered about 360 members. The dress is that of the Conventuals, from whom they can hardly be distinguished. The residence of the minister-general is at Rome, near the Church of Sts. Cosmas and Damian. After the time of Leo X the Spanish congregation had often had troubles on the question of its submission to the First Order. After Pius V (1568) had put the whole Third Order again under the care of the Minister-General of the Friars Minor, the superiors of the three provinces constituted in Spain could, after 1569, paralyze at the Council of Trent. The Third Order Minor and since 1670 they have had even a definitory general to represent them. The French congregation, named from their house at Paris "of Picpus".
was reformed by V. Mussart (d. 1637), and maintained close ties with the First Order till its extinction in the French Revolution. A well-known member of this congregation is Hyppolit Hélyot, the author of the work "Histoire de la religion dans les nations du monde". In 1767 it had four provinces with 61 convents and 494 religious. Other congregations of Tertiaries existed after the fifteenth century in Germany, Bohemia, Hungary, Ireland, and England. They perished either at the time of the Reformation or in the French Revolution. But many still exist in the Franciscan, the "Bons-Fils" in northern France founded in 1615, and the "Pénitents gris" at Paris after the sixteenth century, all now extinct. In the nineteenth century some new congregations arose, e.g. the Poor Brothers of St. Francis, the Brothers of St. Francis at Walden (1829), the Brothers of "St. Dominic's" (1826) in England, founded in 1818 at Naples by Ludovicus of Casoria, O.F.M. The most of these modern tertiary communities consist of lay brothers and depend on the diocesan bishop.

(3) Congregation of Sisters.—Whilst Leo X in the reform of the rule had left it free to the congregations to adopt papal enclosure or not, Pius V (1568) prescribed it to all convents of tertiary sisters with solemn vows. Still this order was not carried out everywhere. In this regard the custom prevailed that the Friars Minor refused to take the direction of these communities. But the lay sisters already mentioned above, we may add the different offshoots of the Sisters of St. Elizabeth in Austria, Germany, the Netherlands, and France (there, under the name of Sœurs du Refuge, some of them still exist). The first Ursulines, also, founded by St. Angela Merici (1540), belonged to the Third Order.

In the nineteenth century many of the new congregations adopted the Rule of the Third Order, but most of them have no further connexion with the First Order. Many of them have widely varying names; a good many are of mere local character, others again are of international importance. As to their activities, almost all dedicate themselves to works of charity, either in hospitals, homes, or ateliers; others work in schools, not a few are in foreign missions. We can give here scarcely more than a list of the names, with the dates of the foundation. In Germany, which first adopted this order, the Franciscan Sisters of St. Francis founded 1845 (1851) by M. Schervier at Aachen, with some houses in America; the Franciscan Sisters of the Holy Family, founded in 1857 at Eupen, Diocese of Cologne; the Franciscan Sisters, at Münster, Westphalia, founded in 1850; the Poor Franciscan Sisters of the Perpetual Adoration at Olten, founded in 1852. In Switzerland the Poor Franciscan Sisters of the Sacred Hearts of Jesus and Mary, at Saltkotten, near Paderborn (1863); the Sisters of Mercy of the Third Order, at Thun, Diocese of Osmabruck (1869); the Sisters of Mercy of St. Francis, at Waldbreitbach, Diocese of Trier (1863); the Franciscan Sisters at Nomenwerth, an island on the Rhine, founded in 1872 at Heythuizen in Holland; Franciscan Sisters of Maria-Stern, at Augsburg, whose first foundation can be followed back to the thirteenth century; Franciscan Sisters at Dillingen, Diocese of Augsburg, founded in the fourteenth century; the Poor Franciscan Sisters, at Mallersdorf, Diocese of Ratibon (1855); the Congregation of Ursperg (1897); the Franciscan Sisters of Kaufbeuren, Diocese of Augsburg, founded in the fifteenth century, to which had belonged Blessed Crescentia Hess (1744). In the Diocese of Rottenburg, in Württemberg, were the Ursulines of Bingen. In Belgium, Erolshaim (1855); of Heiligbronn (1857); of the Sisters of Christian Charity, at Reute, founded 1849 at the same place where in the fifteenth century Blessed Elisabeth of Reute, called also the "good Beta" (d. 1420), had professed the Third Order; the Franciscan Sisters of Süssien (1853). In Baden is noteworthy the Congregation of Gengenbach (1867), since 1876 also in the United States, Joliet, Illinois. At Mainz there is the Convent of Perpetual Adoration (1885).

In Austria-Hungary the School Sisters of the Third Order (1728), with mother-houses at Hallein, Diocese of Salzburg, at Vienna (III), and at Judenau, Diocese of St. Polten; the Sisters of the Third Order of St. Francis at Vienna (V), (1857); the Poor School Sisters at Voklbruck, Diocese of Linz (1850); the Sisters of Mercy of the Third Order of St. Francis at Troppau, Diocese of Olmütz (1853); Congregation of School Sisters of the Third Order of St. Francis at Marburg on the Drau (1856); the Congregation of the Third Order of St. Francis at Prague (I), 1856; and three small communities in Tyrol. In Luxembourg there is the Congregation of Paffentals; the Sisters of Mercy of St. Francis with the mother-house in the town of Luxembourg, and communities in Sweden at Stockholm and in the Carolines. In Holland there are the Congregations of Rosendaal, of Breda, of Heythuizen, all of which have communities in foreign missions; lastly the Congregation of Heerlen. In Belgium there exist, besides the old congregation of the Grey Sisters of Hospitals (see above) at Antwerp, Léau, Tirlemont, and Tongeren, and the recent communities of Ghent (founded 1701), of Hérimon, Diocese of Malines, of Macon-lez-Chimay, of Opwijk, Diocese of Malines (1845). In Switzerland there once existed many congregations of the Third Order, and even now there are several convents of strict enclosure. Of the active congregations the last noteworthy are the two founded by the Capuchin Theodosius Florentini, viz. the Sisters of the Holy Cross for schools, with mother-house at Menzingen (1844), with numerous convents outside Switzerland, and the Sisters of the Holy Cross for hospital work (1852), with mother-house at Ingenbohl.

In France, before the last suppression of convents, there were about fifty communities of the Third Order; the most important was that of the Missionaries of Mary, founded by Mother de Chapoton de Neuville (d. 1904) in India, with actual mother-houses at Rome, with communities spread all over the world. In Italy they had a mother-house near Florence by Mother Lapini (d. 1660); the Sisters of Egypt, for missionary work, with mother-house at Rome; the Sisters of Gemona; finally, the Sisters of the Child Jesus, with mother-house at Assisi. On the whole, the sisters professing the Rule of the Third Order are about 10,000.

The Regular Third Order produced one saint, Hyacinth of Mariscotti, and five Blessed: Lucia of Callagirone, Elizabeth of Reute, Angelina of Marsciano, Jeremias Lambertenghi and Crescentia Hoes of Kaufbeuren.

Rule of 1288: Seraphicae Leges et legum origines (Quaracchi, 1897), 77-94; Saraboda, Bullarium Franciscanum, IV (Rome, 1768), 94-97; Wadding, Annales Minorum, II (2nd ed., Rome, 1792), 9-14; de Guerinesi, Opera Sororica, II (Lyons, 1865), 784-87, tr. according to the text of Wadding: Works of the seraphic Father St. Francis of Assisi (London, 1882), 80-91.

Rule of Leo X of 1516, Legumen, I (Leipzig, 1897); Regola del Tosa, Ordine di S. Francesco approvato da Leone X (Quaracchi, 1889), with Latin, Italian, French, and English text in the same column.

On the origin of the Third Order: Müller, Die Anfänge des Franziskanerordens und der Franziskaner in der Geschichte der Kirche. Schriften des historischen Vereins für die Geschichte des Ordens, XII (1885); Diers, Zur Geschichte des Bruderordens in Zeitschrift für Kirchengeschichte, XXIII (Gotha, 1902), 456-504; Mandognini,
The Third Order was re-established about 1840 by Mgr Ignatius Bourget, Bishop of Montreal. Fervent fellow-labourers helped to found the Tertiaries of St. Francis in the diocese of Montreal, notably Canon J. A. Paré and the Sulpicians C. E. Gilbert and A. Gibaud. Mgr Bourget established a fraternity of women, 6 May, 1803, and one of men, 13 June, 1866; both were directed by the Sulpicians till 1874, by Canon P. E. Ducreux from 1874 till 1881, by the Friars Minor from 1881 till 1888, and by the Sulpicians from 1888 till 1890; since then by the Friars Minor. Mgr Fabre, successor to Bishop Bourget, in a letter (3 Sept., 1882) to the priests and faithful of his diocese, says: "We have in our midst the tertiaries of St. Francis, who are known to you and not only the affection they give, but the good odour of all the virtues they practise in the world." The Third Order was re-introduced at Quebec almost at the same time as at Montreal. On 19 Nov., 1859, Father Flavian Durocher, O.M.I., received the profession of two women, after a year's novitiate. These were joined by others, until in 1876 Quebec possessed 137 tertiaries, while in the Province of Quebec several parishes had groups of tertiaries. Among priests zealous for the spread of the Third Order at this epoch we must name, besides the above-mentioned Montreal priests: Father Durocher, St. Sauveur, Quebec; Father Bégénoir of the Sulpicians of Quebec; Father Texon, Quebec; Oliver Caron, Vicar-General of Three Rivers; E. H. Guibert, L. Provancher, and G. Fraser, all three of the Quebec diocese. Father Provancher was one of the most zealous. In 1866, receiving faculties from the General of the Minor Order, he established a very fervent fraternity in his parish of Portneuf. He propagated the Third Order by his writings. For two years he edited a review, in which he published nearly every month an article on the Third Order, or answered questions appertaining thereto. At that epoch (1876) the brothers' fraternity at Montreal counted 137 members; the sisters, a still greater number. At Montreal the tertiaries were less numerous—enough, however, to form a fraternity a little later. Quebec with its 200 tertiaries did not have a fraternity till 1882.

In 1881 the arrival in Canada of Father Frederic of Ghyvelde gave new spirit to the Third Order. He spent eight months in Canada, and worked actively for the Third Order. He began at Quebec, where he held the Holy Visit prescribed by the rule and admitted 100 new members. At Three Rivers he found a numerous and fervent fraternity; his visit to the fraternities of Montreal was followed by a notable increase in membership. Shortly afterwards Leo XIII published his Encyclicals on the Third Order. The Canadian bishops, in obedience to the pope's wishes, recommended the Third Order to their clergy and faithful. But the Friars of the First Order alone could give the Third Order a solid development; hence, when Father Frederic returned in 1888, several brothers, among them Bishop Lafleche of Three Rivers and Archbishop Taschereau, welcomed him as its promoter. The foundation of a convent of Friars Minor at Montreal in 1890 inaugurated a new era of prosperity for the Third Order. The Franciscans took over the direction of the Third Order at Montreal. The fraternities of other districts were visited regularly, and new ones were formed. The Third Order has since spread rapidly. To-day the Third Order in Canada numbers nearly 1,000, with over 60,000 members, under the jurisdiction of the Friars of the Minor Order. The Capuchins have a small number of fraternities. The Capuchin Minor have also the direction of 20 fraternities with 5000 members in the Franco-Canadian centres of the United States. All these with large numbers of...
isolated tertiaries give a total of nearly 60,000. These tertiaries are mostly French Canadians. There are very few fraternities for English-speaking tertiaries; of these there are two very flourishing ones at Montreal. It is in the Province of Quebec that the Third Order is most flourishing. Three monthly reviews, treating specially of the Third Order, are published: (1) "La Tiers Ordre", founded in 1894 by the tertiaries of Montreal, and directed since 1891 by the Friars Minor of that city; (2) "The Franciscan Review and St. Anthony's Record", founded in 1905 by the Friars Minor of Montreal; (3) "L'Echo de St. Francois" published since 1911 by the tertiaries of Quebec. The official publications of the Third Order in Canada are: three houses of the Third Order in Montreal and one in Quebec, directed by lady tertiaries; a lodging-house and an industrial school at Montreal, directed also by lady tertiaries; several work-rooms for the benefit of the poor; and public libraries, one in Quebec and two in Montreal.

The Third Order Regular is represented in Canada by three flourishing institutions: A. Little Franciscan Sisters of Mary, founded at Worcester, Massachusetts, in 1859 and transferred to Baie-St-Paul, Canada, in 1891; their constitutions were approved in 1903 by the Provincial of the Third Order Regular. Their habit comprises a brown tunic and scapular, a white hood and wimple, and a white woollen cord; they wear a silver crucifix. Work.—Assistance of the sick, the poor, the aged, of orphans and instruction of the young—in a word, all the works of mercy. Development.—This congregation possesses 8 houses, nearly all in the United States. The mother house is at Baie-St-Paul, Province of Quebec, Canada. The institution numbers 150 professed sisters, 7 novices, 30 postulants, and 8 associates.

B. Franciscan Missionaries of Mary, founded in India, and following the Rule of the Third Order Regular. They have six houses in Canada: (1) Quebec, founded 1892; novitiate, perpetual adoration, printing, embroidery, workshop, house of probation for aspirants, patronage, visiting the sick. (2) St. Anne of Beaufort (1894); patronage, workshop, hospital, visiting the sick. (3) St. Lawrence, Manitoba (1897); boarding-school, parochial schools, dispensary, visiting the sick. (4) Pine Creek, Manitoba (1899); school, model farm, dispensary, visiting the sick. (5) St. Malo, Quebec (1902); day nursery, primary schools, school of domestic economy, dispensary, pharmacy, visiting the sick. (6) St. Peter, 1909; day nursery, embroidery, patronage, visiting the poor and the hospitals. These houses possess 150 sisters, novices included. Since its establishment in Canada, the congregation has had 290 Canadian members, many of whom are now engaged in mission work in China, Japan, India, Ceylon, Congo, Zululand, Natal, Mozambique, Madagascar, and South America. The mother-house of Quebec has founded six others in the United States: Woonsocket in 1904; New York and New Bedford in 1906; Boston in 1907; Providence in 1909; Fall River in 1910.

C. Religious of St. Francis of Assisi, founded at Lyons in 1838. Their object is the care of the sick and of orphans and the education of the young. They were introduced into Canada in 1904, and have at present 5 houses, comprising a hospital, a boarding-school for girls, and model and elementary schools. They follow the Rule of the Third Order Regular (Paris, 1691); Etablissement sur l'établissement d'un hospice à Quebec (1861); Archives de Versailles, Fonds Recollets; Gazette des Franciscains Médicis (1860-70); Revue de l'Ordre; Pr. Bienvenu d'Amo, tertiaries, Notice historique sur la Tiers-Ordre à Quebec (1868). Third Order Regular: instruction furnished by the congregations themselves.

ODORIC M. JOUVE.

VIII. THIRD ORDER OF ST. FRANCIS IN GREAT BRITAIN AND IRELAND.—A. In Great Britain.—The Third Order Secular comprises ninety-six congregations of which forty are under the jurisdiction of the Friars Minor of the Leominster Union of fifty-one, ten under that of the Friars Minor Capuchin, and about 12,000 members, amongst whom are several diocesan bishops, a number of the clergy, and laity of all ranks. In their organization the British tertiaries are on the common rule, but many of them add some corporal works of mercy, reclaiming negligent Catholics, and so forth. All the tertiaries are governed by a commissary-provincial appointed by the minister-provincial of the first order. His duty is to grant the necessary faculties to directors of congregations, the third visitations, and generally supervise the affairs of the Third Order. On this jubilee year there was a conference of British tertiaries with a view to strengthening and consolidating the order, was held in 1898 at Liverpool in the hall attached to the Jesuit church, and was presided over by the bishop of the diocese. The opening address was delivered by the Archbishop of Paris. A second national conference was held at Leeds. Since the institution of the English national Catholic congress, in 1910, the tertiaries have taken part in these and have had their sectional meeting in the congress.

Of the Third Order in Great Britain, in pre-Reformation days little is known. It is, however, certain that there existed in Scotland several houses of Sisters of the Third Order Regular. Blessed Thomas More is frequently spoken of as a tertiary of St. Francis, but there seems to be no historical evidence to support this statement. The Third Order, however, was known in England in the penal days. Fr. William Stanley, the first commissary of the order in England after the dissolution, wrote "A Treatise of the Third Order of St. Francis" (Douai, 1617). An interesting fact in connexion with the Third Order in England is the appointment in 1857, as commissary-general, of Fr. John Bourke, afterwards Cardinal Manning, who may be mentioned Cardinal Vaughan, Lady Herbert of Lea, the late Earl of Denbigh, and the poet Coventry Patmore. The Third Order Regular is represented in England by nineteen convents of sisters and in Scotland by six convents. There are also communities of Friers Minor and of Third Order Secular to various congregations, most of which are of English institutions. They devote themselves either to education or to parochial works of mercy or to the foreign missions. Most notable historically amongst these congregations are the convents at Taunton and Woodchester, which represent the English convent of the Third Order established at Brussels, Belgium, in 1621. Their founder was Father Gennings, the brother of the martyr Edmund Gennings. This was, in fact, the first convent of the Third Order Regular, enclosed, founded for English women. The community later on migrated to Bruges where it remained until 1794, when, owing to the troubles caused by the French Revolution, it crossed over into England and, after eleven years' residence at Winchester, settled finally at Taunton in Somerset. The congregation was under the jurisdiction of the Friars Minor until 1837, when, owing to the dissolution of the recollect province, it was under the jurisdiction of the diocesan bishop. In 1860 a second foundation was made at Woodchester.

B. In Ireland.—The congregations of the Third Order Secular in Ireland are almost exclusively attached to the churches of the First Order. Under the jurisdiction of the Friars Minor of the Leominster Union are fourteen congregations with 9741 members, and
subject to the Capuchin Friars Minor are four congregations with 5100 members. The Third Order Regular comprises two houses of brothers at Clara and Farragher, and eleven in the Archdiocese of Tuam, all devoted to educational work. At Drumshambo the brothers of the order have a convent, where perfection and adoration is maintained day and night. There is also one convent of the Francisca Missionary Sisters of Mary.

Franciscan Annals (Pentæcho), a monthly magazine, (Monthly Forecast Gate, London). The following details will be found in Threaddr. The Francisca in England (London, 1898) and in the statistical tables published yearly in Acts Ord. & Min. and Annate Ord. & Min.

FATHER CUTHBERT.

IX. THIRD ORDER REGULAR OF ST. FRANCIS, IN THE UNITED STATES.—A. Congregations of Men.—(1) Province of the Sacred Heart of Jesus of the Fathers of the Third Order Regular of St. Francis. In 1847 Bishop O'Connor of Pittsburgh obtained from the Irish congregation six brothers, who founded a monastery and college at Loretto, Pennsylvania. Pius IX, by a Rescript of 12 Nov., 1847, erected this foundation into an independent congregation under the obedience of the Bishop of Pittsburgh. This congregation entered the Institute of Friar Minor, together with the community at Spalding, Nebraska, which in 1906 had joined the Italian congregation, was erected into a province, 24 Sept., 1910. Houses, 4; colleges, 2; religious, 62; novices, 5. (See below.)

(2) Congregation of the Francisca Brothers of Brooklyn, New York. Founded 31 May, 1888, by 2 brothers from the Irish congregation, Pius IX, by a Rescript of 15 Dec., 1859, erected it into an independent congregation. The ordinary of the Diocese of Brooklyn is the superior-general, and governs the congregation through a provincial superior with an assistant and seven consultors, chosen by the brethren from among themselves for a term of three years. Brothers, 67; novices, 8; academy, 1; college, 1; schools, 14; pupils, 9875. (See below.)

(3) Congregation of the Brothers of the Poor of St. Francis Seraphicus. Founded 28 Dec., 1857, at Aachen by John Hoever for the protection and education of poor, homeless boys, it was introduced into the United States in 1866. Brothers, 43; novices, 5; postulants, 3; candidates, 13; homes for boys, 2.

B. Congregations of Women.—(1) Sisters of the Third Order Regular of St. Francis.—(a) Congregations of women at Philadelphia. Founded in 1851 by Rev. F. J. Rudolf, its rules and constitutions were approved by the Holy See. Sisters, 536; novices, 41; postulants, 7; schools, 67; pupils, 12,273. (b) Congregation with mother-house at Mt. St. Clare, Clinton, Iowa. Founded in 1867 by Rt. Rev. Bishop Lavelle of Lousiville, Kentucky. Sisters, 130; novices and postulants, 40; hospital, 1; schools, 16; pupils, 2590.

(2) Sisters of the Third Order of St. Francis:—

(a) Congregation with mother-house at Glen Riddle, Pennsylvania. Founded by the Ven. John Nepomucene Neumann, C.S.S.R., Bishop of Philadelphia, who died on April 16, 1855, in the midst of women, Marianne Bachmann (Mother M. Francis), Barbara Boll (Sister M. Margaret), and Anna Dorn (Sister M. Bernardina), with the habit of St. Francis. In 1896 the mother-house was transferred from Philadelphia to Glen Riddle. This congregation is divided into three provinces; sisters, 279; novices, 30; postulants, 182; novices, 48; postulants, 15; academies, 4; seminaries, 2; orphan asylums, 9; hospitals, 12; schools, 42; schools for Indians and negroes, 8. By and from this congregation were established (i) Congregation with mother-house at 337 Pine Street, Buffalo, New York in 1856, for orphan and neglected children; sisters, 30; pupils, 6540; orphan asylums, 1; hospitals, 2. From this congregation were founded (a) Congregation with mother-house at Mt. Alvernia, Millvale Station, Pennsylvania, in 1888. Sisters, 210; novices, 17; postulants, 13; schools, 14; pupils, 6429; orphan asylum, 1; hospital, 1; home for ladies, 1. (b) Congregation with mother-house at Mt. Hope, Westchester Co., New York, 1893. Legal title: Sisters of St. Francis under the Subscription of the Order of the M.I.V. Sisters, 182; novices, 19; postulants, 9; academy, 1; schools, 6; (ii) Congregation with mother-house at St. Anthony's Convent, Syracuse, New York, 1862. Sisters, 173; novices, 9; candidates, 6; schools, 17, pupils, 4500; hospitals, 1; home for aged, 1; home for Chinese, 1; (iii) Congregation with mother-house at Fallen Timbers, Ohio. Founded in 1867 by Rt. Rev. John L. Bihm. Sisters, 56; novices, 9; postulants, 4; hospital, 1; orphan asylums, 2; homes for aged, 2; schools, 13. (d) Congregation with provincial house at Pekeskill, New York. Founded by Mother M. Gertrude and two sisters from the general congregation. Mother, who, at the request of Rev. Andrew Feifer, O.F.M., came to this country in 1865. Sisters, 284; novices, 18; postulants, 15; academy, 1; schools, 18; day nurseries, 3; institution for destitute children, 1; home for working girls, 1; children in charge of sisters, 7705. (e) Congregation with mother-house at Bay Settlement, Wisconsin, founded 6 Dec., 1867. Sisters, 35.

(3) Sisters of St. Francis:—(a) Congregation with mother-house at St. Elizabeth's Convent, Allegany, New York. Founded in 1857 by Very Rev. Familio di Magliano, F.M. Sisters, 300; novices, 25; postulants, 12; schools, 11; hospitals, 2; homes, 4. (b) Congregation with mother-house at St. Francis's Convent, Dubuque, Iowa. Founded in 1876 by Mother Xaveria Termehr and sisters from the house of Bethlehem, Herford, Germany, who on account of the infamous "May laws" were compelled to leave Germany. Sisters, 399; novices, 34; postulants, 20; orphan asylums, 2; industrial school, 1; academy, 1; home for aged, 1; schools, 43; pupils, 6829. (c) Congregation with mother-house at St. Joseph's Hospital, Maryville, Missouri. Founded with the approbation of the Holy See by Rev. M. F. Conforti, O.F.M., 1849. Sisters, 45; novices, 7; postulants, 1; hospitals, 6. (4) Sisters of St. Francis of Penance and Christian Charity:—Congregation with mother-house at Stella Niagara, near Lewiston, New York. Established in 1874 by Mother M. Aloysia and three sisters from Nonnenwerth, near Rolandsleck, Rheinische Prusien, Germany. Sisters, 253; academies, 5; schools, 18; pupils, 6348; orphan asylum, 1; Indian schools, 2; pupils, 577; foundling-houses, 1.

(5) Franciscan Sisters:—

(a) Congregation with mother-house, Grand Avenue and Dryden Street, St. Louis, Missouri. Founded in 1866 from the general mother-house at Salzkotten, Germany. Sisters, 224; hospitals, 6; schools, 1; orphan asylums, 2; house of providence, 1; convent, 1; (b) Congregation with mother-house at Mill Hill, London, England, for coloured missions. Founded into the United States in 1868. Sisters, 60; school, 1; parochial schools, 4; pupils, 765. (6) Sisters of St. Francis of the Sacred Heart:—Congregation with mother-house at Mercy Hospital, Burlington, Iowa. Sisters, 22; hospital, 1. (7) Franciscan Sisters, Minor Conventuals:—Congregation with mother-house and postulants, Cathedral, Buffalo, New York. Sisters, 58; novices, 16; postulants, 21. (8) Sisters of the Third Order of St. Francis of Assisi, M.C.:—Congregation with mother-
house at St. Francis, Wisconsin. Founded in 1849 by sisters from Bavaria. Its rules and constitutions were copied by Rev. J. M. Henni, Bishop of Milwaukee. In June, 1873, this congregation was affiliated to the Order of Minor Conventuals, and Pius X on 6 Dec., 1911, gave it its definite approbation. Sisters, 303; novices, 22; postulants, 30; academy, 1; orphanage, 1; insane asylum, 1; private schools, 36; pupils, 4500. (9) School Sisters of St. Francis.—Congregation with mother-house, Greenfield and Twenty-Second Avenues, Milwaukee, Wisconsin. The sisters conduct schools in Wisconsin, Minnesota, South Dakota, Nebraska, Iowa, Missouri, Illinois, Michigan, and Oregon. There are two branches of this congregation in Europe, one in Luxembourg, the other at Erlenbad, Baden. Sisters, 814. (10) Franciscan Sisters of the Perpetual Adoration.—Congregation with mother-house at St. Rose Convent, La Crosse, Wisconsin. Founded by six sisters from Bavaria, and ratified in 1853 by Most Rev. M. Heiss, Archbishop of Milwaukee. The Perpetual Adoration was introduced in 1878. Sisters, 420; novices, 42; postulants, 40; schools, 63; pupils, 6448; orphan asylums, 2; Indian school, 1; domestic science schools, 2. (11) Franciscan Sisters of Christian Charity.—Congregation with mother-house at Holy Family Convent, Alverno, Wisconsin. Founded in 1869 at Manitowoc, Wisconsin, by Rev. Joseph Fessler, it was affiliated to the Order of Friars Minor Conventual 19 March, 1900. Sisters, 303; novices, 40; postulants, 10; hospitals, 2; homes for aged, 1; schools, 58; pupils, 550. (12) Franciscan Sisters of the Sacred Heart.—Congregation with mother-house at St. Joseph's Hospital, Joliet, Illinois. Founded in 1867 at Avila, Indiana, by sisters from Germany. Sisters, 325; novices, 40; postulants, 12; hospitals, 10; home for aged, 1; orphan asylums, 1; schools, 9. (13) Sisters of the Third Order of St. Francis of Perpetual Adoration.—Congregation with mother-house at St. Francis's Convent, Nevada, Missouri. Established in 1893 by Sister M. John Hau and sisters from the mother-house at Grimmeinstein, Switzerland. Sisters, 25; orphan asylums, 1. (14) Holy Spirit Sisters of St. Francis.—Congregation with provincial house at St. John's Hospital, Springfield, Illinois. Founded in 1875 by sisters from the general mother-house, Münster, Germany. Sisters, 299; novices, 29; postulants, 11; hospitals, 12. (15) The Poor Sisters of St. Francis of the Immaculate Conception.—Congregation with provincial house at St. Francis Convent, Lafayette, Indiana. Introduced into this country in 1875 by sisters from the general mother-house at Olpe, Germany, Sisters, 613; novices, 35; postulants, 21; academies, 1; orphan asylums, 1; homes for aged, 1; schools, 36; hospitals, 13; high schools, 2. (16) Sisters of the Poor of St. Francis. See Poor of St. Francis, Sisters of the. (17) Franciscan Sisters of St. Kuneuguanda (Polish):—(a) Congregation with mother-house at Chicago, Illinois. Founded in 1896. Sisters, 107; novices, 22; postulants, 18; orphan asylum, 1; home for aged and crippled, 1; day-nursery, 1; schools, 11; pupils, 2070. (b) Congregation with mother-house at Chicago Heights, Illinois. Foundation of English-speaking Franciscan Sisters. Sisters, 17. (18) Sisters of St. Francis of the Immaculate Conception.—Congregation with mother-house at Peoria, Illinois. Founded in 1890. Sisters, 47; postulants, 18; orphan asylums, 1; homes, 2; asylums, 1. (19) Missionary Franciscan Sisters of the Immaculate Conception.—Congregation with mother-house, Rome, Italy. The sisters conduct establishments in the Archdioceses of New York and Boston, the Diocese of Newark, Pittsburgh, and Savannah. (20) Franciscan Sisters of the Immaculate Conception:—(a) Congregation with mother-house at Little Falls, Minnesota. Sisters, 60; postulants, 3; orphan asylum, 1; hospitals, 3. (b) Congregation with mother-house at St. Francis's Hospital, Rock Island, Illinois. Sisters, 18; novices, 6. (21) Polish Franciscan School Sisters:—Congregation with mother-house, 3419 Gasconade Street, St. Louis, Missouri. Founded 29 May, 1901, by Most Rev. John J. Kain, Archbishop of St. Louis. Sisters 83; schools, 9; pupils, 700. (22) Felician Sisters, O.S.F.—Congregation with general mother-house, Cracow, Austria. Founded in 1855 by Sophia Truszkowska at Warsaw, Russia. Introduced into the United States in 1874. (a) Western Province of the Presentation B. V. M. Mother-house, Detroit, Michigan. Sisters, 278; novices, 30; postulants, 53; in lakes in preparatory course, 65; schools, 33; pupils, 12,500; orphan asylum, 1. (b) Eastern Province. Mother-house at Buffalo, New York, established 20 Aug., 1900. Choir Sisters, 278; novices, 32; postulants, 93; lay sisters, 66; novices, 6; postulants, 21; candidates and probationers, 19; Provincial with headquarters at Detroit, Michigan. Sisters, 386; novices, 17; postulants, 27; candidates, 3; wards, 74; pupils, 6482; orphan asylums, 3. (23) Sisters of the Third Order of St. Francis of the Congregation of Our Lady of Lourdes. Mother-house, Rochester, Minnesota. Established 1877 by sisters of St. Francis, Joliet, Illinois. Sisters, 336; novices, 9; postulants, 16; academies, 5; normal school, 1; schools, 20; pupils, 5767; hospital, 1; nurses' training school, 1. (24) The Order and Congregations of the Catholic Church (2nd ed.), Paderborn (1907): The Catholic Church in the United States, 1-11 (New York, 1909); Official Catholic Directory (New York). FERDINAND HECKMANN. X. PROVINCE OF THE SACRED HEART OF JESUS.—Prior to 1906 several communities of the Third Order existed in the United States, all lay institutes dedicated to teaching and other works of charity. Amongst these were three branches of Franciscan Observants: at Brooklyn, New York; at New Haven, Connecticut; and at Spalding, Nebraska. The communities at Loretto and Brooklyn were founded more than half a century ago from Mount Belgrove Monastery, Archdiocese of Tuam, Ireland; Spalding Institute was a branch of the Brooklyn community. In 1905 Father Linus Lyman, superior of the institute, asked the ordinary of the diocese for permission to have some of his subjects ordained priests. This request the bishop refused, as the community had been introduced into the diocese for the care of parish schools, and he feared that in the event of its members becoming priests this work would suffer. A petition was sent to the see of Rome, Rev. Rev. Dr. Stanislaus Dujmic, commissary-general, and by dispensation of Pius X from the ordinary year of probation they made the vows of the order. A college was then opened at Spalding, giving the order its first house in the United States. In 1908 the diocesan community of Franciscan Brothers at Loretto, Pennsylvania, were admitted to the solemn profession, and eight young men were received into the novitiate. In 1910—11 Rt. Rev. Eugene A. Garvey, D.D.
Bishop of Altoona, requested the fathers to take charge of the Italian Church of St. Anthony of Padua at Johnstown, and the Church of the Lady of Mount Carmel, Altoona, Pennsylvania. The four houses in the United States were erected into a province, 24 Sept., 1910, Very Rev. Dr. Jerome Zazza being elected provincial. The Archbishop of Chicago has since given the fathers charge of St. Peter and Paul Church in St. Joseph, in 1860, and a new college is to be opened at Sioux City, Iowa, in 1912. The provincial mother-house is at St. Francis's College, Loretto, Pennsylvania. The American Province has now five convents, two colleges, sixty-five professed members, and twenty novices and postulants.

JOHN P. M. DOYLE.

XI. THE THIRD ORDER SECULAR OF ST. FRANCIS was established in the United States by the early Franciscan missionaries for the white settlers and soldiers and Indian converts, especially in the Southern States. A confraternity existed at Santa Fé, New Mexico, about 1680. Another confraternity existed at Santa Fé, New Mexico almost from the time of the reconquest (1692–1695). The document stating this fact is a report of the Father custos, José Bernal, dated Santa Fé, 17 Sept., 1794. There is no documentary evidence of the existence of a Third Order for lay persons in a previously organized confraternity, or anywhere else, though we learn from documents that single individuals were termed tertiaries among the Indians. It is most probable, however, that a confraternity existed at St. Augustine, Florida, before the close of the sixteenth century, and at San Antonio, Texas, before the middle of the eighteenth century. The establishment of provinces of the order of Friars Minor brought about the establishment of many confraternities. There are at present 186 confraternities of Franciscan Tertiaries in this country, with a membership of 35,605. Of these, 142 congregations with 27,805 members are under the direction of the Friars Minor, 32 with 6800 members under the direction of the Friars Minor Capuchin, and 12 congregations with 1000 members under the direction of the Friars Minor Conventual. Besides these, there are many hundreds of tertiaries throughout the country not belonging to any congregation.

XII. THE THIRD ORDER SECULAR OF THE SERVITES was established in the United States in 1803. There are at present 2 congregations, with a membership of 400.

XIII. THE THIRD ORDER REGULAR OF SERVITES. See many, Servants of.

FERDINAND HECKMANN.

Thirty Years War, THE.—The Thirty Years War (1618–48), though pre-eminently a German war, was also of great importance for the history of the whole of Europe, not only because nearly all the countries of Western Europe took part in it, but also on account of its connexion with the other great European wars of the same era and on account of its final results.

I. CAUSES OF THE WAR.—The fundamental cause was the internal decay of the empire from 1555, evidenced by the weakness of the imperial power, by the gross lack of patriotism manifested by the estates of the empire, and by the paralysis of the imperial authority and its agencies among the Protestant states of South-western Germany, which had been in a state of discontent since 1555. Consequently the whole of Germany was in a continual state of unrest. The decay of the empire encouraged the other nations of Western Europe to infringe upon its territory. Spain and the Netherlands made the use of the twelve-years truce to secure a footing in the neighbouring district of the Lower Rhine so as to increase their strategic base. For nearly a hundred years France had made treaties with many of the estates hostile to the emperor. Henry IV of France was the first to make use of the idea of the revocation of the edict of Nantes: he wished to convert France to the Catholic faith and to interfere in the war over the Jülich-Cleve succession. James I of England was the father-in-law of the head of the Protestant party of action in Germany, Elector Frederick V of the Palatinate, and was inclined to take part in a continental quarrel. Denmark sought ostentatiously to obtain the power of "administration" over the dioceses of Northern Germany that had become Protestant, and to get control of the mouth of the Elbe. Gustavus Adolphus (1611–32), of Sweden, also showed a strong desire to interfere in German affairs. At the outbreak of the Thirty Years War all these countries, it is true, were prevented from taking part in it by internal difficulties or by wars in other directions. Still the disposition to do so existed everywhere.

Another cause of the war was that the countries forming the Austrian provinces belonged to the empire. For, in the first place, the empire, owing to its geographical position, was always deeply involved in the contemporary affairs in Eastern Europe. The general aristocratic reaction that appeared throughout Europe at the end of the fifteen and in the sixteenth centuries gradually became so powerful in the eastern and northern countries that a life-and-death struggle between its representatives and the sovereign power broke out at the beginning of the seventeenth century in the more active districts of these sections. These causes gave the first impulse to the Thirty Years War (see section II below). In addition the dynasty ruling the countries forming Austria was a branch of the Habsburg family, whose most distinguished line at that era ruled Spain. From the reign of Philip II (1556–98) the Spanish Habsburgs were the champions of Catholicism in Western Europe and the chief rivals of France in the struggle for supremacy in Europe. From about 1612, especially during the administration of Philip IV (1621–65) and his distinguished minister, Olivares, they displayed increased energy and tried to induce the German Habsburgs to support their plans. The empire was all the more affected by this Spanish policy as the head of the German Habsburgs was Emperor of Germany.

A further important cause was the religious sectarianism which, after diminishing for a short time, grew more intense early in the seventeenth century. In the Catholic movement (about 1692) which followed the Council of Trent only Catholic theologians and a few princes backed the second movement, on the contrary, carried with it the masses of the clergy and laity, and was marked by an ardent spirit of faith and a passionate demand for the spread of Catholicism. If among Protestants the idealistic enthusiasm was perhaps not so great, still their partisan feeling was equally violent and their combative-ness no less ardent. After the war began it soon became manifest that social and economic reasons made Germany a favourable soil for its growth. Economic life, which for a long time had flourished greatly, from the second half of the sixteenth century had grown stagnant. Consequently there existed a considerable number who were disposed of supporting themselves as paid soldiers and of enriching themselves by plunder. The nobles, also, who were numerous in proportion to the rest of the population, took advantage of the opportunity to indulge their private feuds and robberies. As only a small number of them were attracted by foreign
wars, they were ready therefore for internal disorders. Soon there appeared leaders of ability who gathered both nobles and burghers under their banners and retained them in their service by indulging their every caprice. The people of Germany, who had been long unaccustomed to war and were not trained to bear public burdens, chafed under the hardships now imposed upon them. This discontent, combined with the ease with which troops were equipped, aided in prolonging the war.

The Bohemians, in the beginning of the seventeenth century the regions ruled by the German Habsburgs included Upper and Lower Austria, Bohemia together with Moravia and Silesia, the lesser part of Hungary which had not been conquered by the Turks, Styria, Carinthia, Carniola, the Tyrol, and the provinces bordering on Germany. This territory, however, was divided among three branches of the family, the main line, the Sturian, and that of Tyrol-Vorarlberg. Although the main line of the German Habsburgs held by far the larger part of these landed possessions yet its territories did not form a compact whole, but were only a number of loosely connected countries, each having its own provincial estates, which were largely composed of nobles and which maintained an incessant opposition to the dynasty, and therefore largely desired religious freedom, that is the right to become Protestant and to internalise their own domains. The struggle of the nobility against the dynasty reached its height during the last decade of the reign of Rudolph II (1576-1612). Even at that time the nobility maintained relations with the active Protestant party in the empire. In 1604 the Hungarian nobles revolted with the aid of the ruler of Transylvania, and in 1607 they rebelled again and became the allies of the Turks. On 25 June, 1608, Rudolph was obliged to transfer the government of Hungary, Austria, and Moravia to his more compliant brother Matthias; he did not, however, give up his rights as King of Bohemia, and in 1609 was able to pacify an outbreak of the Bohemian nobility only by granting the Imperial Charter (Majestätbrief) which gave religious liberty not only to the nobles and their dependents in Bohemia but also to those living on the crown lands. This concession greatly strengthened the power of the nobility.

After Rudolph's death Cardinal Kiesel sought, as the chancellor of Matthias (1612-19), to avoid above all any new crisis, so as to gain time to reorganize the resources of the ruling dynasty. Matthias, like Rudolph, had no son and the royal family chose as his successor Ferdinand, the head of the Styrian branch of the House of Habsburg who had restored Catholicism in Styria. In 1617 the dynasty persuaded the Bohemians to accept Ferdinand as their future king, and in 1618 they prevailed upon the Hungarians to elect him king. Before this (May, 1618) the Bohemian nobles had revolted anew under the leadership of Count von Königsmarck, who accused Vok of the alleged breach of the charter granted by Rudolph. The dynasty was not yet ready for war. When Matthias died (March, 1619) the Hungarians and the inhabitants of Moravia joined the revolt, and in June Thurn advanced on Vienna with an army to persuade the Austrians also to join. However, the determined attitude of Ferdinand prevented the insurrection and Thurn withdrew. Ferdinand was now able to go to Frankfurt, where his election as emperor (28 August) secured the imperial dignity for his family. Two days before this the Bohemians had elected the leader of the rebels, Count Frederick of the Palatinate, as rival King of Bohemia.

The inhabitants of Lower Austria now joined the revolt. Bethlen Gabor, Prince of Transylvania, made an alliance with its leaders, and in conjunction with them once more threatened Vienna at the close of 1619. Thenceforth, however, discipline steadily declined in the Bohemian army, and the leaders disagreed. The expected aid was never received from the Protestant party, excepting that a few of the less insurrectionary forces in the empire joined the insurrectionary forces. On the other hand, in October, 1619, Ferdinand obtained the help of Maximilian of Bavaria, who had the largest army in the empire, and of the Protestant Elector of Saxony. Spain and Poland also sent troops. Maximilian so greatly terrified the Protestant party, which since 1608 had formed the Union, that it was broken up. He then advanced into Bohemia supported by Austrian troops and decisively defeated the Bohemians in the battle of the White Mountain, near Prague. The Elector Frederick, called the "Winter King," on account of the brief duration of his rule, fled. Ferdinand took possession of his provinces and restored order there. The war with Transylvania, however, was carried on with interruptions until 1626.

III. The War in the Palatinate and the War with Denmark.—The emperor placed Frederick, the Elector Palatine, under the ban of the empire on 22 January, 1621; the latter refused to beg for pardon. Reconciliation was made more difficult by the demand of Maximilian of Bavaria of that part of the Palatine lands called the Upper Palatinate, as recompense for the expenses of the war; he also desired, in accordance with a traditional claim of the Bavarian ruling family, the electoral dignity belonging to the Palatinate; this the emperor gave him with hesitation and under certain conditions (21-25 February, 1623). Maximilian gained for himself the desired land by transplanting the war to the territory of the Palatinate. Spanish troops had established themselves in these districts as early as 1620, and aimed at retaining possession of the Palatinate for the purpose of establishing communication between the Italian possessions of the House of Habsburg and its territories in Burgundy and the Netherlands. In carrying out this scheme the Spaniards in the same year (1620) had seized the Valtellina and the territory of the Rhaetian League. Before this, in 1617, when Ferdinand became the head of the German-Habsburg dynasty, Spain had expressed its desires for the reversion of the Austrian possessions in Alsace.

None of the victors desired to continue the war. The emperor was fully occupied with the restoration of his power in his hereditary possessions and with the war against Transylvania. The Spaniards had only a small military force, as was shown by the spiritless manner in which they recommenced war with the Netherlands in 1621. Maximilian, it is true, desired to obtain possession of his conquests; but he had no confidence in the Spaniards, and found it very difficult to bear the burdens of war, as he received no outside aid of importance. On the other hand, the Count Palatine received no active help either from the Protestant estates of the empire or from abroad, but by the beginning of 1622, several adventurous partisans of his—Ernest of Mansfeld, Christian of Brunswick (called "mad Christian"), and Margrave George
Frederick of Baden—collected 50,000 mercenaries, an army of unusual size for that era. This force was intended to oppose the army of Maximilian and the Spaniards, and as quickly as its numbers decreased they were recruited afresh. The Bavarian commander-in-chief Tilly defeated this force when it attempted to prevent his army and the Spaniards from occupying the fortified town of the Elector Palatinate (undecisive engagement at Wiesloch, 27 April, 1622; complete defeat of the army of the mar- gravate at Baden at Wimpfen, 6 May, 1622; severe defeat of Christian at Höchst, 20 June, 1622). After this, however, the Netherland, the foe of Spain, allowed the still unconquered Mansfeld to enter the territory; from here he advanced in 1623 into East Frisia. The plan was that Christian should come to his support with a new army. Tilly, however, pursued Christian and completely defeated him on 6 August, 1623, at Stadthoorn in Westphalia, but was unable at that moment to attack Mansfeld. Under these circumstances Tilly was obliged to remain in north-western Germany; the estates of this territory had taken no part in the war, and soon the quar- tering of the soldiers and the forced contributions aroused violent discontent among them.

A denominational movement now also gradually made itself felt. In 1623 for the first time a Catholic was elected bishop in the Diocese of Osnabrück. Hereupon the estates of Lower Saxony demanded the emperor's guarantee for the security of their lands which had formerly belonged to the Church. The emperor, however, was willing only to promise security against force, not against a judgment of dispossession. In 1624 Maximilian began to make the Upper Palatinate once more Catholic. In Swabia the Catholic estates sought to regain not merely their ecclesiastical foundations that had been acquired by the Protestants. A large number of suits concerning ecclesiastical property were still in litigation before the courts of the empire. There developed on the one side the desire, and on the other the dread, that all the changes in the entire empire made by the Protestants contrary to the Religious Peace of Augsburg might be done away with. Foreign countries began to give increasing attention to the war. France sought especially to separate Maximilian from the emperor; the Netherlands granted subsidies; in 1624 a French embassy intrigued against the Habsburg dynasty at the German and northern courts; England and Holland negotiated both with King Christian IV of Denmark and with Gustavus Adolphus to induce these rulers to take part in the war. Christian, who belonged to the estates of the empire as Count of Holstein, was elected commander of their forces by the majority of religious parties of the Electors of the Saxon circle, and on 9 December, 1625, he came to an agreement with England and Holland and marched into the empire.

Thus the enemies of the emperor and the Duke of Bavaria became so powerful that the emperor could no longer leave the burdens or the direction of the war to a single prince of the empire, even though this prince were as able as Maximilian. The struggle now threatened to engage all Europe. Wallenstein, a Bohemian noble, and the ablest of all the leaders of mercenaries, offered to collect and maintain in the same way as the enemy a force larger and better equipped than that of the Protestants. Ferdinand accepted Wallenstein's offer, and on 7 April, 1625, Ferdinand I appointed him governor of the territories. Wallenstein and Tilly did not come to an understanding. In 1626 Wallenstein took up a position on the Elbe. Mansfeld planned to surround him and establish communication with the Prince of Transyl- vania, but Wallenstein defeated him on 25 April at the bridge over the Elbe at Dessau. However, Mans- feld was able to march to Tranyslavia, where he found that Bethlen Gabor had decided to make peace. Shortly after his arrival he died of fever. Wallenstein increased his army to 70,000 men and in the summer of 1627 he defeated Mansfeld's troops, now without a leader, at Kosel in Silesia on 9 July. In the meantime Tilly had defeated the Danish King Christian on 27 August, 1626, in a hotly-contested battle at Lutter on the Barenberg. During the winter Christian equipped a new army; nevertheless, Tilly drove him from the lower Weser and Elbe, but did not take Stade.

The Edict of Restitution.—The success of the imperial and Bavarian armies in Northern Germany enabled the Catholics to reclaim the lands of the Church. In 1626 the energetic Francis William of Wartenberg, a relative of Maximilian, became Bishop of Osnabrück. He sought to be made bishop also of the dioceses of Minden and Verden, which had become Protestant. In 1627 the Austrian Archduke Leopold William became Bishop of Halberstadt; in the early part of 1628 he was defeated by a prince of Saxony in his attempt to secure the Archdiocese of Magdeburg, but in the summer of 1628 he obtained the right of succession to the Archbishopric of Magdeburg. In Southern Germany Maximilian undertook in 1627 to make the Electoral Palatinate Catholic again. Catholic demands were now sent to the emperor from all sides. In accordance with the Habsburg method of administration and with the emperor's own way of thinking, these demands were all turned over in September, 1628, to the Aulic Council for judicial investigation. Following this, Ferdinand issued in March, 1629, the Edict of Restitution. In its first part the edict settled the meaning of the disputed ordinances of the Religious Peace; it then ordered all the Protestant estates which had been acquired under the Religious Peace to be settled summarily in accordance with the edict. It further appointed three commissions which were to determine and correct the infringements of the Religious Peace in all parts of the empire. The Guelphs in Northern Germany were obliged to surrender what they had taken of the Diocese of Hildesheim in 1523 with the exception of a small part; in March, 1630, imperial commissioners took possession of Magde- burg, and in May and July, 1630, Francis William of Wartenberg established himself at Verden and Minden. In Southern Germany Württemberg, in partic- ular, was forced to make restitution.

In the beginning of the trouble, at the period of the Bohemian revolt the more powerful of the Protestant estates had held to the emperor. The transfer of the electorate to Maximilian, however, had made Saxony and Brandenburg indignant because it put an end to the majority of religious parties of the Electors of the Saxon circle, and to keep Brandenburg from joining the other side Wallenstein devastated it between 1626 and 1627. The Edict of Restitution, however, alienated all the Protestant rulers and nobles from the emperor. From desire of peace and from lack of strength they took no steps against him. It was not until the Catholic estates also became estranged from the emperor that
a crisis arose in the internal affairs of the empire which largely influenced the continuation of the war.

Wallenstein's method of recruiting and maintaining his army required the establishment of extremely large divisions of the army. Following a custom introduced by Ferdinand in Austria, he assigned to each of these divisions a definite district for the collection of recruits and supplies. At first these districts were in the domains of the rulers and nobles hostile to the emperor; gradually, however, the territories of the spiritual princes who had been united by Maximilian in the Empire under the ban of the empire without the consent of the Electors, he revived other imperial privileges that had fallen into disuse. Thus he declared the estates of Lower Saxony, which had taken part in the Danish war against his orders, guilty of treason punishable by the loss of their territories. He knew instinctively that their territorial sovereignty, which had existed as a fact from 1555, depended solely on the passivity of the empire in foreign affairs, and that they would have to be more submissive to the emperor's authority should the civil war develop into a European one, as appeared more likely from year to year. This thought troubled them greatly. Their horizon was narrow; they were ignorant of European politics. They said that under Wallenstein's influence Ferdinand would make the imperial power absolute, and that German liberty, that is their freedom as princes, was endangered. The fact that Wallenstein's army was composed of Catholics and Protestants alike, and that he appointed as general so zealous a Lutheran as Hans Georg von Arnim, impressed the Catholic estates with the idea that their community of interests with the emperor had become weaker, and induced them through self-interest to unite with the Protestant estates. Loyalty to the emperor, Maximilian in particular was anxious and discontented. An Italian Capuchin, Valerio Magni, irritated him by reports about Wallenstein and the intentions of the emperor, while Wallenstein fanned the flame by his harsh treatment of the Bavarian Elector, by his constant demands for greater military authority from the emperor, and by securing his own appointment as prince of the empire (April, 1628).

The first clear symptoms of the tension between the emperor and the estates of the empire were: the meeting of the League at Würzburg in January, 1627; the successes of the Electors at Mühlhausen, November, 1627; and the meeting of the Catholic Electors at Bingen in June, 1628. The assembly at Mühlhausen already demanded a change in the military organization and the dismissal of Wallenstein. At first Ferdinand sought to reduce the tension by working upon Maximilian; in the Treaty of Munich, 1628, he guaranteed to him the Electoral dignity and the possession both of the Upper Electoral Palatinate and of that on the right bank of the Rhine for thirty years. In the course of 1628, however, the emperor's markedly advantageous position over the estates was somewhat diminished by the planning of his Austrian territories, to secure the continuity of the imperial crown in his family by the election of his son as King of the Romans. This desire made him dependent on the good will of the Electors. In the spring of 1628 he forced Wallenstein to reduce the size of his army a little, and in the autumn of the same year to make a much larger reduction. Encouraged thereby the Electors refused to accede to the emperor's wish for the convocation of the Electoral College, and wanted to defer it until the end of the war. The Edict of Restitution also deferred the meeting, but only for a short time. At Ferdinand's demand the Elector of Mainz finally convoked the college for June, 1630. Before it met the emperor again forced Wallenstein to dismiss a large part of his troops. The meeting of the Electors, which was held at Ratisbon from 3 July till 12 November, 1630, the two Protestant Electors not attending, took place under entirely changed political and military conditions.

V. THE WAR BECOMES A EUROPEAN CONFLICT.—About 1625 the Spanish Habsburgs began to develop an energetic policy, as they had done in the sixteenth century. They believed a great opportunity had come to give Protestantism a crushing blow; they even hoped for the aid of France, although this hope proved vain. The Spanish troops were sent first against the Netherlands; in 1626 Spinola took the important fortress of Breda. In the meantime Austria and Bavaria were to aid Spain by cutting off the Netherlands from its main source of commercial revenue, the Baltic. In this way the Spaniards thought to use against the Dutch the same means which the latter had employed against them when they strove to cut off the Spanish fleets carrying to the Indies the product of the silver mines of America. At first Ferdinand hesitated and Maximilian still more. However, it was agreed at the Brussels conference of 1626 to blockade the coast of the North Sea and at least one port on the Baltic. Austria soon found that it could further its own interests in this enterprise. Ferdinand planned to gain a free water-route to the sea for his products by treaties with the countries on the banks of the Elbe and Oder, and by treaties with the large Dutch commercial cities to obtain a good outlet for his exports, especially in sending Hungarian copper to Spain. In 1627 the Dukes of Mecklenburg were deprived of their possessions for aiding the King of Denmark. In October, Wallenstein was besieged as a good port on the Baltic. In pursuance of the scheme the Spaniards were now to appear with a fleet in the Baltic so as to enable Wallenstein to gain the supremacy at sea. During this period, however, Spain's performances on sea were a disappointment, and on this occasion, also, no fleet appeared. Upon this the Hanseatic towns, whose aid in carrying out the plan had been counted on from the first, were intimidated by Denmark from sending ships. Wallenstein attempted to build a fleet himself, but only a small flotilla, capable of inflicting occasional surprises under Gabriel Leroy, came into existence. The last hope of aid from Spain vanished when the Spanish fleet carrying silver was destroyed in the autumn of 1628. The defects of Wallenstein's method of carrying on war appeared at the same time in consequence.
of the peculiar character of the problems he was to solve. He did not dare to use his army for difficult sieges or sudden attacks; where he had forced a road or his projects failed. He left the strongly fortified city of Magdeburg, which controlled the passage over the Elbe, untaken in his rear. He wished to take by storm in May, 1628, the city of Stralsund, which formed the connexion between the German Baltic coast and Sweden, but he gave up that plan, and besieged it from the land side. He could not force the city to surrender, however, as Danish and Swedish troops came to its aid. His victory in August, 1628, over a Danish army of relief at Wolgast did not change the result. Denmark, it is true, signed the Peace of Lubeck, 22 May, 1629, on condition that all Danish territories should be restored. But this brought Gustavus Adolphus on the scene of war.

In the autumn of 1629, Gustavus Adolphus declared before the Swedish Diet that the emperor wanted to conquer Sweden and the Baltic, and that he should be prevented from doing so, but that if Sweden were victorious on German soil the German states would become the booty of Sweden. Up to this time, notwithstanding the strong offers of inducements, the king had limited himself to wars with weaker opponents. He had, however, always carried on war, not only from love of it, but also from the necessity of supporting his army in foreign countries, as Sweden, being a poor country, could not otherwise maintain it. In the meantime the king neglected nothing to increase the prosperity of Sweden. Just then he hoped to secure the wealth of the north German cities and princes. But now, the politico-commercial plans of the emperor threatened to put an end to Sweden's trade in copper, its one valuable natural source of wealth, while Wallenstein's troops threatened to expel the Swedish forces from the country beyond the Baltic, from the revenues of which, especially the customs, it largely drew its pecuniary means. Self-defence as well as the spirit of adventure forced the king to put some check upon the emperor. Nevertheless, he hesitated until the summer of 1630, when on 6 June he landed on the German coast of Pomerania. Except for a few persons of importance Gustavus was not welcomed, even by the Protestants, whosexon to make his way in Pomerania by force of arms. In a short time his money was entirely gone, and he debated for months whether he might venture inland. Wallenstein could, perhaps, have crushed him, but instead, he left the way open to him, for, through resentment at the emperor's command in the spring of 1630 to reduce the number of his troops, he had disbanded the greater part of the imperial forces in the districts now entered by Gustavus, and had allowed other detachments to be sent to fight in the Netherlands and Italy. The year previous Tilly had vainly begged Maximilian's permission to attack the Dutchers at the right moment in their own country, giving as his reason that the money of the Dutch was constantly used to renew the opposition to the Bavarian troops. Maximilian, however, had not the force to assist, and to repel a conflict with a foreign foe. Thus the Dutch stadtholder, Frederick Henry, in 1629, after the great Spanish general Spinola had been recalled, was able to besiege Bois-le-Duc, and thus give the first great rebuff to Spain. It was not Tilly who hastened to the aid of the Spaniards, an imperial force, detached from Wallenstein's army, was sent. But when the Dutch seized the fortification of Wesel and thus endangered the retreat of the imperial troops, a part of the imperial force fell back. Bois-le-Duc surrendered on 14 September, and the Dutch were able to take the offensive, for the territories had published a declaration that Had Sweden been won by Gustavus Adolphus, the Duke of Lorraine (from 1624), a vassal of the emperor, laid claim as heir to the Duchy of Barr in Alsace; but Richelieu disputed his rights and harassed the secular authority of the Bishop of Verdun so that the latter took refuge in the empire. In 1627 the Duke of Guise, head of the line of the House of Male, was in Mantua in upper Italy. The next heir was the Duke of Nevers, a relative of the Bourbons. He took possession at once of Mantua, and hoped to secure Montferrat also by the marriage of his son with the daughter of his predecessor, for the succession to Montferrat was on the female line. Montferrat, however, had been surrendered by the king, though, lay far below Mantua in the western part of upper Italy. Consequently Spain and Savoy were able to seize the district for themselves before the Duke of Nevers could enter it. Spain wished to maintain controlling influence in upper Italy, which it had acquired during the life of Guise and Montferrat, on the other hand, now saw Savoy, which had become dependent on it, suddenly taking sides with Spain. Spain asked for the decision of the emperor, who was suzerain of Mantua. Ferdinand interfered in the quarrel, not only because his dynasty had always considered the imperial rights in Italy of much value, but also because he had constantly, from the time he ruled Styria, been opposed to Venice, which he believed might become dangerous. Still, neither he nor Spain carried on the negotiations rapidly nor with insistence, as their attention was fixed in other directions. The imperial troops, in time to punish Savoy (1628–29). After this Ferdinand's troops besieged Mantua and the Spaniards under Spinola besieged Casale. Richelieu did not yet consider France strong enough to oppose the Habsburgs directly. When Mantua was taken and Casale's position became very precarious, Richelieu proposed a truce; this was signed at Ratisbon on 4 September, 1630. Then Richelieu sent his most adroit negotiator, Père Joseph, to Ratisbon, where the electors were still in session. He hoped to withdraw France from the struggle but to raise ammunitions enough against Austria elsewhere.

On 17 June, 1630, Richelieu made a treaty with the Netherlands by which he gave them a subsidy for the continuance of the war against Spain. By means of the truce, which was brought about by France, between Gustavus Adolphus and Poland at Almalt in September, 1629, Gustavus was at liberty to take part in the war with the emperor and hesitated to assume responsibilities which would permit France to interfere with his management of the war. From March, 1629, negotiations had been actively carried on by Richelieu with the imperial estates but so far to little purpose. His aim was to separate them from the emperor by bringing them into a neutral confederation under his guidance. By
representing that the friendship of France, an essentially peaceable country, would protect them against the pretensions of the warlike emperor, and that their alliance with France would guarantee their "German liberties" against Austria, he hoped to separate them from the emperor in a neutral confederacy. However, the negotiation broke off in October, 1630, and was the draft of a treaty between France and Bavaria. Richelieu transferred the negotiations with the emperor to the place where the College of Electors was in session, because he hoped here to come to a settlement with the estates. Success in these undertakings, however, was made difficult for Richelieu by the landing of Gustavus Adolphus on German soil in June. When the emperor announced (13 August, 1630) Wallenstein's resignation to the Electors, they declared themselves ready to aid him against Gustavus on condition that both the imperial troops and the different estates should be united under Maximilian as commander-in-chief. Ferdinand used the friendliness of the Electors to exert pressure upon the French negotiator. Although the latter was only to come to an agreement regarding upper Italy, still Ferdinand made him promise in the Peace of Ratisbon (16 October) that when the Duke of Nevers received Mantua and Montferrat in fief, France would neither attack the empire itself nor aid others in any manner to attack it, and that the Duke of Lorraine should be included in this agreement. This imperial success, however, came to nothing, because the estates of the empire did not support it. The Protestant Electors instead, invited the Protestant estates to meet at Leipzig and form a neutral party (Assembly of the Princes at Leipzig, February-April, 1631). The Catholics came to an agreement with the emperor that the imperial troops should be under the command of Tilly, but Maximilian had made up his mind that Tilly should only be employed to protect Bavaria against a possible attack by Gustavus Adolphus. He insisted, therefore, that the imperial troops and his own should not be united into one army. This enabled Richelieu, whose overthrow seemed certain in Italy, to avoid first the danger of Ratisbon, and, contrary to agreement, to make the treaty of Bärwalde (23 January, 1631) with Gustavus Adolphus. In this treaty Gustavus, whom the need of money had finally made compliant, pledged himself to carry on war against the emperor for four years.

VI. THE WAR WITH SWEDEN WITHIN THE EMPIRE.

After Wallenstein's deposition Gustavus was able to clear the entire lower course of the Elbe of the imperial troops, which were disbanding and had no commander. His farther advance would take him through the territories of the Electors of Brandenburg and Saxony, and these princes refused to let him pass. Tilly thus gained time to assume command on the Elbe and Oder, and immediately attempted (February, 1631) to force Gustavus to a battle; but the latter was not to be drawn into one. During this period, in which no decisive action took place, Gustavus retired to Bohemia in December, 1630, because he happened at Stralsund, a Swedish detachment under Dietrich von Falkenberg had thrown itself into Magdeburg, in September, 1630, and, supported by the citizens, refused to permit the imperial troops to enter. Magdeburg was the city which Wallenstein had set out to conquer, and then determined to destroy it, and stormed it on 25 May, 1631. But a fire, which the Swedes are accused of starting when they saw that the city was lost, laid it in ashes, and took from Tilly the advantage he had gained. In the meantime Gustavus had taken advantage of the withdrawal of his opponents towards Magdeburg to seize the fortresses of Frankfort and Landsberg on the middle course of the Oder, and to wring from the Elector of Brandenburg Kusin and the fortress of Spandau from the Princes of Saxony. Fearing that the Elector of Saxony would also yield to Gustavus, Tilly tried to terrify the wavering ruler; this, however, forced the latter under the influence of the Lutheran general, von Arnim, who had formerly been an officer of Wallenstein's, and forming a temporary alliance with Sweden on 17 September, 1631, the combined troops of Saxony and Sweden destroyed Tilly's army at Breitenfeld, near Leipzig. The victory had a great moral effect, but did not decide the war. In northwestern Germany Pappenheim had an excellent position which enabled him to control the line of the Westphalian border for the emperor, and the emperor and Bavaria had sufficient means to raise new troops. The strength of Gustavus Adolphus was always much below that of his enemies. Conscious of this, he felt the necessity of entering rich districts which he could use for the support and strengthening of his troops; in addition he wished to come into communication with the Protestant estates of south-western Germany that were favourable to him, and perhaps hoped when there to persuade France to undertake a common war against the emperor. These views probably influenced his military decisions after the battle of Breitenfeld. He left the Saxons to occupy the Austrians by an attack on Prague, and without moving against Pappenheim he went straight towards the dioceses on the Main and the middle course of the Rhine river, to avoid first the danger of Ratisbon, and, contrary to agreement, to make the treaty of Bärwalde (23 January, 1631) with Gustavus Adolphus. In this treaty Gustavus, whom the need of money had finally made compliant, pledged himself to carry on war against the emperor for four years.

Maximilian's fear of Sweden constantly increased, and in May, 1631, he made his first treaty with France. It was, however, very hard for him to assume a neutral position towards the Protestant princes who opposed the emperor and the empire. Gustavus Adolphus on his part was not inclined to spare the champion of Catholicism in the empire for the sake of Richelieu. Finally, Maximilian so completely lost courage that negotiations for a truce were begun by the Duke of Nevers in December, 1631, and the truce was concluded in January, 1632. For the emperor, this was the most dangerous moment of the war. The Saxons had taken Prague. Richelieu continued to be hostile although the emperor had agreed to the Treaty of Cherasco (April, 1631), in which he waived the recognition of the Duke of Nevers of his suzerainty over Mantua; this treaty replaced that of Ratisbon. Contrary to the agreement made at Cherasco, Richelieu did not withdraw his troops from Piedmont, but
through the treachery of Pignerolo, retained it. He made the flight to Lorraine of Gaston of Orléans, who lived in discord with his brother Louis XIII, a pretext to carry the war into Lorraine and there to seize one fortress after another. In this way his troops were kept near the seat of war, between the French and Dutch. In January, 1632, Gustavus Adolphus urged that Richelieu should take Haguenau and Zabern in Alsace from the Habsburgs. Richelieu hesitated, and Père Joseph persuaded him for religious reasons to reject the proposal. During all these months the emperor had had no correspondance from whom he could entrust the direction of his forces. His son, Ferdinand III, was still too young, so from necessity he turned again to Wallenstein. The latter kept him in suspense and only consented when granted powers so great as to raise suspicion against himself. The contract was made on 13 April, 1632, although Wallenstein actually assumed command several weeks earlier. Gustavus reopened the campaign in February, 1632, and began the siege of Bamberg. But Tilly came with fresh troops and relieved the city. He wished to open communications with Wallenstein at Eger and thus force Gustavus to withdraw from the interior of Germany, but Wallenstein did not stir; consequently Gustavus was free to advance directly towards Bavaria. On 15 April there was an undecided battle at Rain on the Lech; Tilly was mortally wounded and the Bavarians withdrew from the battlefield. This left the road to Munich open to the Swedes and permitted them to plunder the Bavarian lowlands. However, Maximilian retained Ingolstadt and Ratisbon, the two strategic points of his country. Gustavus Adolphus simply lost time in the Bavarian campaign. In north-western Germany Pappenheim was successful in his undertakings. New imperial forces gathered both in Bohemia and Swabia. In June Wallenstein conquered Bohemia, formed a junction with Maximilian, and kept Gustavus inactive at Nuremberg for weeks. In vain Gustavus tried to draw Wallenstein into a battle, and when he attempted to storm Wallenstein's position (3 September) he was defeated. For about six weeks he marched aimlessly through Franconia and Swabia pursued by the Swedes. The latter suddenly drew off towards Saxony in order to unite there with Pappenheim, and cut off Gustavus' road to the Baltic. Gustavus followed and on 16 November, forced a battle at Lützen near Leipzig, just as the forces of Wallenstein and Pappenheim met. The Swedes gained the victory, but they paid for it with the life of Gustavus Adolphus. On the imperial side Pappenheim, the emperor's most daring and capable cavalry general, was killed.

The death of the Swedish king did not make any essential change. His policies were carried on in the same manner and with equal skill by his ablest coadjutor, who since the Swedish forces had been declining throughout the year 1632, the important questions to be decided were: whether, as the Swedish power declined, the Protestant prince would act independently of it under the leadership of Saxony, taking upon themselves the cause of Protestantism and of the independence of the princely rulers; or whether the emperor could find a commander who would make the unreliable and sluggish Wallenstein unnecessary. In fact the latter two years were more occupied with negotiations than with battles. Oxenstiern brought Duke Bernhard of Saxe-Weimar, who had been trained under Gustavus Adolphus and who was the ablest of the younger commanders among the German Protestants, and with him Saxony into closer union with Sweden; he also made an agreement with the Protestant rulers of the central German states at the assembly at Heilbron (March, 1633). In November, 1633, Bernhard by a daring advance took Ratisbon; Austria lay open to him, while a revolt of the Bavarian peasants crippled Bavaria's strength. The duke, however, did not venture into Austria and by January Maximilian had subdued the peasants. Sweden rapidly lost its popularity even among the Protestants of central Germany, for it demanded much. In addition, Oxenstiern flooded the states with Swedish coin and sent their silver to Sweden, thus ruining them economically. As early as 1634 the influence of Richelieu over these states was greater than that of Sweden. Wallenstein used his army but little in 1633. He was constantly occupied with negotiations, chiefly with Sweden, Saxony, and the empire. On the point of these discussions he asked them to a conference with a view to imposing a peace on the Habsburgs. The commander of the Saxon forces, von Arnim, persuaded him to agree to one truce after another. In this way Saxony saved its strength and gained time to improve its position in the empire both as regards Sweden and the emperor. Although he afterwards denied it, even Richelieu believed early in 1634 that Wallenstein was ready to enter into relations with France also. Ferdinand and Maximilian, however, had already planned his downfall; he was murdered at Eger on 25 February, 1634.

France was the only country successful in war and politics from 1632 to the middle of 1634. An increasing number of fortresses in Lorraine came under its control. In the spring of 1632, after making a treaty with the Archbishop of Trier to protect him from the Swedes, French troops occupied Coblenz and Ehrenbreitstein on the opposite side of the Rhine. Richelieu also carried on negotiations with the Count Palatine of Cologne, who was Bishop of Liège as well, by which he hoped to bring French troops into north-western Germany in the flank of the imperial forces there, and also to garrison Dinan which belonged to the Diocese of Liège. From this latter point France would be able to exercise a strong influence on the war between Spain and the Netherlands. Dinan was not obtained owing to a revolt of the citizens of Cologne. However, from this time on, Richelieu pressed steadily forward towards Alsace. He wished the Protestant princes to request him to garrison the fortified Alsation towns. In the same year he sent troops under the command of Louis de Béhier, which belonged to Wurttemberg, and the Diocese of Basle. Spain had already, in 1633, sent troops both from Italy and from the Netherlands to the upper Rhine as protection. Richelieu's plans were held in check by the slow progress of the war in the Netherlands. Notwithstanding the treaty of 1630, by which France granted subsidies, the States General showed but little warlike spirit, while the southern part of the Netherlands was positively averse to war. A Spanish attack by sea on the Netherlands ended in September, 1632, in a complete defeat. On the other hand, an attack on the by-steadholder of the Netherlands on Maastricht in 1633 led to a siege of the fortress, not, as hoped and planned, to a revolt of the southern provinces against Spain. Neither did it force France to openly take part in the war. Nego-
tations for peace were begun and it was only by his greatest efforts, and by his promise that France also should declare war on Spain, that Richelieu was able to outwit his rival.

In the autumn of 1634 conclusive action was also taken in the empire. Ferdinand's son assumed command of the imperial troops, and Maximilian drove the Swedes out of Ratisbon. In this year the command of the Bavarian army was assumed by the Duke of Lorraine, who had been obliged to fly from his country. Von Armni's attempt to take Prague a second time failed. In south-western Germany the Swedes had undoubtedly the strongest army. Early in September the imperial and Bavarian armies united at Nördlingen, which the Swedes under Horn had within easy march of Bavaria, and Saxon, decided (6 September, 1634) the remainder of the finely-disciplined troops to which Gustavus Adolphus had owed his successes. After this the men who fought under the Swedish flag were only mercenaries, greedy for plunder, like those of the other armies of the time. To prevent them from becoming absolute a Breda which had been lost in 1626. Neither the Dutch nor the French could derive any further advantage from the capture of Arras (August, 1640), by which they had pierced the line of fortresses protecting the southern Netherlands. Even in 1639, the Habsburgs maintained their superiority in numbers, but their enemies conducted the war with greater skill. Consequently the imperialists gained but little when Piedmont in 1639 proclaimed its independence of France.

The union of the German estates consequent upon the French attack did not beget any warlike enthusiasm. They longed for peace and hoped that the peace congress proposed in 1636 would assemble. In 1635 the ambassadors of the emperor and of the emperor and his states, and with the emperor, who had carried on from the beginning of the war, were renewed in 1637, although, as usual, without result. In 1639 Duke Bernhard died unexpectedly. France enlisted his troops and placed them under the command of the able General Guébriant; and in this way acquired, what it had not had before, an experienced army of its own on German soil. In the winter of 1639-40 Guébriant boldly forced his way into the interior of the empire intending to unite with Baner. As he advanced the Landgrave of Hesse broke off the negotiations with the emperor; thus once more foreigners gained allies in the heart of Germany. In January, 1641, Baner planned to capture Ratisbon again, but the thaw that set in discouraged him. Guébriant also saw that he could not long maintain himself in so advanced a position; as in 1631, the imperial forces controlled the line of the Weser and threatened him on that side. In the spring of 1641 Saxony and the empire prepared to repeat against Sweden the offensive operations which had failed in 1636. The plan failed, owing to the simultaneous deaths of von Armni, the Brandenburg statesman Count Schwarzenberg, and Baner. The young Frederick William became Elector of Brandenburg in December, 1640, and early in the summer of 1641 issued a

the Swedish general, Baner, at Wittstock (4 October, 1636). The fantastic plan of the Spaniards to revenge the defeat, by a combined attack of their fleet and the imperial and Saxon land forces on Livonia so as to strike the Swedes in the rear, failed because the fleet, while on its way, was defeated (1639) by the Dutch in the English Channel. By a desperate defence, Brandenburg sought to save at least its fortresses from the Swedes. In 1639 Baner twice made forced marches as far as Prague, plundering and terrorizing as he went. From the close of 1636 the Habsburgs were placed in an unfavourable defensive position in the west. France took into its service the army fighting under Bernhard of Saxe-Weimar, on the upper Rhine, and in December, 1638, Bernhard conquered Briesach on the right bank of the Rhine. In 1637, after a celebrated siege, Holland retaken the town of its own on German soil. In the winter of 1639-40 Guébriant boldly forced his way into the interior of the empire intending to unite with Baner. As he advanced the Landgrave of Hesse broke off the negotiations with the emperor; thus once more foreigners gained allies in the heart of Germany. In January, 1641, Baner planned to capture Ratisbon again, but the thaw that set in discouraged him. Guébriant also saw that he could not long maintain himself in so advanced a position; as in 1631, the imperial forces controlled the line of the Weser and threatened him on that side. In the winter of 1639-40 Guébriant boldly forced his way into the interior of the empire intending to unite with Baner. As he advanced the Landgrave of Hesse broke off the negotiations with the emperor; thus once more foreigners gained allies in the heart of Germany. In January, 1641, Baner planned to capture Ratisbon again, but the thaw that set in discouraged him. Guébriant also saw that he could not long maintain himself in so advanced a position; as in 1631, the imperial forces controlled the line of the Weser and threatened him on that side. In the spring of 1641 Saxony and the empire prepared to repeat against Sweden the offensive operations which had failed in 1636. The plan failed, owing to the simultaneous deaths of von Armni, the Brandenburg statesman Count Schwarzenberg, and Baner. The young Frederick William became Elector of Brandenburg in December, 1640, and early in the summer of 1641 issued a
proclamation of neutrality. This gave the Swedes time to place their troops under the command of Torstenson, who was much superior to Baner in energy. Moreover, the rising of the French nobility was not as successful as the Habsburgs had hoped. Guébriant, indeed, was obliged to withdraw from the empire, its influence ruined, but on his return to France he defeated at Kempen in January, 1642, the imperial and Spanish troops, who were going to the help of the French nobles. In the meantime the war had taken a decisive turn in favour of the French, in an unexpected place. The inhabitants of Barcelo- na, oppressed by the Spanish soldiers quartered under that city, demanded and received the help of the kingdom of Catalonia (June, 1640). Richelieu at once sent aid to the rebels. In December, 1640, Portugal also shook off the Spanish yoke. For several years Spain was crippled at the chief seat of war by these conflicts in the Pyrenean peninsula. On the other hand the French, under the leadership of young commanders, Turenne and Condé, became experts in the art of war. By June, 1642, Piedmont was again under control. In 1643 Condé completely destroyed the finest and most celebrated troops of the Spanish army at Rocroi in the Netherlands. The Provinces of the Lower Rhine and the southern Netherlands fell into his hands. In 1644, Holland seized the mouth of the Scheldt and France Grevelingen, and in 1645 France occupied the greater part of Flanders and in 1646 Dunkirk. Henceforth, the Spaniards held only a few of the large cities in the Spanish Netherlands. The people, excepting the nobility, remained loyal to them.

VIII. The Results of the War.—The German Habsburgs were forced to take the defensive and their cause was in great danger. Allied with Maximilian they were compelled to use their main force to fight the threat of the occupation of the empire by the French. They bravely fought in this part of Germany under Mercy during the years 1643–45, but were continually obliged to fall back. On 5 May, 1645, they gained a famous victory over Turenne at Mergentheim; on 3 August, 1645, the French were victorious at Altersheim and Mercy was killed. Still the imperial and Bavarian troops were always at least strong enough to save Bavaria from the incursions of the French. In the meantime, however, the imperial forces had not been able to bring a sufficiently large army against the Swedes. These, it is true, were obliged to encamp (1642) a new encampment in Denmark. But the Danes accomplished just as little as their imperial allies. The imperial forces were severely defeated by Torstenson at Breitenfeld in November, 1642, and at Jüterbog and Magdeburg in October, 1644. After these two victories, Torstenson formed an alliance with George Rücker, the successor to Bethlen Gabor, as Prince of Transylva- nia. Resolved to carry the war directly into the hereditary lands of the emperor, Torstenson advanced at once as far as Brunn, but there saw that he was too weak for such an undertaking. The result of the Swedish victories in this year was the permanent loss by the imperialists of the control of the Weser, and of their position in north-western Germany. Den- mark concluded a treaty of peace in 1645.

During the years 1642–45 the German estates unceasingly demanded peace. As early as 1640, at a session of the Electors at Nuremberg, the opinion was expressed that part of the empire should go to the Swedes if this would content them. In 1641, at the suggestion of the electors the first Diet held since 1613 met at Ratibon, and its success proved that the effort made in the Peace of Prague to revive the organization of the empire had borne good fruit. The estates, however, showed very plainly that they believed the emperor was over-considerate of Spain. France and Sweden encouraged this view by expressing their readiness to open negotiations. The opinion gained ground among the estates that if Austria did not break off its connexion with Spain the estates would once more abandon the emperor, form a union among themselves, and make a treaty of peace with the Swedes and Spain. It was believed that these two countries would consent not to interfere in the internal affairs of the empire, especially as regards religion. The economic suffering and misery of the population of the empire had greatly increased, largely through the marauding expeditions of the Swedes, and final success in the war was clearly out of the question. The kings of France and Sweden, who was at Würzburg, was especially active in supporting the proposal that the estates should separate from the emperor and establish peace in the empire without him. Maximilian encouraged the bishop, though reluctantly. One after another, the smaller German estates brought letters of protection from the Swedes in order to escape being plundered by them. In this way these territories became neutral without any further formalities. The larger principalities Brandenburg abandoned its neutrality in 1644 without, however, becoming friendly to the emperor on any account. The southern Netherlands, still exhausted and desperate, made a direct treaty of neutrality with Sweden in 1645. Under these circumstances the emperor early in 1643 also declared himself ready to negotiate. He wished, however, that the treaty of peace should be general, not limited in geographical extent as was the case in 1630. The negotiations were to be carried on with France at Münster, with Sweden at Osnabrück, where the Swedish embassy had been since the spring of 1643. About the middle of 1643 the imperial delegates appeared at both designated places, and the French delegates followed in the following spring. The imperialistic powers and the imperial delegates presented their first proposition, to which the French did not reply until November, 1645. A last dispute had arisen over the question whether the emperor alone should negotiate for the empire or whether the estates should also be represented. The quarrel was practically settled by the invitation to be sent to the various estates by France and Sweden. On 26 August, 1645, the emperor also invited them. In the same year representatives of Spain and Holland also appeared at Münster. An ambassador of Venice and a papal nuncio likewise took part as mediators between France and the emperor.

The course of the negotiations was influenced by the results of the last events of the war, and it was decided by the military conditions of 1646. In this year the Swedes under Wrangel united with Turenne and the two armies occupied Bavaria. This led Maximilian to make a treaty of neutrality with Sweden in March, 1647. The entire empire was now occupied by the armies of France and Sweden, but the emperor retained undisputed possession of his hereditary lands. The outbreaks of the years 1647–48 were directed against him. The French, however, in aid of these revolts, as internal troubles in France claimed their attention and made them desirous of coming to a settlement with the emperor and the empire. While Turenne marched back to France (1647) Wrangel seized Prague, but was expelled by the emperor and Maximilian, who broke his agree- ment with Sweden. In 1648 Turenne again invaded and joined, and, allied with the Swedes, defeated the imperial and Bavarian forces at Zusmarshausen and cruelly ravaged Bavaria. The attack on Prague was renewed by the Swedes alone in July, 1648, under Königsmark. They took part of the city, but the Austrians brought to- gether a larger army and forced them to withdraw in November, 1648.

At the opening of the negotiations for peace the
emperor had hoped to be able to indemnify Sweden and to separate it from France, but on Sweden's refusal to accept his proposals he was obliged to give up his intention of making peace only if Spain were included in it. Supported by Maximilian, France induced the emperor and empire to remain neutral during the war in Spain. This made it impossible for France, however, did not prevent Holland from concluding peace with Spain on 5 June, 1648. But France received recompense for this disappointment in a new and great victory of Condé at Lens in the Netherlands, on 20 August, 1648. To secure peace for the future, the Conference in Münster, 1648 to give the hereditary lands in Alsace and the city of Breisach to France; it also finally recognized the incorporation of the territories of Metz, Toul, and Verdun into France. It postponed, however, the decision as to the claims of France on the Duchy of Lorraine, and prevented France being made an estate of the empire for its conquests in Alsace. Sweden received the land around the mouth of the Oder with Stettin and Hither Pomerania, the territory near the outlet of the Weser, and the dioceses of Bremen and Verden, as well as Wismar, and was made an estate of the empire, because, and not the Electorate of Saxony, had been the least of the Estates, was asked for peace. In addition it was to receive money to pay its mercenaries.

Taken in general, all the states and territories of the empire were confirmed in the possessions that they had had in 1618. The exceptions were: Electoral Saxony was confirmed in the possession of Lusatia which had been conceded to it in 1620; Bavaria was left in possession of the Upper Palatinate and of the fourth electorship, while a new, eighth electorate was created for the Palatinate; by the intervention of France, Brandenburg received, besides further Pomeranian, in part of duchy of Pomerania. This and the similar concession to Sweden for Bremen and Verden undermined one of the main foundations of the organization of the empire, which for hundreds of years had rested on the existence and importance of the spiritual domains. In other particular it was evident that the more important states sought, and probably sincerely, not to damage the efforts made in the Peace of Prague to revive the organization of the empire, yet in various instances they inflicted much injury upon it. It was contrary to the organization of the empire that the negotiations from the original intention were not limited to external matters. Sweden and a large number of the Protestant estates were not willing to consent to this. To settle the claims made by the different religious denominations to one and the same territory the year 1624 was taken as the normal year, and the denomination which had prevailed in that year in a territory, was, as a rule, to be the permanent religion of that territory. Calvinism was included in the religious peace. The compulsory force of the principle, cujus regio, ejus religio, was restricted by granting private liberty of conscience, but only to a limited extent. The result of these regulations was in the main that the period of the violent religious disputes which had divided the empire was closed. It was also hoped that an effective working of the organic parts of the empire—the imperial and provincial diets, the supreme court, the Archbishop and the imperial institution—would be secured for the future by an arrangement of their relations with one another and of their authority. The decision of this reconstruction were left to the decision of a future Diet. It was settled, however, that grants of supplies were to be made not by majority vote, but by a voluntary agreement for the estates. All the rulers, even the petty ones in southern and western Germany, were declared sovereign in the internal government of their territories with certain exceptions. Moreover, the right to have diplomatic relations with foreign countries and to make treaties with them was granted to every estate. In reality this regulation only gave legal recognition to conditions that actually existed.

Austria was exempt from all these regulations, especially from the clause of freedom of conscience, in the strict sense, in its territory. This showed how little influence the war had inflicted upon it, and also the increasing differentiation between its domains and those of the other estates of the empire. The seat was impressed upon this differentiation by the fact that the control which it claimed by Charles, as Elector of Mainz and consequently Chancellor of the Empire, and especially by the fact that the treaty conceded to France and Sweden lasting diplomatic influence in the empire in return for their evacuation of the imperial territories. To counterbalance the power which Austria thus possessed, France and Sweden were entitled to represent the execution of the treaty in the empire, consequently to continually interfere in imperial affairs. On this basis the Peace of Westphalia with France and Sweden was signed on 24 October, 1648. The chief results of the Thirty Years War were: the recognition of a unified Austria under the rule of the German Habsburgs; the revival, in a certain doubtful sense, of the Holy Roman Empire; the establishment of Sweden on German soil; the permanent weakening of Denmark; the renunciation by Holland of all efforts to drive Spain out of southern Netherlands; an enormous increase of the power of France. The question whether Spain would be able to maintain itself as a great power alongside of France led to eleven more years of war between the two states, and was decided, in favour of France, by the Treaty of the Pyrenees. This was partly on the basis of the pre-eminence of France during the second half of the seventeenth century.

Thamus, a titular see in Augustamnica Prima, suffragan of Pelusium; a city of Lower Egypt, on the canal east of the Nile, between its Tanitic and Mendesian branches. Herodotus (II, 166) gives it as the capital of a nome bearing its name, and Ptolemy as that of the Mendesian nome. In the fourth century B.C. it was still important, having its own admiral, and being exempt from the jurisdiction of the Prefect of Alexandria. It was in existence at the time of the Arabian conquest, and was later called Al-Mourad or Al-Mouradeh; it must have disappeared after the Turkish conquest. Its ruins are at Tell el-Mef, about five miles northwest of a station on the railway from Zagazig to Mansura. ("Oriens Christ.," II, 537) names nine bishops of Thamus, the last three being Monophysites of the Middle Ages. The others are St. Phileas, martyr (in the Martyrology, 4 Feb.); St. Donatus, his successor, martyred (ibid., 19 Feb.); the Council of the Council in 325; St. Serapion, d. shortly before 360, the author of several works, in part preserved; Ptolemaeus, in the Council of Seleucia (359); Aristobulus, in the Council of Ephesus (431).

S. PÉTRIDES.

Thomas, Saint, the Apostle.—Little is recorded of St. Thomas the Apostle, nevertheless thanks to the fact that he is called Didymus, or "twin," it is certain that of some others of the Twelve. His name occurs in all the lists of the Synoptists (Matt., x, 3; Mark, iii, 18; Luke, vi, 15, cf. Acts, 1, 13), but in St. John he plays a distinctive part. First, when Jesus announced His intention of returning to Judea to visit Lazarus, “Thomâ, a Pantôn Didymus [the twin],” said to his fellow disciples: “Let us also go, that we may die with him” (John, xi, 16). Again it was St. Thomas who during the discourse before the Last Supper raised an objection: “Thomas saith to him: Lord, we know not whither thou goest; and how can we know the way?” (John, xvi, 22). Especially St. Thomas is remembered for his incredulity when the other Apostles announced Christ’s Resurrection to him: “Except I shall see in his hands the print of the nails, and put my finger into the place of the nails, and put my hand into his side, I will not believe” (John, xx, 25); but eight days later he made his act of faith, drawing down the kindly rebuke of Jesus: “Because thou hast seen me, Thomas, thou hast believed: blessed are they that have not seen, and have believed” (John, xxi, 29).

This exhausts all our certain knowledge regarding the Apostle but his name is the starting-point of a considerable apocryphal literature, and there are also certain historical data which suggest that some of this apocryphal material may contain germ of truth. The principal document concerning him is the “Acta Thomas,” preserved to us with some variations both in Greek and in Syriac, and bearing unmistakable marks of its Gnostic origin. Probably it is not the work of Bardesanes himself. The story in many of its particulars is utterly extravagant, but it is of early date, being assigned by Harnack (Chronologie, ii, 172) to the beginning of the third century, before A. D. 220. If the place of its origin is really Edessa, as, however, some OTHERS have held, (ibid., p. 176), this would lend considerable probability to the statement, explicitly made in the “Acta” (Bonnet, cap. 170, p. 286), that the relics of the Apostle Thomas, which we know to have been venerated at Edessa (“Peregrinatio Silviius,” ed. Geyer, p. 60), had really come from the East. The extravagance of the legend may be judged from the fact that in more than one place (cap. 31, p. 148) it represents Thomas (Judah Thaimas, as he is called here, and this is a common tradition) as the twin brother of Jesus. The word Thomas in Syriac is equivalent to ἄδειας in Greek, and means twin. Rendel Harris who exaggerates very much the cult of the Dioscuri, wishes to regard this as a transformation of a pagan worship of Edessa but the point is best problematical. The story itself runs briefly as follows: At the division of the Apostles, India fell to the lot of Thomas, but he declined his inability to go, whereupon his Master Jesus appeared in a supernatural way to Abban, the envoy of Gundafar, an Indian king, and sold Thomas to him to be his slave and to serve Gundafar as a carpenter. Then Abban and Thomas sailed away until they came to Andrapolis, where they landed and attended the marriage feast of the ruler’s daughter. Strange occurrences followed and Christ under the appearance of Thomas exhorted the bride to remain a virgin. Coming to India Thomas undertook to build a palace for Gundafar, but spent the money of Abban in a New Year Feast. Gundafar imprisoned him, but the Apostle escaped miraculously and Gundafar was converted. Going about the country to preach, Thomas met with strange adventures from dragons and wild asses. At last he came to the city of King Misdai (Syriac Masdale), where he converted Tertia, the wife of Misdai and Vaza his son. After this he was condemned to death, led out of the city to a hill, and pierced through with spears by four soldiers. He was buried in the tomb of the ancient kings but his remains were afterwards removed to the West. In a remarkable and trustworthy account of the year A. D. 46 a king was reigning over that part of Asia south of the Himalayas now represented by Afghanistan, Baluchistan, the Punjab, and Sind, who bore the name Gondophernes or Gudaphara. This we know both from the discovery of coins, some of the Parthian type with Greek legends, others of the Indian type with legends in an Indian dialect in Kharoṣṭhī characters. Despite sundry minor variations the identity of the name with the Gundaphorōn of the “Acta Thomas” is unmistakable and is hardly disputed. Further we have the evidence of the Takhkhar inscription, dated, and which the best specialists accept as establishing that the King Gudaphara probably began to reign about A. D. 20 and was still reigning in 46. Again there are excellent reasons for believing that Misdai or Masdale may well be a transformation of a Hindu name made on: Indian soil. In this case it will probably represent a certain King Vāsudēva of Mathura, a successor of Kaniska. No doubt it can be urged that the Gnostic romancer who wrote the “Acta Thomas” may have adopted a few historical Indian names to lend verisimilitude to his fabrication, but as Mr. Fleet urges in his recently completed book on Gnostic Literature, there are those who are in connexion with St. Thomas are distinctly not such as have lived in Indian story and tradition” (Jour. of R. Asiatic Soc., 1905, p. 235).

On the other hand, though the tradition that St. Thomas preached in “India” was widely spread in both East and West and is to be found in such writers as Eusebius, Pseudo-Armen Syriac, Tertullian, a little later, in Gregory of Tours and others, still it is difficult to discover any adequate support for the long-accepted belief that St. Thomas pushed his missionary journeys as far south as Mylapore, not far from Madras, and there suffered martyrdom. In that region there is still to be found a number of inscriptions, both in Syriac and in Pahlavi (ancient Persian) inscription dating from the seventh century, and the tradition that it was here...
that Thomas Jaid down his life is locally very strong. Certainly it is also that on the Malabar or west coast of southern India a body of Christians still exists using a form of Syriac for its liturgical language. Whether this Church dates from the time of St. Thomas the Apostle or St. Syri-Chelebat, bishop John "from India and Persia" who assisted at the Council of Nicea in 325) or whether the Gospel was first preached there in 345 owing to the Persian persecution under Shapur, or Sapor, or whether the Syrian missionaries who accompanied a certain Thomas Cuna penetrated to the Malabar coast about the year 743, or whether it is merely that only in the sixth century Cosmas Indicopleustes speaks of a bishop who had been consecrated in Persia. King Alfred the Great is stated in the "Anglo-Saxon Chronicle" to have sent an expedition to establish relations with these Christians of the Far East. On the other hand the reputed relics of St. Thomas were certainly at Edessa in the fourth century, and there they remained until they were translated to Chios in 1258 and afterwards to Ortona. The improbable suggestion that St. Thomas preached in America (American Eccles. Rev., 1886, pp. 1-18) is denounced by W. W. Skeat and is repudiated by the text of the Acts of the Apostles (1, 8; cf. Berchet "Fonte italiane per la storia della scoperta del Nuovo Mondo", II, 236, and I, 44).

Besides the "Acta Thomas" of which a different and notably shorter redaction exists in Ethiopic and Latin, we have an abbreviated form of a so-called "Gospel of Thomas" originally Gnostic, but also a "Revelatio Thomae", condemned as apocryphal in the Decree of Pope Gelasius, which has recently been recovered from various sources in a full Latin version (ed. Revue bénédictine, 1911, pp. 359-374).

The most recent and thorough work is: DAHLMA.nn, Die Thomas-Legende (Freiburg, 1912). See also: Wecker in Theol. Quartalschrift xxi (Tübingen, 1910), 534-556; DABLMA.nn, Indische Feldzüge, II (Freiburg, 1906), 130 sqq.; Fick, The Apocryphal Acts of Paul, Peter and Thomas (Chicago, 1909) gives a tr. of the Acta Thomas; Wright, Apocryphal Acts of the Apostles (London, 1871), in Syriac, with tr.; Lipsius and Bonnor, Acta apostolica apocrypha (Leipzig, 1893-1903), the third part of this collection gives the full Greek text, critically edited; Burritt in Journal of Theological Studies, I, 280 sqq.; III, 94 sqq. has shown that the Syriac is probably the original language; Idem, Texts and Studies (Cambridge, 1907) p. 75; Mansel, The Fragments of the Histories of the Holy Apostles (London, 1871), 172-220; Medlycott, India and the Apostolic Church (London, 1870), a Catholic apologist who is perhaps in error in tone; Prester in Antiqua bolandiana (1890), 179, 197, 207; Richards, Indian Christians of St. Thomas (London 1867); Harris, Cult of the Holy Apostles (London, 1905), 103-25; Fleet in Jour. of Arian Society (London, 1905), 223-36, (1906), 706-11; Burritt-French, Uebersicht in Zeitung (Tübingen, 1807); Milne Bar, Notes on the Syrian Church in India (Edinburgh, 1892); Wilhelm, Deutsche Legenden und Legenden (Leipzig, 1877); Mott, Die Christlichen Evangelien, Apokryph. (Freiburg, 1911); Tschirnhold, Evangelia apocrypha (Leipzig, 1876); Hauler in Wiener Studien (Vienna, 1908), 308-340; Birnbaum in Revue bénédictine, XXVIII (Marbourg, 1911).

HERBERT THURSTON.

THOMAS, CHARLES L. A., French composer, b. at Metz, 5 Aug., 1811; d. at Paris, 12 Feb., 1896. He gained the Grand Prix at the Paris Conservatoire in 1832, having previously won first prize for piano and for harmony. Continuing his studies with Kalkbrenner, Barbereau, and Lesueur, he composed much during the 1850s, but owing to a requiem mass. Turning his attention to comic opera he produced a number of ballets, of which "Le Caid" showed great promise. In 1851 he became a member of the Institute, and in the following year was appointed professor of composition at the Conservatoire. His last, and most celebrated opera in the composer's association with "Mignon", produced on 17 Nov., 1866. This success he followed up with "Hamlet", a five-act opera first given on 9 March, 1868. In 1871, on the death of Auber, he was appointed Director of the Conservatoire, a position he held till his death. Among his sacred compositions, his "Messe Solennelle" was given on 22 November, 1857, the feast of St. Cecilia, at the Church of St. Eustache, for the benefit of the church. On St. Thomas' Day, 1865, his "Marche Religieuse" was performed. His first was recognized by several decorations including the Grand Cross of the Legion of Honour in 1894. From a musical standpoint, Thomas holds a high place by reason of his dramatic instinct, admirably shown in "Mignon" and "Hamlet", and the art of being in the first rank, but his "Mignon" retains its popularity, after close on half a century. MATTHEW, Handbook of Musical History (London, 1848); C.M., Digit. of Music and Musical Works (London, 1904-10); S. Y. E., Life, Story of Opera (London, 1909); DUNSTAN, A Cyclopaedia of Music (London, 1900).

W. H. GRATTON-FLOOD.

THOMAS, GOSPEL OF SAINT. See APOCRYPHA, subtitile III.

THOMAS ABeL, BLESSED (also ABEll, or ABBEL), priest and martyr, b. about 1497; d. 30 July, 1540. He was chaplain to Queen Catharine, and defender of the Mariandolan condition of marriage. For the latter reason he was eventually put to death. He was a graduate of Oxford, and appears to have taught the queen modern languages and music. After a journey to Spain in her behalf, he received the parochial benefice of Bradwell in Sussex. He soon published (May, 1522) in defence of the queen's marriage a work entitled: "Invicta Veritas, an answer to the determination of the most famous Universities, that by no manner of law it may be lawful for King Henry to be divorced from the Queen's grace, his lawful and very wife". For this he was thrown (1532) into Beauchamp Tower, and after a year's liberation again imprisoned, in December, 1533, on the charges of disseminating the prophecies of the Maid of Kent, encouraging the queen "obstinately to persist in her willful opinion against the same divorce and separation", and maintaining her right to the title of the queen. He was kept in close confinement until his execution at Tyburn, two days after the execution of Cromwell himself. There is extant a very pious Latin letter written by him to a fellow-martyr, and another to Cromwell, begging for some slight mitigation of his "close prison"—i.e. "license to go to church and say Mass, and live in the Tower and to lie quietly in the house upon the Green". It is signed "by your daily bedman, Thomas Abel, priest." His act of attainment states that he and three others "have most stately and admirably themselves unto the bishop of Rome, being a common enemy unto your Majesty and this your Realm, refusing your Highness to be our and their Supreme Head of this your Realm of England". There is in Beauchamp Tower a rebus of the Martyr, probably executed by himself; the figure of a bell carved on the wall, the letter A in front and the word "Thomas" above. He is one of the fifty-four English martyrs bestrayed by Leo XIII (26 April 1900) and A. Collider, Lives of the English Martyrs, I (London, 1904), 482-83.

THOMAS J. SHAHAN.

BLESSED EDWARD POWELL.—With Blessed Thomas Abel there suffered Edward Powell, priest and martyr, b. in Wales about 1478; M. A. Oxon.; Fellow of Oriel, 1485; D.D. 20 June, 1506 and styled 'percutus' by the university in his own lifetime. He was vicar of Porlock, Somerset, and prebendary of Centum Solidorum in Lincoln, which he exchanged for Carlton-cum-Thurby in 1505, and the latter for Sutton-in-Marisco in 1525. He also held the prebends of Lyme Regis, Calstock, Bedminster, and St. Mary Redcliffe, Bristol, and the living of St. Edmund's Salisbur. As a noted preacher in high favour with Henry VIII, he was ordered to publish a reply to Luther ("Propugnaculum summum suummi Sacerdotii Evangelici, ac septem Sacramen-
torum, seditione per virum eruditum, sacrum literatum professoris Edardorum Polium adversus Martinum Lutherum fratrem fanosum et Wielicz kan insigne a 1572, in connexion with which he wrote one dialogue between Powell and Luther). The University of Oxford commended this work, and styled Powell "the glory of the university" in a letter to the king. Powell was one of the four theologians selected to defend the legality of the marriage of Catherine of Aragon, in connexion with which he wrote the very rare "Tractatus de non dissolvendo Henrici Regis cum Catharina matrimonio" (London).

In March, 1533, Powell was selected to answer Latimer at Bristol, and was alleged to have disparaged his moral character. Latimer complained to Cromwell, and Powell fell into further disfavour by denouncing Henry's marriage with Anne Boleyn. He was discharged from the provostship of Salisbury in Jan., 1534, and in November he was attainted, together with Blessed John Fisher, for high treason in refusing to take the oath of succession, deprived of his benefices, and imprisoned in the Tower of London. His confinement was very rigorous: the keeper himself was sent to the Marshalsea Prison for allowing Powell and Abel out on bail. The sentence was not carried out until 30 July, 1540. Three Catholics (Powell, Abel, and Richard Featherstone) and three Protestant laymen suffered hanging. The victims were dragged on hurdles from the Tower to Smithfield, a Catholic and a Protestant on each hurdle. Powell's companion was Robert Barnes, the Protestant divine. A dialogue in verse was published shortly after, "The metyng of Doctor Barnes and Dr. Powell at Paradise Gatee and of theyre communicacne both drawn to Smithyldfe fro the Towar" (London, 1540), in the British Museum. The Catholics were hanged, drawn, and quartered as traitors; the others were burned as heretics.

C. F. Wemyss Brown.

Thomas & Jesu (Diaz Sanchez de Avila), Discalced Carmelites, writer on mystical theology, b. at Baeza, Andalusia, 1564; d. in Rome, 24 (or 27) May, 1627. Son of Don Baltasar de Avila and Doña Teresa de Herrera, he took degrees in the humanities at an unusual age, entering the Society of Jesus in 1578, and in 1583 to that of law at the University of Salamanca. Having heard one of the professors extoll the writings of St. Teresa (as yet unpublished) he procured a copy, the study of which resulted in a determination to embrace her manner of life. When he left the habit at 1586, and made his profession in the following year. As a novice he was commissioned to write a ceremonial according to the Roman Rite lately introduced into the order, which remained in force until the last century. He filled the posts of reader of Divinity at Seville, prior at Saragossa, and provincial of Old Castile. After the expiration of his term of office he withdrew to the Desert of Las Batuecas situated in a mountain gorge of difficult access near Alberca. Later he became prior of this convent. He himself had been the originator of this peculiar kind of life. The Carmelite Rule was written for hermits, but the strictly eremitical life, at least on a large scale, being incompatible with the exigencies of modern times, he devised a compromise by restricting the number of such convents to one for each province, and limiting that of the religious to four permanent ones, and volunteers from other houses who were to reside only one year at the time. He established the first Desert at Bolarque (New Castile) in 1592, Las Batuecas (Old Castile) during his provincialship, and later on a similar house in Belgium. He was called to Italy by Paul V who desired to evangelize the Congo States. Unlike the Spanish Congregation of the Order, the Italian had decided on principle to engage in missionary work, and Thomas being noted for his zeal was selected for it. The expedition, however, was frustrated, but he, with a view to accomplish the work, established with the pope's consent a new branch of the order under the title of Congregation of St. Paul, which was to cultivate exclusively missionary work (22 July, 1608). Both the Spanish and the Italian superiors resented this step on the ground that it might lead to a split in the order, and the pope withdrew his approval, and Thomas remained two years under a cloud.

He wrote his large work, "Stimulus missionum" (Rome, 1610), and soon afterwards another, "De procuranda salute omnium gentium" (Antwerp, 1613), in which he outlined the organization and functions of a papal congregation with such vigour that in 1615 when instituting Propaganda in 1622 followed the lines suggested by Thomas. The latter had been sent by Paul V to the Low Countries where he was favourably received by the archdukes, and founded convents at Brussels (1610), Louvain (1611), Cologne (1613), Douai (1615), Lille (1616), Liège (1617), Antwerp (1618), Marlagne (Desert, 1619), Louvain (missionary college for the East, and also for England and Holland, 1621), and Namur (1622). From 1617 he filled the post of Provincial of Flanders. While at Brussels he placed the Carmelite Nuns who had come under his charge under the jurisdiction of the Italian superiors, and assisted them in the establishment of numerous convents. In 1621 he was recalled to Rome as definitor general, and died there three years later in the odour of sanctity. By order of Urban VIII his writings were collected in two volumes, and were published at Cologne in 1684, while a third volume was never carried through the press. Besides the works already mentioned there are some on subjects connected with his order (its antiquity, Salamanca, 1599; the privileges of the confraternity, 1599, commentaries on various points of the rule, notices of prominent men, etc.). Octavio Angeleri, his biographer, dealt with mystical theology, of which the principal are: "De contemptione divina", Antwerp, 1620, and "Divine orationis methos", Antwerp, 1623. The small treatise "La meilleure part, ou la Vie contemplative", translated and edited by Berthold-Ignace de St Anne (Brussels, 1680), is from an unprinted work of himself. After 1624, Thomas & Jesu systematized St. Teresa's teaching on the basis of St. Thomas Aquinas, II–III, QQ. cxxi–cxxxv.

Not less active than Thomas & Jesu in helping to establish the Propaganda was Venerable Dominico & Jesu Maria (Ruspoli), b. at Calatajudd, 16 May, 1550, at Viterbo, 16 Pd., April, 1572, entered the convent of Carmelites at Pastrana (1589), who sent him as master of novices to Madrid, and afterwards to Alcalá for his higher studies. He assisted the plague-stricken at Barcelona, and was five years prior at Valencia. He resigned the priorship of Toledo at the command of Philip III who desired his presence at Madrid. After a short time he withdrew to the Desert of Bolarque. The papal nuncio sent him to Rome where he filled the posts of master of novices and prior at the convent of La Scala. The pope entrusted him with a mission to the Vicerey of Naples at Pâlermo, but would not consent to his permanently absenting himself from Rome. In 1616 he became prior of the convent there only a year since, in which capacity he undertook the canonical visitation of the northern Italian convents, and founded the Desert of Varrazzo near Genoa, having previously established a convent at Lano in Liguria. The struggle between the Catholic and Protestant powers which ultimately developed into the Thirty Years War hav-
ing broken out, Paul V sent Dominic to Ferdinand II, who was preparing to engage in what was hoped would prove a decisive battle. With a crucifix in his hand and a picture of the Madonna, which had been shamefully mutilated by the heretics, he moved among the combatants, animating the Catholics to fight for their Faith and to gain the victory he promised would be theirs. The Battle of Prague proved indeed a signal success (8 Nov., 1620). Dominic continued his journey through Vienna, Lorraine, Cologne, Brussels, (where he assisted Archbishop Albert on his deathbed), Paris, and Marseilles, being everywhere hailed as a hero. Back in Rome towards the end of 1621 he assisted the pope in the establishment of Propaganda, towards which end he had collected considerable funds during his apostolic journey; he was also a member of a company of the Carmelites. Urban VIII sent him to Vienna to bring about a settlement of the differences between the Court of Austria and the House of Mantua, but he was taken ill and died, surrounded by the imperial family. His body, partly incorrupt, now rests in the Carmelite church of St. Thomas near Vienna. His biographers relate numberless miracles alleged to have been wrought by him during life (for which he was called the Thaumaturgus of his time), and after his death, but until the conclusion of the process of beatification it is impossible to speak of these. He wrote, besides some works which remained in MS., "Sententiae de Monasticclle Theologia," translated into French (Paris, 1623), German, and Flemish; "Argumenta psalmorum" (Rome, 1623); "De protectione B. Virginis" (French translation, Paris, 1645); "Concordia spiritualis" (Spanish translation, Brussels, 1626).

Besides the extensive notices contained in PHILIPPUS A SS. TRINITATE, Decor. Carmeli, in the Reforma de los Descalzos, and the Correspondence of Saint John of the Cross, R. E. see BERTHOUZET, De Ste. Anne, Vie de la Mère Anne de Jésus (Mohill, 1882), II. 344-358, concerning Thomas & Jesu. PHILIPPUS A SS. TRINITATE, Vita Ven. P. Domini (Lyons, 1659), also in French; MARIA GABRIELLA, Leben des ehren. Dominikus (Innsbruck, 1902).

BENEDICT ZIMMERMANN.
fact that Thomas was not clothed as a novice until 1406, at which date the cloister was just completed, nor ordained priest until 1413, the year after the church was consecrated. The point is worth noting, as some writers in their eagerness to discredit the claims of a Kempis to the authorship of the "Imitation" have actually fastened upon the length of this period of preparation to misrepresent him as a dull or worse. Thomas was himself, to within a few months of his death, the chronicler of Agnetenberg. The story which he tells of the early struggles of the priory on the Mount, its steady progress, and eventual prosperity is full of charm and edification ("The Chronicle of the Canons Regular of Mount St. Agnes," London, 1842). Those records of the piety and holiness of his religious brethren. He was twice elected subprior, and once he was made procurator. The reason assigned by an ancient biographer for the latter appointment is one that does honour both to Thomas and his brethren, his love for the poor. However, we can scarcely imagine the author of the "Imitation" a good business manager, and after a time his preference for retirement, literary work, and contemplation prevailed with the Canons to relieve him of the burden. The experience thus gained he made use of in a spiritual treatise, "De Edificiis." His first tenure of office as subprior was interrupted by the exile of the community from Agnetenberg (1429), occasioned by the unpopular observance by the Canons of Windesheim of an interdict laid upon the country by Martin V. A dispute had arisen in connexion with an appointment to the vacant See of Utrecht and an interdict was upon the land. The Canons remained in exile until the question was settled (1432). The community of Mount St. Agnes had dwelt meanwhile in a canonry of Lunenkerk, which they reformed and affiliated to Windesheim. Motivated by this trying period, Thomas, with his brother John in the convent of Bethany, near Arnheim, where he had been sent to assist and comfort his brother, who was ailing. He remained until his death (November, 1432). We find record of his election as subprior again in 1448, and doubtless he remained in office until age and infirmity procured him release. It was part of the undertaking of the young religious, and to this fact no doubt we owe most of his minor treatises, in particular his "Sermons to the Novices Regular" (tr. London, 1907). We also know from early biographers that Thomas frequently preached in the church attached to the priory. Two such sermons were recorded in the "Prayer Book, Psalms and Meditations on the Life of Christ" and the "Incarnation and Life of Our Lord," London, 1904, 1907). They treat of a Kempis's favourite subjects, the mystery of our Redemption, and the love of Jesus Christ as shown in His words and works, but especially in the sufferings of His Passion. In person Thomas is described as a man of middle height, dark complexion and vivid colouring, with a broad forehead and piercing eyes; kind and affable towards all, especially the sorrowful and afflicted; constantly engaged in his favourite occupations of reading, writing, or prayer; in time of recreation for the most part silent and recollected, finding it difficult even to express an opinion on matters of mundane interest, but pouring out a ready torrent of eloquence when the conversation turned on God or the concerns of the soul. At such times often he would excuse himself, "My brethren," he would say, "I must go: Someone is waiting for me." Consequently, several "Canons" of the most authentic portrait, preserved at Gertrudenberg, bears as his motto the words: "In omnibus requiem cessivi et nisquam inveni nisi in Hocceken. In eam Boecken." (Everywhere I have sought rest and found it nowhere, save in little nooks with little books). He was laid to rest in the eastern cloister in a spot carefully noted by the continuator of his chronicle. Two centuries after the priory's destruction, during which the priory was destroyed, the holy remains were transferred to Zwolle and enclosed in a handsome reliquary by Maximilian Hendrik, Prince-Bishop of Cologne. At present they are enshrined in St. Michael's Church, Zwolle, in a magnificent monument erected in 1631 by subscriptions from all over the world and inscribed: "Honori, non memoriae, tomum Thomas Kempensis, cujus nomen perennius quam monumentum" (To the honour not to the memory of Thomas a Kempis, whose name is more enduring than any monument). It is interesting to recall that the same Maximilian Hendrik, who showed such zeal in devoting the religious to us the religious to us, was also eager to see the cause of his beatification introduced, and began to collect the necessary documents; but little more than a beginning was made when he died (1658) and since that date no further steps have been taken.

A few words on Thomas's claim, once disputed but now hardly so, to the authorship of the "Imitation of Christ." The book was first issued anonymously (1418) and was soon accorded a wide welcome, copied by different scribes, and attributed to various spiritual writers, among others St. Bernard, St. Bonaventure, St. Bonaventure, and St. Thomas Aquinas. It contains, however, a number of errors and inaccuracies, and was not corrected until 1425. The first printed edition was published in Strassburg in 1476, and was followed by many others. The most important editions are those of 1500, 1501, and 1505. The last-named edition was issued by Petrus de Haren, a Benedictine monk of the Holy Cross at Zwolle, and was the first to bear the name of the author, Thomas a Kempis.

The book was first issued anonymously (1418) and was soon accorded a wide welcome, copied by different scribes, and attributed to various spiritual writers, among others St. Bernard, St. Bonaventure, St. Thomas Aquinas, and John a Kempis. In 1441 Thomas completed and signed his name to a codex still extant (Royal Library, Brussels, 5855-61), containing the four books of the "Imitation" and nine minor treatises. Then for two hundred years no serious attempt was made to dispossess Kempis of his title; but early in the seventeenth century a fierce and prolonged controversy was commenced with the object of establishing the claim either of Jean Charlier de Kerso, Chancellor of Paris, or of his Italian variant, Giovanni Gerson, allied Benedictine Abbot of Vercelli. At the end of the seventeenth century the Dominican Reginald of Thurtgrum, the author of the "Scale (Ladder) of Perfection," was brought forward, but his claim was not long maintained. Incredible as it may sound, the very existence of Giovanni Gerson of Vercelli is yet to be proved. Of Jean Charlier de Kerso the following facts have been established and Gerson may be fairly demonstrated: that he wrote in such works as Cruise, "Thomas a Kempis," and Ketlewell, "The Authorship of the De Imitatione Christi." Not a single contemporary witness is found in Gerson's favour; not a single manuscript during his life for thirty years after his death ascribes the work to him; the only evidence is textual (tr. London, 1904), a respect unfavourable. On the other hand we find that the title of a Kempis proved by the following: several contemporary witnesses of unimpeachable authority, including members of his own order, name Thomas as the author; contemporary MSS., including one autograph codex, bear his name; internal evidence is wholly favourable. Sir Francis Cruse summarizes this last item under three headings: (1) identity of style, including peculiarities common to the "Imitation" and other undisputed works of a Kempis, viz.: barbarisms, Italianized words, Dutch idioms, systematic rhythmical punctuation, and the word denoting as used primarily of associates of the new devotion; (2) The "Imitation" breathes the whole spirit of the Windesheim school of mysticism; (3) it is impregnated throughout with the Scriptures and the writings of the Fathers, especially St. Augustine and Bernard, all favourite founts of inspiration for a Kempis and the text, to which is itself, the best known and the first in order of merit of his original writings, comprises in bulk about one tenth of the works of a Kempis. Many were originally instructions for the novices and junior Canons of whom, as subprior, Thomas had charge; others are spiritual treatises of wider application and some of
these indeed, as the "Oratio de elevatione mentis in Deum", rise to sublime heights of mysticism. There are numerous prayers of sweet devotion and quaint Latin hymns of simple rhythm and jingling rhyme. One work of Thomas is a Latin author, a "Life of (St.) Ludwine, Virgin" (tr. London, 1911). The best complete edition so far of the "Opera omnia" is Kempis is that of the Jesuit Sammlung, published by Nut of Antwerp, 1607; even this does not contain the "Chronicon Montis Sanctae Agnesis", which was edited by H. Roozway, S.J., and published with a new edition of the recension of the "Emenese" (Antwerp, 1621). Of the innumerable editions of the "Imitation", doubtless by far the most interesting is a facsimile from the 1441 codex, published in London, 1789. A splendid critical edition of the "Opera omnia" is now being published by Herder under the able editorship of Dr. Pöhl; five of eight projected volumes have appeared (1911). Messrs. Kegan Paul have published in a uniform edition five volumes of translation, already mentioned in the course of this article. Messrs. Burns and Oates have brought out a sixth. It is hoped eventually to offer a complete translation. This necessity will prove a boon to students of Kempis, almost as with several of his works, such as "The Soliloquy of the Soul", "The Disciple of the Cloister", the "Manuale Parvulorum", etc., have been rendered into English, the work hitherto accomplished has been of unequal merit. Perhaps in this connexion we may quote the enthusiastic commen- tation of Dr. Leander von Danhauser, the publisher of the first edition of Thomas a Kempis' works, 1494: "Nothing more holy, nothing more honourable, nothing more religious, nothing in fine more profitable for the Christian commonweal can you ever do than to make known the virtues of Thomas a Kempis."

**Thomas Aquinas**. See **Thomas of Joz.**

**Thomas Aquinas**, SAINT, philosopher, theologian, doctor of the Church (Angelicus Doctor), patron of Catholic universities, colleges, and schools. b. at Rocca Secca in the Kingdom of Naples, 1225 or 1227 d. at Fossa Nuova, 7 March, 1274.

**LIFE.—The great events and the important events of his life are known, but biographers differ as to some details and dates. Death prevented Henry Denifle from executing his project of writing a critical life of the saint. Denifle's friend and pupil, Dominik Prümmer, O.P., professor of theology in the University of Fribourg, Switzerland, has taken upon him the work and is publishing the "Fontes Vitae S. Thomas Aquinatis, notis historicis et criticis illustrati"; and the first fascicle (Toulouse, 1911) has appeared, giving the life of St. Thomas by Peter Calo) now published for the first time. From Tolomeo di Lucca's "Vita S. Thomae Aquinatis" (Paris, 1691) we learn that at the time of the saint's death there was a doubt about his exact age (Prümmer, op. cit., 45). The end of 1225 is usually assigned as the time of his birth. Father Prümmer, on the authority of Calo, thinks 1227 is the more probable date (op. cit., 28). All agree that he died in 1274.

Landulph, his father, was Count of Aquino, Theodora, his mother, Countess of Teano. His family was related to the Emperors Henry VI and Frederick II, and to the Kings of Aragon, Castle, and France. Calo relates that a holy hermit foretold his career, saying to his father: "He will enter the Order of Friars Preachers, and so great will be his learning and sanctity that in his day no one will be found to equal him" (Prümmer, op. cit., 13). At the age of five, according to the custom of the times, he was sent to receive his first training at the Benedictine Monastery of Monte Cassino. Diligent in study, he was thus early noted as being meditative and devoutly to prayer, and his preceptor was surprised at hearing the child ask frequently: "What is God?" About the year 1236 he was sent to the University of Naples. Calo says that the charta was made at the instance of the abbot of Monte Cassino, who wrote to the saint's father that a boy of such talents should not be left in obscurity (Prümmer, op. cit., 20). At Naples his preceptors
were Pietro Martini and Petrus Hibernus. The chronicler says that he soon surpassed Martini in grammar, and he was then given over to Peter of Ireland, who trained him in logic and the natural sciences. The customs of the times divided the liberal arts into two courses: the Trivium, comprising grammar, logic, and rhetoric; and the Quadrivium, comprising music, mathematics, geometry, and astronomy (see Arts, The Seven Liberal). Thomas could repeat the lessons with more depth and lucidity than his masters displayed. The youth's heart had remained pure amidst the corruption with which he was surrounded, and he resolved to embrace the religious life.

Some time between 1240 and August, 1243, he received the habit of the Order of St. Dominic, being attracted and directed by John of St. Julian, a noted preacher of the convent of Naples. The city wondered that such a noble young man should don the garb of a poor friar. His mother, with mingled feelings of joy and sorrow, hastened to Naples to see her son. The Dominicans, fearing she would take him away, sent him to Rome, his ultimate destination being Paris or Cologne. At the instance of his mother Theodora, Thomas's brothers, who were soldiers under the Emperor Frederick, captured the novice near the town of Aquapendente, and confined him in the fortress of San Giovanni at Rocca. See the life of St. Thomas at St. Thomas Aquinas (Piero della Francesca, Poldi-Pezzoli Gallery, Milan).

Here he was detained nearly two years, his parents, brothers, and sisters endeavouring by various means to destroy his vocation. The brothers even laid snares for his virtue, but the pure-minded novice drove the temptress from his room with a brand which he snatched from the fire. Towards the end of his life, St. Thomas confided to his faithful friend and companion, Reginald of Piperno, the secret of a remarkable favour received at this time. When the temptress had been driven from his chamber, he knelt and most earnestly implored God to grant him integrity of mind and body. He fell into a gentle sleep, and, as he slept, two angels appeared to assure him that his prayer had been heard. They then girded him about with a white girdle, saying: "We gird thee with the girdle of perpetual virginity." And from that day forward he never experienced the slightest motions of concupiscence.

The time spent in captivity was not lost. His mother relented somewhat, after the first burst of anger and grief; the Dominicans were allowed to provide him with new habits, and through the kind offices of his sister he procured some books—the Holy Scriptures, Aristotle's Metaphysics, and the Sentences of Peter Lombard. After eighteen months or two years spent in prison, either because his mother saw that the hermit's prophecy would eventually be fulfilled or because his brothers feared the threats of Innocent IV and Frederick II, he was set at liberty, being lowered in a basket into the arms of the Dominicans, who were delighted to find that during his captivity "he had made as much progress as if he had been in a studium generale." (Calo, op. cit., 24). This had immeasurably augmented his value, and his superiors sent him to Rome. Innocent IV was pleased closely into his motives in joining the Friars Preachers, dismissed him with a blessing, and forbade any further interference with his vocation. John the Teutonic, fourth master general of the order, took the young student to Paris, and, according to the majority of the saints' biographers, where he arrived in 1244 or 1245, and was placed under Albertus Magnus, the most renowned professor of the order (on chronology of this period see Prümmer, op. cit., p. 25). In the schools Thomas's humility and tactfulness were misinterpreted as signs of dullness, but when Albert had heard his brilliant defence of a difficult thesis, he exclaimed: "We call this young man a dunce ox, but his bellowing in doctrine will one day resound throughout the world."

In 1245 Albert was sent to Paris, and Thomas accompanied him as a student. In 1248 both returned to Cologne, where Albert had been appointed regent of the new studium generale, erected that year by the general chapter of the order, and Thomas was to teach under him as Bachelor. (On the system of graduation in the thirteenth century see Preachers, Order of, II. A. 1, d; Fleury, "Hist. Escol.", diss. V., Drane, "Christian Schools and Scholars", London, 1881, 413; Donnay, "L'organisation des études dans l'ordre des Fêts Prêcheurs, au 13ème siècle", Paris, 1884.) During his stay in Cologne, probably in 1250, he was raised to the priesthood by the Command of His Holiness, which was then abbot of the monastery of St. Mary of the Fields. Throughout his busy life, he frequently preached the Word of God, in Germany, France, and Italy. His sermons were forceful, redolent of piety, full of solid instruction, abounding in apt citations from the Scriptures (see "D. Th. Aquinatis sermones et opuscula con- cionatoria", 2 vols., Paris, 1831). In the year 1251 or 1252 the master general of the order, by the advice of Albertus Magnus and Hugo a S. Chato (Hugh of St. Cher), sent Thomas to fill the office of Bachelor (sub-regent) in the Dominican studium at Paris. This appointment may be regarded as the beginning of his public career. His teachings attracted the attention both of the professors and of the students. His duties consisted principally in explaining the "Sentences" of Peter Lombard, and his commentaries on that text-book of theology furnished the materials and, in great part, the plan for his chief work, the "Summa theologiae".

In due time he was ordered to prepare himself to obtain the degree of Doctor in Theology from the University of Paris, but the conferring of the degree was postponed, owing to a dispute between the university and the friars. The conflict, originally a dispute between the university and the faculty of arts, arose from the slaying of one of the students and the wounding of three others by the city guard. The university, jealous of its autonomy, demanded satisfaction, which was refused. The doctors closed their schools, solemnly swore that they would not reopen them until their demands were granted, and it was agreed that in future no student would be admitted to the degree of Doctor unless he would take an oath to follow the same line of conduct under similar circumstances. The Dominicans and Franciscans, who had continued to teach in their schools, refused to take the prescribed oath, and from this there arose a bitter conflict which was at its height at the time St. Thomas and St. Bonaventure were ready to be
presented for their degrees (see Vaughan, "Life and Labours of St. Thomas of Aquin", 2 vols., London, 1871–72, I, xxi). William of St-Amour extended the displeasure of the religious orders (Tournon, op. cit., II, cc. vii sqq.). The book of William of St-Amour was condemned by Alexander IV at Anagni, 5 October, 1256, and the pope gave orders that the mendicant friars should be admitted to the doctorate.

About this time St. Thomas also combated a dangerous book, "The Eternal Gospel" (Tournon, op. cit., II, xxii). The university authorities did not obey immediately; the influence of St. Louis IX and eleven papal Briefs were required before peace was firmly established, and St. Thomas was admitted to the degree of Doctor in Theology. The date of his promotion, as given by many biographers, was 23 October, 1257. His theme was "The Majesty of Christ." His text, "Thou waterest the hills from thy upper rooms: the earth shall be filled with the fruit of thy works" (Ps. cxiii, 13), said to have been suggested by a holy woman visiting Thomas to have the prophetic life of her career. A tradition says that St. Bonaventure and St. Thomas received the doctorate on the same day, and that there was a contest of humility between the two friends as to which should be promoted first. From this time St. Thomas's life may be summed up in a few words: praying, preaching, teaching, writing, journeying. Men were more anxious to hear him than they had been to hear Albert, whom St. Thomas surpassed in accuracy, lucidity, brevity, and power of exposition, if not in universality of knowledge. Paris claimed him as her own; the popes wished to have him near them; the studies of the order were eager to enjoy the benefit of his teaching; hence we find him successively at Anagni, Rome, Bologna, Orvieto, Viterbo, Perugia, in Paris again, and finally in Naples, always teaching and writing, living on earth with one passion, an ardent zeal for the explanation and defence of Christian truth. The result was not what he had expected; with tears he begged to be excused from accepting the Archibishopric of Naples, to which he was appointed by Clement IV in 1265. Had this appointment been accepted, most probably the "Summa theologica" would not have been written.

Reginald, who urged him to continue his writings: "I can do no more. Such secrets have been revealed to me that all I have written now appears to be of little value" (Prümmer, op. cit., p. 48). The "Summa theologica" had been completed only as far as the ninetieth question of the third part (De partibus ponentis et non ponentis). Thomas began his immediate preparation for death. Gregory X, having convoked a general council, to open at Lyons on 1 May, 1274, invited the Thomist, as Thomas, op. cit., p. 48) to take part in the deliberations, commanding the former to bring to the council his treatise "Contra errores Graecorum" (Against the Errors of the Greeks). He tried to obey, setting out on foot in January, 1274, but strength failed him; he fell to the ground near Tarentum, whence he was conveyed, supine, to the Castle of Maienza, the home of his niece the Countess Francesca Ceccano. The Cistercian monks of Fossa Nuova pressed him to accept their hospitality, and he was conveyed to their monastery, on entering which he whispered to his companion: "This is my rest for ever and ever: here will I dwell, for I have chosen it" (Ps. xxxiii, 14). When Father Reginald urged him to remain at the castle, the saint replied: "If the Lord wishes to take me away, it is better than I be found in a religious house than in the dwelling of a lay person." The Cistercians were so much disturbed and attentive that Father Reginald was alarmed. "Whence comes this honour?" he exclaimed, "that servants of God should carry wood for my fire!" At the urgent request of the monks he dictated a brief commentary on the Canticle of Canticles.

The end was near; extreme unction was administered. When the Sacred Vaticum was brought into the room he pronounced the following act of faith: "If in this world there be any knowledge of this sacrament stronger than that of faith, I wish now to use it in affirming that I firmly believe and know as certain that Jesus Christ, True God and True Man, Son of God and Son of the Virgin Mary, is in this Sacrament." Then he added: "I receive Thee, the price of my redemption, for Whose love I have watched, studied, and laboured. Thee have I preached; Thee have I taught. Never have I said anything against Thee: if anything was not well said, that is to be attributed to my ignorance, but not to my will. I am obstinate in my opinions, but if I have written anything erroneous concerning this sacrament or other matters, I submit all to the judgment and correction of the Holy Roman Church, in whose obedience I now pass from this life" (Prümmer, op. cit., p. 48). He died on 7 March, 1274, and his relics were translated to his sanctity, and he was canonized by John XXII, 18 July, 1323. The monks of Fossa Nuova were anxious to keep his sacred remains, but by order of Urban V the body was given to his Dominican brethren, and was solemnly translated to the Dominican church at Toulouse, 25 January, 1340. A magnificent shrine erected in 1628 was destroyed during the French Revolution, and the body was removed to the Church of St. Sernin, where it now reposè in a sarcophagus of gold and silver, which was solemnly blessed by Cardinal Despizes on 24 July, 1787. The chief bone of his left arm is preserved in the cathedral of Naples. The right arm, bestowed on the University of Paris, and originally kept in the St. Thomas's Chapel of the Dominican church, is now preserved in the Dominican Church of S. Maria sopra Minerva in Rome, whither it was transferred during the French Revolution.

A description of the saint as he appeared in life is given by Calo (Prümmer, op. cit., p. 401), who says that his features corresponded with the greatness of his soul. He was of lofty stature and of heavy build, but straight and well proportioned. His complexion was "like the colour of new wheat";
his head was large and well shaped, and he was slightly bald. All portraits represent him as noble, meditative, gentle yet strong. St. Pius V proclaimed St. Thomas a Doctor of the Universal Church in the year 1667. In the Encyclical "Aeterni Patris" of 1879, and in the "Declaratio" of the restoration of Christian philosophy, Leo XIII declared him "the prince and master of all Scholastic doctors". The same illustrious pontiff, by a Brief dated 4 August, 1880, designated him patron of all Catholic universities, academies, colleges, and schools throughout the world.

II. Works.—A. General Remarks.—Although St. Thomas lived less than fifty years, he composed more than sixty works, some of them brief, some very lengthy. This does not necessarily mean that every word in the authentic works was written by his hand; he was assisted by secretaries, and biographers assure us that he could dictate to several scribes at the same time (Vaughan, op. cit., vol. I, p. 469). Other works, some of which were composed by his disciples, have been falsely attributed to him. The most recent, and probably the most satisfactory, treatise on the authenticity of his works is the series of articles by P. A. Desclée, "Lettres et Discours de Thomas d'Aquin" (Fribourg, 1910), originally written for the "Revue Thomiste" (March-April, 1909). The "Disser­tationes in singulara opera D. Th. Aquinatis" (Venice, 1750) of Bernard de Rubescus are given in all important editions of the saint's works. A reliable and authentic list is given in P. F. in his "S. Thomas d'Aquin" (2 vols., Paris, 1910).

In the "Scriptores Ordinis Predicatorum" (Paris, 1719) Fr. Echard devotes eighty-sixfolio pages to St. Thomas's works, the different editions and translations (I, pp. 282-948). Fouc'ron (op. cit., pp. 591 seqq.) devoted a whole volume nearly all the libraries of Europe, and that, after the invention of printing, copies were multiplied rapidly in Germany, Italy, and France, portions of the "Summa theologica" being one of the first important works printed. Peter Schoeffer, a printer of Mainz, published the "Secunda Secundae" in 1477. This is the first known printed copy of any work of St. Thomas. The first complete edition of the "Summa" was printed at Basle, in 1485. Many other editions of this and of other works were published in the sixteenth and seventeenth centuries, especially at Venice and at Louvain. The principal editions of all the works of St. Thomas (Opera Omnia) were published as follows: Rome, 1570; Venice, 1594, 1612, 1745; Antwerp, 1612; Paris, 1660, 1871-80 (Vives); Parma, 1852-73; Rome, 1882 (the Leonine). The Roman edition of 1570, called "the Piana" because edited by order of St. Pius V, was the standard for many years. Besides a carefully revised text it contained the commentaries of Cardinal Cajetan and the valuable "Tabula Aurea" of Peter of Bergamo. The Venetian edition of 1612 was highly prized because the text was accompanied by the Cajetan-Portecca commentaries (see PORTECCA, Sigismondo). The manuscript edition, begun under the patronage of Leo XIII, now continued under the master general of the Dominicans, undoubtedly will be the most perfect of all. Critical dissertations on each work will be given, the text will be carefully revised, and all references will be verified. By direction of Leo XIII (Motu Proprio, 18 Jan., 1880) the "Summa contra gentiles" will be published with the commentaries of Sylvester Ferrariensis, whilst the commentaries of Cajetan go with the "Summa theologica". The latter has been published, being vols. IV-XII of the edition (last in 1906). St. Thomas's works may be divided into philosophical, scriptural, and apologetic, or controversial. The division, however, cannot always be rigidly maintained. The "Summa theologica", e. g., contains much that is philosophical, whilst the "Summa contra gentiles" is principally, but not exclusively, philosophical and apologetic. His philosophical works are chiefly commentaries on Aristotle, and his first important theological writings were commentaries on Peter Lombard's four books of "Sentences"; but he does not give a summary following Lombard's "Master of the Sentences" (on opinions of the Lombard, see Migne, 1841, edition of the "Summa", I, p. 451).

B. His Principal Works in Detail.—Amongst the works wherein St. Thomas's own mind and method are shown the following deserve special mention:—

(1) "Questiones disputatae" (Disputed Questions) —These were more complete treatises on subjects that had not been fully elucidated in the lecture halls, or concerning which the professor's opinion had been sought. They are very valuable, because in them the author, free from limitations as to time or space, freely expresses his mind and gives all arguments for or against the opinions adopted. These treatises, containing the questions "De potentia", "De malo", "De spiritu creaturis", "De anima", "De unione Verbi Incarnati", "De virt. in commun., De caritate", "De cor. fraterna", "De spe", "De virt. rerum vs. Th. Aquinatis" (Fribourg, 1910), originally written for the "Revue Thomiste" (March-April, 1909). The "Disser­tationes in singulara opera D. Th. Aquinatis" (Venice, 1750) of Bernard de Rubescus are given in all important editions of the saint's works. A reliable and authentic list is given in P. F. in his "S. Thomas d'Aquin" (2 vols., Paris, 1910).

In the "Scriptores Ordinis Predicatorum" (Paris, 1719) Fr. Echard devotes eighty-six-folio pages to St. Thomas's works, the different editions and translations (I, pp. 282-948). Fouc'ron (op. cit., pp. 591 seqq.) devoted a whole volume nearly all the libraries of Europe, and that, after the invention of printing, copies were multiplied rapidly in Germany, Italy, and France, portions of the "Summa theologica" being one of the first important works printed. Peter Schoeffer, a printer of Mainz, published the "Secunda Secundae" in 1477. This is the first known printed copy of any work of St. Thomas. The first complete edition of the "Summa" was printed at Basle, in 1485. Many other editions of this and of other works were published in the sixteenth and seventeenth centuries, especially at Venice and at Louvain. The principal editions of all the works of St. Thomas (Opera Omnia) were published as follows: Rome, 1570; Venice, 1594, 1612, 1745; Antwerp, 1612; Paris, 1660, 1871-80 (Vives); Parma, 1852-73; Rome, 1882 (the Leonine). The Roman edition of 1570, called "the Piana" because edited by order of St. Pius V, was the standard for many years. Besides a carefully revised text it contained the commentaries of Cardinal Cajetan and the valuable "Tabula Aurea" of Peter of Bergamo. The Venetian edition of 1612 was highly prized because the text was accompanied by the Cajetan-Portecca commentaries (see PORTECCA, Sigismondo). The manuscript edition, begun under the patronage of Leo XIII, now continued under the master general of the Dominicans, undoubtedly will be the most perfect of all. Critical dissertations on each work will be given, the text will be carefully revised, and all references will be verified. By direction of Leo XIII (Motu Proprio, 18 Jan., 1880) the "Summa contra gentiles" will be published with the commentaries of Sylvester Ferrariensis, whilst the commentaries of Cajetan go with the "Summa theologica". The latter has been published, being vols. IV-XII of the edition (last in 1906). St. Thomas's works may be divided into philosophical, scriptural, and apologetic, or controversial. The division, however, cannot always be rigidly maintained. The "Summa theologica", e. g., contains much that is philosophical, whilst the "Summa contra gentiles" is principally, but not exclusively, philosophical and apologetic. His philosophical works are chiefly commentaries on Aristotle, and his first important theological writings were commentaries on Peter Lombard's four books of "Sentences"; but he does not give a summary following Lombard's "Master of the Sentences" (on opinions of the Lombard, see Migne, 1841, edition of the "Summa", I, p. 451).

(2) "Quodlibeta" (may be rendered "Various Subjects", or "Free Discussions")—They present questions or arguments proposed and answers given in or outside the lecture halls. They chiefly inculcate some of the more formal scholastic exercises, termed circuli, conclusiones, or determinations, which were held once or twice a year. (See Mandonnet, "Siger de Brabant", 2nd ed., Louvain, 1911, IV, p. 85; Turner, "Hist. of Philosophy", Boston, 1903, p. 346). (3) "De unitate intellectus contra Averroes"—This opinion was, in fact, a dangerous and widespread error, viz., that there was but one soul for all men, a theory which did away with individual liberty and responsibility. (See AVERROES; Mandonnet, op. cit.) (4) "Commentaria in Libros Sententiarum" (mentioned above).—This with the following work are the immediate forerunners of the "Summa theologica". (5) "Summa de veritate catholicorum fidei contra gentiles" (Treatise on the Truth of the Catholic Faith, against Unbelievers).—This work, written at Rome, 1261-64, was composed at the request of St. Raymond of Pennafort, who desired to refute a very dangerous and widespread error, viz., that there was but one soul for all men, a theory which did away with individual liberty and responsibility. (See AVERROES; Mandonnet, op. cit.) (4) "Commentaria in Libros Sententiarum" (mentioned above).—This with the following work are the immediate forerunners of the "Summa theologica". (5) "Summa de veritate catholicorum fidei contra gentiles" (Treatise on the Truth of the Catholic Faith, against Unbelievers).—This work, written at Rome, 1261-64, was composed at the request of St. Raymond of Pennafort, who desired to refute a very dangerous and widespread error, viz., that there was but one soul for all men, a theory which did away with individual liberty and responsibility. (See AVERROES; Mandonnet, op. cit.) (4) "Commentaria in Libros Sententiarum" (mentioned above).—This with the following work are the immediate forerunners of the "Summa theologica". (6) Three works written by order of Urban IV (see Mandonnet, "Ecrits authentiques", p. 128).—(a) The "Opusculum contra errores Graecorum" refuted the teaching of the most of the Greeks, and particularly that which was held between them and the Roman Church, viz., the procession of the Holy Ghost from the Father and the Son, the primacy of the Roman pontiff, the Holy Eucharist, and purgatory. It was used against the Greeks with telling effect in the Council of Lyons.
THOMAS (1274) and in the Council of Florence (1403). In the range of human reasonings on deep subjects there can be found nothing to surpass the sublimity and depth of the argument adduced by St. Thomas to prove that the Holy Ghost is the Son (cf. Summa theolog., I, Q. xxxvi, a. 2); but it must be borne in mind that our Faith is not based on that argument alone. (b) "Officium de festo Corporis Christi."—Mandoonen (Ecrits, p. 127) declares that it is now established beyond doubt that St. Thomas is the author of the "beautiful" Office of Corpus Christi, in which solid doctrine, tender piety, and enlightening Scriptural citations are combined, and expressed in language remarkably accurate, beautiful, chaste, and poetic. Here we find the well-known hymns, "Sacris Solemniis," "Pange Lingua," (concluding in the "Pomum Ergo"), "Venite, exultemus," (concluding with the "O Salutaris Hostia"), and, in the Mass, the beautiful sequence "Lauda Sion." In the responses of the office, St. Thomas places side by side words of the New Testament affirming the real presence of Christ in the Blessed Sacrament, articles, and arguments; the latter differing to the types and figures of the Eucharist (see Vaughan, op. cit., p. 21 sqq.; Cassaw, "Lyra Catholica," London, 1840; Guéranger, "The Liturgical Year; Feast of Corpus Christi"). Santeuil, a poet of the seventeenth century, said he would give all the wages earned for the last thirty-six years of his life to St. Thomas's "liber omnium" : "Se nascens dedit socium, converses in edulium; Se moriens in pretium, Se regnant in praeium."—"In birth, man's fellow-man was He, His meat, while sitting at the Board: He died his Ransomer to be, He reigns to be His Great Reward (tr. by Marquis of Bute)." (c) The "Catena Aurea," though not as original as his other writings, furnishes a striking proof of St. Thomas's prodigious memory and manifests an intimate acquaintance with the Fathers of the Church. The work contains a series of passages selected from the writings of the various Fathers, arranged in such order that the texts cited form a running commentary on the Gospels. The commentary on St. Matthew was dedicated to Urban IV, and in the translation the "Catena Aurea" was edited by John Henry Newman. (4 vols., Oxon, 1841-1845; see Vaughan, op. cit., vol. II, pp. 529 sqq.).

(7) The "Summa theologiae."—This work immortalized St. Thomas. The author himself modestly considered it simply a manual of Christian doctrine for the use of his students. In reality it is a complete, scientifically arranged exposition of theology and at the same time a summary of Christian philosophy (see SUMMAE, SUMMULAE). In the brief prologue St. Thomas first calls attention to the difficulties experienced by students of sacred doctrine in his day, the causes assigned being: the multiplication of useless questions, articles, and themata; the lack of scientific order; frequent repetitions, "which beget disgust and confusion in the minds of learners.

Then he adds: "Wishing to avoid these and similar drawbacks, we shall endeavour, confiding in the Divine assistance, to treat of these things that pertain to sacred doctrine with brevity and clearness, in so far as the subject to be treated will permit." In the introductory question, "On Sacred Doctrine", he proves that, besides the knowledge which reason affords, Revelation also is necessary for salvation, first, because without it men could not know the supernatural truths to which they owe their sanctification; secondly, because, without Revelation, even the truths concerning God which could be proved by reason would be known "only a few, after a long time, and with the admixture of many errors". When revealed truths have been accepted, the mind of man proceeds to explain them and to draw conclusions from them. Hence results theology, which is a science, because it proceeds from principles that are certain (q. 2). The object, or subject, of this science is to prove the knowledge of God; for they relate to God (a. 7). Reason is used in theology not to prove the truths of faith, which are accepted on the authority of God, but to defend, explain, and develop the doctrines revealed (a. 8). He thus announces the division of the "Summa": "Since the end of the first division is to prove the knowledge of God, not only as He is in Himself, but also as He is the Beginning of all things, and the End of all, especially of rational creatures, we shall treat first of God; secondly, of the rational creature's advance towards God (de motu creaturee resumtis in Deum). Thirdly, Man, is the way by which we tend to God." God in Himself, and as He is the Creator; God as the End of all things, especially of man; God as the Redeemer—these are the leading ideas, the great headings, under which all that pertains to theology is contained. (a) Sub-divisions. (i) The First Part is divided into three tracts: (a) On those things which pertain to the Essence of God; (b) On the distinction of Persons in God (the mystery of the Trinity); (c) On the production of creatures by God and on the creatures produced. (ii) The Second Part, On God as He is in the world, is subdivided into two sections: (a) On the nature of St. Thomas, i.e., his treatise on the end of man and human acts. It is subdivided into two parts, known as the First Section of the Second (I-II, 1a 2ae) and the Second of the Second (II-II, 2a 2ae). (a) The First of the Second. The First five questions are devoted to proving: that man's last end, his beatitude, consists in the possession of God. Man attains to that end or deviates from it by human acts, i.e., free, deliberate acts. Of human acts he treats, first, in general (in all but the first five questions of the I-II), secondly, in particular (in the whole of the II-II). The treatise on human acts in general is divided into two parts: the first, on human acts in themselves; the other, on the principles or causes, extrinsic or intrinsic, of those acts. In these tracts, and in the Second of the Second, St. Thomas, following Aristotle, gives a perfect description and a wonderfully keen analysis of the movements of man's mind and heart. (b) The summary of human acts, i.e., the virtues and vices, in particular. In it St. Thomas treats, first, of those things that pertain to all men, no matter what may be their station in life, and, secondly, of those things that pertain to some men only. Things that pertain to all men are reduced to seven things, i.e., Charity, Prudence, Justice, Fortitude, and Temperance. Under each title, in order to avoid repetitions, St. Thomas treats not only of the virtue itself, but also of the vices opposed to it, of the commandment to practise it, and of the gift of the Holy Ghost which corresponds to it. The seven virtues are reduced to three headings: the graces freely given (gratia gratis datae) to certain individuals for the good of the Church, such as the gifts of tongues, of prophecy, of miracles; the active and the contemplative life; the particular states of life, and duties of those who are in different states, especially bishops and religious. (iii) The Third Part treats of Christ and of the benefits which He has conferred upon man, hence three tracts: On the Incarnation, and on what the Saviour did and suffered; On the Sacraments, which were instituted by Christ, and have their efficacy in Him; On the Church, i.e., on the end of the world, the resurrection of bodies, judgment, the punishment of the wicked, the happiness of the just who, through Christ, attain to eternal life in heaven.

Eight years were given to the composition of this
work, which was begun at Rome, where the First Part and the First of the Second were written (1265-69). The Second of the Second, begun in Rome, was completed in Paris (1271). In 1272 St. Thomas went to Naples, where the Third Part was written, down to the nineteenth question of the text (v. cit., i, p. xiii). The work has been completed by the addition of a supplement, drawn from other writings of St. Thomas, attributed by some to Peter of Auvergne, by others to Henry of Gorkum. These attributions are rejected by the editors of the Leonine edition (XI, pp. viii, xiv, xvii). Modern and more recent authorities declare that it was compiled by Father Reginald de Piperno, the saint’s faithful companion and secretary. The entire "Summa" contains 38 Treatises, 612 Questions, subdivided into 3120 articles, in which about 10,000 objections are proposed and answered. So admirably is the promised order preserved that, by reference to the beginning of the Tracts and Questions, one can see at a glance what place it occupies in the general plan, which embraces all that can be known through theology of God, of man, and of their mutual relations (see accompanying chart, reproduced by permission of the Rosary Mag. of the Holy Name, 1919). The Summa is arranged on a uniform plan. Every subject is introduced as a question, and divided into articles.

... Each article has also a uniform disposition of parts. The topic is introduced as an inquiry for discussion, under the term Utroque, whether—e.g., Utroque dicit. The objections against the proposed thesis are then stated. These are generally three or four in number, but sometimes extend to seven or more. The conclusion adopted is then introduced by the words, Respondeo dicendum. At the end of the thesis expounded the objections are answered, under the forms, ad utrum quidem, ad secundum, etc. (Encyclop. tr., see below). The "Summa" is Christian doctrine in scientific form; it is human reason rendering its highest service in defence and explanation of the truths of the Christian religion. It is the answer of the matured and saintly doctor to the question of his youth: What is God? Revelation, made known in the Scriptures and by tradition; reason and its best results; soundness and fulness of doctrine, order, conciseness and clearness of expression, effacement of self, the love of truth alone, hence a remarkable fairness towards adversaries and calmness in combating them; the universality and the uniformity (with a charmingly tender and enlightened piety)—these are all found in this "Summa" more than in his other writings, more than in the writings of his contemporaries, for "among the scholastic doctors, the chief and master of all, towers Thomas Aquinas, who, as Cajetan observes (In 2am 2ae, Q. 146, a. 4) ‘because he venerated the ancient doctors of the Church in a certain way seems to have inherited the intellect of all’ (Encyclop. "Æterni Patris", of Leo XIII).

(b) Editions and Translations.—It is impossible to mention the various editions of the "Summa", which has been in constant use for more than six hundred years. Very few books have been so often republished. The first complete edition, printed at Basle in 1485, was soon followed by others, e.g., at Venice in 1505, 1509, 1588, 1594; at Lyons in 1520, 1541, 1547, 1548, 1551, 1558, 1565; at Antwerp in 1540; at Louvain (op. cit., p. 692), who says that about the same time other editions were published at Rome, Antwerp, Rouen, Paris, Douai, Cologne, Amsterdam, Bologna, etc. The editors of the Leonine edition deem worthy of mention those published at Paris in 1617, 1638, and 1663, and at Venice in 1683, and a new edition of 1775 (IV, pp. xi, xii). Of all old editions they consider the most accurate two published at Padua, one in 1698, the other in 1712, and the Venice edition of 1755. Of recent editions the best are the following: the Leonine; the Migne editions (Paris, 1841, 1877); the first volume of the 1841 edition containing the "Libri quattuor sententiarum" of Peter Lombard; the very practical Faucher edition (5 vols. in 4, 1857), dedicated to Cardinal Pecchi, enriched with valuable notes by Rohrbach of 1894. The "Summa" has been translated into Greek and Armenian, and some parts have been translated into Chinese (see De Rubeis in Leonine ed., I, p. cxcvii; Eichard, Script. Ord. Pred., I, p. 345; Symon, op. cit., VI, ix; Valpy, op. cit., II, p. 167). In 1896 Father J. C. W. Buxton, P.P., to the verse rendering of "Aquinas Ethicus", a translation of the principal portion of the Second Part of the "Summa theologica". At the present time Father Thomas Péguy, O.P., is publishing a French translation of the whole "Summa" with commentaries, under the title "Commentaire français littéral de la Somme Théologique de S. Thomas d’Aquin". The five volumes which have appeared (Paris, 1907-10) bring the work down to the end of the First Part. (For reviews, see "Cath. University Bulletin", Jan., 1908; Jan., 1909; March, 1910; April, 1911.) For the English-speaking world, "The Scholastic Philosophy", "The Summa theologica", "The Method of St. Thomas", and "The Leonine Edition".

C. Method and Style of St. Thomas.—It is not possible to characterize the method of St. Thomas by one word, unless it can be called eclectic. It is Aristotelian, Platonic, and Scholastic; it is inductive and deductive; it is analytic and synthetic. He chose the best that could be found in those who preceded him, carefully sifting the chaff from the wheat, approving what was true, rejecting the false. His powers of synthesis were extraordinary. No writer surpassed him in the faculty of expressing in a few well-chosen words the truth gathered from a multitude of varying and conflicting opinions; and in almost every instance the student sees the truth and is perfectly satisfied with St. Thomas’s summary and statement. Not that he would have students swear by the words of a another. In point of judgment his authority are of secondary importance; philosophy does not consist in knowing what men have said, but in knowing the truth (In 1 lib. de Caelo, lect. xxi; II Sent., D. xiv, a. 2, ad 1am). He assigns its proper place to reason used in theology (see below: Influence of St. Thomas), but he keeps it within its own sphere. Against the Traditionalists the Holy See has declared that the method used by St. Thomas and St. Bonaventure does not lead to Rationalism (Denzinger-Bannwart, n. 1652). Not so bold or original in investigating nature as were Albertus Magnus and Roger Bacon, he was nevertheless, through science, and many of his opinions are of scientific value in the twentieth century. Take, for instance, the following: "In the same plant there is the twofold virtue, active and passive, though sometimes the active is found in one and the passive in another, so that one plant is said to be masculine and the other feminine" (3 Sent., D. III, Q. ii, a. 1.—For other examples see Conway, O.P., op. cit., pp. 73 sqq.; Walsh, "St. Thomas Aquinas"; in "Rosary Magazine", May, 1911).

The style of St. Thomas is a medium between the rough expressions of some Scholastics and the fastidious elegance of John of Salisbury; it is remarkable for accuracy, brevity, and completeness. Pope Innocent VI (quoted in the Encyclical, "Æterni Patris", of Leo XIII) declared that, with the except-
tion of the canonical writings, the works of St. Thomas supply all others in "accuracy of expression and truth of statement" (habet proprietatem verborum, modum dicendorum, veritatem sententiarum). Great orators, such as Bossuet, Lacordaire, Monsabré, have studied his style, and have been influenced by it, but they could not reproduce it. The same is true of his discourses. Cajetanism was the style better than any of his disciples, but Cajetan is beneath his great master in clearness and accuracy of expression, in sobriety and solidity of judgment. St. Thomas did not attain to this perfection without an effort. He was a singularly blessed genius, but he was also an indefatigable worker, and by the time he reached that stage of perfection in the art of writing where the art disappears. "The author's manuscript of the Summa Contra Gentiles is still in great part extant. It is now in the Vatican Library. The manuscript consists of strips of parchment, of various shades of colour, contained in an old parchment cover to which they were originally stitched. The writing is in double column, and difficult to decipher, abounding in abbreviations, often passing into a kind of shorthand. Throughout many passages a line is drawn in sign of erasure" (Rickaby, op. cit., prefage: see Uceli ed.), "Sum. cont. gent., I, ii, sqq.

III. Influences Exerted on St. Thomas.—How was this great genius formed? The causes that exerted an influence on St. Thomas were of two kinds, natural and supernatural.

A. Natural Causes. (1) As a foundation, he "was a witty child, and had received a good soul" (Wis., viii, 19). From the beginning he manifested precocious and extraordinary talent and thoughtfulness beyond his years. (2) His education was such that great things might have been expected of him. His training at Monte Cassino, at Naples, Paris, and Cologne was the best that the fourteenth century could give, and that century was the golden age of education. That it afforded excellent opportunities for forming great philosophers and theologians is evident from the character of St. Thomas's contemporaries. Alexander of Hales, Albertus Magnus, St. Bonaventure, St. Raymond of Pennafort, Roger Bacon, Hugo a S. Charo, Vincent of Beauvais, not to mention scores of others, prove beyond all doubt that those were days of really great scholars. (See Walsh, "The Thirteenth Greatest of Centuries", New York, 1907.) The men who trained St. Thomas were his teachers at Monte Cassino, but about whom he studied at Paris and Cologne. (3) The books that exercised the greatest influence on his mind were the Bible, the Decrees of the councils and of the popes, the works of the Fathers, Greek and Latin, especially of St. Augustine, the "Sentences" of Peter Lombard, the writings of the philosophers, especially of Plato, Aristotle, and Boethius. If from these authors any were to be selected for special mention, undoubtedly they would be Aristotle, St. Augustine, and Peter Lombard. In another sense the writings of St. Thomas were influenced by Averroes, the theologian whom he had to combat in order to defend and make known the true Aristotle. (4) It must be borne in mind that St. Thomas was blessed with a retentive memory and great powers of penetration. Father Daniel d'Agusta once pressed him to say what he considered the greatest grace he had ever received, sanctifying grace of course excepted. "If I had to name that of having perceived what I have read," was the reply. St. Antoninus declared that "he remembered everything he had read, so that his mind was like a huge library" (cf. Drane, op. cit., p. 427; Vaughan, op. cit., II, p. 567). The bare enumeration of the works of Scripture cited in the "Summa theologica" finds eighty entries and constitutes the opening of the Migne edition, and by many it is unreasonably supposed that he learned the Sacred Books by heart while he was imprisoned in the Castle of San Giovanni. Like St. Dominic he had a special love for the Epistles of St. Paul, on which he wrote commentaries (recent edition in 2 vols., Turin, 1891). (5) Deep reverence for the Faith, as made known by tradition, characterizes all his writings. The con-

B. Supernatural Causes. — Even if we do not accept as literally true the declaration of John XXII, that St. Thomas wrought as many miracles as there are articles in the "Summa", we must, nevertheless, go beyond causes merely natural in attempting to explain his extraordinary career and wonderful writings. (1) Purity of mind and body contributes in no small degree to clearness of vision (see St. Thomas, "Commentarii in Cor., c. vii", Lesson v). By the gift of purity, miraculously granted at the time of the mystic girding, God made Thomas's life angelic; the peregrinability and depth of his intellect, Divine grace aiding, made him the "Angelic Doctor." (2) The spirit of prayer, so truly an Albigensian vocation, deepened and gave direction to his studies. Explaining why he read, every day, portions of the "Conferences" of Cassian, he said: "In such reading I find devotion, whence I readily ascend to contemplation" (Prümmer, op. cit., p. 32). In the lessons of the Breviary read on his feast day it is explicitly stated that he never began to study without first invoking the assistance of God in prayer; and when he wrestled with obscure passages of the Scriptures, to prayer he added fasting. (3) Facts narrated by persons who either knew St. Thomas in life or wrote at about the time of his canonization prove that he received continuous grace from heaven. To Father Reginald he declared that he had learned more in prayer and contemplation than he had acquired from men or books (Prümmer, op. cit., p. 36). These same authors tell of mysterious visitors who came to encourage and enlighten him. The Blessed Virgin appeared, to assure him that his work was acceptable and that he would persevere in his holy vocation. Sts. Peter and Paul came to aid him in interpreting an obscure passage in Isaias. When humility caused him to consider himself unworthy of the doctorate, a venerable religious of his order (supposed to be St. Dominic) appeared to encourage him and suggested the idea for the opening discourse (Prümmer, op. cit., 29, 37; Tocci in "Acta
ST. THOMAS AQUINAS AMONG THE DOCTORS OF THE CHURCH
FRANCISCO ZURBARAN, THE MUSEUM, SEVILLE.
His ecstasies have been mentioned. His abstractions in presence of King Louis IX (St. Louis) and of distinguished visitors are related by his biographers. Hence, even if allowance be made for great enthusiasm on the part of his admirers, we must conclude that his extraordinary learning cannot be attributed to merely natural causes. Of him it may truly be said that he laboured as if all depended on his own efforts and prayed as if all depended on God. THOMAS.—A. Influence on Sanctity.—The great Scholastics were holy as well as learned men. Alexander of Hales, Blessed Albertus Magnus, St. Thomas, and St. Bonaventure prove that learning does not necessarily dry up devotion. The angelic Thomas and the seraphic Bonaventure represent the highest types of contemplative, ascetic, and bining eminent learning with heroic sanctity. Cardinal Bessarion called St. Thomas "the most saintly of learned men and the most learned of saints." His works breathe the spirit of God, a tender and enlightened piety, built on a solid foundation, viz. the knowledge of God, of Christ, and of man. "Summa theologica" may be made a manual of piety as well as a text-book for the study of theology (cf. Drane, op. cit. p. 446). St. Francis de Sales, St. Philip Neri, St. Charles Borromeo, St. Vincent Ferrer, St. Pius V, St. Antoninus constantly studied St. Thomas and referred to him as their guide. Two of his treatises on Christ, in His sacred Person, in His life and sufferings. His treatise on the sacraments, especially on penance and the Eucharist, would melt even hardened hearts. He takes pains to explain the various ceremonies of the Mass ("De ritu Eucharistic," in "Sum. theol."") II Q. lxxxii, and no writer has explained more clearly than St. Thomas the effects produced in the souls of men by this heavenly Bread (ibid., Q. lxxxix). The principles recently urged, in regard to frequent Communion, by Pius X ("Sacrae Trident. Synod."") 1905 are found in St. Thomas (Q. lxxxix, a. 5; Q. lxxix, a. 10), although he is not so explicit on this point as he is on the Communion of children. In the Decree "Quam Singulari" (1910) the pope cites St. Thomas, who teaches that, when children begin to have some use of reason, so that they can conceive some devotion to the Blessed Sacrament, they may be allowed to communicate (Q. xxvi, a. 1, q. 7, a. 9). The spiritual and devotional aspects of St. Thomas's theology have been pointed out by Father Contenson, O.P., in his "Theologia mentalis et cordis." They are more fully explained by Father Vallorners, O.P., in his "Theologia Mystica D. Thomae," wherein the author leads the soul to the highest type of contemplative, illuminative, and unitive ways. The Encyclical Letter of Leo XIII on the Holy Spirit is drawn largely from St. Thomas, and those who have studied the "Prima Secundae" and the "Secundae Secundae" know how admirably the saint explains the gifts and fruits of the Holy Ghost, as well as the Beatitudes, and their relations to the different virtues (see Froget, O.P. "De L'habitation du Saint Esprit dans les âmes justes, d'après la doctrine de S. Thomas d'Aquin," Paris, 1898). Nearly all good spiritual writers seek in St. Thomas definitions of the virtues which they recommend. Recently his minor works on the religious life have been translated into English ("An Apology for the Religious Orders," by St. Thomas Aquinas, St. Louis, 1902; "The Religious State", "The Episcopate", "The Priestly Office", by St. Thomas, St. Louis, 1902).

B. Influence on Intellectual Life.—Since the days of the early Church, the scholastic method of investigating questions and formulating opinions has had a powerful influence on the thinking world as did St. Thomas. His authority was very great during his lifetime. The popes, the universities, the study of his order were anxious to profit by his learning and prudence. Several of his important works were written at the request of others, and his opinion was sought by all classes. On several occasions the doctors of Paris referred their disputes to him and gratefully obeyed his decisions. Hence, even if allowance be made for great enthusiasm on the part of his admirers, we must conclude that his extraordinary learning cannot be attributed to merely natural causes. Of him it may truly be said that he laboured as if all depended on his own efforts and prayed as if all depended on God. THOMAS.—A. Influence on Sanctity.—The great Scholastics were holy as well as learned men. Alexander of Hales, Blessed Albertus Magnus, St. Thomas, and St. Bonaventure prove that learning does not necessarily dry up devotion. The angelic Thomas and the seraphic Bonaventure represent the highest types of contemplative, ascetic, and bining eminent learning with heroic sanctity. Cardinal Bessarion called St. Thomas "the most saintly of learned men and the most learned of saints." His works breathe the spirit of God, a tender and enlightened piety, built on a solid foundation, viz. the knowledge of God, of Christ, and of man. "Summa theologica" may be made a manual of piety as well as a text-book for the study of theology (cf. Drane, op. cit. p. 446). St. Francis de Sales, St. Philip Neri, St. Charles Borromeo, St. Vincent Ferrer, St. Pius V, St. Antoninus constantly studied St. Thomas and referred to him as their guide. Two of his treatises on Christ, in His sacred Person, in His life and sufferings. His treatise on the sacraments, especially on penance and the Eucharist, would melt even hardened hearts. He takes pains to explain the various ceremonies of the Mass ("De ritu Eucharistic," in "Sum. theol."") II Q. lxxxii, and no writer has explained more clearly than St. Thomas the effects produced in the souls of men by this heavenly Bread (ibid., Q. lxxxix). The principles recently urged, in regard to frequent Communion, by Pius X ("Sacrae Trident. Synod."") 1905 are found in St. Thomas (Q. lxxxix, a. 5; Q. lxxix, a. 10), although he is not so explicit on this point as he is on the Communion of children. In the Decree "Quam Singulari" (1910) the pope cites St. Thomas, who teaches that, when children begin to have some use of reason, so that they can conceive some devotion to the Blessed Sacrament, they may be allowed to communicate (Q. xxvi, a. 1, q. 7, a. 9). The spiritual and devotional aspects of St. Thomas's theology have been pointed out by Father Contenson, O.P., in his "Theologia mentalis et cordis." They are more fully explained by Father Vallorners, O.P., in his "Theologia Mystica D. Thomae," wherein the author leads the soul to the highest type of contemplative, illuminative, and unitive ways. The Encyclical Letter of Leo XIII on the Holy Spirit is drawn largely from St. Thomas, and those who have studied the "Prima Secundae" and the "Secundae Secundae" know how admirably the saint explains the gifts and fruits of the Holy Ghost, as well as the Beatitudes, and their relations to the different virtues (see Froget, O.P. "De L'habitation du Saint Esprit dans les âmes justes, d'après la doctrine de S. Thomas d'Aquin," Paris, 1898). Nearly all good spiritual writers seek in St. Thomas definitions of the virtues which they recommend. Recently his minor works on the religious life have been translated into English ("An Apology for the Religious Orders," by St. Thomas Aquinas, St. Louis, 1902; "The Religious State", "The Episcopate", "The Priestly Office", by St. Thomas, St. Louis, 1902).
the decree being moderated by Gregory IX in 1231. There crept into the University of Paris an insidious spirit of irreverence, and Scholasticism, was especially by Abelard and Raymond Lullius, which claimed that reason could know and prove all things, even the mysteries of Faith. Under the authority of Averroes dangerous doctrines were propagated, especially two very pernicious errors: first, that philosophy being made rationalism into a true religion might be false in philosophy; secondly, that all men have but one soul. Averroes was commonly styled "The Commentator", but St. Thomas says he was "not so much a Peripatetic as a corruptor of Peripatetic philosophy" (Opus. de unit. intell.).

Applying the principle of St. Thomas (St., Ix, viii. a. 5), following in the footsteps of Alexander of Hales and Albertus Magnus, St. Thomas resolved to take what was true from the "unjust possessors", in order to press it into the service of revealed religion. Objections to Aristotle would cease if the true Aristotle were made known; hence his first care was to obtain a new translation of the works of the great philosopher (see A. Jourdain, "Recherches critiques sur l'âge et l'origine des traductions latines d'Aristote", Paris, 1819, 1843: Uebeweg, op. cit., I, p. 430; Barthélemy Saint-Hilaire). Aristotle was to be purified; false commentators were to be refuted; the most influential errors of Averroism were Averroism in what is called St. Metaphysics, henceforth St. Thomas is continually rejecting his false interpretations.

(2) Theology Systematized.—The next step was to press reason into the service of the Faith, by putting Christian doctrine into scientific form. Scholasticism does not exist, as some persons imagine, in useless discussions and subtleties, but in this, that it expresses sound doctrine in language which is accurate, clear, and concise. In the Encyclical "Æterni Patris" Leo XIII, citing the words of Sixtus V (Bull "Triumphantis", 1588), declares that to the right use of philosophy we are indebted for "those noble endowments which make Scholastic theology so formidable to the enemies of truth", because "that ready coherence of cause and effect, that order and array of a disciplined army in battle, those clear definitions and distinctions, that strength of argument and those keen discussions by which light is displayed from darkness, the true from the false, expose and lay bare, as it were, the falsehoods of heretics wrapped around by a cloud of subterfuges and fallacies".

When the great Scholastics had written, there was light where there had been darkness, there was order where confusion had prevailed. The work of St. Thomas was first to spread this light by the Scholastic theologians. Since their days no substantial improvements have been made in the plan and system of theology, although the field of apologetics has been widened, and positive theology has become more important.

C. St. Thomas's Doctrines Followed.—Within a short time after his death the writings of St. Thomas were universally esteemed. The Dominicans naturally took the lead in following St. Thomas. The general chapter held in Paris in 1279 pronounced severe penalties against all who dared to speak irreverently of him or his writings. The chapters held in Paris in 1286, at Bordeaux in 1287, and at Lucca in 1288 expressly required the brethren to follow the doctrine of Thomas, who at that time had not been canonized (Const. Ord. Pred., n. 1130). The University of Paris, on the occasion of Thomas's death, sent an official missive to the general chapter of the Dominicans, declaring that equally with his brethren, the university experienced sorrow at the loss of one who was their own by many titles (see text of letter in Vaughan, op. cit., II, p. 92). In the Encyclical "Æterni Patris" Leo XIII mentions the Universities of Paris, Salamanca, Aix-la-Chapelle, Douai, Toulouse, Louvain, Padua, Poggio, Naples, and Coimbra as "the homes of human wisdom where St. Thomas reigned supreme, and the minds of all, of teachers as well as students, taught and trained in wonderful harmony under the shield and authority of the Angelic Doctor". To the list may be added Lima and Manila, Fribourg and Washington. Seminaries and colleges followed the lead of the universities. The "Summa" gradually supplanted the "Sentences" as the text-book of theology. In regions where it were taught in harmony with the principles of St. Thomas; he became the great master, exercising a world-wide influence on the opinions of men and on their writings; for even those who did not adopt all of his conclusions were obliged to give due consideration to his opinions. It has been estimated that more than seven thousand works have been written. Manuals of theology and of philosophy, composed with the intention of imparting his teaching, translations, and studies, or digests (études), of portions of his works have been published in profusion during the last six hundred years and to-day his name is in honour all over the world (see Thomism). In every one of the general councils held since his death St. Thomas has been singularly honoured. At the Council of Lyons his book "Contra errores Graecorum" was used with telling effect against the Greeks. In later disputes, before and during the Council of Florence, John of Khurumegg and others of the Franciscans of the Church of St. Thomas, works a source of irrefragable arguments. The "Decretum pro Armenis" (Instruction for the Armenians), issued by the authority of that council, is taken almost verbatim from his treatise, "De fidei articulis et septem sacramentis" (see Denzinger-Bannwart, n. 665). "In the Councils of Lyons, Vienne, Florence, and the Vatican", writes Leo XIII (Encyclical Æterni Patris), "one might almost say that Thomas took part in and preceded over the deliberations and decrees of the Fathers, contending against the errors of the Greeks, of heretics, and Rationalists, with invincible force and with the help of divine truth. But the chief and special glory of Thomas, one which he shared with none of the Catholic doctors, is that the Fathers of Trent made it part of the order of the conclave to lay upon the altar, together with the code of Sacred Scripture and the decrees of the Supreme Pontificate, on the altar, true from Thomas's "Divina Commedia" whence to seek counsel, reason, and inspiration." Greater influence than this no man could have.

Before this section is closed mention should be made of two books widely known and highly esteemed, which were inspired by and drawn from the writings of St. Thomas. The treatise "Exercitii Spirituales" by Bernard de Taillefer, and the "Exercitii Spirituales" of St. Albert of the Angelic Doctor, seemingly a specimen of the study of Scholastic philosophy: "It is known that nearly all the founders and framers of laws of religious orders commanded their societies to study and religiously adhere to the teachings of St. Thomas. To say nothing of the family of St. Dominic, which rightly claims this great teacher for its own glory, the statutes of the Benedictines, the Carmelites, the
Augustinians, the Society of Jesus, and many others, all testify that they are bound by this law. Amongst the "many others" the Servites, the Passionists, the Barnabites, and the Sulpicians have been devoted in an especial manner to the study of St. Thomas. (See "Leota et Locum Testationis de S. Thomas d'Aquin", Paris, 1905, pp. 15 sqq.; Goudin, O.P., "Phil. D. Thomas", Paris, 1886, introd. a 3; Tournon, op. cit., V, cc. xi, xii.) The principal ancient universities where St. Thomas ruled as the great master have been enumerated above. The Paris doctors claimed him as the mystic, the poet, the philosopher, the light of the whole Church. Stephen, Bishop of Paris, repressing those who dared to attack the doctrine of "that most excellent Doctor, the blessed Thomas", calls him "the great luminary of the Catholic Church, the precious flower of the priesthood, the flower of doctors, and the bright mirror of the University of Paris" (Drano, op. cit., p. 431).

In the old Louvain University the doctors were required to uncover and bow their heads when they pronounced the name of Thomas (Goudin, op. cit., p. 21). (On the universities, see Tournon, op. cit., I, cc. IX, X; Echard, op. cit., I, 435, pp. 15 sqq.; cf. above, p. 712.)

"The ecumenical councils, where blossoms the flower of all earthly wisdom, have always been careful to hold Thomas Aquinas in singular honour" (Leo XIII in "Et Patris"). This subject has been sufficiently treated above. The "Bullarium Ordinis Preclavatorum", published in 1729-39, gives thirty-eight Bulls in which eighteen sovereign pontiffs praised and recommended the doctrine of St. Thomas (see also Vaughan, op. cit., II, c. ii; Berthier, op. cit., pp. 7 sqq.). These approbations are recalled and renewed by Leo XIII, who lays special stress on "the crowning testimony of Innocent VI: His teaching above the others, the canons alone excepted, enjoys such an elegance of phraseology, a method of statement, a truth of proposition, that those who hold it are never found swerving from the path of truth, and he who dare assail it will always be suspected of error." (Ibid.) Leo XIII surpassed his predecessors in admiration of St. Thomas, in whose works he declared a remedy can be found for many evils that afflict society (see Berthier, op. cit., introd.). The notable Encyclical Letters with which the name of that illustrious pontiff will always be associated show how he had understood the doctrine of the Church. The most noticeable in the letters on Christian marriage, the Christian constitution of states, the condition of the working classes, and the study of Holy Scripture. Pope Pius X, in several Letters, e. g. in the "Pascendi Dominici Gregis" (Sept., 1907), has insisted on the observance of the recommendations of Leo XIII concerning the study of St. Thomas. An attempt to give names of Catholic writers who have expressed their appreciation of St. Thomas and of his influence would be an impossible undertaking; for the list would include nearly all who have written on philosophy since the Reformation, as well as hundreds of writers on other subjects. Commentaries and eulogies are found in the introductory chapters of all good commentaries. An incomplete list of authors who have collected these testimonies is given by Father Berthier (op. cit., p. 22). Other names will be given in bibliography. (See Thomists.)

(2) Outside the Church.—(a) Anti-Scholastics. Some persons have been and are still opposed to everything that comes under the name of Scholasticism, which they hold to be synonymous with subtlety and useless discussions. From the prologue to the "Et Patris" we may see that the Saint himself was opposed to all that was superfluous and confusing in Scholastic studies. When people understand what true Scholasticism means, their objections will cease (see De Wulf, "Scholasticism Old and New", New York, 1907; Perrier, "The Revival of Scholastic Philosophy", New York, 1909; and especially the Encyclical "Æterni Patris"). (b) Heretics and Schismatics.—"A last triumph was reserved for this incomparable man—namely, to compel the homage, praise, and imitation of his numerous followers in every part of the world. The name of Thomas was made use of, and the Church of the sixteenth century could not but revere the name of St. Thomas by attacking him, Luther being particularly violent in his coarse invectives against the great doctor. Citing Bucer's wild boast, "Take away Thomas and I will destroy the Church", Leo XIII (ibid.) remarks, "The hope was vain, but the testimony has its value." Cælo, Tocci, and other biographers relate that St. Thomas, travelling from Rome to Naples, converted two celebrated Jewish rabbis, whom he met at the country house of Cardinal Richard (Prümmer, op. cit., p. 33; Vaughan, op. cit., II, p. 793). Rabbi Paul of Burgos, in the fifteenth century, was converted by reading the "Summa" of St. Thomas. Theobald Thamer, a disciple of Melanchthon, abjured his heresy after he had read the "Summa", which he intended to refute. The Calvinius Duperron was converted in the same way, subsequently becoming Archbishop of Sena and a cardinal (see Conway, O.P., op. cit., p. 96). After the bitterness of the first period of Protestantism had passed away, the Protestants saw the necessity of retaining many parts of Catholic philosophy and theology, and those who came to know St. Thomas were compelled to admire him. Ueberweg says "He brought the Scholastic philosophy to its highest stage of development, by effecting the most perfect accommodation that was possible of the Aristotelian philosophy to ecclesiastical orthodoxy" (op. cit., p. 440). R. Seeberg in the "New Schaff-Herzog Religious Encyclopedia" (New York, 1911) devotes ten columns to St. Thomas, and says that "at all points he succeeded in upholding the church doctrine as credible and reasonable." (XL, p. 427). For many years, especially since the days of Pusey and Newman, St. Thomas has been in high repute at Oxford. Recently the "Summa contra gentiles" was placed on the list of subjects which a candidate may offer in the final honour school of the "Facultas Humanae". (W. E. Walsh, op. cit., x. vii.) For several years Father De Groot, O.P., has been the professor of Scholastic philosophy in the University of Amsterdam, and courses in Scholastic philosophy have been established in some of the leading non-Catholic universities of the United States. Anglicans have a deep admiration for St. Thomas. Alfred Mortimer, in the chapter "The Study of Theology" of his work entitled "Catholic Faith and Practice" (2 vols., New York, 1909), regretting that "the English priest has ordinarily no scientific acquaintance with the Queen of Sciences", and regretting that "the best doctrine with regard to the perfection of universal theology is to be found in the Summa of St. Thomas" (vol. II, pp. 454, 465).

V. ST. THOMAS AND MODERN THOUGHT.—In the Syllabus of 1864 Pius IX condemned a proposition in which it was stated that the method and principles of the ancient Scholastic doctors were not suited to the needs of our times and the progress of science (Denzinger-Bannwart, n. 1713). In the Encyclical "Æterni Patris" Leo XIII points out the benefits to be derived from "a practical reform of philosophy by restoring the renowned teaching of St. Thomas Aquinas". He expounds the truths that the golden wisdom of Thomas and to spread it far and wide for the defence and beauty of the Catholic Faith, for the good of society, and for the advantage of all the sciences. In the pages of the Encyclical imme-
Thomas 674

No better guide could have been chosen than the clear-minded, analytic, synthetic, and sympathetic Thomas Aquinas. His extraordinary patience and fairness in dealing with erring philosophers, his approbation of all that was true in their writings, his gentle- ness in pointing out the direction to true knowledge in all its branches, his aptness and accuracy in expressing the truth—these qualities mark him as a great master not only for the thirteenth century, but for all times. If any persons are inclined to consider him too subtle, it is because they do not know how clear, concise, and simple are his definitions and divisions. His two *summae* are masterpieces of pedagogy, and mark him as the greatest of human teachers. Moreover, he dealt with errors similar to many which go under the name of philosophy or science in our days. The Rationalism of Abelard and others called forth by St. Thomas's luminous and everlasting principles on the true relations of faith and reason. Ontologism was solidly refuted by St. Thomas nearly six centuries before the days of Malebranche, Gioberti, and Ubaghs (see “Sum. theol.”, I, Q. lxxxiv, a. 8). The true effect of the Logos upon him and by the other great Scholastics, is the best refutation of Kant's criticism of metaphysical ideas (see, e.g., “Post. Analyt.”, I, lect. xix; “De ente et essentia”, c. iv; “Sum. theol.”, I, Q. xvii, a. 3, corp. and ad 2em; Q. lxxix, a. 3; Q. lxxxiv, a. 5, a. 6, corp. and ad 2em; Q. lxxxv, a. 2; Q. lxxxvi, Q. lxxxv). Cf. index to “Sum. theol.”, “Veritatis”, “Principium”, “Universale”). Modern psychological Pantheism does not differ substantially from the theory of one soul for all men asserted by Averroes (see “De unit. intell.” and “Sum. theol.”, I, Q. lxxvi, a. 2; Q. lxxxiv, a. 5). The Modernistic error, which distinguishes the Christ of faith from the Christ of history, had as its forerunner the Averroistic principle that a thing might be true in philosophy and false in religion.

In the Encyclical “Providentissimus Deus” (18 Nov., 1893) Leo XIII draws from St. Thomas's writings the principles and wise rules which should govern scientific criticism of the Sacred Books. From the same source recent writers have drawn principles which are most helpful in the solution of questions pertaining to Spiritism and Hypnotism (see Concinnier, *L'âme humaine*, Paris, 1890; “L'hypnotisme franc”, Paris, 1898; Berthier, *Spiritisme et hypnotisme*); Ursus S. Thomae (see *Summae*). Are we to conclude, then, that St. Thomas's works, as he left them, furnish sufficient instruction for scientists, philosophers, and theologians of our times? By no means. *Vetere nosis augere et perferere—To strengthen and complete the old by aid of the new*. Is this the measure of the restoration promised by Leo XIII? Were St. Thomas living to-day he would gladly adopt and use all the facts made known by recent scientific and historical investigations, but he would carefully weigh all evidence offered in favour of the facts (see “L'Avenir du Thomisme” in Serilactes, op. cit. p. 127). "Positive theology is more necessary in our days than it was in the thirteenth century. Leo XIII calls attention to its necessity in his Encyclical, and his admonition is renewed by Pius X in his Letter on Modernism. But both pontiffs declare that positive theology must not be ex- toled to the detriment of Scholastic theology. In the Encyclical "Pascendi", prescribing remedies against Modernism, Pius X, following in this his illustrious predecessor, gives the first place to "Scholastic philosophy, especially as it was taught by Thomas Aquinas". St. Thomas is still "The Angel of the Schools".

**Specimen of Text of the Summa;** I, Q. i, a. 1.

With translation by English Dominican Fathers.

Utrum sit necessarium propter Whether, besides philosophy, philosophicas disciplinas any further doctrine is re- quire?
Ad primum quo proceditur.

1. Videtur quod non sit necessarium præter philosophicas disciplinas, ne secundum aliarem haberi. Ad ea enim quae supra rationem sunt, non sunt præter philosophicas disciplinas. Superfuum igitur videtur præter disciplinas aliam doctrinam haberi.

2. Fideatis, doctrina non potest esse nisi de ente; nihil enim potest esse nisi quod eum convertit, sed de omnibus sibi etiam divinius disciplinae philosophicas et etiam de Deo; unde quidem seque præter disciplinas utrumque seque se in doctrinam. Sive doctrina se divina scientia divina, divinum universale, divinum in 6 Metaph. (com. 2). Non fuit igitur necessarium præter disciplinas se habere.

Sed contra est quid dici tur 2 ad Themas, 11, 12. Quod in scripturis divinis inspirata utile est ad docendum, non est corripienda, ad erudendum, ad justitiam. Sedest autem divinitas insiprata non pertinet ad philosophicam scientiam, sed quae sunt secundum humam rationem inventae. Unde necessarium est præter philosophicas disciplinas esse aliam scientiam divinam.

Respondeo disendum quod, necesse est quod Deo in humana salutatione esse doctrina quacumque secundum revelaconem divinam præter philosophicas disciplinas quae ratione humanae investigatur. Primo quidem quia hinc sequitur, quod Deo semper aliquid sed at quemdam finem, quod comprehenduntur rationem divinam secundum Iudaei 64,4; Oculus non vidit, Deus, absque te, quae omni expectationibus tib. Finem autem operis esse per se cognitionis hunc divinam tentiones et actiones debet ordine in finem. Unde necessarium est hominum dignum ad salutem quod non sit tamen quod per revelationem divinam rabatis humanae exequi.

Ad steiam quas de Deo rationem humanam posse sunt, necessarium est hunc instruct revelationum secundum expositionem Deo per rationem investigare, a paucis et per longum tempus non in admissione multorum errores. Quid tamen, sicut veritatis cognitione dependet totius humanae cognitionis, in Deo est. Ut igitur salus huminibus et convenientiam et certitudinem habere, necessarium est quod divinis per divinam revelationem sunt instruxerunt. Necesseest igitur præter praepræter philosophicas disciplinas, quae per rationem investigat, sivee in doctrinam revelationem habet.

**Thomas Becket, Saint, martyr, Archbishop of Canterbury, b. at London, 21 Dec., 1118 (7); d. at Canterbury, 29 Dec., 1170. St. Thomas was born of parents who, coming from Normandy, had settled in England some years previously. No reliance can be placed upon the legend that his mother was a Saracen. In after life his humble birth was made the subject of spiteful comment, though his parents were not peasants, but people of some rank, and from his earliest years their son had been well taught and had associated with gentlefolk. He learned to read at Merton Abbey and then studied in Paris. On leaving school he employed himself in secretarial work, first with Sir Richer de l'Aigle and then with his kinsman, Osbert Huideniers, who was "Justiciar" of London. Somewhat about the year 1127, under the influence of Albertus Magnus, he was variously related, he entered the service of Theobald, Archbishop of Canterbury, and in that house-hold he won his master's favour and eventually became the most trusted of all his clerks. A description embodied in the Icelandic Saga and derived probably from Robert de Clriklaive gives a vivid portrait of him at this period. To look upon him was so long of form and pale of hue, with dark hair, a long nose, and a strictly featured face. Bliche of countenance was he, winning and lovable in his conversation, frank of speech in his discourses, but slightly stuttering in his talk, so keen of wit, so shrewd in his judgment and so ready in his replies, that he could always make difficult questions plain after a wise manner." 

Theobald recognized his capacity, made use of him in many delicate negotiations, and, after allowing him to go to London for a year to study civil and canon law at Bologna and Aixerre, ordained him deacon in 1154, after bestowing upon him several preferments, the most important of which was the Archdeaconry of Canterbury (see Radford, "Thomas of London", p. 53). 

It was at this period that King Stephen died and the young monarch Henry II became unques-tioned master of all the English lands. For some years previously, as Bishop of London", as Becket was then most commonly called, for his chancellor, and in that office Thomas at the age of thirty-six became, with the possible exception of the justiciar, the most powerful subject in Henry's wide dominions. The chroniclers speak with wonder of the relations which existed between the chancellor and the sovereign, who was twelve years his junior. People declared that "they had but one heart and one mind." Often the king and his minister behaved like two schoolboys at play. But although they hunted or rode at the head of an army together it was no more companionship in partmentum and understanding; they were hard workers, and both, we may believe, had the prosperity of the kingdom deeply at heart. Whether the chancellor, who was after all the elder man, was the true originator of the administrative reforms which Henry introduced cannot now be clearly determined. In many matters they saw eye to eye. The king's imperial views and love of splendour were quite to the taste of his minister. When Thomas went to France in 1158 to negotiate a marriage treaty, he travelled with such pomp that the people said: "If this be only the chancellor what must be the glory of the king himself?" 

In 1163 Thomas acted as justice itinerant in three counties. In 1169 he seems to have been the chief originator of Henry's expedition to Toulouse, upon which he accompanied him, and though it seems to be untrite that the impost of "seigeage" was called into
existence for that occasion (Round, "Feudal England", 268–73), still Thomas undoubtedly pressed on the extortion of the money contribution in lieu of military service and enforced it against ecclesiastics in such a way that bitter complaints were made of the disproportionately heavy burden thus imposed upon the Church. In the military operations Thomas took a leading part, and Garnier, a French chronicler, who left the writing of the virtues of St. Thomas and his martyrdom, declares that in these encounters he saw him unhorse many French knights. Deacon though he was, he led the most daring attacks in person, and Edward Grim also gives us to understand that in laying waste the enemy’s country with fire and sword the crews of his ships did not materially differ from those of the other commanders of his time. But although, as men then reported, “he put off the archdeacon”, in this and other ways, he was very far from assuming the licentious manners of those around him. No word was ever breathed against his personal purity. Foul conduct or foul speech, lying or unchastity were hateful to him, and on occasion he punished them severely. He seems at all times to have had clear principles with regard to the claims of the Church, and even during this period of his chancellorship he more than once risked Henry’s gracious displeasure. For example, he opposed the dispensation which Henry for political reasons extorted from the pope, and strove to prevent the marriage of Mary, Abbess of Romsey, to Matthew of Boulogne. But to the very limits of what his conscience permitted, Thomas identified himself with his master’s interests, and his position is true to history when he makes the archbishop say:

I served our Theobald well when I was with him: I served King Henry well as Chancellor: I am his no more, and I must serve the Church.

Archbishop Theobald died in 1161, and in the course of the next year Henry seems to have decided that it would be good policy to prepare the way for further schemes of reform by securing the advancement of his chancellor to the primacy. Our authorities are agreed that from the first Thomas drew back in alarm... “I know your plans for the Church”, he said, “you will assert claims which I, if I were archbishop, must needs oppose.” But Henry would not be gainsaid, and Thomas at the instance of Cardinal Henry of Pisa, who urged it upon him as a service to religion, yielded in spite of his misgivings. He was ordained priest on Saturday in Whits week and consecrated bishop the next day, Sunday, 3 June, 1162. It seems to have been St. Thomas who obtained for England the privilege of keeping the feast of the Blessed Trinity on that Sunday, the anniversary of his consecration, and more than a century afterwards this celebration of the papal Court itself and eventually imposed upon the whole world.

A great change took place in the saint’s way of life after his consecration as archbishop. Even as chancellor he had practised secret austerities, but now in view of the struggle he clearly saw before him he gave himself to fasting and disciplines, hair shirts, prostrated vigils, and constant prayers. Before the end of the year 1162 he stripped himself of all signs of the lavish display which he had previously affected. On 10 Aug. he went barefoot to receive the pallium, which he brought him the pallium from Rome. Contrary to the king’s wish he resigned the chancellorship. Whereupon Henry seems to have required him to surrender certain ecclesiastical prebendaries which he still retained, notably the archdeaconry, and when this was not done at once showed bitter displeasure. Other misunderstandings soon followed. The archbishop, having, as he believed, the king’s express permission, set about to reclaim alienated estates belonging to his see, a procedure which again gave offence. Still more serious was the open resistance which he made to the king’s proposal that a heavy fine should be levied on the sheriffs be paid into the royal treasury. As the first recorded instance of any determined opposition to the king’s arbitrary will in a matter of taxation, the incident is of much constitutional importance. The saint’s protest seems to have been successful, but the relations with the king only grew more strained.

Soon after this the great matter of dispute was reached in the resistance made by Thomas to the king’s officials when they attempted to assert jurisdiction over criminous clerks. The question has been dealt with in some detail in the recent article in the English (V, 436). That the saint himself had no wish to be lenient with criminous clerks has been well shown by Norgate (Angevin Kings, ii, 22). It was with him simply a question of principle. St. Thomas seems all along to have suspected Henry of a design to strike at the independence of what the king regarded as a too powerful Church. With this view Henry summoned the bishops at Westminster (1 Oct., 1163) to sanction certain as yet unspecified articles which he called his grandfather’s customs (avita consuetudines), one of the known objects of which was to bring clerics guilty of crimes under the jurisdiction of the secular courts. The other bishops, as the demand was still in the vague, showed a willingness to submit, though with the condition “saving our order”, upon which St. Thomas inflexibly insisted. The king’s resentment was thereupon manifested by requiring the archbishop to surrender certain castles he had hitherto retained, and by other acts of unfriendliness. In deference to what he believed to be the pope’s wish, the archbishop in December consented to make some concessions by giving a personal and private undertaking to the king to obey his customs “loyally and in good faith”. But when Henry shortly afterwards, the Clarendon (13 Jan., 1164) sought to draw the saint on to a formal and public acceptance of the “Constitutions of Clarendon”, under which name the sixteen articles, the avita consuetudines as finally drafted, have been commonly known, St. Thomas, though at first yielding somewhat to the solicitations of the other bishops, in the end took up an attitude of uncompromising resistance.

Then followed a period of unworthy and vindictive persecution. When opposing a claim made against him by John the Marshal, Thomas upon a frivolous pretext was found guilty of contempt of court. For this he was sentenced to pay £500; other demands for large sums of money followed, and finally, though a
complete release of all claims against him as chancellor had been given on his becoming archbishop, he was required to render an account of nearly £30,000 which had passed through his hands in the discharge of the office. Eventually a sum of nearly £30,000 was demanded of him. His fellow bishops, summoned by Henry to a council at Northampton, implored him to throw himself unreservedly upon the king's mercy, but St. Thomas, instead of yielding, solemnly warned them and threatened them all. The next morning after celebrating Mass, he took his archiepiscopal cross into his own hand and presented himself thus in the royal council chamber. The king demanded that sentence should be passed upon him, but in the confusion and discussion which ensued the saint with uplifted cross made his way out through the mob of angry courtiers. He fled away secretly that night (13 Oct., 1164), sailed in disguise, and arrived at St. Alban's (2 Nov.), and, after being cordially welcomed by Louis VII of France, he threw himself at the feet of the Saint at a supper given for him at Sens, on 23 Nov. The pope, who had given a cold reception to certain episcopal envoys sent by Henry, welcomed the saint very kindly, and refused to accept his resignation of his see. On 30 Nov., Thomas went to take up his residence at the Cistercian Abbey of Pontigny in Burgundy, though he was compelled to leave this refuge a year later, as Henry, after confiscating the archbishop's property and banning all the Becket kinsfolk, threatened to wreak his vengeance on the monks of the Cistercian Order if they continued to harbour him.

The negotiations between Henry, the pope, and the archbishop dragged on for the next four years without the position being sensibly changed. Although the saint remained firm in his resistance to the principle of the Constitutions of Clarendon, he was willing to make any concessions that could be reasonably asked of him, and on 6 Jan., 1169, when the kings of England and France were in conference at Montmirail, he threw himself at Henry's feet, but as he still refused to accept the obnoxious customs Henry repulsed him. At last in 1170 some sort of reconciliation was patched up. The question of the customs is not mentioned and Henry professed himself willing to be guided by the archbishop's council as to amends due to the See of Canterbury for the recent violation of its rights in the crowning of Henry's son by the Archbishop of York. On 1 Dec., 1170, St. Thomas again landed in England, and was received with every demonstration of popular enthusiasm. But trouble almost immediately occurred in connexion with the absolution of two of the bishops, whose sentence of excommunication St. Thomas had brought with him, as well as over the restoration by the de Broc family of the archbishop's castle at Saltwood. How far Henry was directly responsible for the tragedy which soon after occurred on 29 Dec. is not quite clear.

Four knights who came from France demanded the absolution of the bishops. St. Thomas would not comply. They left for a space, but came back at Veper time with a band of armed men. To their angry question, "Where is the traitor?" the saint boldly replied, "Here I am, no traitor, but archbishop and priest of God." They tried to drag him from the church, but were unable, and in the end they slew him where he stood, scattering his brains on the pavement. His faithful companion, Edward Grim, who bore his cross, was wounded in the struggle.

A tremendous reaction of feeling followed this deed of blood. In an extraordinary space of time devotion to the martyred archbishop spread all over Europe. The pope promulgated the bull of canonization, little more than two years after the martyrdom, 21 Feb., 1173. On 2 July, 1174, Henry II did public penance, and was scourged at the archbishop's tomb. An immense number of miracles were worked, and for the rest of the Middle Ages the shrine of St. Thomas of Canterbury was one of the wealthiest and most famous in Europe. The martyr's holy remains are believed to have been destroyed in Sept., 1538, when nearly all the other shrines in England were dismantled, but there is no definite reason to believe that this was the case. There are several excellent lives by Anglo-Canons, of which Hutton, Becket (London, 1899), is probably the best. The biography by Robertson, Becket, Archbishop of Canterbury (London, 1919), is one of the most modern researches. There is an admirable study of the Becket trial from the point of modern research. There are several excellent lives by Anglo-Canons, of which Hutton, Becket (London, 1899), is probably the best. The biography by Robertson, Becket, Archbishop of Canterbury (London, 1919), is one of the most modern researches. There is an admirable study of the Becket trial from the point of modern research. Becket was born in London on 12 Nov. 1118. The present study of the Becket trial from the point of modern research.

Nearly all the sources of the life, as well as the books of miracles worked at the shrine, have been edited in the Rolls Series by Robertson under the title Materials for the History of Thomas Becket (7 vols., London, 1875-1883). The valuable Nuremberg series of the Life of Thomas Becket has been edited by H. de Pass (Paris, 1919). Becket was canonized by Pope Alexander III at Sens, on 23 Nov. 1173.

Herbert Thurston

Thomas Christians, Saint, an ancient body of Christians on the east and west coasts of India, claiming spiritual descent from the Apostle St. Thomas. The subject will be treated under the following heads, viz.:—I. Their early traditions and their connexion with the Apostle St. Thomas; II. The Apostle's tomb at Mallyar; III. This legend is specially studied from an agnostic standpoint by Abbot Thomas Becket, of the history of Thomas Becket (7 vols., London, 1875-1883). The life of Thomas Becket has been edited by H. de Pass (Paris, 1919). Becket was canonized by Pope Alexander III at Sens, on 23 Nov. 1173.

Herbert Thurston

I. Interest in the history of these Christians arises from more than one feature. Their ancient descent at
once attracts attention. Theophilus (surnamed the Indian), an Arian, sent by Emperor Constantius (about 354) on a mission to Arabia Felix and Abyssinia, is one of the earliest, if not the first, who draws our attention to the Commerce of India. He had been in India very many years, and a hostage a Dives, by the inhabitants of the Maldives, to the Romans in the reign of Constantine the Great. His travels are recorded by Philostorgius, an Arian Greek Church historian, who relates that Theophilus, after fulfilling his mission to the Homerites, sailed to his home in Chersonesus (other part of India, reforming many things—for the Christians of the place heard the reading of the Gospel in a sitting, etc. This reference to a body of Christians with church, priest, and liturgy, in the immediate vicinity of the Maldives, can only apply to a Christian Church and faithful on the adjacent coast of India, and not to Ceylon, which was well known even then under its own designation, Tāprobane. The people referred to were then Christians known as a body who had their liturgy in the Syriac language and inhabited the west coast of India, i.e., Malabar. This Church is next mentioned and located by Cosmas Indicopleustes (about 350) and travelers, who describe the Church, and he adds that the Christians of Ceylon, whom he specifies as Persians, and "those of Malabar" (the latter he leaves unspecified, so they must have been natives of the country) had a bishop residing at Callimani (Kalyan), ordained in Persia, and one likewise on the Island of Ceylon.

II. St. Gregory of Tours (Glor. Mart.), before 590, reports that Theodore, a pilgrim who had gone to Gaul, told him that in that part of India where the corpus (bones) of Thomas the Apostle had first rested (Mylapur on the east or Coromandel Coast of India) there stood a monastery and a church of striking dimensions and elaborately adorned, adding: "After a long interval of time these remains had been removed thence to the city of Edessa." The location of the first tomb of the Apostle in India is proof both of his martyrdom and of his Apostolate in India. The evidence of Theodore is that of an eye-witness who had visited both tombs—the first in India, while the second was at Edessa. The primitive Christians, therefore, found on both coasts, east and west, witness to and locate the tomb at Mylapur, "St. Thomas", a little to the south of Madras; no other place in India lays claim to this precious treasure, nor to any other country. On these facts is based their claim to be known as St. Thomas Christians.

III. Further proof may be adduced to justify this claim. A Syrian ecclesiastical calendar of an early date confirms the above. In the quotation given below two points are to be noted which support its antiquity, the fact of the name given to Edessa and the fact that the memory of the translation of the Apostle's relics was so fresh to the writer that the name of the individual who had brought them was yet remembered. The entry reads: "3 July, St. Thomas who was pierced with a lance in India. His body is at Urhai the capital city of Edessa, where he was brought by the merchant Khabin. A great festival." It is only natural to expect that we should receive from Edessa first-hand evidence of the removal of the relics to that city; and we are not disappointed, for St. Ephrem, the great doctor of the Syrian Church, has left us ample details in his writings. Ephrem came to Edessa on the surrender of Nisibis to the Persians, and he lived there from 363 to 373, when he died. This proof is found mostly in his rhythmical compositions. In the forty-second of his "Carmina Nisi- bina" (Leipzig, 1890) he tells us that the Apostle was put to death in India, and that his remains were subsequently buried at Edessa, brought there by a merchant—but his name is never given; apparently at that date the name had dropped out of popular memory. The same is repeated in varying form in several of his hymns edited by Lamy (Ephr. Hymni et Sermones, IV). "It was to a land of dark people he was sent, to clothe them by Baptism in white robes. His grateful dawn dispelled India's painful darkness. It was he who brought the light of light and the light, the One-Eighteen. The merchant is blessed for having brought so great a treasure. Edessa thus became the blessed city by possessing the greatest pearl India could yield. Thomas' works miracles in India, and at Edessa Thomas is destined to baptize peoples perverse and to seal in darkness those in the land of darkness."

For fuller proof of the Apostleship of St. Thomas the reader is referred to the work of the present writer "India and the Apostle Saint Thomas" (London, 1905). This short excursus was necessary to establish the claim of the Christians on the coast and especially that of the Malabar Syrian Church to be the daughter of the Apostle St. Thomas.

IV. These Christians have no written records of the incidents of their social life from the time of their first conversion down to the arrival of the Portuguese on the coast, just as India had no history until the arrival of the Mohammedans. Fortunately the Calcutta Museum has a large collection consisting of several folio volumes containing MSS. letters, reports, etc., of Jesuit missions in India and elsewhere; among these in add. vol. 9853, beginning with the leaf 86 in pencil and 525 in ink, there is a "Report" on the Serra (the name by which the Portuguese Christians of Malabar are known in Portuguese by a Jesuit missionary, bearing the date 1604 but not signed by the writer; there is evidence that this "Report" was known to F. de Souza, author of the "Oriente Conquistado," and utilized by him. The writer has carefully put together the traditional record of these Christians; the document is yet unpublished, hence its importance. Extracts from the same, covering what can be said of the early part of this history, will offer the best guarantee that can be offered. The writer of the "Report" distinctly informs us that these Christians had no written records of ancient history, but relied entirely on traditions handed down by their elders, and to these they were most tenaciously attached.

Of their earliest period tradition records that after the death of the Apostle his disciples remained faithful for a long time, the Faith was propagated with success, and all wore the same dress, and the Church, now formed into a national Church, was under the spiritual guidance of the Apostle himself. But later, wars and famine supervening, the St. Thomas Christians of Mylapur got scattered and sought refuge elsewhere, and many of them returned to paganism. The Christians, however, who were on the Cochin side, fared better than the former, spreading from Coulac (Quilon) to Palur (Paleur), a village in the north of Malabar. These had fared better, as they lived under native princes who rarely interfered with their Faith, and they probably never suffered real persecution such as befell their brethren on the other coast; besides, one of the paramount rajahs of Malabar, Cherumana Perumal, had conferred on them a civil status. To them of a country holds that from the time of the Apostle seven churches were erected in different parts of the country, besides the one which the Apostle himself had erected at Mylapur. This tradition is most tenaciously held and is confirmed by the "Report". It further asserts that the Apostle Thomas, after preaching to the inhabitants of the Island of Socotra and establishing there a Christian community, had come over to Malabar and landed at the ancient port of Cranganore. They hold that after preaching in Malabar the Apostle went over to Mylapur on the Coromandel Coast; this is practically the same as on the many paths across the dividing mountain ranges which were well known and much frequented in olden times. The Sootrians had yet retained their Faith when in 1542 St. Francis Xavier visited them on his
way to India. In a letter of 18 Sept. of the same year, addressed to the Society at Rome, he has left an interesting account of the degenerate state of the Christians he found there, who were Nestorians. He also tells us they render special honours to the Apostle St. Thomas, claiming to be descendants of the Christians converted to Jesus Christ by him in 52 A.D. In 1680 when the Carmelite Vincenzo Maria di Santa Caterina landed there he found Christianity quite extinct, only faint traces yet lingering. The extinction of this primitive Christianity is due to the oppression of the Arabs, who now form the main population on land, and to the scandalous conduct of some of the Nestorian Patriarchs who in former times were wont to supply the bishop and clergy for the island. When St. Francis visited the island a Nestorian priest was still in charge.

VI. There is one incident of the long period of isolation of the St. Thomas Christians from the rest of the Christian world which they are never tired of relating, and it is one of considerable importance to them for the civil status it conferred and secured to them in the country. This is the narrative of the arrival of a Syrian merchant on their shores, a certain Malabar Emir—of the Portuguese he named him Cananeo and styled him an Armenian, which he was not. He arrived by ship on the coast and entered the port of Cranganore. The King of Malabar, Cherumman Perumal, was in the vicinity, and receiving information of his arrival sent for him and admitted him to his presence. Thomas was a wealthy merchant who had probably come to trade; the king took a liking to the man, and when he expressed a wish to acquire land and make a settlement the king readily acceded to his request and let him purchase land, then unoccupied, at Cranganore. Under the king’s orders Thomas selected a number of Christian families from the surrounding country, which enabled him to start a town on the ground marked out for his occupation. He is said to have collected seventy-two Christian families (this is the traditional number always mentioned), and to have installed them in as many separate houses erected for them; attached to each dwelling was a sufficient piece of land for vegetable cultivation for the support of the family as is the custom of the country. He also erected a dwelling for himself and eventually a church. The authorization to possess the land and dwellings erected was granted to Thomas and those of the paramount Lord and Rajah of Malabar, Cherumman Perumal, said to have died in the last of the line, the country having been subsequently divided among his feudatories. (The details given above as well as what follows of the copper plate grant are taken from the "Report"). The same records also speak of several privileges and honours by the king to Thomas himself, his descendants, and to the Thomas Christians, by which the latter community obtained rank and a social status above the lower classes, and which made them equal to the Nayars, the middle class in the country.

The deeds thus follow:—"the king Cucuranon [personal name of the king] be prosperous, enjoy a long life and live 100,000 years, divine servant of the gods, strong, true, just, full of good deeds, reasonable, powerful over the whole earth, happy, conquering, glorious, rightly prosperous in the service of the gods, in Malabar, in the city of the Maharaja [the great idol of the temple in the vicinity of Cranganore]. By the year of the month of March before the full moon the same king Cucuranon being in Cannalur there landed Thomas Cana, a chief man who arrived in a ship wishing to become a convert; he was received at the palace, the men seeing how he arrived informed the king. The king himself came and saw and sent for the chief man Thomas, and he disembarked and came before the king, who spoke graciously to him. To honour him he gave him his name, styling him Cucuranon Cana, and he went to rest in his place, and the king gave him the city of Mogoderpantanam (Cranganore) for ever. And the same king being in his great prosperity went one day to hunt in the forest, and he hastily sent for Thomas, who quickly came, and stood beside the forest, and at the propitious hour, and the king consulted the astrologer. And afterwards the king spoke to Thomas that he should build a town in that forest, and he made reverence and answered the king: 'I require this forest for myself', and the king granted it to him for ever. And when he arrived with another to the forest, and he cast his eyes upon it in the same year on the eleventh of April, and in a propitious time gave it to Thomas for a heritage in the name of the king, who laid the first stone of the church and of the house of Thomas Cana, and he built there a town for all, and he entered the church and prayed there on the same day. After these things Thomas himself went to the feet of the king and offered his gifts, and after this he asked the king to give that land to him and his descendants; and he measured out two hundred and sixty-four elephant cubits and gave them to Thomas and his descendants for ever. On this day two temples were immediately erected there, and garners with their enclosures and paths and boundaries and inner yards. And he granted him seven kinds of musical instruments and all honours and the right of travelling in a palanquin, and he conferred on him dignity and the privilege of spreading carpets on the ground and the use of sandals, and to erect a pavilion at his gate and ride on elephants, and also granted five taxes to Thomas and his companions, both men and women, for all his relations and to the followers of his law for ever."

The said king gave his name and these princes witnessed it . . . .

Then follow the names of eight witnesses, and a note is added by the Portuguese translator that this is the document by which the Emperor of all Malabar gave the land of Cranganore to Thomas Cana and also to the Christians of St. Thomas. This document, transcribed from the MS. "Report", has been carefully translated into English, as it forms the "Great Charter" of the St. Thomas Christians. The "Report" adds: "and because at that time they reckoned the era in cycles of twelve years according to the course, they say that the said settlement was founded in the year of Mercury . . . that mode of reckoning is totally forgotten, because for the last seven hundred and seventy-nine years in all this Malabar time has been reckoned by the Quilon era. However, since the said Perumal, as we have said above, died more than a thousand and two hundred years, it follows: that the same number of years have elapsed since the Church and Christians were established at Cranganore. The writer of the "Report" had previously stated "it is one thousand and two hundred and fifty years since the said Mal died on the first of March". Deducting the date of the "Report" this would give A.D. 346 for his death. Diego de Couto (Decada XII), quoting the above grant in full, says that the Syrian Christians fix A.D. 811 as corresponding to the date borne on the grant; the first is far too early, and the second is an approximately correct date. The "Report" informs us that the copper plates on which this deed or grant was inscribed were taken away to Portugal by Franciscan Fathers, who left behind a translation of the same. It is known that the Syrian Bishop of Malabar, Mar Jacob, had deposited with the Factor of Constantinople all the Syrian and Tranquebar MSS. providing however that when necessary access could be had to the same. Gouvea at p. 4 of his "Jornadas" says that after having remained there for some long
time they could not be found and were lost through some carelessness; de Couto asserts the same in the passage quoted above and also elsewhere. In 1806 at the suggestion of Rev. Claude Buchanan, Colonel Macaulay, the British resident, ordered a careful search for them and they turned up in the record room of an Irish monastery; they were the set of plates of the grant to Irani Corton of Cranganore, and (2) the set of plates of the grant to Maruvan Sopir Iso of Quilon, but those of the grant to Thomas Cana were not among them; had they not been removed they would have been found with the other plates; this confirms the information of the writer that they had been taken to Portugal. From what is stated in the royal deed to Thomas Cana it may be taken for granted that the latter brought with him a small colony of Syrians from Mesopotamia, for the privileges conceded include his companions, both men and women, and all his relations.

VII. Besides the arrival of Thomas Cana and his colony, by which the early Christians benefited considerably, the “Report” also records the arrival on this coast of two individuals named Soper Iso and Prodhoe; they are said to have been brothers and are supposed to have been Syriacs from Mesopotamia. The following details: they came to possess a promonitory opposite Paliport on the north side, which is called Malankara, and they entered the port with a large load of timber to build a church; and in the Chaldean books of this Serra there is no mention of them, except that they were brothers, came to Quilon, built a church there, and worked some miracles. After their death they were buried in the church they had erected; it is said that they built other smaller churches in the country; they were regarded as pious men and were later called saints, their own church was eventually dedicated to them as well as other churches in the country. Archbishop Alexis Menezes afterwards changed the dedications of these churches to other saints in the Roman Calendar. There is one important item that the “Report” has preserved: “the said brothers built the church of Quilon in the hundredth year after the foundation of Quilon.” (This era commences from 25 August, A.D. 825, and the date will thus be A.D. 925.)

The second of the aforesaid copper-plate mentions Meruvan Sober Iso, one of the above two brothers. The “Report” also makes mention of pilgrims coming from Mesopotamia to visit the shrine of the Apostle Andrew, at which place in the course of their progress they would meet and visit the churches and other places in Malabar. It may be stated here that the Syriacs of Malabar are as a body natives of the land by descent, and the Syriac trait in them is that of their liturgy, which is in the Syriac language. They call themselves Syriacs by way of distinction from the other body of Christians on the coast, who belong to the Latin Rite. The honorific appellation bestowed upon them by the rulers of the country is that of Mapla, which signifies great son or child, and they are commonly so called by the people; this appellation had also been given to the descendants of Araby Iphraim by the St. Thomas Christians; proper to be called Nasrani (Nazarenes), the designation given by the Mohammedans to all Christians.

VIII. There are certain stone crosses of ancient date in southern India, bearing inscriptions in Pahlavi letters. Extraordinary legends have been spread about them in some parts of Europe; the present writer took the trouble to verify the authenticity of one of them, with a legend of the Apostolate and martyrdom of St. Thomas, a reproduction of the inscription on his cross. This was attached to the calendar of one of the dioceses of France, and this writer was asked if it were authentic. His examination of such reports it may be useful to state here that of these crosses one is in the Church of Mount St. Thomas, Mylapur, discovered in 1647, after the arrival of the Portuguese in India; the other is in the church of Kottayam, Malabar. Both are of Nestorian origin, are engraved as a base-relief on a flat stone with ornamental decorations around the cross, and bear an inscription. The inscription has been variously read. Dr. Burck, an Indian antiquary, says that both crosses bear the same inscription and offer the following reasons: “In the case of the former the letters are split in the middle by the cross was the suffering of this one. Who is the true Christ, God above and Guide ever pure.” These crosses bear some resemblance to the Syro-Chinese Nestorian monument discovered in 1625 at Singam-fu, an ancient capital of China, but erected in 781, and commemorating the arrival in China of Chaldean Nestorian missionaries in 636.

IX. Of the prelates who governed the Church in India after the Apostle’s death very little is known; that little is collected and reproduced here. John the Persian was present at the Council of Nice (325), is the first known to history claiming the title. In his signature to the decrees of the council he styles himself; John the Persian (presiding) over the churches in all Persia and Great India. The designation implies that he was the (priestly) Metropolitan of Persia and also the Bishop of Great India. As metropolitan and chief bishop of the country he may have reported to the pope on the state of the church in India and also the council of Sardis, his actions were not recorded, but in his “Topographia” informs us of the presence of a bishop residing at Caliana, the modern Kalyan at a short distance from Bombay. That residence was, in all probability, chosen because it was the chief port of commerce on the west coast of India, and had easy communication with Persia. We know later of a contention which took place between Juesub of Adiabene the Nestorian Patriarch and Simmon of Ravardsir, the Metropolitan of Persia, who had left India unprovided with bishops for a long period. The patriarch reproached him severely for this gross neglect. We may take it the bishops sent to India, as Cosmas has said, were consecrated in Persia, but after this gross neglect the patriarch reserved to himself the choice and consecration of the prelates he sent out to India, and this practice was continued till the arrival of the Portuguese in 1500.

Le Quien places the two brothers Soper Iso and Prodhoe on the list of bishops of India, but Indian tradition gives it no support, and in this the British Museum MS. Report and Gouvea (Jornada, p. 5) concur. The brothers were known as church-builders, and were reputed to be holy men. Moreover, to include Thomas Cana in the list of bishops is preposterous on the face of the evidence of the copper-plate grant. The “Report” mentions a long period when there was neither bishop nor priest surviving in the land, for they had all died out; the only clerical survival was a Nestorian prominent at Adiabene. When the Portuguese arrived they found them without prelates, made him say Mass and even ordain others, but as soon as prelates came from Babylon they put a stop to this disorder. The next authentic information we have on this head comes from the Vatican Library and has been published by Assemani (Bibl. Ori. III, 590). It consists of a statement made by two Nestorian bishops and their companions and a letter from the former written in Syriac to the patriarch announcing their arrival, dated 1504; there is a translation in Latin added to the documents. In 1490 the Christians of Malabar despatched three messengers to ask the Pope to send out bishops; two died on the journey, the other two presented themselves before the patriarch and delivered their message; two monks were selected and the Patriarch consecrated them.
bishops, assigning to one the name of Thomas and to the other that of John. The two bishops started on their journey to India accompanied by the two messengers. On arrival they were received with great joy by the people, and the bishops commenced consecrating altars and ordaining a large number of priests "as they had been for a long time deprived of bishops". One of them, John, remained in the Holy City, while the other, Thomas, accompanied by Joseph, one of the two messengers, returned to Mesopotamia, taking with them the offerings collected for the patriarch. Joseph returned to India in 1483, but Thomas remained in Mesopotamia.

The next year, when the next patriarch ordained three other bishops for India, Thomas went back with them. These new bishops were also chosen from the monks, one was named Jaballa (he was the metropolitan), the second was named Denha, and the third Jacob. These four bishops took ship from Ormus and landed at Kananur; they found there some twenty Portuguese who had recently arrived and presented themselves to them, said they were Christians, explained their condition and rank, and were kindly treated. Of this large number of bishops only one remained to work, and this was Mar Jacob; the other three returned to the metropolitan, returned to their country. Guvea adds that they were either dissatisfied with their charge or did not like the country. The Portuguese writers mention only two bishops as residents, John, who had come before their arrival in India and Mar Jacob. Nothing further is known of John, but Jacob lived in the country till his death. St. Francis Xavier makes a very pretty eulogium of him in a letter written to King John III of Portugal on 26 Jan., 1549. "Mar Jacob [or Jacome Abuma, as St. Francis styles him] for forty-five years has served God and your Highness in these parts, a very old and a virtuous man, and at the same time unknown by your Highness and almost in all India. God rewards him ... He is notified only by the Fathers of St. Francis, and they take so good care of him that nothing more is wanted. ... He has laboured much among the Christians of St. Thomas, and now in his old age he is very obedient to the customs of the Holy Mother Church of Rome." This eulogium of St. Francis sums up his career for the forty-five years he worked in Malabar (1504-49). He came out as a Nestorian, remained such during his early years, but gradually as he came into touch with the Catholic missionaries, he allowed them to preach in his Church, and to instruct his people. When he was old enough he left Cranganore and went to live in the Franciscan convent at Cochin and there he died in 1549. There remain two others—the last of the Mesopotamian prelates who presided over these Christians—Mar Joseph and Mar Abraham; their career will be detailed further on.

X. When Cosmas gave us the information of the existence of a Christian community in "Male (Malabar) where the pepper is grown" he also supplied us with additional details: that they have a bishop residing at Kalyan; that in Taprobana (Ceylon) "an island of interior India where the Indian Ocean is a trusted" there is a "Christian Church with clergy and the faithful; similarly in the island of Dioscórida [Socotra] in the same Indian Ocean". Then he enumerates the churches in Arabia Felix, Bactria, and among the Huns; and all these churches are by him represented to us as subject to the Metropolitan of Persia. This shows at that time the holder of this dignity was Patrick, the tutor, as Asseman designates him, of Thomas of Edessa, a prominent Nestorian to which sect Cosmas also belonged; hence his interest in supplying all these details. The bishop and clergy whom the Metropolitan of Persia sent over to all the above-mentioned places and churches would and must have been undoubtedly infected with one and the same heresy. Hence it is quite safe to conclude that at the time of the visit of Cosmas to India (a.d. 530-35) all these churches, as also the Church in India, were holding the Nestorian doctrine of their bishops and priests. Nor should this historical fact cause surprise when we take into consideration the opportunities, the bold attitude and violent measures adopted by the promoters of the Nestorian heresy from the Roman Empire.

When the Emperor Zenon ordered Cyrus, Bishop of Edessa, to purge his diocese of that heresy (a.d. 489), the Nestorians were forced to seek refuge across the Roman boundary into Persia. Among them were the banished professors and students of the Persian School of Edessa, the centre of the Nestorian movement, and they found refuge and protection with Barsomus, Metropolitan of Nisibis, himself a fanatical adherent of Nestorius. Barsomus at this time also held from the Persian king the office of governor of the frontier. With the influence Barsomus possessed at court it was an easy thing for him to make the king, already so disposed, believe that the actual bishops holding sees in his territory were friendly to his enemies, the Romans, and that it would be better to replace them by men he knew who would owe allegiance only to the Persian monarch. This stratagem rapidly succeeded in capturing more and more sees, and in a few months so many were converted that although Barsomus could not remove the Achaemenian (Acaesium), the occupant of the chief see of Seleucia, a Catholic, yet a Nestorian was selected to succeed the latter (a.d. 496). Thus within the short space of seven years the banished heresy sat mistress on the throne of Seleucia, in a position to force every existing see eastward of the Roman Empire to embrace the heresy and to secure its permanence. Thus the Indian Church suffered the same fate which befell the Churches of Persia, and by 530-35 we find that she has a Nestorian prelate consecrated in Persia and presiding at Kalyan over her future destiny. If further proof is wanted of the existence of this belief, we have the following historical facts of the control exercised by the Nestorian Patriarch. In 650-60, as above stated, Jesusab of Adiabene claimed authority over India and reproached Simeon of Reverdibar, the Metropolitan of Persia, for not having sent bishops to India and so deprived that Church of the successions of her ministry. In 714-28 Saliba Zacha, another Nestorian Patriarch, raised the see of India to metropolitan rank. Again in 857 Theodosius, another Nestorian Patriarch, included the see of India among the exempted which, owing to distance from the patriarchate, should rule; in 924 the Church of India had communion but once in six years. This ruling was subsequently incorporated in a synodal canon.

If we look to the general tradition of the St. Thomas Christians it will be found that all their prelates came from Babylon, the ancient residence as they say, of the ancient patriarchs or Catholics of the East. It is further known and acknowledged by them that whenever they remained deprived of a bishop for a long time they used to send messengers to that Patriarchate asking that bishops be sent out to them. Sufficient proof of this practice has been given above when discussing the arrival of four bishops in 1504. The Holy See was fully aware that the Malabar Christians were under the control of the Nestorian Patriarch. When Julius III gave Sulaka his Bull of nomination as the Catholic Chaldean patriarch, he distinctly laid down the same extent of jurisdiction which had been claimed and controlled by his late Nestorian predecessor; he included in the last clause of his Bull of nomination the name Sin Maesin et Caliucsth et tota India." It becomes necessary to fix this historical truth clearly, because during this decade some of the younger generation in Malabar have begun to deny this historical fact. They would wish people to believe that all the Portuguese missionaries, bishops, priests, and writers were completely mistaken when they styled them Nesto-
rians in belief, and because of this false report all subsequent writers continued to call them Nestorians. The reader who has gone through the statement of facts above related must be conscious that such an action is deploring or boldly denying publicly the utter hopelessness. They maintain, in support of their false view, that there always had been a small body among the Chaldeans in Mesopotamia who remained attached to the true Faith, and from them they received their bishops. This plea is historically false for the bishops they received all came to them from the Nestorians, and as the truthfulness of the existence during all these centuries back of a Catholic party among the Nestorian Chaldeans, it is too absurd to be discussed. It was only after the conversion of Sulak in 1552 that the Chaldeans in part returned to the unity of faith. The truth is that the Malabar Church remained from N. 496 up till then in heresy.

XI. During the centuries that these Christians were isolated from the rest of Christendom their sole intercourse was limited to Mesopotamia whence the Nestorian Patriarch would from time to time supply them with prelates. But from the close of the thirteenth century onwards the travelers of the Italian missions were sent by the popes, sent to the Western occasional news of their existence. Some of these it will be useful to reproduce here. The first who informed the world of the existence of these St. Thomas Christians was Friar John of Monre Corvino. After he had spent several years in India in law. After going through the ports and on to China, he proceeded to China, passing through the Indian ports between the years 1292 and 1294. He tells us in a letter written from Cambales (Peking) in 1305 that he had remained eighteen months in that part of India where the Church of St. Thomas the Apostle stood (Mylapore); he also baptized St. Thomas and St. Thomas and these are the masters of the public writing-office (customs' office). Before quitting Quilon he erected a monument to commemorate his visit, and this was a marble pillar with a stone cross on it, intended to last, as he says, till the world's end. "It had the pope's arms", he says, "and my own engraved on it, with an inscription both in Indian and Latin characters. I consecrated and blessed it in the presence of an infinite multitude of people." The monument stood there till late in the nineteenth century, when by the gradual erosion of the coast it fell into the sea and disappeared. He concludes his narrative by saying that after staying in the Church for years and four in 1565 he took a ship and returned. His brethren, i.e. the missionaries who were working in that field.

XII. The two last Syrian bishops were Mar Joseph Sulak and Mar Abraham; both arrived in Malabar after the arrival of the Portuguese. Their case presents two questions for discussion; were they canonically appointed, and had they completely rejected Nestorianism? As to the first there is no doubt that his appointment was canonical, for he, the brother of the first Chaldean patriarch, was appointed by his successor Abad Jesu and sent out to Malabar, and the apostolic constitution that had the Church in Malabar confirmed by the Holy See. Mar Joseph was sent to India with letters of introduction from the pope to the Portuguese authorities; he was besides accompanied by Bishop Ambrose, a Dominican and papal commissary to the pope for five years, by his uncle Father Anthony, and by Mar Elias Horn, Archbishop of Diarbekir. They arrived at Goa about 1563, and were detained at Goa for eighteen months before being allowed to enter the diocese. Proceeding to Cochin they lost Bishop Ambrose; the others travelled through Malabar for two and a half years and four months, following the two letters from the pope, to the chief of the Christians of Quilon and the other to the Christians at Malephatam, a town on the Gulf of Mansar. In the first the pope beseeches "that divisions cease and clouds of error stain not the brightness of faith of all generated by the waters of baptism . . . and that the phantom of schism and wilful blindness of unsullied faith darken not the vision of those who believe in Christ and adore His name."

Much the same in other words is repeated in the second letter, and they are urged to unity with the Holy Catholic Roman Church. The pope recommends the bishop to the kindness of the people, and thanks them for that shown to the friars who are working among them. All we know is that Bishop Jordanus was sent out with these letters, but nothing further is heard of him. He wrote a small book named "Mirabilia", edited by Col. A. Yule for the Hakluyt Society, published in 1863 (see also "Cathay", I, 184. The next visitor is Blessed Oderic of Pordenone, who about 1324-1355 landed at Tana, recovered the bodies of the friars, Thomas and his companions who had there suffered martyrdom, and conveyed them to China. On his way he halted at Quilon, which he calls Polumbium; hence he took passage on a Chinese junk for a certain city called Zayton in China. He mentions the Christians at Quilon, and that they were many and had a masterful bishop. He gives them the name of "Cathay" (I, 57). A few years later Giovanni de Marignoli, the papal delegate to China, arrived at Quilon. He stayed there at a church dedicated to St. George, belonging to the Latin Rite, and he adorned it with fine paintings and taught there the Roman law. After spending there a year he sailed to visit the shrine of the Apostle; he calls the town Miropolis. After describing the culture of pepper on the coast he adds: "the pepper does not grow in forests but in gardens prepared for the purpose; nor are the Saracenos the proprietors, but the Christians of St. Thomas, and these are the masters of the public writing-office" (customs' office). Before quitting Quilon he erected a monument to commemorate his visit, and this was a marble pillar with a stone cross on it, intended to last, as he says, till the world's end. "It had the pope's arms", he says, "and my own engraved on it, with an inscription both in Indian and Latin characters. I consecrated and blessed it in the presence of an infinite multitude of people." The monument stood there till late in the nineteenth century, when by the gradual erosion of the coast it fell into the sea and disappeared. He concludes his narrative by saying that after staying in the Church for years and four in 1565 he took a ship and returned. His brethren, i.e. the missionaries who were working in that field.
other monk remained with Archbishop Joseph Sulaka. For some time the new prelate got on well with the Portuguese and the Jesuit missionaries, in fact, they praised him for having introduced order, decorum, and propriety in the Church services and all that he attempted to tamper with the faith of some young boys in his service belonging to the Diocese of Cochín. This came to the knowledge of the bishop, through him to the Metropolitan of Goa, and thence to the viceroy; it was decided to remove and send him to Portugal, to be dealt with by the Holy See.

The following is the nature of the incident. Taking these youths apart, he instructed them that they should venerate the Blessed Virgin as the refuge of sinners, but were not to call her the Mother of God, as that was not true; but she should be styled Mother of Christ (Nestorius, refusing at the Council of Ephesus to subscribe to the profession of faith which was made publicly by the bishop and all present. Moreover, urgent reforms were sanctioned and agreed to. A letter was sent by Pope Gregory XIII, 23 Nov., 1578, laying down what Abraham had to do for the improvement of his diocese, and of the departure of the Catholic faith. A long letter to the pope in reply, specifying all that he had been able to do by the aid of the Fathers (see letter, pp. 97–99, in Giamii). This is called the first reconciliation of the Syrians to the Church. It was formal and public, but left no improvement on the general body, the liturgical books were not corrected, nor was Catholic teaching introduced in the Church. In 1595 Abraham fell dangerously ill (Du Jarric, tom. I, lib. II, p. 614). Unfortunately he survived the excellent sentiments he then had and recovered. After about two years, in 1597 (Gouveia, p. ii), he was a second time again dangerously ill; Archbishop Aléxio de Menezes wrote and exhorted him to reform his people, but for answer he had only frivolous excuses. He would not even avail himself of the exhortations of the Fathers who surrounded his bed, nor did he receive the last sacraments. Thus he died. The viceroy took note of his death and wrote to Archbishop Aragão that he was absent on a visitation tour, by letter of 6 Feb., 1597.

XIII. Archbishop Menezes received intelligence of the death of Mar Abraham while on a tour of pastoral visitation at Damão. Fearing the work on hand could not be postponed, he decided to act on the powers delegated to him by the pope in his last Brief, and nominated Father Francisco dos Reis del Sociedade of Jesus who, undoubtedly fulfilled the requirements demanded by the pope for the appointment. On receipt of the letter and the instructions accompanying it, the superior, knowing that the late Abraham before his departure had assigned to his archdesceon the government of the church pending the arrival of a new prelate from Babylon, and the same had been accepted by the people, and foreseeing also the insecurity of the position, decided that it would be prudent to await the return of the archbishop before taking any further step. The archbishop on returning to Goa weighed the gravity of the case, and felt bound in conscience to put aside every other duty for the time being, and safeguard the Syrian Christians from falling again into the hands of a new heretical intruder. He decided on visiting the Serra personally. Father Nicholas Pimenta, then the superior of the Jesuit missions in India, writing to the General of the Society, Father Claudio Acquaviva, takes up the narrative as follows: "It was not small comfort to all that Alexio Menezes, the Lord Archbishop of Goa, moved by his zeal for the salvation of souls and at our persuasion..."
undertook to visit the ancient Christians of St. Thomas, spread through the hilly parts of Malabar. The place was named after the death and burial of one of these Christians, a man named Thomas, who died and was buried in a field near a river. The bishop who was present at the burial of this man was called Abraham, and the place where he was buried was called Angamaly. Abraham was then succeeded by a successor called George, who continued the work of converting the people to Christianity. The Archdeacon George was then appointed to the office of Bishop of Angamaly, and he continued the work of converting the people to Christianity. He was succeeded by another bishop called Gop, who continued the work of converting the people to Christianity.

He therefore issued instructions to the rector of the Vaiicotta College, enclosing a letter of appointment naming the archdeacon administrator of the diocese provided he be in the presence of the rector made a solemn profession of faith. The archdeacon expressed his satisfaction on receiving the intimation and promised to make the profession demanded on a feast day. But later on he would neither make the profession, nor would he accept the nomination of administrator as coming from the archdeacon of the diocese, nor would he sign the letters that had been so asked on the advice of others. The Bishop of Goa, after taking counsel with the Fathers, decided on starting on the visitation of the Archidioecese of Angamaly to induce that Church to receive a prelate from the Sovereign Pontiff. On this coming to be known all sorts of difficulties were raised to induce him to abandon his project, even from ecclesiastics, with such pertinacity that the archdeacon wrote to Pimenta: "Heaven and earth have conspired against my design." But he manfully faced the work before him, and went through it with singular firmness of character and prudence, and supported by Divine aid he began, continued, and completed the arduous task he had undertaken with complete success.

During the visitation (full details of which are given by Gouvea in the "Jornada"), the one source whence all other writers have obtained their information, some even going so far as entirely to distort the facts to satisfy their prejudice (the archdeacon performed all sorts of hardships, visiting the principal parishes, addressing the people, holding services, and everywhere confessing the sacraments, of which these people were deprived. He caused the Nestorian books in the possession of the churches and in the hands of the clergy in Latin, to be translated into Arabic and then restored to their owners. All the books then existing among the Syrians were in MS. form; printed books among them did not exist at this period. Passages that denied the supreme authority of the Apostolic See of Rome were similarly deleted. He also caused capable priests to be sought out, and then placed in charge of parishes. Eventually he established eighty parishes. Thus he prepared his ground for the reform of this Church which he intended to carry out. The synod was opened with great solemnity and pomp on 20 June, 1599, at the village of Udumpankhal, whence it is known as the Synod of Diampur. The Acts were published in Portuguese as an appendix to the "Jornada"; they were also translated into Latin. The opening Act of the synod was the profession of faith. The archdeacon was the first to make his profession, then followed the archdeacon who made his in Malayalam, a translation of the four first verses of the book of Genesis, in which the clergy in turn made theirs in the hands of the archdeacon as the archdeacon also had done. The Latin text may be found with the Latin text of the synod, and separate in "Juris Pontificii de Propaganda Fide", Pars I, vol. VI, part II, p. 243. Besides the archdeacon and certain Jesuit Fathers who assisted him there were some 153 Syrian priests and about 600 laymen deputed by the congregation to represent them; all these signed the death of the Nestorians, and proclaimed the orthodox faith embodied in the act of profession taken by the entire clergy. The archbishop addressed the synod on the falsity of the errors of Nestorius up till then held by that Church, the assembly denounced them, anathematized the Nestorians, and pronounced obedience and submission to the Roman Pontiff.

Among the calumnies spread against Menezes and the synod the most prominent is that all the Syriac books of the community were burnt and destroyed by order of the synod. What was done in this matter under the decree passed in the fifth session is thus described in the "Jornada" (tr. Glen, book I, ch. xxiv, p. 340). After the above condemnation of errors it was decided that certain books which had been named and were current in the Serra and full of errors should be burnt, that others were to be censured only until they were corrected and expurgated. The list of books to be burnt is given in the 14th decree of the third session. The books consist: (1) of those ex professo teaching Nestorian errors; (2) containing false legends; (3) books of sorceries and superstitious practices. None of these were capable of correction. In many others, however, defective doctrinal errors were erased. The "Jornada" (p. 365) gives the system adopted during the visitation of the churches for the correction of books: after Mass was said all books written in Syriac, whether the property of the Church or of private individuals, were handed over to Father Francisco Ros, who with three other Jesuits (the Syrian priests) specially selected for the purpose would retire to the vestry and there correct the books in conformity with the directions given by the synod; those that were condemned and forbidden were handed over to the archbishop, who would order them to be burnt publicly. Under his orders no book capable of being purged from doctrinal errors would be destroyed, but those ex professo teaching heresy would be destroyed. After the conclusion of the synod Archbishop Menezes continued his visitation of the churches down to Quillon and then returned to Goa. He did not forget to send a letter of thanks to Father Pimenta for the continuous and important aid given him by the Fathers of the Society all through the work he had to perform in Malabar.

XIV. In making provision for the future government of the Syrian Church in Malabar Clemen VIII wished to adopt such regulations as would ensure the permanency in the faith and exclude the danger of a relapse. He decided that it would be the safest course to appoint a Latin prelate in sympathy with the people and fully acquainted with their liturgical language. The selection fell on Father Ros, no doubt after hearing the opinion of American Jesuits. Father Ros was consecrated by the Archbishop at Goa under the title of Bishop of Angamaly in 1601. Four years later Paul V transferred him (1605) to the new See of Cranganore, which he created an archbishopric in order that the faithful brought to unity should not feel that the honour of their see had suffered any diminution of honour. The new prelate made a visitation tour through the diocese, correcting the liturgical books at every church where this had not been done, and enforcing everywhere the rules sanctioned by the Synod of Diampur. In 1606 he convened and held a diocesan synod; no further details of his administration are handed down to us. After twenty-three years of strenuous episcopal he died at Parur, his ordinary residence, 18 Feb., 1624, and was buried in the church. Besides the Latin Canon of the Mass he had also translated the Latin ritual into Syriac for the administration of the Holy Sacraments by the clergy. Years later, on the occasion of the first pastoral visit of
the first Vicar Apostolic of Trichur to the church of Parur in 1888, on enquiring after the tomb of the archbishop, he was told that no tomb of his was known to exist there, but after careful search had been made the tombstone, with its Malayalam inscription in ancient Tamil characters, was found and is now affixed to the inner wall of the church. The loss of a part of the church by the revolution of 1857 was caused by the sacking and burning of this church by many others by the soldiers of Tippoo Sultan on his second invasion of the coast. Paulinus a Sanoto Bartholomeo, who had visited the church in 1758 and had taken a transcript of the inscription at the time, of which a Latin translation was published in the "Itiner. Chr. Orient.", p. 64, did not read the name Roz on the stone, however the name is there in a flaw of the stone and has been read on rediscovery.

Father Estevão de Brito, also a Jesuit, was designated successor, and was consecrated by the Archbishop of Goa in the Church of Bom Jesus, Goa, on 29 Sept., 1624, and left Goa for his diocese on 4 Nov. He died on 2 Dec., 1641, having governed the see for over seventeen years. The third of the series was Francisco Garcia, of the same society. He was consecrated Bishop of Aascalon on 1 Nov., 1637, with right of nomination by the Archbishop of Goa and the Jesuit Church of Bom Jesus, Goa, and succeeded to the See of Cangrango in 1641. Under this prelate a frightful schism broke out (1653) and his entire flock, with all his clergy and churches, withdrew from his allegiance. Out of the entire body of 200,000 Syrian Christians only some 400 individuals remained faithful. This misfortune had by most writers been attributed to Garcia's want of tact, obstinacy, and sarcastic disposition: as to the latter defect there is one instance, and that at the last opportunity for reconciliation, which fell through owing to his harsh treatment of the delegates sent to him by his revered flock. This had been hatched many years previously during the lifetime of his predecessor de Brito, secretly and unknown to him. Here the dates only of documents can be quoted. On 1 Jan., 1628 (see German, p. 440) the Archdeacon George wrote a letter to the papal nuncio at Lisbon complaining that no answer was given to a letter sent some twenty years earlier regarding the spiritual wants of this Christian people. In 1630 Rome was informed of these complaints the substance of which was that Jesuits only controlled these Christians, that they were unsuited, and had caused the trouble and the leader of the forty-four churches of the Carmelites to be expelled and other religious orders to be sent. The Sacred Congregation sent instructions that other orders should be admitted into the diocese.

Paulinus (op. cit., pp. 70 sq.) adduces further evidence of the treachery and treachery of Archdeacon George. In 1632 a meeting was convened by him at Rapolin consisting of clergy and laity, when a letter of complaint was sent to the King of Portugal against the Jesuit Fathers; these very same complaints formed the heads of their grievances in 1653, when open schism was proclaimed to secure independence and oust the Jesuits. The plot had been hatched for a good number of years; it was begun by Archdeacon George (d. 1637) who was succeeded in office by a relative, another Thomas de Campo (Thoma Parambil) who in 1653 headed the revolt. After the schism had broken out the intruder Abatalla, a Mesopotamian prelate, was deported by the Portuguese, who took him back to Cochin where lay the seat of the former, but he turned out a failure and died in 1665. The following year, Father Peter-Paul, a Carmelite, was created titular Archbishop of Aeneyra, and was appointed vicar Apostolic for Malabar. With his arrival in 1678 there was a considerable improvement in the relations between the Dutch Government and the Carmelites. The Archbishop Peter-Paul was
a prince of the House of Parma, and his mother was the sister of Pope Innocent XII; before coming out to Malabar he had obtained a decree from the Government of Holland authorizing the residence in Malabar of one bishop and twelve Carmelite priests who had once been in Portugal, the Italians, Greeks, or Belgians; but they were not admitted into Cochin.

The French traveller Anquetil du Perron, who visited Malabar in 1758, offers the following statistics regarding the number of Christians on the coast which he had obtained from Bishop Florentius, the vicar Apostolic of Malabar. He tells us that the bishop believed the total number of Christians to amount to 200,000; of these 100,000 were Catholic Syrians, another 50,000 were of the Latin Rite; both these were under his jurisdiction, while the revolted Syrians, who may be classed as Jacobites, were under Mar Thomas VI (who on his consecration in 1722 assumed the name and style of Dionysius I), and numbered 50,000. From the death of Archbishop Garcia in 1659 the See of Cranganore had no resident bishop till 1701, when Clement XI appointed Joao Rebeiro, a Jesuit. When the latter assumed charge the Archbishop Apostolic of Cochin refused to have any jurisdiction over his Syrian flock that his jurisdiction had ceased and they must now pass over to that of the new Archbishop of Cranganore. The Syrians refused to acknowledge the new archbishop and sent a petition to Rome that they preferred to remain under the Carmelite Patriarch Apollinaris; the archbishop consented to the submission and eighteen in partial union (i.e., the parish was divided and part had submitted to Rome), while only twenty-eight churches remained altogether separate. Pope Clement, after informing the King of Portugal of the state of things, extended in 1709 the jurisdiction of Bishop Angelus over the dioceses of Cranganore and Cochin, and the pope assigned as a reason for doing so that the Dutch would not tolerate any Portuguese prelate in the country, and the Christians threatened rather to return to schism than accept the bishop sent out. For fuller particulars of this period the reader is referred to G. T. Mackenzie, "History of Christianity in Travancore", in Census Report of 1901, Trevandrum; and Paulinus a Sancto Bartholomæo, "India Orientalis Christ." (Rome, 1794.)

On the arrival of the Dutch and the capture of Cochin by them everything went wrong. The Jesuits quitted the college at Vippetota; they abandoned the place and removing to the interior beyond the reach of their open enemies, opened a new college, called St. Paul's College, at Ambalacud, whence they controlled their new missions on the east coast. Bishop Rebeiro returned there and carried on his work; eventually several of the Syrian Carmelite priests went over to the succeeding Archbishop of Cranganore, and these eventually lapsed under the control of the Archbishops of Goa. Bishop Rebeiro died at the college of Ambalacud on 24 Sept., 1716, is buried in the church of Puttencherra and has a tombstone with an inscription. His successor was the Jesuit, consecrated at Cochin, and his name was Paulinus. He was a Jesuit, consecrated at Cochin in 1753, and d. at Puttencherra in 1756; the church contains his tomb-stone with inscription. Salvador Reis, the last of the series who resided in India, was also a Jesuit; he was consecrated by the same Bishop Clemente at Angengo on 5 Feb., 1758, d. on 7 April, 1777, at Puttencherra and has his tombstone with inscription in the same church. Paulinus records of him "vir sanctimoniora vitae praecarius"; he survived the suppression of his order. This closes the account of the bishops who have governed the See of Cranganore.

To complete the historical account of the Syrian Malabar Church, brief mention should also be made of the line of prelates who ruled over the schismatics who eventually became Jacobites, embracing that error through their prelates. Thomas I, proclaimed bishop by those he had led (1653) into the aforesaid schism after the imposition of the hands of twelve priests his followers, and the placing on his head of a mitre and in his hand a pastoral staff. He continued obdurate and died a sudden death in 1673. Thomas II, brother of the former, proclaimed in 1674, died eight days later struck by lightning. Thomas III, nephew of the former, received the mitre in 1676, a Jacobite. Thomas IV of the same family, succeeded in 1676 and d. in 1686, a Jacobite. Thomas V, a nephew of the former, made every effort to obtain consecration but was refused. The patriarch of Antioch d. in 1718, and Thomas VI, consecrated in India in 1751, Mar Basil, Mar Gregory, and Mar John. The first named died a year after arrival; the second years later consecrated Mar Thomas VI a bishop in 1772, and he assumed the name of Dionysius I. The Dutch authorities found great difficulty in obtaining payment for the expenses incurred; a suit was instituted against the Jacobites in the Travancore Rajah's court in 1775 and payment of the amount, twelve thousand pounds, was obtained. He died in 1808.

For the long period between 1788 and 1886, the Catholic Syrians remained under the uninterrupted control of about fifteen Carmelite Bishops as vicars Apostolic. During this period there had often arisen severe troubles which cannot here be detailed, quarrels between Syrian and Latin Christians, the control of some bishops; over and above this the ordinary trend of controlling such a large, factious, and difficult body. There were two most serious schismatical intrusions within this Syrian fold by Catholic Chaldean prelates who had come from Mesopotamia with the full connivance of the Chaldean Patriarch and against the express orders of the Roman Pontiff. The Carmelites had to face and surmount all these difficulties and keep the flock in due submission to ecclesiastical regime. Of the two intrusions, the first was that of the Chaldean Bishop Mar Roccoos, who entered Malabar in 1861. Pius IX met him to the faithful as an intruder, yet he met with a complacent reception in many of the missions. He received the submission of all, even his successors, in due submission of schism, and caused a great agitation. Fortunately for the peace of the Church he was persuaded to return to Mesopotamia within the year. The second, who came to Malabar in 1784, caused much greater harm, the evil effects of which seem to be permanent in the principal church of Trichur, though elsewhere in process of time those evil effects have been remedied. This was the Bishop Mellus, whom the patriarch had sent over in spite of the strict prohibition of the same pope. It was only when after repeated admonitions, the pope had fixed a limit of time after which should he continue refractory he would be excommunicated that he yielded and sent Bishop Mellus instructions to return. When the troublesome character of these people is taken into consideration it reflects great credit on the Carmelite Order that the bishops i
charge were successful in retaining them as a body in the unity of Holy Church.

The Mellian schism, though broken by the advancement of the Madras High Court, was by no means yet extinct when in the autumn of 1878 the Holy See decided on placing the Syrian Christians under separate administration, appointing two vicars Apostolic of the Latin Rite for the purpose. These were Rev. A. E. Medlicott, Ph.D., Military Chaplain in the Punjab, educated in the Propaganda College, Rome, and consecrated by the Apostolic Delegate Mgr. A. Ajuti on 18 Dec. 1887, at Ootacamund, titular Bishop of Tricaria, appointed to the Vicariate Apostolic of Trichur; and the Rev. Charles Lavigne S.J., former private secretary of the late Father Beckx, General of the Congregation in Belgium, consecrated in Rome coming out, appointed to the See of Kottayam, later called of Changanacherry. Under the Concordat of Leo XIII with the King of Portugal an important advantage had been gained by the suppression of the Padroado jurisdiction (Cranangore Archbishops) over the Syrian churches. The first task the new bishops had to face was to amalgamate into one harmonious whole the two sections of this Church, that which had been under the Carmelites with that which had belonged to the Goan or Padroado jurisdiction, for the two had been for long years in open antagonism. This union fortunately, was successfully effected. The other task was to establish something like a proper administration and control over the churches. This took longer time. The northern churches belonging to Trichur had not seen their prelates for perhaps a century, the two Chaldean Bishops had utilized the fact to their own advantage, and the troubles caused by them in these churches can be easily imagined; but with firmness and patience a fair working administration was introduced. The result may thus be briefly summed up. The Vicariate of Trichur had a Catholic Syrian population of 60,222 with eighteen parish churches and twenty-two chapels-of-ease, served by 118 priests of the Syrian Rite, besides 23 Syrian Carmelite Tertiary monks, in two monasteries; there was also a convent of 24 native Tertiary nuns with a middle-class school of 33 girls. The bishop on taking charge found that there were no schools, except one provided for clerics; he took early steps to open as many elementary parish schools as possible; within nine years (1888-96) the vicariate was provided with no less than 231 elementary parish schools for both sexes, educating over 12,000 children, besides a high school (St. Thomas), with 95 students; there were 56 boys in St. Alouysius's High School, under the Tertiary monks. A catechumenate was opened, where annually about 150 heathen converts were baptized; a fine building was under construction for a suitable residence, and plans were prepared to house the above college in a handsome structure. This was the condition of things when the bishop went to Europe on sick leave. The Vicariate of Kottayam had a Catholic population of 150,000, with 108 parish churches and 50 dependent chapels, served by a numerous clergy of over 300 priests; it had 35 Tertiary monks, besides novices, in five monasteries; also three convents of native Tertiary Carmelites nuns educating girls, two orphanages under Tertiary Sisters of St. Francis, four catechumenates, two seminaries, with 96 students. The higher class clerical students of both vicariates attended the central Pontifical Seminary at Puttenpally. The parochial schools numbered 296, but the number of students was not ascertained. There were three English Schools: Mananam, 60; Campalam, 80; and another with 20 students.

In 1895 both vicars Apostolic happened to be absent on leave. During this period the Holy See decided on a change of régime, yielding to the wishes of the people to grant them native bishops.

XVII. The two vicariates described above were split into three, and they were styled Trichur, Ernakulam, and Changanacherry; the new vicariate was formed of the southern portion of the diocese of the northern portion of Changanacherry. The changes were carried out under Leo XIII by Brief of 28 July, 1896, "Quae Rei Sacrae". Rev. John Menachery, as Bishop of Parulas, was appointed to Trichur. Rev. Aloysius Parepambil, titular Bishop of Tio, was appointed to Ernakulam and Rev. Matthew Mekkal, Bishop of Tralles, was appointed to Changanacherry; all three received consecration from the Apostolic Delegate Mgr. Zalecki, at Kandy on 15 Oct., 1896.

The latest ecclesiastical returns of these three vicariates (1911) give: Trichur: Catholic population, 91,064; children being educated, 19,092; Ernakulam: Catholic population, 94,357; children being educated, 9950; Changanacherry: Catholic population, 134,791; children being educated, 2844.

The future of this people depends very largely on education for their welfare and technical training for their development.

A. E. MEDLYCOTT.

Thomas Cottam, Blessed, martyr, b. 1549, in Lancashire; executed at Tyburn, 30 May, 1582. His parents, Laurence Cottam of Dillworth and Anne Brewer, were Protestants. Having completed his studies at Brasenose, Oxford (M.A., 14 July, 1572) he became master of a grammar school in London. Converted there to the faith by Thomas Pound he went over to Douai, and was ordained deacon at Cambrai, Dec., 1577. Desirous of the Indian mission, he went to Rome and was received (8 April, 1579) as a Jesuit novice at Sant' Andrea. Attacked by fever about October, he was sent to Lyons to recuperate, and went thence to the College at Reims, considering himself as accepted for India, if his health improved by a visit to France. Failing in this (26th), 1580, he was ordained priest at Soissons, and started (5 June) with four companions for England. Through the treachery of an English spy by the name of Sledd he was immediately arrested at Dover, but by a ruse of Dr. Ely, one of his fellow-travellers, reached London safely. Ely being imprisoned through this friendly act, Cottam voluntarily surrendered himself and was committed "close prisoner" to the Marshalsea, where he perhaps said his first Mass. After being tortured, he was removed, 4 December, 1580 (Catholic Record Society, III, 10) to the Tower, where he endured the rack and the "Scalengraver's Daughter". He was excommunicated with Confiscated property and others (16 November, 1581) condemned to death. His execution was deferred till 30 May, 1582 (see Munday's "Breefe Reports"), when with William Filby, Luke Kirby and Laurence Richardson, secular priests (all beheaded 29 Dec., 1580), he was drawn to Tyburn and executed. His portrait, with martyrdom misdated, is reproduced in Foley, "Records", VII (1) 174; his relics are the Mass corporal used by him and four other martyrs in the Tower (cf. Cumm, English Martyrs, II, 563) and perhaps his autograph in the registers of Sant' Andrea.

P. RYAN.
Thomas Ford, Blessed. b. in Devonshire; d. at Tyburn, 28 May, 1582. He incepted M.A. at Trinity College, Oxford, 14 July, 1567, and was a fellow, Woods says president, of the college. He went to the English College at Paris in 1580 and was tonsured first three of its students to be ordained, receiving all orders in March, 1573, at Brussels. After becoming B.D. at Douai he left for England, 2 May, 1576, and soon became chaplain to Edward Yate and his Bridg- etine guests at Lyford, Berkshire. Arrested with Blessed Edmund Campion (q. v.) 17 July, 1581, and committed to the Tower 22 July, he was thrice tortured. He was brought before the Queen's Bench 16 November, with his fellow martyr Blessed John Shert, on an absurd charge of conspiracy at Rome and Reims, where he had never been, on dates when he was in England, and both were condemned 11 November. With him suffered John Shert and Robert Johnson.

John Shert, Blessed. a native of Cheshire, took the degree of B. A. at Brasenose College, Oxford, in 1585. Successively schoolmaster in London, and servant to Dr. Thomas Stapleton at Douai, he entered the seminary in 1576, and was ordained sub-deacon in 1577.

He was ordained priest from the English College, Rome, of which he was senior of the first six scholars. He left Reims for England 27 August, 1579, and was sent to the Tower, 14 July, 1581.

Johnson, Blessed. in Shropshire, entered the German College, Rome, 1 Oct., 1571. Ordained priest at Brussels from the English College Douai, in April, 1576, he started immediately for England. After a pilgrimage to Rome in 1579 he returned to England in 1580, and was committed to the Poultry Counter 12 July, 1581, of which he was transferred to the Tower 5 Dec. On 16 December he was violently racked, and then thrust into an underground dungeon. He was brought before the Queen's Bench 14 Nov., and condemned 20 Nov.

John B. Wainwright.

Thomas Johnson, Blessed, Carthusian martyr, d. in Newgate gaol, London, 20 Sept., 1537. On 18 May, 1537, the twenty choir monks and eighteen brothers remaining in the London Charterhouse were required to change their Oath of Supremacy. Of these choir monks Thomas Johnson, Richard Bere, Thomas Green (priest), and John Davy (deacon), refused; and of the brothers Robert Salt, William Greenwood, Thomas Redyng, Thomas Scryven, Walter Pierson, and William Horne. On 29 May all were sent to Newgate, where they were chained standing and with their hands tied behind them to posts in the prison, and so left to die of starvation. However Margaret Clement, who as Margaret Gysse had been brought up in the household of Blessed Thomas More, bribed the gaoler to let her have access to the prisoners, and disguised herself as a milkmaid and carried in a milk-can full of meat, wherewith she fed them. After the king's inquiry as to whether they were not already dead, the gaoler was afraid to let her enter again; but she was allowed to go on the roof, and uncovering the tiles, she let down meat in a basket as near as she could to their mouths, in order to save them from the rack, and as the gaoler feared discovery even this plan was soon discontinued. Greenwood died first (6 June), then Davy (8 June), Salt (9 June), Pierson and Green (10 June), Scryven (15 June), Redyng (16 June). It is probable that then Cromwell interfered and ordered those still living to be given food in order that they might be preserved for execution; for Bere did not die till 9 August, nor Johnson till 20 September. Horne survived, and, though he could not be induced to quit his religious habit, was not attainted till 1540, when he was hanged, disem- bowelled, and quartered at Tyburn (4 August) with the five Pratermissi Robert Bird (layman), Lawrence Cook (Carmelite Prior of Doncaster), Thomas Empson (Benedictine), Giles Heron (layman), and probably with William Bird (Reverend of Caldecote and of Bradford, Wiltshire). All ten Carthusians were beati- fied by Leo XIII on 29 Dec., 1886. Blessed Richard Bere was a nephew of Richard Bere (Abbot of Glastonbury 1483–1525), and became a Carthusian on 20 Feb., 1523. Blessed Thomas Green has been canonised by Dom Hubert O. G. Cawkwood (B. A., Oxon, M.A., Cantab, 1511), who became Fellow of St. John's College Cambridge in 1515 and D.D. in 1532.

John B. Wainwright.

Thomas Marshall, Blessed. See Beche, John, Blessed.

Thomas More, Blessed, knight, Lord Chancellor of England, author and martyr, b. in London, 27 Feb., 1477–78; executed at Tower Hill, 6 July, 1535. He was the sole surviving son of Sir John More, barrister and later judge, by his first wife Agnes, daughter of Thomas Graunger. While still a child Thomas was sent to St. Anthony's School in Thread- needle Street, kept by Nicholas Holt, and when seven years old was placed in the household of Cardinal Morton, Archbishop of Canterbury and Lord Chancellor. Here his merry character and brill- iant intellect attracted the notice of the archbishop, who sent him to Oxford, where he entered at Canter- bury Hall (subsequently absorbed by Christ Church) about 1492. His father made him an allowance barely sufficient to supply the necessaries of life and, in conse- quence, he had no opportunity to indulge in "vain or hurtful amusements" to the detriment of his studies. At Oxford he made friends with William Grocyn and Thomas Linacre, the latter becoming his first instructor in Greek. Without ever becoming an exact scholar he mastered Greek "by an instinct of genius" as witnessed by Pace (De fructu qui ex doctrina perceptum, 1517), who adds "his eloquence is incomparable and twofold, for he speaks with the same facility in Latin as in his own language." Besides the classics he studied French, history, geometry, mathematics, and also learned to play the flute and the violin. After two years' residence at Oxford, More was recalled to London and entered as a law student at New Inn about 1494. In February, 1496, he was admitted to Lincoln's Inn as a student, and in due time was called to the bench and subsequently made a bencher. His great abilities now began to attract attention and the governors of Lincoln's Inn appointed him "reader" or lecturer on law at Furni- val's Inn, his lectures being esteemed so highly that the appointment was renewed for three successive years.

It is clear however that law did not absorb all More's energies, for much of his time was given to letters. He wrote poetry, both Latin and English, a considerable amount of which has been preserved and is of good quality, though not particularly striking, and he was especially devoted to the works of Pico Mirandola, who had written a little of the Carta della Education some years later. He cultivated the acquaintance of scholars and learned men, and, through his former tutors, Grocyn and Linacre, who were now living in London, he made friends with Colet, Dean of St. Paul's, and William Lilly, both.
renowned scholars. Colet became More's confessor, and Lilly vied with him in translating epigrams from the Greek Anthology into Latin, their joint productions being published in 1518 (Proopnymasmata T. M. or The Cynegi Lan). In 1497 More was introduced to Erasmus, probably at the house of Lord Mountjoy, the great scholar's pupil and patron. The friendship at once became intimate, and later on Erasmus paid several long visits at More's Chelsea house, and the two friends corresponded regularly until death separated them. Besides law and the Classics More read the Fathers with care, and he delivered, in the Church of St. Lawrence Jewry, a series of lectures on St. Augustine's "De civitate Dei" which were attended by many learned men, among whom Grocyn, the rector of the church, is expressly mentioned. For such services and such lectures the lectures must have been prepared with great care, but unhappily not a fragment of them has survived. These lectures were given somewhere between 1499 and 1533, a period during which that kind of mind was occupied almost wholly with religion and the question of his own vocation for the priesthood.

This portion of his life has caused much misunderstanding among his various biographers. It is certain that he went to live near the London Charterhouse and often joined in the spiritual exercises of the monks there. He wore "a sharp shirt of hair next his skin, which he never left off wholly" (Cressacre More), and gave himself up to a life of prayer and penance. His mind vague for some time between joining the Carthusians or the Observant Franciscans, both of which orders observed the religious life with extreme strictness and fervour. In this, apparently, with his approval of Colet, he abandoned the hope of becoming a priest or religious, his decision being due to a mistrust of his powers of perseverance. Erasmus, his intimate friend and confidant, writes on this matter as follows (Epp. 447): "Meanwhile he applied his whole mind to exercises of piety, looking to and pondering in vigils, fasts and prayers and similar austerities. In which matter he proved himself far more prudent than most candidates who thrust themselves rashly into that arduous profession without any previous trial of their powers. The one thing that prevented him from giving himself to this profession was that he could not shake off the desire of the married state. He chose, therefore, to be a chaste husband rather than an impure priest.

The last sentence of this passage has led certain writers, notably Mr. Seebold and Lord Campbell, to expatiate at great length on the supposed corruption of the religious orders at this date, which, they declare, disgusted More so much that he abandoned his wish to enter religion on that account. Father Bridgett deals with this question at considerable length (Life and Writings of Sir Thomas More, pp. 23-36), but it is enough to say that this view has now been abandoned by modern Catholic writers, as witness Mr. W. H. Hutton: "It is absurd to assert that More was disgusted with monastic corruption, that he 'loatched monks as a disgrace to the Church'..." He was throughout his life a warm friend of the religious orders, and a devoted admirer of the monastic ideal.

He condemned the vices of individuals; he said, as his great-grandson says, 'that at that time religious men in England had somewhat degenerated from their ancient strictness and fervour of spirit...'; but there is not the slightest sign that his ideal of the monastic life was due to the smallest degree to a distrust of the system or a distaste for the theology of the Church.'

The question of religious vocation being disposed of, More threw himself into his work at the Bar and scored immediate successes. Besides law and the Classics More read the Fathers with care, and he delivered, in the Church of St. Lawrence Jewry, a series of lectures on St. Augustine's "De civitate Dei" which were attended by many learned men, among whom Grocyn, the rector of the church, is expressly mentioned. For such services and such lectures the lectures must have been prepared with great care, but unhappily not a fragment of them has survived. These lectures were given somewhere between 1499 and 1533, a period during which that kind of mind was occupied almost wholly with religion and the question of his own vocation for the priesthood.

This portion of his life has caused much misunderstanding among his various biographers. It is certain that he went to live near the London Charterhouse and often joined in the spiritual exercises of the monks there. He wore "a sharp shirt of hair next his skin, which he never left off wholly" (Cressacre More), and gave himself up to a life of prayer and penance. His mind vague for some time between joining the Carthusians or the Observant Franciscans, both of which orders observed the religious life with extreme strictness and fervour. In this, apparently, with his approval of Colet, he abandoned the hope of becoming a priest or religious, his decision being due to a mistrust of his powers of perseverance. Erasmus, his intimate friend and confidant, writes on this matter as follows (Epp. 447): "Meanwhile he applied his whole mind to exercises of piety, looking to and pondering in vigils, fasts and prayers and similar austerities. In which matter he proved himself far more prudent than most candidates who thrust themselves rashly into that arduous profession without any previous trial of their powers. The one thing that prevented him from giving himself to this profession was that he could not shake off the desire of the married state. He chose, therefore, to be a chaste husband rather than an impure priest.

The last sentence of this passage has led certain writers, notably Mr. Seebold and Lord Campbell, to expatiate at great length on the supposed corruption of the religious orders at this date, which, they declare, disgusted More so much that he abandoned his wish to enter religion on that account. Father Bridgett deals with this question at considerable length (Life and Writings of Sir Thomas More, pp. 23-36), but it is enough to say that this view has now been abandoned by modern Catholic writers, as witness Mr. W. H. Hutton: "It is absurd to assert that More was disgusted with monastic corruption, that he 'loatched monks as a disgrace to the Church'..." He was throughout his life a warm friend of the religious orders, and a devoted admirer of the monastic ideal.

Of More himself Erasmus has left us a wonderful portrait in his famous letter to Ulrich von Hutten dated 23 July, 1519 (Epp. 473). The description is too long to give in full, but some extracts must be made. "To begin then with what is least known to you, in stature he is not tall, but, though remarkably short. His limbs are formed with such perfect symmetry as to leave nothing to be desired. His complexion is white, his face fair rather than pale and though by no means ruddy, a faint flush of pink appears beneath the whiteness of his skin. His hair is dark brown or brownish black. The eyes are greyish blue, with some spots, a kind which betokens singular talent, and among the English is considered attractive, whereas Germans prize black hair. It is said that none are so free from vice. His countenance is in harmony with his character, being always expressive of an amiable joyousness, and even an incipient laughter and, to speak candidly, it is better framed for gladness than for gravity or dignity,
THOMAS

THOMAS

though without any approach to folly or buffoonery. The right shoulder is a little higher than the left, especially when he walks. This is not a defect of birth, but the result of habit such as we often contrive to give the rest of our body. It is a habit which he cannot offend. He seems born and framed for friendship, and is a most faithful and enduring friend. When he finds any sincere and according to his heart, he so delights in their society and conversation as to place it in the principal charm of life. In a word, if you want a perfect model of virtue, you will find it in no one better than in More. In human affairs there is nothing from which he does not extract enjoyment, even from things that are most serious. If he converses with the learned and judicious, he delights in their talent, if with the ignorant and foolhardy, he is particularly beloved by professional jesters. With a wonderful dexterity he accommodates himself to every disposition. As a rule, in talking with women, even with his own wife, he is full of jokes and banter. No one is less led by the opinions of the crowd, yet no one departs less from common sense" (see Bishop Bridge's Life, p. 56–60, for the entire letter). More married again very soon after his first wife's death, his choice being a widow, Alice Middleton. She was older than he by seven years, a good, somewhat commonplace soul without beauty or education; but she was a capital housekeeper and devoted to his four young children. On the whole the marriage seems to have been quite satisfactory, although Mistress More usually failed to see the point of her husband's jokes.

More's fame as a lawyer was now very great. In 1510 he was made Under-Sheriff of London, and four years later was chosen by Cardinal Wolsey as one of an embassy to Flanders to protect the interests of English merchants. He was thus absent from England for more than six months in 1515, during which time he made the first sketch of the "Utopia," his most famous work, which was published the following year. Both Wolsey and the king were anxious to secure More's services at Court. In 1516 he was granted a pension of £100 for life, was made a member of the embassy to Calais in the next year, and became a privy councillor about the same time. In 1519 he resigned his post as Under-Sheriff and became comptroller to the Court of Wards. In June, 1520, he was in Henry's suite at the "Field of Cloth of Gold," in 1521 was knighted and made sub-treasurer to the king. When the Emperor Charles V visited London in the following year, More was chosen to deliver the Latin address of welcome; and grants of land in Oxford and Kent, made him this and three years later, were further proof of Henry's favour. In 1523 he was elected Speaker of the House of Commons on Wolsey's recommendation; became High Steward of Cambridge University in 1525; and in the same year was made Chancellor of the Duchy of Lancaster, to be held in addition to his other offices. In 1522 More had purchased a piece of land in Chelsea, where he built himself a mansion about a hundred yards from the north bank of the Thames, with a large garden stretching along the river. Here at times the king would come as an unbidden guest at dinner time, or would walk in the garden with his arm round More's neck enjoying his brilliant conversation. But More had no illusions about the royal favour he enjoyed.

"If my head should win him a castle in France," he said to Roper, his son-in-law, in 1525, "it should not fail to go." The Lutheran controversy had now spread throughout Europe and, with some reluctance, More was one of the first to oppose it. His views are mentioned below in the list of his works, and it is sufficient here to say that, while far more refined than most polemical writers of the period, there is still a certain amount that tastes unpleasant to the modern reader. At first he wrote in Latin but, when the books of Tindal and other English Reformers began to be read by people of all classes, he adopted English as more fitted to his purpose and, by doing so, gave little aid to the development of English prose.

In October, 1520, More succeeded to Wolsey's position, and his tenure of the chancellorship is chiefly memorable for his unparalleled success as a judge. His despatch was so great that the surcharge, which had previously been an incident, an incident commemorated in the well-known rhyme,

"When More some time had Chancellor been

No more suits did remain.

"The like will never more be seen,

Till More be once more in the same.""

As chancellor it was his duty to enforce the laws against heretics and, by doing so, he provoked the attacks of Protestant writers both in his own time and since. The subject need not be discussed here, but More's attitude is patent. He agreed with the principle of the anti-heresy laws and had no hesitation in enforcing them. As he himself wrote in his "Apologia" (cap. 49) it was the vice of heretics that he hated, not their persons; and he never proceeded to extremities until he had made every effort to get those brought before him to recant. How successful he was in this is evident from the care of the home of four persons suffered the supreme penalty for heresy during his whole term of office. More's first public appearance as chancellor was at the opening of the new Parliament in November, 1529. The accounts of his speech on this occasion vary considerably, but it is quite certain that he had no knowledge of the long series of encroachments on the Church which this very Parliament was to accomplish. A few months later came the royal proclamation ordering the clergy to acknowledge Henry as "Supreme Head" of the Church "as far as the law of God will permit," and we have Chapu's testimony that More at once proffered his resignation of the chancellorship, which however was not accepted. His firm opposition to Henry's designs in regard to the divorce, the papal supremacy, and the laws against heretics, speedily lost him the royal favour, and in May, 1532, he resigned his post of lord chancellor, and in June, the same year, he was further expatriated by the Act of Attainder. In 1532 he was elected Speaker of the House of Commons on Wolsey's recommendation; became High Steward of Cambridge University in 1525; and in the same year was made Chancellor of the Duchy of Lancaster, to be held in addition to his other offices. In 1522 More had purchased a piece of land in Chelsea, where he built himself a mansion about a hundred yards from the north bank of the Thames, with a large garden stretching along the river. Here at times the king would come as an unbidden guest at dinner time, or would walk in the garden with his arm round More's neck enjoying his brilliant conversation. But More had no illusions about the royal favour he enjoyed.

"If my head should win him a castle in France," he said to Roper, his son-in-law, in 1525, "it should not fail to go." The Lutheran controversy had now spread throughout Europe and, with some reluctance, More was one of the first to oppose it. His views are mentioned below in the list of his works, and it is sufficient here to say that, while far more refined than most polemical writers of the period, there is still a certain amount that tastes unpleasant to the modern reader. At first he wrote in Latin but, when the
principis mori est". "Is that all, my lord," answered More, then, in good faith, between your grace and me, but this, that I am your lord's man to-morrow." In March, 1534, the Act of Succession was passed which required all who should be called upon to take an oath acknowledging the issue of Henry and Anne as legitimate heirs to the throne, and to this was added a clause repudiating "any forebear, grandfather, prince or potentate." On 14 April, More was summoned to Lambeth to take the oath and, on his refusal, was committed to the custody of the Abbot of Westminster. Four days later he was removed to the Tower, and in the following November was attainted of treason, the trial being made to end with him being resumed by the Crown. In prison, though suffering greatly from "his old disease of the chest . . . gravel, stone, and the cramp", his habitual gaiety remained and he joked with his family and friends whenever they were permitted to see him as merrily as in the old days at Chelsea. When alone his time was given up to prayer and penitential exercises; and he wrote a "Dialogue of comfort against tribulation", treatise (unfinished) on the Passion of Christ, and many letters to his family and others. In April and May, 1535, Cromwell visited him and also demanded his opinion of some statutes conferring on Henry the title of Supreme Head of the Church. More refused to give any answer beyond declaring himself a faithful subject of the king. In June, Rich, the solicitor-general, held a conversation with More and, in reporting it, declared that More had denied Parliament's power to confer ecclesiastical supremacy on Henry. It was now discovered that More and Fisher, the Bishop of Rochester, had exchanged letters in prison, and a fresh inquiry was held which resulted in his being deprived of all books and writing materials, but he contrived to write to his wife and favourite daughter, Margaret, on scraps of paper with a charred stick or piece of coal.

On 1 July, More was indicted for high treason at Westminster Hall before a special commission of twenty. More denied the chief charges of the indictment, which was enormously long, and denounced Rich, the solicitor-general, and pleaded witness against him, as a perjuror. The jury found him guilty and he was sentenced to be hanged at Tyburn, but some days later this was changed by Henry to beheading on Tower Hill. The story of his last days on earth, as given by Roper and Cresacre More, is of the tenderest beauty and could be read and reread and the martyr ever surpassed him in fortitude. As Addison wrote in the Spectator (No. 349) "that innocent mirth which had been so conspicuous in his life, did not forsake him to the last . . . his death was of a piece with his life. There was nothing in it new, forced, or affected. Pity did not look upon the severing of his head from his body as a circumstance that ought to produce any change in the disposition of his mind". The execution took place on Tower Hill "before nine of the clock" on 6 July, the body being buried in the Church of St. Peter ad vincula. The head, after being parboiled, was exposed on London Bridge for a month when Margaret Roper bribed the man, whose business it was to throw it into the river, to give it to her instead. The final fate of the relic is somewhat uncertain, but in 1824 a leaden box was found in the Roper vault at St. Dunstan-in-the-West being opened found to contain a head presumed to be More's. The Jesuit Fathers at Stonyhurst possess a remarkable collection of secondary relics, most of which came to them from Father Thomas More, S.J. (d. 1795), the last male heir of the martyr. These include his hat, cap, crucifix of gold, a silver seal, "George", and other articles. The hair, shirt, worn by him for many years and sent to Margaret Roper the day before his martyrdom, is preserved by the Augustinian canons of Abbot's Leigh and was given to whom it was brought by Margaret Clements, the adopted child of Sir Thomas. A number of autograph letters are in the British Museum. Several portraits exist, the best being that by Holbein in the possession of E. Huth, Esq. Holbein also painted More's son at the age of ten. More's diaries disappeared, but the original sketch for it is in the Basle Museum, and a sixteenth-century copy is the property of Lord St. Oswald. Bl. Thomas More was formally beatified by Pope Leo XIII, in the Decree of 29 December, 1886.

"Surely, my lord, there was a ready writer and not a few of his works remained in manuscript until some years after his death, while several have been lost altogether. Of all his writings the most famous is unquestionably the "Utopia", first published at Louvain in 1516. The volume recounts the fictitious travels of one Raphael Hythlodaeus, a mythical character, who, in the course of a voyage to America, was left behind near Cape Frio and thence wandered on till he chanced upon the Island of Utopia (ωτ, τότες or "nowhere") in which he found an ideal constitution in operation. The whole work is really an exercise in the imagination with much brilliant satire upon the world of More's time. He wrote it as Peter Giles, Cardinal Morton, and More himself, take part in the dialogue with Hythlodaeus, so that an air of reality pervades the whole which leaves the reader sadly puzzled to detect where truth ends and fiction begins, and has led not a few to take the book seriously. But this is precisely what More intended, and there can be no doubt that he would have been as delighted at entrapping William Morris, who discovered in it a complete gospel of Socialism; or Cardinal Zeligari, who denounced it as "no less foolish than impious"; as he must have been with his own contemporaries who proposed to hire a ship and send out missionaries to his non-existent island. The book ran through a number of editions in the original Latin version and, within a few years, was translated into German, Italian, French, Dutch, Spanish, and English.

The collected works of More's English works was published by William Rastell, his nephew, at London in 1557; it has never been reprinted and is now rare and costly. The first collected edition of the Latin Works appeared at Basle in 1563; a more complete collection was published at Louvain in 1565 and again in 1566. In 1667 the complete works appeared at Frankfort-on-Main, and Leipzig. After the "Utopia" the following are the most important works: "Luciani Dialogi . . . compluris opuscula . . . ab Erasmo Roterdamo et Thoma Moro interpretibus optimis in Latinorum linguas traducta" (London, 1530); "Here is contained the lyfe of John Piers, Earle of Myrondula . . . " (London, 1510); "Historie of the pitifull life and unfortuneate death of Edward the fifth and the then Duke of Yorke his brother . . .", printed incomplete in the English Works" (1557) and re-issued with a completion from Hall's Chronicle by Wm. Sheares (London, 1641); "Thomasi Morii v. c. Dissertatio Epistolica de aliquot sui temporis theologarum inipiibus . . . " (Leyden, 1625); Epigrammata . . . Thoma Mori Britanni, pleraque e Graecias versae. (Basle, 1518); Erudissimis viri G. Rosi Opus elegans quo pulcherrime retulit reflerti insaniae Lutheri . . . " (London, 1523), written at the request of Henry VIII in answer to Luther's reply to the royal "Defensio Septem Sacramentourum"; "A dyaloge of Syr Thomas More Knt . . ." of divers maters, as of the veneration and worship of ymages and relickyes, praying to sayntys and goyng on pylgrymage . . . " (Lon-

RUBENS, THE PRADO, MADRID
Thomas of Bradwardine (Bragwardin, Bradwardin, Bradwarden, de Bradwardina), b. about 1290; d. in London, 26 August, 1349. His birthplace was variously assigned to Bradwarden, Hereford, or Gloucester, and it is certain that he was born at Chichester. He was educated at Merton College, Oxford, and in 1325 was one of the proctors of the university who took part in the litigation between the university and Cardinal Galhardus de Mors, Archdeacon of Oxford. As a theologian he attained great fame, being one of the followers of Richard FitzGilbert and John Duns Scotus, an eminent jurist, and a noted jurist and canonist. He was one of the originators of the Ricardian School, and his works on canon law and secular law were widely studied and used. He was also a great orator, and his sermons and discourses were held in high esteem. He was a friend of John Wycliffe and a supporter of the Lollard movement, and his works were burned at the stake in 1382.

Edwin Burton.

Thomas of Cantimpré, medieval writer, preacher, and theologian, b. of noble parentage at Leu St-Pierre near Brus. in the Duchy of Brabant, 1201; d. at Wells, 14 Jan., 1465. He was educated at Winchester (1404) and New College, Oxford (1406). After his ordination as priest he acquired much ecclesiastical preferment, including the archdeaconry of Buckingham and a canonry at Wells. Being a skilled lawyer he was consulted in the Case of Thomas of Woodstock in 1428. He was also frequently employed as English ambassador abroad. His influence with the young King Henry VI was so great that he was appointed lord privy seal in 1442; and in the following year the pope nominated him Bishop of Bath and Wells. He was consecrated, 13 Oct., 1442, at the new foundation of Eton College, in which he took great interest. As bishop he rebuilt the episcopal palace at Wells, and greatly improved the city. He was a lover of learning and a munificent patron to houses of education, particularly Winchester School and Lincoln College, Oxford.

Beckett, Official Correspondence of Beckett, secretary to Henry VI in R. S. (London, 1872); Nicol, Journal of one of the suites of Beckett during embassy to negotiate marriage between Henry VI and the Count of Armagnac's daughter (London, 1832); Rumford, Lettres de Margaret of Anjou, Bishop Beckett and others (London Society, 1809); Gershon in Dict. Nat. Biog., v. s. v. Beckett or Beccington, Thomas.

Edwin Burton.

Thomas of Beckington (Bekynton), Bishop of Bath and Wells, b. at Beckington, Somerset, about 1300; d. at Wells, 14 Jan., 1465. He was educated at Winchester (1404) and New College, Oxford (1406). After his ordination as priest he acquired much ecclesiastical preferment, including the archdeaconry of Buckingham and a canonry at Wells. Being a skilled lawyer he was consulted in the Case of Thomas of Woodstock in 1428. He was also frequently employed as English ambassador abroad. His influence with the young King Henry VI was so great that he was appointed lord privy seal in 1442; and in the following year the pope nominated him Bishop of Bath and Wells. He was consecrated, 13 Oct., 1442, at the new foundation of Eton College, in which he took great interest. As bishop he rebuilt the episcopal palace at Wells, and greatly improved the city. He was a lover of learning and a munificent patron to houses of education, particularly Winchester School and Lincoln College, Oxford.

Nat. Biog., v. s. v. Beckett or Beccington, Thomas.

Edwin Burton.
d. 15 May, 1272. At the age of five his education began at Liége, where he spent eleven years mastering the difficulties of the *trivium* and *quadrivium*. At the age of sixteen he received the habit of the Canons Regular of St. Augustine in the Abbey of Cantimpre, where he continued to study until the presentation of his order.

In 1232, after fifteen years at Cantimpre, during which he was a constant source of edification to his religious brethren, he entered the Order of St. Dominic at Louvain. Immediately after his profession in that year, he was sent to Cologne to pursue the higher theological studies of the order, under the tutelage of the illustrious Albert the Great. From Cologne, where he spent four years, he went to Paris, to the Dominican *studium* of St. James, to perfect himself in the sciences and to prepare for the apostolate of preaching. Returning to Louvain in 1240, he was made professor of philosophy and theology—an office he filled with rare distinction. He achieved equal success in the apostolate of preaching, in recognition of which the title of "Preacher General" was conferred upon him. His missionary activities extended throughout Brabant and into Germany, Belgium, and France. To his reputation for missionary zeal and eloquence he added the famous *Tria Regalien*: seven works, treating of philosophy, theology, and hagiology, are attributed to his pen. His first and most important work is entitled "Opus de natura rerum". In the composition of this great work, which contains twenty books, he spent fifteen years. "Bonum universale de apibus" is an allegory in which, employing the figure of bees, he treats of precepts concerning conduct and of the duties of superiors and subjects. This work, which had a wide vogue among spiritual writers for many centuries, was printed at Deventer (before 1478), at Paris, and three times at Douai (1595, 1650, 1627). His other works on the treat of hagiology and are as follows: (1) "Vita Christine virginis mirabilis dicta"; (2) "Vita B. Margarite Irenis"; (3) "Vita Pia Flugardis"; (4) "Vita Joanis annibis prius monasteri Cantimpratenis et ejus Ecclesiae undistorsa"; (5) "Supplementum ad vitam B. Maris d'Oniges a B.M. Jacobo de Vi"triac-

John B. O'Connor.

Thomas of Celano, Friar Minor, poet, and hagiographical writer, b. at Celano in the Province of the Abruzzi, about 1200; d. about 1255. He was one of the first disciples of St. Francis of Assisi and joined the order probably in 1215. In 1221 Thomas accompanied Francis of Assisi on his mission to Germany. The following year he became custos of the convents at Mayence, Worms, Speyer, and Cologne, and soon after a Cesar of Speyer, on his return to Italy, made him his vicar in the government of the German province. Before September, 1223, Thomas returned to Rome and lived there in famous retirement. Francis, soon after the canonization of St. Francis (16 July, 1228) he wrote his "Vita prima", or "First Life" of St. Francis of Assisi, by order of Gregory IX. Between 1244 and 1247, he compiled his "Vita secunda", or "Second Life" of St. Francis, which is in the nature of a supplement to the first one, by command of Crescentius of Jessi, then minister general of the order. About ten years later Thomas wrote a treatise on the miracles of St. Francis at the bidding of Blessed John of Parma, the successor of Crescentius as minister general. In addition to these works, around which a large controversy of literature has grown up, Thomas of Celano wrote some beautiful sequences in honour of St. Francis: "Fregit victor virtualis" and "Sanctitatis nova signa", and, in all probability, he is also the author of the "Dies Irm" and of the "Life of St. Clare of Assisi", written between 1255 and 1261 (cf. Robinson, "Life of St. Clare", Introduction, pp. xxi sq.). The best critical edition of the works of Thomas of Celano is that of Père Édouard d'Alencçon.

Ferdinand Heckmann.

Thomas of Dover, martyr; d. 2 or 5 Aug., 1295. On the above date the French ravaged Dover with fire and sword, and eventually attacked the Benedictine priory of St. Martin. All the inmates fled, with the exception of one, an old and infirm monk named Thomas Hales or de Haly, whom the sailors found in the dormitory, and slew for refusing to disclose the place where the treasures of the church were hidden. Numerous miracles [for which see Horstmann, "Nova legenda Anglia", (Oxford, 1906), and Berthelot, "Les miracles", (Paris, 1870)], cited in the work cited by John of Tynemouth as having been wrought through his relics. Friar Simon Simeon, in the narrative of his pilgrimage to the Holy Land about 1222, bears witness to the honour paid to him as a martyr at the "Black Rocks under Dover Castle" (see *Itin. Sim. Simeoni*, ed. Nasmith, Cambridge, 1778, p. 7). Richard II at the instance of his mother requested the pope to canonize Thomas; but though an enquiry was set on foot in 1382 nothing further seems to have been done. He was, however, popularly regarded in the neighbourhood as a saint. In 1500 his name Rich, Vicar of Dover, obtained a "letter of indulgence" for the altar of Blessed Thomas de Haly in Dover Priory. His own church contained a chapel of St. Thomas, which may possibly have been dedicated to Thomas of Dover. He is very generally given the title of saint, and it is remarkable that he is represented (fig. 26) in the copper-plate reproduction of the pictures formerly at the English College, Rome, which resulted in the equivalent beatification of sixty-three martyrs mentioned by name therein (see *English Confessors and Martyrs*). On neither day is he mentioned in the "Acta Sanctorum". Memorial in St. Francis, *A Discourse on Wales* (London, 1852), 665; *Challoner, Britannica sanitas, II* (London, 1774), 72; *Hussey, Testamenta Cantuana*: *Ess. Kemi* (London, 1907), 3, 90, 104.

John B. Wainwright.

Thomas of Horsford (Thomas de Cantelupe), SAINT, b. at Hambledon, Buckinghamshire, England, about 1218; d. at Orvieto, Italy, 25 August, 1282. He was the son of William de Cantelupe and Millicent de Gournay, and thus a member of an illustrious and influential family. He was educated under the care of his uncle, Watkin of Hertford, Bishop of London, first at Oxford then at Paris. During his studies he attended the Council of Lyons in 1245, when he became a papal chaplain. Returning to Oxford, he taught canon law, and in 1262 was elected chancellor of the university. In the Barons' Wars he took the popular side of the Barons, but in the Bishop of Ely's revolt of St. Omer at Amiens, 1263. After the defeat of Henry III at the battle of Lewes he was made Chancellor of England (22 Feb., 1265), gaining wide renown for his judicial wisdom and fairness. Deprived of the chancellorship on the death of Simon de Montfort, he went into exile, lecturing at Paris on theology and Scripture (1265-75). He then returned to Oxford till 1274 when he attended the Second Council of Lyons. He held several benefices which he administered most zealously, appointing responsible
THOMAS

vicars, visiting them regularly, and showing himself a model pastor by his holiness and wide charity. In June, 1575, he was appointed Bishop of Hereford, and was consecrated by his friend Cardinal Kilwardby (8 Sept., 1275). As bishop he continued his apostolic life, labouring incessantly for the good of his people, maintaining the privileges and property of his diocese against Gilbert of Gloucester, Llewellyn, and others, supporting Edward I in his struggle with Llewellyn, combating the unjust practices of the Jews, and reforming the clergy, secular and regular. He came into conflict with Archbishop Peckham on questions of jurisdiction, and at the Council of Reading (July, 1279), maintained the policy of Peckham. (For the articles embodying the points in dispute see Wilkins, "Concilii", II, 75.) His personal differences with Peckham led first to his withdrawal to Normandy that he might avoid an interdict and appeal to Rome, and subsequently in 1282 to his actual excommunication by the archbishop. He then went to Rome to plead his own cause before Pope Martin IV, who received him kindly. But his failing health succumbed to the fatigue of the journey and the summer heat. He was buried at Orvieto, but subsequently his relics were brought back to Hereford, where many miracles were wrought by his intercession and his shrine became second only to that of St. Thomas of Canterbury. He was canonized by John XXII (17 April, 1320), and his festival, formerly observed on 2 October, is now kept in England on 3 October.

EDWIN BURTON.

Thomas of Jesus (Thomas de Andrade), reformer and preacher, b. at Lisbon, 1529; d. at Sagana, Morocco, 17 April, 1582. He was educated by the Augustinian Hermits from the age of ten, entered the order at Lisbon in 1534, completed his studies at Combra, and was appointed novice-master. In his zeal for primitive observance he attempted a thorough reform of the order, but the opposition was such that he was ordered to leave Portugal. However, the active engagement of the Discalced or Reformed Augustinians is attributed to the initiative of Thomas de Andrade (see HERMITS OF ST. AUGUSTINE). High in favour at Court, Thomas assisted, in 1578, at the death of John III, of which he has left an interesting narrative in a letter still extant. John's successor, Sebastian, immediately set out on his ill-starred expedition to Africa (see PORTUGAL), and he insisted that Thomas should accompany the forces. The holy Hermits laboured among the soldiery with his accustomed zeal until wounded and taken captive at Alcacer, 1375. A Moorish monk became his master and, first by kindness then by torture, strove to secure his perversion. Into the dungeon where he was confined a faint gleam penetrated for a short period at midday, and by that light, day after day, Thomas composed for the comfort of his soul the "Liber lietorum de Christo et de Jesus", contemplations on the sufferings of Jesus, which have since proved the nourishment and edification of countless souls. The Portuguese ambassador, learning of his pitiable plight, rescued Thomas and placed him under the care of a Christian merchant. But he was forced to be set on once to Sagana, where some two thousand of the poorest captives were detained. There he commenced an apostolate which was soon blessed with marvellous fruit; the jail seemed transformed into a monastery, numbers were saved from apostasy or reconciled, and several of his penitents suffered a glorious martyrdom. Meanwhile vigorous efforts were being made to procure his complete liberation, but Thomas declared that, captive or free, he would remain to the end in the service of the Christian slaves of the Moors. His enfeebled frame at last succumbed to the combined effects of his sufferings, toils, and austerities. He spent his dying breath in reassuring some poor Christians on the point of apostasy that their ransom would arrive by a certain date if they persevered, as indeed it did.

Since early in the eighteenth century there have been editions of Thomas's works, notably those of Thomas's famous work on the Passion, but the last complete version has long been out of print.

For biography see Introduction to Sufferings of Jesus (tr., London, 1863). For interesting and complete account of various English versions of Os trabalhos de Jesus see Pravagio in Bullettum da segundas classes: Academia das Sciences de Lisboa, IV, No. 1 (Lisboa, 1911).

VINCENT SCULLY.

Thomas of Jors (often but erroneously called Joyce and frequently referred to as Anglicus or Angilicus), theologian and cardinal, date of birth and circumstances of his education unknown; d. at Grenoble, 13 December, 1310. He entered the Order of Preachers in England, and was remarkable for his piety, erudition, and executive ability. He was master of the order at Oxford, acted as regent for the king while the latter was absent, and afterwards served as Provincial of the English Province for seven years (1296-1303). He stood in special favour with Edward, King of England, acting as his confessor and executing various commissions for him. While at Lyons on a commission for the king, 15 Dec., 1305, he was created Cardinal Priest of Santa Sabina by Clement V. This pope also appointed him legate to Henry VII, King of Germany, but in fulfilling the appointment he was taken sick and died. His body was afterwards transferred to Oxford and buried under the choir of the Dominican church. His writings are often confused with those of Thomas of Wales, O.P., also called Anglicus or Anglicus. His most important work is "Commentaria in IV libros Sententiarum." The commentary on the first book (Venice, 1523) still enjoys popularity, and offers a concise and complete refutation of the attacks made by Scotus on the teachings of Saint Thomas.

IGNATIUS SMITH.

Thomas of Strasbourg, a fourteenth-century scholastic of the Augustinian Order, b., according to some writers, at Hagenau in Alsace, according to others, at Strasbourg; d. 1357. It was probably at Strasbourg that he entered the Augustinian Order, and there he began his career as a teacher. About the year 1341 he went to Paris, and from that time he taught as a teacher in the university. In 1345 he was elected general of his order, a position which he held until his death. As general, he undertook the revision of the constitution of his order, and published the revised statutes under the title "Constitutiones Ordinis Sui". He was, however, less successful in the promotion of his desire to create a chapter of Augustinians among the members of his order, and was instrumental in founding at Verona in 1351 a studium generale, or university, for the study of logic, philosophy, and theology. His best known work is a commentary on the "Books of Sentences" of Peter the Lombard, published in 1456 in four editions: Venice, 1564 and 1588; Genoa, 1585; Geneva, 1635. He was also the author of sermons, meditations, and letters, still unpublished.
As a teacher and commentator he adhered closely to the doctrines of Giles of Rome (Ægidius Romanus, or de Columba), who since 1287 had been recognized as the doctor ordinis of the Augustinians. He opposed the innovations of Henry of Ghent and the abstruse discussions of the Schoolmen. For example, in the question of the distinction between the nature of God and the Divine attributes, he taught that there can be no formal distinction, nor any distinction of any kind except by comparison of the external effects of those attributes. Similarly there is, he maintained, no formal distinction between the ideas and the Divine ideas; whatever distinction exists among the ideas themselves or between the ideas and the Divine essence is the work of the Divine intellect. In regard to the origin of the universe, he maintained that the doctrine of creation can be proved by strict demonstration, the starting-point of the proof being the fact that the power of God, being unlimited, could not postulate a material as a necessary condition of action; just as the existence of God does not postulate any other being, so the Divine action does not postulate a material on which to act. This refers, however, to creation. Whether the material world was created in time or at once, or, on the contrary, was created ab eterno, is a question which, he believed, the human mind cannot solve without the aid of revelation.

WILLIAM TURNER.

Thomas of Villanueva, Saint, educator, philanthropist, b. at Pueullantana, Spain, 1488; d. at Valencia, 8 Sept., 1555. Son of Alonso Tomas Garcia and Lucia Martin Spain: Castellanos, the saint was brought up in the practices of religion and charity. Every Friday his father was wont to give in alms all the meal he earned at his mill, besides his usual daily dole of bread. On great feast-days he added wood, wine, and money; while to poor farmers he loaned money and seed. On the death of her husband, Lucia continued the usual alms, and supplied indigent maidens in the neighbourhood with clothing and money. When sixteen years old, Thomas entered the University of Alcalá. After profound study of the liberal sciences, he filled the chair (1514) of arts, logic, and philosophy. Among his auditors were the famed scholars Ferdinand de Encina and Dominic Soto. With Alcalá, however, ended his university associations, he having declined the chair of natural philosophy at Salamanca, where he joined the Augustinians in 1516, his vows following a year later, and his ordination to priesthood the year after; his first Mass was celebrated at Christmas, 1518. At Salamanca Convent Thomas was given the class of Scholastic theology because of his attachment for books, chiefly the Lombard and St. Thomas, and his exemplary life. Preaching in the chief pulpits of Spain was envied alike to his duties, among other places at Valencia, the field of his later trials, and Valladolid, seat of the imperial Court and residence of the Emperor Charles V when he visits from the Low Countries. In this last-named city St. Thomas was named by the emperor his court preacher, and one of his councilours of State. Rarely, however, did the saint pay visits of ceremony to the then master of Europe, though his written correspondence with Charles, who held his opinions in high esteem, was voluminous. Towards the end of his life, while at Salamanca, he had all the emperor's letters destroyed; his own letters to the emperor, however, are now stored at Simancas.

Apart from these burdens Thomas held many offices of trust in his order, e. g. as convent prior in various cities, among others at Valladolid in 1544, the very year he was called to the See of Valencia. Moreover, he was twice provincial-prior, first of Andalusia and Castile in 1527, then six years later of Castile alone, whence the first mission band of his brethren was sent across the Atlantic in 1533 to establish houses of their order. In Mexico, for example, his nomination to the Archdiocese of Valencia, a post that for well-nigh a hundred years had witnessed no bishop in residence, an appointment that was confirmed by Paul III. Previously St. Thomas had declined the See of Granada, offered him by the emperor, while that of Valencia he accepted only through obedience to his superiors. He was consecrated in the church of his order at Valladolid by Juan, Cardinal Tavera de Pardo, Archbishop of Toledo. On his entrance to his see on 1 Jan., 1545, of which he was thirty-second bishop and eighth archbishop, St. Thomas opened his career as legislator and philanthropist, which won for him the titles of "Almsgiver," "Father of the Poor," and "Model of Bishops," given him at his beatification in 1618 by Paul V. During his eleven years of episcopal rule his most noteworthy deeds were as follows: a visitation of his diocese, opened the cemetery to the sick, and after his death, devoted the sick to the care of the clergy; among other amendments he inhibited his visitators from accepting any gifts whatever. He then held a synod, the first at Valencia for many years, whereby he sought to do away with a number of abuses, as bloodshed, divorce, concubinage, and many excessive priviledges or unreasonable immunities from criminal punishments, in underground prisons; rebuilt the general hospital at Valencia which had just been destroyed by fire; founded two colleges, one for young ecclesiastics, the other for poor students; laboured for the conversion of the naves de Cristo, whose profession of Christianity was largely more outward show; established a church near his palace for foundlings and the offspring of indigent parents; had Mass said at early hours for the working-classes; and in brief, by statutes, by preaching, and by example, strove to reform the morals of churchman and layman.

Towards the poor especially his heart was ever alive with pity; to them his palace gate was always open; daily he had a repast for every poor person that applied for help, as many even as four to five hundred thus getting their meals at his hands. In every district of the city he had almoners appointed with orders especially to them; established or maintained hospitals where poor were from asking alms; these he had supplied with money, food, clothing, while as to indigent workmen, poor farmers, and mechanics, he replenished their stock and bought them tools, thus putting them in the way of making a living. His whole life was replete with acts of practical kindness. He spent his spare time chiefly in prayer and study; his table was one of simple fare, with no luxuries. His dress was inexpensive; he mended with his own hands whatever needed repairs. Numberless are the instances of St. Thomas's supernatural gifts, of his power of healing the sick, of multiplication of food, of removing grievances, of his conversions of sinners. He was taken ill in August, 1555, of angina pectoris, of which he died at the age of 67, at the termination of Mass in his bedroom. His last words were the versicles: "In manus tuas, Domine", etc.; his remains were entombed at the convent Church of Our Lady of Help of his order outside the city walls, whence later they were brought to the cathedral. The saint was of well-knit frame, of medium height, with dark complexion, brilliant eyes, ruddy cheeks, and Roman nose. He was beatified by Paul V (7 Oct., 1618), who set his feast-day for 16 Sept., and canonized by Alexander VII (1 Nov., 1668).

Various reasons are given to account for St. Thomas's non-appearance at the Council of Trent, among them that he was ill, unable to stand the fatigue of travel; that his people would not brook his
Thomas Sherwood, Blessed, martyr, b. in London, 1551; d. at Tyburn, London, 7 February, 1578. His parents also suffered for their conscience, both enduring imprisonment for the Faith. After leaving school in 1568, Thomas assisted his father, a London woollen draper, for about ten years; then, feeling that his vocation was to the priesthood, he made arrangements to go to Douay College and was in London settling his affairs, and obtaining the means for his support and education. While so engaged he was recognized in Chancery Lane and betrayed by George Marten, son of Lady Tregonwell. Being examined before the Recorder as to his opinion of the Bull of Pius V and as to whether an excommunicated queen held lawful sovereignty, he denied all knowledge of both Bull and excommunication, but expressed his opinion that if the queen were indeed excommunicated her rule could not be lawful. He was detained at Westminster, where the attorney-general visited him and found him constant in that opinion. On 17 November, 1577, he was committed to the Tower by the Privy Council to be retained close prisoner, from conference with any person, and if he did not willingly confess such things as were demanded of him, he was to be committed to the dungeon amongst the rats. He was repeatedly examined, and twice racked in order to elicit where he had heard Mass and who had been present thereat, but his constancy was unshaken. After being racked, he was cast into a dark and fetid dungeon, where he was kept absolutely without clothes, without food, and with nothing but the bare earth to lie upon. His friends were not allowed to supply his needs, and the utmost concession that William Romper could obtain was permission to supply him with straw to lie upon. He was brought to trial on 3 February, and pronounced guilty of high treason for denying the queen's supremacy; four days later he was executed. He was a man of good wit and judgment and, being well instructed in religious matters, was very helpful to many poor Catholics. Small in stature, he was of healthy constitution and of a cheerful disposition, which he maintained even amidst his torture.

Thomas, Louis, theologian and French Oratorian, b. at Aix-en-Provence 28 Aug., 1619; d. in Paris, 24 Dec., 1695. At the age of thirteen he entered the Oratory and for some years was professor of literature in various colleges of the congregation, of theology at Sau- mur, and finally in the seminary of Saint Magloire, in Paris, where he remained until his death. His chief works are: "Ancienne et nouvelle discipline de l'égèse touchant les bénévoles et les bénéfices" (3 vols. in fol., Paris, 1678-79), which passed through several French and Latin editions and several abridgments; "Dognatum theologicon....de Ineasrra...", "Dei proprietatibus...etc." (3 vols.)

Thomas Reddyng, Blessed. See Thomas Johnson, Blessed.

Thomas Scryven, Blessed. See Thomas Johnson, Blessed.
in fol., Paris, 1890–91), likewise re-edited several times (the treatise on the Incarnation is regarded as Thomassin’s masterpiece); a series of “Tractés historiques et dogmatiques” on ecclesiastical facts, feasts, the Divine Office, the unity of the Church, truth and lying, alms, business and usury (1860–97), a series of methods of studying and teaching, while saying Mass, published by P. Berthier, in (1881–92); the “Glossarium universale hæbraicum” (in fol., Paris, 1897). “Tracté dogmatique et historique des évêques et d’other moyens... dont on est servi... pour établir et maintenir l’unité de l’église” (3 vols. in 4°, Paris, 1765). The last-named two posthumous publications, written by P. Berthier, were written by a life of Thomas Aquinas at the beginning of the “Glossarium”. Thomassin was one of the most learned men of his time, “Vitae stupenda plane eruditionis”, as Hurter says, in his “Nomenclator”, II (Innsbruck, 1886), 410.

A. Thomism in General.—(1) Early opposition overcome.—Although St. Thomas (d. 1274) was highly esteemed by all classes, his opinions did not at once gain the ascendency and influence which they acquired during the first half of the fourteenth century and which they have since maintained. Strange as it may appear, the first of his immediate opponents came from Paris, of which he was such an ornament, and from some of his own monastic brethren. In the year 1277 Stephen Tempier, Bishop of Paris, censured certain philosophic propositions, embodying doctrines taught by St. Thomas, relating especially to the principle of individuation and to the possibility of creating several angels of the same species. In the same year Robert Kilwardby, a Dominican, Archbishop of Canterbury, in conjunction with some doctors of Oxford, condemned those same propositions and moreover attacked St. Thomas’s doctrine of the unity of the substantial form in human beings. These propositions were associated with the condemned propositions, something of Averroisic Aristotelism, whilst the secular doctors of Paris had not fully forgiven one who had triumphed over them in the controversy as to the rights of the mendicant friars. The storm excited by these condemnations was of short duration. Blessed Albertus Magnus, in his old age, hastened to Paris to defend his beloved disciple. The Dominican Order, assembled in general chapter at Milan in 1278 and at Paris in 1279, adopted severe measures against the members who had spoken in defence of the venerable Pole. Bishop William de la Mare, O.F.S., wrote a “Correctorium fratri Thomae”, an English Dominican, Richard Clapwell (or Clapole), replied in a treatise “Contra corruptorium fratri Thomae”. About the same time there appeared a work, which was afterwards printed at Venice (1516) under the title “Contra corruptorium fratrii S. Thomas”, attributed by some to Agelius Romanus, by others to Clapwell, by others to Father John of Paris. St. Thomas was solemnly vindicated when the Council of Vienna (1311–12), defined, against Peter John Olivi, that the rational soul is the substantial form of the human body (on this definition see Zignara, “De mente Conc. Vien.”, Rome, 1787).

The canonisation of St. Thomas by John XXII, in 1323, was a death-blow to his detractors. In 1324 Stephen de Bourret, Bishop of Paris, revoked the censure pronounced by his predecessor, declaring that the bishops of the Dominicans, Franciscans, and Aquinas, had never believed, taught, or written anything contrary to the Faith or good morals”. It is doubtful whether Tempier and his associates acted in the name of the University of Paris, which had always been loyal to St. Thomas. When this university, in 1316, wrote a letter by St. Louis to the Bishop of Monteseo, it was explicitly declared that the condemnation was not aimed at St. Thomas: “We have
said a thousand times, and yet, it would seem, not often enough, that we by no means include the doctrine of St. Thomas in our condemnation. An account of these attacks and defences will be found in the following works: Echard, "Script. ord. pred."

I, 279 (Paris, 1719); De Rubeis, "Diss. crit.", Diss. xxv, xvi, I, p. cxxvii; Leodine ed. Works of St. Thomas (Paris, 1849—91), I, 543, 558, 566; II, 6, 280; Duplessis d’Argentére, "Collectio judiciorum de novis erroribus" (3 vols., Paris, 1733—36), I, 175 sqq.; Du Boulay,

"Hist. univ. Par." IV, 205, 456, 618, 622, 627; Jourdain,

B. Progress of Thomism.—The general chapter of the Dominican Order, held at Carcassonne in 1342, declared that the doctrine of St. Thomas had been received as sound and solid throughout the world (Douay, op. cit., 106). His works were consulted from the time they became known, and by the middle of the fourteenth century they had supplanted the "Libri quattuor sententiarum" of Peter Lombard as the text-book of theology in the Dominican schools. With the growth of the order and the widening of its influence Thomism spread throughout the world; St. Thomas became the great master in the universities and in the study of the religious orders (see Eneyo, "Étudi Patris" of Leo XIII).

The fifteenth and sixteenth centuries saw Thomism in a triumphant march which led to the crowning of St. Thomas as the Prince of Theologians, when his "Summa" was laid beside the Sacred Scriptures at the Council of Trent, and claimed him a Doctor of the Universal Church. The publication of the "Piana" edition of his works, in 1570, and the multiplication of editions of the "Opera omnia" and of the "Summa," during the seventh century and part of the eighteenth show that Thomism flourished during that period. In fact it was during that period that some of the great commentators (for example, Suárez, Sylvestre, and Billuart) adapted his works to the needs of the times.

C. Decline of Scholasticism and of Thomism.—Gradually, however, during the seventeenth and eighteenth centuries, there occurred a decline in the works of the great Scholastics. Scholars believed that there was need of a new system of studies, and, instead of building upon and around Scholasticism, they drifted away from it. The chief causes which brought about the change were Protestantism, Humanism, the study of nature, and the French Revolution. Positive theology was considered more necessary in discussions with the Protestants than Scholastic definitions and divisions. Elegance of diction was sought by the Humanists in the Greek and Latin Classics, rather than in the works of the Scholastics, many of whom were far from being masters of style. The discoveries of Copernicus (d. 1543), Keppler (d. 1631), Galilei (d. 1642), and Newton (d. 1727) were not favourably received by the Scholastics. The experimental sciences were in honour; the Scholastics, including St. Thomas, were neglected (cf. Turner, op. cit., 43). Finally, the French Revolution disorganised all educational systems and struck to Thomism a blow from which it did not fully recover until the last quarter of the nineteenth century. At the time when Billuart (d. 1757) published his "Summa Saneti Thomasi hodierni academiae moribus accendata" Thomism still held an important place in the theological discussion. The tremendous upheaval which disturbed Europe from 1798 to 1815 affected the Church as well as the State. The University of Louvain, which had been largely Thomistic, was compelled to close its doors, and other important institutions of learning were either closed or seriously hampered in their work. The Dominican Order, which naturally had supplied the most ardent Thomists, was crushed in France, Germany, Switzerland, and Belgium. The provinces of Holland and Flanders were almost destitute of Thomists, and the provinces of Austria and Italy were left to struggle for their very existence. The University of Manila (1645) continued to teach the doctrines of St. Thomas and in due time gave to the world Cardinal Zephyrinus González, O.P., who contributed in no small degree to the revival of Thomism under the Benedictine Order.

D. Distinctive Doctrines of Thomism in General.—

(1) In Philosophy. (a) The angels and human souls are without matter, but every material composite being (compositum) has two parts, prime matter and substantial form. In a composite being which has substantial unity and is not merely an aggregate of distinct unities, there can be but one substantial form. The substantial form of man is his soul (anima rationalis) to the exclusion of any other soul and of any other substantial form. The principle of individuality, for material composites, is matter with its dimensions: without this there can be no merely numerical multiplication, just as there is no such multiplication in the form with its distinction: hence there cannot be two angels of the same species. (b) The essences of things do not depend on the free will of God, but on His intellect, and ultimately on His essence, which is immutable. The natural law, being derived from the eternal law, depends on the mind of God, ultimately on the essence of God; hence it is intrinsically immutable. Some actions are forbidden by God because they are bad; they are not bad simply because He forbids them [see Ziniglara, "Sum. phil." (3 vols., Paris, 1859), cc. xi, 11, M. 23, 24, 25]. (c) The will moves the intellect, qua intellectum, i.e., by the power of the will; the intellect moves the will, qua specificationem, i.e., by presenting objects to it: nihil est intellectum nisi praecognitionem. The beginning of all our acts is the apprehension and desire of good in general (bonum in communi). We desire happiness (bonum in communi) naturally and necessarily, not by the determination of our will, qua voluntas (bona particularia) we choose freely; and the will is a blind faculty, always following the last practical judgment of the intellect (Ziniglara, 51). (d) The senses and the intellect are passive, i.e., recipient, faculties; they do not create, but receive (i.e., perceive) their objects (see Ziniglara, C. xxix, a. 2; Ziniglara, 26, 27). If this principle is borne in mind there is no reason for Kant’s "Critique of Pure Reason". On the other hand those faculties are not like wax, or the sensitive plate used by photographers, in the sense that they are inert and receive impressions unconsciously. The will controls the exercise of the faculties, and the process of acquiring knowledge is a vital process: the moving cause is always within the living agent. (e) The Peripatetic axiom: "Nihil est in intellectu quod non prius in sensu" (Nothing is in the intellect that was not first in the senses), is admitted, but St. Thomas modifies it by saying: first, that, once the sense objects have been perceived, the intellect ascends to the knowledge of higher things, even of God; and, secondly, that the soul knows its own existence by itself (i.e. by its own act), although it knows its own nature only by reflection on its acts. Knowledge begins with perception, but the reason, or the intellect is far beyond that of the senses. In the soul as soon as it begins to act are found the first principles (prima principia) of all knowledge, not in the form of an objective illumination, but in the form of a subjective inclination to admit them on account of their evidence.
THOMISM

Thomism denying the existence of the sun when we see it shining (see Zigliara, op. cit., pp. 32-42). (f) The direct and primary object of the intellect is the universal, which is prepared and presented to the passive intellect (intellectus possibile) by the active intellect (intellectus agens) which illuminates the phantasmata, or mental images, received through the senses, and impresses them on the individual mind of the subject itself. This is called abstracting the universal idea from the phantasmata, but the term must not be taken in a materialistic sense. Abstraction is not a transferring of something from one place to another; the illumination causes all material and individualizing conditions to disappear, though the individualized item remains in the vital action of the intellect (Q. lxxxiv, a. 4; Q. lxxxv, a. 1, ad 1wss, 3wss, 4wss). The process throughout is so vital, and so far elevated above material conditions and modes of action, that the nature of the acts and of the apprehended proves the soul to be immaterial and spiritual. (g) The soul, by its very nature, is immortal. Not only is it true that God will not annihilate the soul, but from its very nature it will always continue to exist, there being in it no principle of disintegration (Zigliara, p. 9). Hence human reason can prove the incorruptibility (i.e., immortality) of the human soul and the existence of the angels (a priori). The existence of angels cannot be proved by innate idea, it cannot be proved by arguments a posteriori but it can be demonstrated by a posteriori arguments. Ontologism was never taught by St. Thomas or by Thomists (see Lepidi, "Exam. phil. theol. de ontologismo", Louvain, 1874, c. 19; Zigliara, Thes. I, VIII). (i) There is no human (i.e., deliberate acts) act in indiviso.

(2) In Theology. (a) Faith and science, i.e., knowledge by demonstration, cannot coexist in the same subject with regard to the same object (Zigliara, O. 32, VII); and the same is true of knowledge and opinion. The metaphysics of the Scotists, according to some Thomists, in the intelligere actualissimum, i.e., fulness of pure intellect, according to others in the perfection of asetitas, i.e., independent existence (Zigliara, Th. VIII, IX). (c) The happiness of heaven, formally and in the ultimate analysis, consists in the vision, not in the fruition, of God. (d) The Divine attributes are distinguished from the Divine nature and from each other by a virtual distinction, i.e., by a distinctio rationis cum fundamento a parte rei. The distinctio actualis formalis of Scotus is rejected. (e) In attempting to explain the mystery of the Trinity—in which all transcendence is—i.e., the relations must be considered perfectionis simplieric simplierices, i.e., excluding all imperfection. The Holy Ghost would not be distinct from the Son if He did not proceed from the Son as well as from the Father. (f) The angels, being pure spirits, are not, properly speaking, in any place; they are said to be in the place, or in the places, where they exercise their activity (Summa, I, Q. li, a. 1). Strictly speaking, there is no such thing as an angel passing from place to place; but if an angel wishes to exercise its activity first in Japan and afterwards in America, it can do so in I. IV, Zigliara, Thes. I, VII. (g) The knowledge of the angels is not passed through intermedius speciei infused by God (Q. iv, a. 4, 2, i. 1. 2, ii. 8, a. 7). They do not naturally know future contingents, the secrets of souls, or the mysteries of grace (Q. lii, aa. 3, 45). The angels choose either good or evil instantly, and with full knowledge; hence their judgment is naturally final and irrevocable (Q. liii, a. 2). (g) Man was created in the state of sanctifying grace. Grace was not due to his nature, but God granted it to him from the beginning (I, Q. xxi, a. 2). So great is the perfection of man in the state of sanctifying grace, so perfect the subjection of his lower faculties to the higher, that his first sin could not have been a venial sin (I-II, Q. lxxxiii, a. 3). (h) It is more probable that the Incarnation would not have taken place had man not sinned (III, Q. i, a. 3). In Christ there were two kinds of actions, the human and the divine, and the knowledge of things in the Divine Essence; the scientia infusa, i.e., the knowledge of things through infused ideas (species), and the scientia acquisita, i.e., acquired or experimental knowledge, which was nothing more than the actual experience of things which he already knew. On this last point St. Thomas, in the "Summa" (Q. ix, a. 4), explicitly retracts an opinion which he had once held (III Sent., d. 14, Q. iii, a. 3). (i) All sacraments of the New Law, including confirmation and extreme unction, were instituted immediately by Christ. Circumcision was a sacrament of the Old Law, and confers upon man and God is not seen, which is original sin. The children of Jews or of other unbelievers may not be baptized without the consent of their parents (III, Q. lxxvii, a. 10; II-II, Q. x q. a. 12; Denzinger-Bannwart, n. 1481). Contrition, confession, and satisfaction are the proximate matter (materia prorsa) of the Sacrament of Penance. Thomists hold, against the Scotists, that when Transubstantiation takes place in the Mass the Body of Christ is not made present per medium addictions, i.e., is not brought to the altar, but they do not agree in selecting the term which should be used to express "De Euchar," Rome, 1900, Th. XI, "De euchar," p. 379) that the best, and the only possible, explanation is the one given by St. Thomas himself: Christ becomes present by transsubstantiation, i.e., by the conversion of the substance of bread into the substance of His body (III, Q. lxxv, a. 4; Sent., d. XI, Q. i, a. 1, q. 1). After the consecration the accidents (accidentia) of the bread and wine are preserved by Almighty God without a subject (Q. lxxxvii, a. 1). It was on this question that the doctors of Paris sought enlightenment from St. Thomas, "Life and writings of St. Thomas", London, 1872, II, p. 544). The earlier Thomists, following St. Thomas (Sumpl., Q. xxxvii, a. 2), taught that the sub-diaconate and the four minor orders were partial sacraments. Some recent Thomists—e.g., Billot (op. cit., p. 252)—and Tancurey (De ordine, n. 16) defend this opinion as more probable and more in conformity with the definitions of the councils. The giving of the chalice with wine and of the paten with bread Thomists generally held to be an essential part of ordination to the priesthood. Some, however, taught that the imposition of hands was at least as necessary in the case of priests under the Mosaic Law the disciples of St. Thomas, like the saint himself (Sumpl., Q. lxxvii, a. 3), waivered, some holding that a dispensation was granted, others teaching that divorce was merely tolerated in order to avoid greater evils.

I. The Thomistic School.—The chief doctrines distinctive of this school, composed principally of Dominican writers, are the following:

A. In Philosophy.—(1) The unity of substantial form in composite beings, applied to man, requires that the soul be the substantial form of the man, so as to exclude even the "forma corporis". This is admitted by Hertz, O. 61, 62, 63; Zelcken, P. 1, 1. 3, 3; Denzinger-Bannwart, in note to n. 1655). (2) It is created beings there is a real distinction between the
essentia (essence) and the existentia (existence); between the essentia and the substantia; between the real relation and its foundation; between the soul and its faculties; between the several faculties. There can be no medium between a distinctio realis and a distinctio rationis, or conceptual distinction; hence the disputabile. The Word, as the unipersonally united entity in a perfect state, are interconnected. (3) According to Billuart (De pecc. div. vii. a. 6), it has been a matter of controversy between Thomists whether the malice of a mortal sin is absolutely infinite. (4) In choosing a medium between Rigorism and laxism, the Thomistic school has been Antiprobabilistic and generally has adopted Probabilism. Some defended Ecclesiastical, or Probabilism cum consensu. Medina and St. Antonius are named by the Probabilists. (5) Thomistic theologians generally, whilst they defended the infallibility of the Roman Pontiff, denied that they had the power to dissolve a matrimonium ratum or to dispense from a solemn vow made to God. When it was urged that some popes had granted such favours, they cited other pontiffs who declared that they could not grant them (cf. Billuart, "De matrimon."
Diss. v. a. 2), and said, with Dominic Soto, "Pactum pontificium non facit articulum fidei!" (The action of a pope does not constitute an article of faith, in 4 dist., 27, Q. i. a. 4). Thomists of to-day are of a different mind, owing to the practice of the Church. (6) The hypostatic union, without any additional grace, rendered Christ immortal. If, as some have maintained, the Word was united to the blood of Christ and remained united to it, even during the interval between his death and resurrection (Denzinger-Bannwart, n. 713). During that same interval the body of Christ had a transitory form, called forma cadaverica (Zigliara, P. 16, 17, IV). (7) The sacraments of the New Law cause grace not only as instrumental moral causes, but by a mode of operation which shall be called instrumental and physical. In the attrition required in the Sacrament of Penance there should be at least a beginning of the love of God; sorrow for sin springing solely from the fear of God can suffice, but not charity. The doctrine of the Thomistic School, especially before the Council of Trent, opposed the doctrine of Mary's Immaculate Conception, claiming that in this they were following St. Thomas. This, however, has not been the opinion of the entire school or of the Dominican Order as a body. Father Rouard de Card, in his book "L'ordre des frères prêcheurs et l'Immaculée Conception" (Brussels, 1864), called attention to the fact that ten thousand professors of the order defended Mary's great privilege. At the Council of Trent twenty-five Dominican bishops signed a petition for the imputation of the merits of God, and, when the bishops of the school, in taking degrees at the University of Paris, solemnly pledged themselves to defend the Immaculate Conception (see biblog. to Thomas Aquinas, Saint; also Kennedy, "The Imm. Con." in "Cath. Univ. Bulletin", March, 1910). (8) The Thomistic School is distinguished from other schools of theology chiefly by its doctrines on the difficult questions relating to God's action on the free will of man, God's foreknowledge, grace, and predestination. In the articles on these subjects will be found an exposition of the different theories advanced by the different schools in their effort to explain these mysteries, for such they are in reality. And, whereas the theses of Aquinas and other leading points should be borne in mind: (a) No theory has as yet been proposed which avoids all difficulties and solves all double; (b) on the main and most difficult of these questions some who are at times listed as Molinists—notably Bellarmine, Suarez, Francis de Lugo, and, in our own days, Cardinal Bilotti ("De deo uno et trino", Rome, 1902, Th. XXXII)—agree with the Thomists in defending predestination ante praescriptionem. Bossuet, after a long study of the question, says of physical predestination, "I confess the opinion ("De libre arbitrio"), c. viii). (c) Thomists do not claim to be able to explain, except by a general reference to God's omnipotence, how man remains free under the action of God, which they consider necessary in order to preserve and explain the freewill of man. The doctrine of God's foreknowledge and necessity is a source of uncertainty of His foreknowledge. No man can explain, except by a reference to God's infinite power, how the world was created out of nothing, yet we do not on this account deny creation, for we know that it must be admitted. In like manner the main question put to Thomists in this controversy should be not "How will you explain man's liberty?" but "What are your reasons for claiming so much for God's action?" If the reasons assigned are insufficient, then one great difficulty is removed, but there remains to be solved the problem of God's foreknowledge of man's free acts. If the reasons are sufficient, we must consider with their necessary consequences and humbly confess our inability fully to explain how wisdom "reacheth . . . from end to end mightily, and ordereth all things sweetly" (Wis., viii, 1). (d) Most important of all, it must be clearly understood and remembered that the Thomistic system on predestination neither saves nor sends to perdition more souls than any other system held by Catholic theologians. In regard to the number of the elect there is no unanimity on either side; this is not the question in dispute between the Molinists and the Thomists. The discussion and controversy revolve, in the main, about this point: How does it happen that, although God sincerely desires the salvation of all men, some are to be saved, and must thank God for whatever merits they may have amassed, whilst others will be lost, and will know that they themselves, and not God, are to be blamed?—The facts in the case are admitted by all Catholic theologians. The Thomists, appealing to the authority of St. Augustine and St. Thomas, defend a system which follows the admitted facts to their logical conclusions. The elect are saved by the grace of God, which operates efficaciously and irresistibly upon their free wills for their benefit and to their detriment to their liberty; and since God sincerely desires the salvation of all men, He is prepared to grant that same grace to others, if they do not, by a free act, render themselves unworthy of it. The faculty of placing obstacles to Divine grace is the unhappy faculty of sinning; and the existence of moral evil in the world is a problem to be solved by all, not by the Thomists alone. The fundamental difficulties in this mysterious question are the existence of evil and the non-salvation of some, be they few or be they many, under the rule of an omnipotent, all-wise, and all-powerful God. The Controversy who suppose that these difficulties exist only for the Thomists. The truth is known to lie somewhere between Calvinism and Jansenism on the one hand, and Scripture and the other. The efforts made by theologians and the various explanations offered by the authors mentioned, Thomists, Molinists, and Congregates, do not show how difficult of solution are the questions involved. Perhaps we shall never know, in this world, how a just and merciful God provides in some special manner for the elect and yet sincerely loves all men. The celebrated Congregatio de Auxiliis (q. v.) did not forever put an end to the controversies, and the question is not yet settled.

III. Neo-Thomism and the Revival of Scholasticism.—When the world in the first part of the nineteenth century began to enjoy a period of peace and
rest after the disturbances caused by the French Revolution and the Napoleonic Wars, closer attention was given to ecclesiastical studies and Scholasticism was revived. This movement eventually caused a revival of the study of ancient texts and the great manuscript model proposed by Leo XIII in the encyclical “Eterni Patris” (4 Aug., 1879) was St. Thomas Aquinas. (For information concerning this movement, its leaders, and their work, see NEO-SCHOLASTICISM. The principal works pertaining to this period will be listed below in bibliography.) The Thomistic doctrine had received strong support from the older universities. Among these the Encyclical “Eterni Patris” mentions Paris, Salamanca, Alcalá, Douai, Toulouse, Louvain, Padua, Bologna, Naples, and Combra as “the homes of human wisdom where Thomistic reigns, and the minds of all teachers as well as taught, rested in wonderful harmony under the shield and authority of the Angelic Doctor.” In the universities established by the Dominicans at Lima (1551) and Manilia (1645) St. Thomas always held sway. The same is true of the Minervan school at Rome (1457), which ranked as a university from the year 1580, and is now the international Collegio Angelico. Coming down to our own times and the results of the Encyclical, which gave a new impetus to the study of St. Thomas’s works, the most important centres of activity are Rome, Louvain, Fribourg, Oxford, and Cambridge. At Louvain the chair of Thomistic philosophy, established in 1880, became, in 1889-90, the “Institut supérieur de philosophie” or “École St. Thomas d’Aquino,” where Professor Mercier, now Cardinal Archbishop of Mechlin, ably and wisely directed the new Thomistic movement (see De Wulf, “Scholasticism Old and New,” tr., Coffey, New York, 1907, append., p. 261; “Irish Eccl. Record,” Jan. 1906). The theological department of the University of Fribourg, Switzerland, established in 1889, has been entrusted to the Dominicans. By the publication of the “Revue thomiste” the professors of that university have contributed greatly to a new knowledge and appreciation of St. Thomas. The Constitution of the Catholic University of America at Washington enjoins special veneration for St. Thomas; the School of Sacred Sciences must follow his leadership (Cath. Univ. Amer.”, Rome, 1890, pp. 38, 43). The University of Oxford and University of Louvain and Laval University are the centres of Thomism in Canada. The appreciation of St. Thomas in our days, in Europe and in America, is well set forth in Perrier’s excellent “Revival of Scholastic Philosophy in the Nineteenth Century” (New York, 1907).

IV. Emeterius Thomistic.—After the middle of the fourteenth century the vast majority of philosophical and theological writers either wrote commentaries on the works of St. Thomas or based their teachings on his writings. It is impossible, therefore, to give here a complete list of the Thomists: only the more important names will be given; as noted, the authors belonged to the Order of St. Dominic. Those marked (*) were devoted to Thomism in general, but were not of the Thomistic School. A more complete list will be found in the works cited at the end of the article.

Thirteenth Century.—Thomas de Cantimpré (1270); Hugh of St. Cher (1263); Vincent of Bauvise (1264); St. Raymond de Penafort (1275); Peter of Tarentaise (Pope Innocent V—1276); Giles de Lassines (1278); Reginald de Piperno (1279); William de Moerbeke (1263); Raymond Marti (1280); Bureau de la Hulpe (1292); Bernard of Hotun, Bishop of Dublin (1298); Theodoric of Apolda (1299); Thomas Sutton (1300).

Fourteenth Century.—Peter of Auvergne (1301); Nicholas Boccasini, Benedict XI (1304); Godfrey of Fontaines (1304); Walter of Winterburn (1305); Egidius Colonna (Egidius Romanus), O.S.A. (1243—1316); William of Paris (1314); Gerard of Bologna, Carmelite (1317); four biographers, vis. Peter Calo (1310); William de Toeco (1324); Bartolommeo of Liubpoli (1327); Euphrosyne (1327); Dante (1321); Natalis Hervaeus (1323); Petrus de Palude (Falduanusi—1342); Thomas Bradwardin, Archbishop of Canterbury (1349); Robert Holkott (1349); John Tauler (1361); Bl. Henry Suoso (1363); Thomas of Strasburg, O.S.A. (1357); Jacobus Passe-avante (1357); Nicholas Bandelli (1356); Durandus of Aurillac (1382), sometimes called Durandulus, because he wrote against Durandus a S. Portiano, who was first a Thomist, afterwards an independent writer, attacking many of St. Thomas’s doctrines; John Bromyard (1390); Nicholas Eymere (1399).

Fifteenth Century.—Manuel Caecus (1413); St. Vincent Ferrer (1415); Bl. John Dominici (1419); John Gerson*, chancellor of the University of Paris (1429); Luis of Valladolid (1436); Raymond Sabunde (1437); John Nieder (1437); Capreolus (1444), called the “Prince of Thomists”; John de Montesegro (1445); Fra Angelo (1446); Antonius (1495); Nicholas of Cusa*, of the Brothers of the Common Life (1464); John of Torquemada (de Turrecrematai, 1468); Bessarion, Basilián (1472); Alans de Rupe (1475); John Faber (1477); Petrus Nicer (1471); Peter of Bergamo (1482); Jerome Savonarola (1488); Seventeenth Century.—Einar Helvoni, and Peter Bandelli (1506); John Tetzel (1519); Diego de Daza (1523); Sylvester Mazzolini (1523); Francesco Silvestro di Ferrara (1528); Thomas de Vio Cajetan (1534); commentaries by these two are published in the Leonine edition of the works of St. Thomas. Conrad Koel lin (1555); Chistophorov Javel (1558); Santos Pagnino (1551); Francesco de Vitoria (1546); Franc. Romac (1552); Ambrosio Catherinuster* (Lancelot Politici, 1553); St. Ignatius of Loyola (1556) enjoined devotion to St. Thomas; Matthew Ory (1557); Dominic Soto (1560); Melchior Cano (1560); Ambrose Pellersan (1561); Peter Soto (1563); Sixtos of Siena (1569); John Faber (1570); St. Pius V (1572); Bartholomew Medina (1581); Vincent Justiniani (1582); Maldonatus* (Juan Maldonado, 1583); St. Charles Borromeo* (1584); Salmeron* (1585); Ven. Louis of Granada (1538); Bartholomew of Braga (1539); Toletus* (1566); Peter Caniusius* (1587); Thomas Stapleton*, Doctor of Louvain (1595); Fonseca (1596); Molina* (1600).

Seventeenth Century.—Valentia* (1603); Domingo Bañez (1604); Vásquez* (1604); Bart. Ledesma (1604); Sánchez * (1610); Baronius* (1607); Capponi Lerreta (1614); Asenio y Menéndez (1616); Mitre y Menéndez (1617); Du Perier*; converted Calvinist, cardinal (1611); Bellarmine* (1621); St. Francis de Sales* (1622); Hieronymus Medicus (1622); Lessius* (1623); Becanus* (1624); Malvenza (1628); Thomas de Lemos (1629); Alvarés; Laymann* (1635); Joan Wiggers, doctor of Louvain (1639); Grocyn (1643); John of St. Thomas (1644); Stilling (1647); Ripalda*, S. J. (1648); Sylvius (Du Bois), doctor of Douai (1649); Petavius* (1652); Goar (1625); Steph. Menocchio *, S. J. (1655); Franc. Pignatelli* (1656); De Lugo (1660); Bollandus* (1665); Janmy (1665); Valignano (1665); Labbe* (1667); Pallavicini* (1667); Bussemann* (1668); Nicolai* (1673); Contensoni (1674); Fab. Pignatelli* (1675); Passeri* (1677); Genet (1681); Bancel (1685); Thomassin* (1685); Goudin (1689); Sfondati* (1696); Quéfille (1698); Rocaberti (1699); Casanate (1700). To this period belong the Carmelite Thomas Maffiante, authors of the “Cursus theologici” (1631-72).

Eighteenth Century.—Guerrino (1703); Bosuet, Bp. of Mâcaux; Norisina, O.S.A. (1704); Diana (1705); Thyrus González* (1708); Massoulié (1708); Duhamel* (1708); Wigandt (1708); Piny (1708); Lacroix*
THOMPSON 703

(1714); Carrières * (1717); Natalis Alexander (1724); Echard (1724); Tournée * (1729); Gravius de Meyer * (1730); Benedict XIII * (1730); Graveseon (1733); Th. du Jardin (1733); Hogenberg (1733); Giotto (1740); Grotti (1742); Drouin * (1742); Antoine * (1743); Lallemant * (1748); Milant * (1749); Freinge * (1752); Concina (1759); Billuart (1757); Benedict XIV * (1758); Culliati (1759); Orsi (1761); Charlevoix * (1761); Reuter (1762); Baumgarten * (1763); Fontaine * (1765); F. de St. -Germain (1775); Touron (1775); Thomas de Burgo (1776); Gner * (1781); Roselli (1783); St. Alphonsus Liguori (1787); Mamachi (1792); Richard (1794).

Nineteenth Century.—In this century there are few names to be recorded outside of those who were connected with the Thomistic revival either as the forerunners, the promoters, or the writers of the Neo-Scholastic period.

See also Free Will; Grace; Philosophy; Predestination; Neo-Scholasticism; Scottish and Scottish; Theology.

For the general history of Thomism see works referred to in the first part of this article.

For Thomists, a complete list of theological writers of all schools that were influenced by the works of St. Thomas, see H. Quête-Échard, Script. ord. prof. (2 vols., Paris, 1719–21).

Many writers of the Dominicans are mentioned in the Preachers, as are those of the Dominicans who have written in English, French, and Spanish, in the English, French, and Spanish section of this article.

For Thomist Philosophers, see W. J. D. H. and the Phil. (Berlin, 1887).

Tyrwhitt, Hist. of the Phil. (Boston, 1880).

Publications on Thomism in general and on the doctrines of the Thomistic school have been multiplied so rapidly since 1879 that volumes would be required for a complete list. The principal works reviving disputes concerning special doctrines of the Thomistic school are: Schueller, Controversiae de divinum gratia liberique arbitrio concordantia unius et progressus (Freiburg, 1881); Dummer, Thomas et doctrina præmunsionis physis (1886); Frere, Thomas Aquinas doctrina de cooperaationis (1887, with omitted parts).

Thomas Aquinas, a complete list of works devoted to Thomas. For comparison of St. Thomas and Scotus, see Vacant, Études comparées sur la philosophie de S. Thomas d’Aquino avec celles de Duns Scot (Paris and Lyons, 1887); J. M. Kennedy, D. J. KENNEDY.

Thompson, the name of two English converts: (1) Edward Healy and (2) Harriet Diana.

Edward Healy, b. at Oakham, Rutlandshire, England; d. at Cheltenham, Gloucestershire, on 21 May, 1891. He was educated at Oakham school and Emmanuel College, Cambridge; and having taken his graduation degree in 1846, he needed a Catholic life. After some years of the Anglican ministry at Marylebone, Ramsgate, and elsewhere, he became a Catholic in 1846 and published as his defence: "Remarks on certain Anglican Theories of Unity" (1846); "The Unity of the Episcopate considered" (1847); and "A few earnest thoughts on Communion with the Catholic Church." (1847). In 1851 jointly with James Spencer Northcote (q. v.) he undertook the editorship of the valuable series of controversial pamphlets known as "The Clifton Tracts." The rest of his life, the latter years of which were spent at Cheltenham, he devoted to religious literature. His chief works were: lives of M. Oter (1861), Marie Harpim (1869), St. Stanislaus Kostka (1869), Baron de Rents (1873), and Henri-Marie Boudou (1880); and "Minister of Angels," "The Life and Glories of St. Joseph." (1888) and "Before and After Gunpowder Plot." (1890). Most of this useful work consisted in the skillful adaptations of foreign books which he thought were of value to English-speaking Catholics.

Harriet Diana, wife of Edward Healy Thompson and daughter of N. H. C. of Humed, b. at Hunsden, Hertfordshire, 1811; d. at Cheltenham, Gloucestershire, 21 Aug., 1896. On her husband's conversion she also joined the Catholic Church, and like him devoted herself to literary work. Her chief work is the "Life of Charles Borromeo," but her stories of Catholic life were considerable popularity. These include: "Mary, Star of the Sea," (1848); "The Witch of Malton Hill," "Mount St. Lawrence," (1850); "Winefred Jones," (1854); "Margaret Danvers," (1857); "The Wyndham Family," (1876); and others, as well as articles in "The Dublin Review." See also the Bibliography at the end of this article. Healy's works were published in the London, 1910; Gondang, Menuis de conversion des diocèses anglais.

EDWIN BURTON.

THOMPSON, Francis, poet, b. at Preston, Lancashire, 18 Dec., 1859; d. in London, 13 Nov., 1907. He came from the middle class and the classes great in imaginative poetry. His father was a prosperous draper; two paternal uncles dabbled in literature; he himself referred his hereditary chiefly to his father, who died in his boyhood. His parents being Catholics, he was educated at Ushaw, the college that had in former Lindal, William and Edward as pupils. There he was noticeable for love of literature and a select of games, though as spectator he always cared for cricket, and in later years remembered the players of his day with something like personal love. After seven years he went to Owens College to study medicine. He hated this proposed profession more than he would confess to his father; he evaded rather than rebelled, and finally disappeared. No blame, or attribution of hardships or neglect should attach to his father's memory; every careful father knows his own anxieties. Francis Thompson went to London, and there endured three years of destitution that left him in the state of incipient disease. He was employed as bookselling agent, and at a shoemaker's, but very briefly, and became a wanderer in London streets, earning a few pence by selling matches and calling cabs, often famished, often cold, receiving occasional alms; on one great day finding a sovereign on the footway, he was requested to come no more to a public library because he was too ragged. He was nevertheless able to compose a little—"Dream-Tryst" written in memory of a child, and "Paganism Old and New," with a few other pieces of verse and prose. Having seen some numbers of a new Catholic magazine, "Merry England," he went to see the editor, Mr. Wilfrid Meynell, in 1888, giving his address at a post-office. The manuscripts were pigeon-holed for a short time, but when Mr. Meynell read them he lost no time in writing to the sender a welcoming letter which was returned from the post-office. The only way then to reach him was to publish the essay and the poem, so that the author might see them and disclose himself. He did see them, and wrote to the editor giving his address at a chemist's shop. Thither Mr. Meynell went, and was told that the poet owed a certain sum for opium, and was to be found by selling matches and calling cabs. The only communication between the druggist and his client, Mr. Meynell wrote a pressing invitation to Thompson to call upon him. That day was the last of the poet's destitution. He was never again friendless or without food, clothing, shelter, or fire. The first step was to restore him to
better health and to overcome the opium habit. A doctor's care, and some months at Storrington, Sussex, where he lived as a boarder at the Premonstratensian monastery, gave him a new hold upon life. It was there, entirely free temporarily from opium, that he began in earnest to write poetry. "Daisy" and the magnificent "Ode to the Setting Sun" were the first fruits. Mr. Meynell, finding him in better health but suffering from the loneliness of his life, brought him to London and established him near himself. Thenceforward with some changes to country air, he was either an inmate or a constant visitor until his death thirty years later.

In the years from 1889 to 1896 Thompson wrote the poems contained in the three volumes, "Poems," "Sister Songs," and "New Poems." In "Sister Songs" he celebrated his affection for the two elder of the little daughters of his host and more than brother; "Love in Dian's Lap" was written in honour of Mrs. Meynell, and expressed the great attachment of his life; and in the same book "The Making of Viola" was composed for a younger child. At Mr. Meynell's house Thompson met Mr. Garvin and Coventry Patmore, who soon became his friends, and whose poetical influence was thenceforth prominent in all his writings, and Mrs. Meynell introduced him at Box Hill to George Meredith. Besides these friendships were few. In the last weeks of his life he received great kindness from Mr. Wilfrid Blunt, in Sussex. During all these years Mr. Meynell encouraged him to practise journalism and to write essays, chiefly as a remedy for occasional melancholy. The essay on Shelley, published twenty years later and immediately famous, was amongst the earliest of these writings; "The Life of St. Ignatius" and "Health and Holiness" were produced subsequently.

Did Francis Thompson, unanimously hailed on the morrow of his death as a great poet, receive no full recognition during life? It was not altogether absent. Patmore, Traill, Mr. Garvin, and Mr. William Archer wrote, in the leading reviews, profoundly admiring studies of his poems. Public attention was not yet aroused. But that his greatness received no stinted praise, then and since, may be seen in a few citations following. Mr. Meynell, who perceived the quality of his genius when no other was aware of it, has written of him as "a poet of high thinking, of 'celestial vision', and of imaginings that found literary images of answering splendour"; Mr. Chesterton acclaimed him "the greatest poet"; Mr. Frail as "one of the first order"; Mr. William Archer wrote, "It is no minor Caroline simper that he recalls, but the Jacobean Shakespeare"; Mr. Garvin, "the Hound of Heaven seems to us the most wonderful lyric in our language"; Burne-Jones, "Since Gabriel's ['Rossetti's'] 'Blessed Damozel' no mystical words have so touched me"; George Meredith, "A true poet, one of a small band"; Coventry Patmore, "the 'Hound of Heaven' is one of the very few great odes of which the language can boast". Of the essay on Shelley (Dublin Review) a journalist wrote truly, "London is ringing Frau Frank Thompson's". After receiving all the sacraments, in the excellent care of the Sisters of St. John and St. Elizabeth, aged forty-eight.

CARROLL B. CHILTON.

THOMPSON, RIGHT HONOURABLE SIR JOHN SPARROW DAVID, jurist and first Catholic Premier of Canada, b. at Halifax, Nova Scotia, 10 Nov., 1844; d. at Windsor Castle, England, 12 Dec., 1894. He was the son of John Sparrow Thompson, queen's printer in Nova Scotia, superintendent of the money order system, and native of Waterford, and of Catherine Pottinger, who was of Scottish descent. The parents on both sides were rigid Protestants. Young Thompson made a short course in the common schools and in the Free Church Academy in his native city. At the age of fifteen he began the study of law and at the same time of stenography. He was admitted to the bar in 1865 and for a short period he assisted in reporting the debates in the Nova Scotia Legislature. In 1870 he married Annie Anderton, afterwards became a Catholic. His progress in public life was rapid and brilliant. Beginning as an alderman in Halifax in 1871, he became a member of the House of Assembly in 1877, attorney-general in 1878, Premier of Nova Scotia in 1882, and a judge of the Supreme Court in the same year. He was also Minister of Justice of Canada, and from the time of his first great speech on the Riel question in 1886, his position as one of the greatest of Canadian parliamentarians was never disputed. In the federal arena his successes were brilliant and unbroken. In 1887 he went to Washington as legal adviser of the British Government in connexion with the Fisheries Commission, and for this service was knighted by Queen Victoria. In 1892 he became Premier of Canada, and a year later he sat as one of the British arbitrators on the Behring Sea Commission at Paris. In recognition of this service he was appointed a member of the Privy Council of Great Britain. He died at Windsor Castle whether he was summoned by the queen, and his remains were conveyed to Halifax on H.M.S. Blenheim. A state funeral attended by state and church dignitaries from all parts of Canada, took place on 1 Jan., 1895. His remains were buried in Holy Cross cemetery. "All things considered," says Mr. J. S. Willison, a distinguished Canadian writer, "his is the most remarkable career which Canadian politics have developed."

HOPKINS, The Life and Work of the Right Hon. Sir John Thompson of Toronto, 1845; House and Grounds (London, 1894); MORRIS, An Elegy (London, 1894); O'BRIEN, Funeral Sermon on Sir John Thompson (Halifax, 1896); BOURINOT, Builders of Nova Scotia (Toronto, 1900).

JOSEPH A. CHISHOLM.

THOMPSON RIVER INDIANS (THOMPSON INDIANS), an important tribe of British Columbia of Salishan linguistic stock, also known as Knife Indians, occupying the country at the junction of Thompson and Fraser Rivers, Yale district, from about Yale up nearly to Lillooet on the Fraser, and as far as Ashcroft on the Thompson. They surrounded the cognate Lillooet, and Shuswap on the north; the Sechelt, Squamish, Cowichan, and Songish on the west and south west; and the Okanagan and Shuswap on the east. They are now gathered upon a number of small reservations under jurisdiction of the Kamloops-Okanagan agency, of which the principal are Lytton (470), Lower Nicola (355), Cooks Ferry (183), Boothroyd (158), Spuzzum (357), Coldwater (107). Their original population may have been near to 4000 souls, but is now reduced (1910) by smallpox and other causes, consequent upon the advent of the whites, to 1782. The proper name of the tribe is Ntlakapamuk or Nhlakapmuh, and they recognize five subtribes among themselves. In their primitive condition they subsisted chiefly by hunting and fishing, together with the gathering of wild roots and berries. In arts, organization, religious belief and ceremonial, and general custom they resembled in all essentials their neighbouring kindred, particularly the Lillooet, Shuswap, Sechelt, and Squamish (q. v.), with whose lands they also their own is closely intermingled. Simon Fraser in descending the river which bears his name passed through their territory, and shortly afterward the Hudson's Bay Company established posts throughout the region. In 1845 the Jesuit missionary Father John Nobili visited the Thompson River, Okanagan, Shuswap, and other tribes of the Fraser River country, preaching and baptizing in temporary chapels built by the Indians.
About 1860 the noted missionary Oblate father (afterwards bishop), Paul Durieu, spent a short time with the tribe. In 1861 Rev. John B. Good, acting for the Episcopalians, established a regular mission work among them, continuing for nearly twenty years with the result that most of the tribe are now of that denomination. In 1862 in common with the other Fraser River tribes, they were terribly wasted by small pox. In 1860 the冷水流域Oblate missionary and philologist Father John M. R. Le Jeune, best known for his invention of a Salishan system of shorthand, began work among the Thompson River Indians extended after some years to the Okanagan and Shuswap. The entire tribe is now Christian, about 1500 being Episcopalian, the rest Catholic, including most of the Coldwater band. Valuable linguistic studies of the Thompson River tribe have been made by Teit and Hill-Tout. Important linguistic contributions are a grammatical sketch and vocabulary and several religious publications by Rev. Mr. Good of the Episcopalian (Anglican) mission, and a number of prayer, hymn, catechism, and primer compositions by Father Le Jeune, all in the Salishan shorthand characters of his own invention. The official report for the Coldwater band (Catholic) will answer for all: “They have a good class of buildings and are steadily improving them. They are industrious, steady and energetic by nature. They have made good progress in farming. They class among our most temperate and moral Indians.”

JAMES MOONEY.

THOMSON, WILLIAM, VENERABLE. See SERGEANT, RICHARD, VENERABLE.

Thonissee, J. J., professor of law at the University of Louvain, minister in the Belgian Government, b. at Hasselt, Limbourg, 21 Jan., 1817; d. at Louvain, 17 Aug., 1891. After a brilliant career as first assistant of the ministry and the administration of the province, but even then was occupied with judicial works on penal law. When dismissed by the Liberal (anti-clerical) ministry, the University of Louvain appointed him in 1848 to the chair of criminal law. In 1863 he was member of Parliament. It is difficult to summarise briefly Thonissee’s activity. Although he achieved his fame in his chosen field of penal law, his writings covered the most varied points of history and social science, as was evidenced by the fact that in 1886 the national jury of social sciences awarded him the prize. In penal matters he began with commentaries on the penal code and devoted himself especially to the reform of the penal procedure which he advocated while he was minister, and for the history of which he wrote important works. He had conceived the vast plan of a history of criminal law, but realised only a part of it. The first part, which met with considerable success, dealt with Brahminical India, Egypt, and Judea, and contained a “Penal Code of the Pentateuch.” He published a work on the penal law of the Athenian Republic. Considering the Roman period as sufficiently well-known, he took up the Frankish period, which was unknown. These works are his chief title to fame from the scientific standpoint as are his reports on penal procedure from the practical standpoint. He aroused lively controversy by advocating the suppression of the death penalty, which his influence brought about in Belgium. While not rejecting it as absolutely unlawful, Thonissee considered it useless in the social condition of the time. In fact, although the death sentence is still legal, capital punishment is no longer inflicted in Belgium.

Detailed lists of Thonissee’s numerous publications are given in the Bibliography of the Académie Royale and in that of the Catholic University of Louvain, to which the reader is referred. He showed a marked preference for national political history, by his principal work, the subject being the “History of the Reign of Leopold II.” He also published biographies of prominent Belgians such as Félix de Mérode. He had been impressed by the events of 1848 which determined his career and he devoted himself to a laborious study of innovating systems, especially of those men who are sometimes called the romanticists of Socialism, St. Simon, Fourier, Cabet, Owen, Louis Blanc, and others, being led eventually to write a history of Socialism from ancient times to 1852. These works and many others secured his admission to the Royal Academy of Belgium and to the Institute of France; he was commissioned by the former institution to write the volume devoted to its centenary (1872).

Thonissee’s political life began in 1863 and was never interrupted by his constituents. In the Chamber his value as a jurisconsult was much appreciated and he drafted many of the parliamentary reports. He occupied a unique position owing to his characteristic independence which made him disagree with the Right on certain points, for instance, on military matters. He was deeply attached to the Belgian Constitution of 1831, which contained articles proclaiming liberty of worship, of the press, etc. Although profoundly religious he was imbued like many men of his generation with the errors of Liberalism, and he wrongly regarded these liberties as of natural right and defended this opinion in his commentary on the Constitution (1844). After the papal decisions on these matters, he corrected his ideas, but always had a leaning towards solutions favouring the Papacy. Although tempered by great generosity, Thonissee’s independence of character was such that even the Right feared him and did not desire his participation in affairs. Thus when the king during a period of stress entrusted him with the formation of a ministry (1872), he was not supported by his party, which dreaded concessions to the Left or to the Crown. When he finally entered the ministry (1884), age had rendered him unfit for laborious work, though he was able to enforce the new school law which the victorious Right had substituted for the lay regime of 1879; this task consumed the last of his strength and left him unable to resume his scientific pursuits in his retirement (1887); his faculties soon became clouded. Thonissee was an intrepid worker, a firm Christian, an upright and simple man, with just a touch of artless vanity, though sometimes brusque in manner and given to occasional outbursts. He was one of the most important members of the faculty of law at Louvain and he will be chiefly remembered in the sphere of penal law, where his name is destined to survive.

Numerous articles have been devoted to Thonissee and to his work. The list of the latter can be found in the bibliography mentioned above. See also Lamy in Annuaire de l’Académie royale de Belgique (1892); Nysse in Annuaire de l’université catholique de Louvain (1892).

VICTOR BRANTS.
Thorney

Thorney Abbey (i.e. "the isle of thorns", anciently called Ancarig), in Cambridgeshire, England, was for some three centuries the seat of Saxon hermits, or of anchorites living in community, before it was refounded in 972 for Benedictine monks by Ethe- wold, Bishop of Winchester. The church was founded by a grant of land from Edmund, Bishop of Wessex, on the aid of King Edgar. The founder brought thither the body of St. Botulph and of other Saxon saints, including, possibly, St. Benet Bishop; and the church, originally dedicated to Jesus Christ and His Blessed Mother, became known therefor as St. Mary and St. Botulph's. The structure built by Robert of Mortimo stood for a century, and was replaced after the Norman Conquest by a new church 290 feet long, which was finished in 1108. The long series of charters granted to Thorney in the twelfth and thirteenth centuries attests the prosperity of the abbey and the number of its benefactors. In Domescall Book its value is reckoned as equal to that of Peterborough; and William of Malmesbury describes it, in the reign of Henry II, as "an image of Paradise", and flourishing in all respects. Of the thirty-eight abbots whose names are recorded, the first was Godeman, and the last Robert Blyth, who was also Bishop of Dover and Connor, in 1239. Blyth and his community of nineteen monks surrendered the abbey to Henry VIII in 1539, receiving a pension in exchange. The buildings and most of the property were granted by Edward VI to John Earl of Bedford, whose family still owns them. The original nave of five bays, with its perpendicular clerestory, remains, and is used as the parish church. The choir has disappeared, and the nave aisles were demolished in 1636, the material being used to fill up the nave arches. The west front, flanked by square turrets with octagonal terminations 100 feet high, and displaying a elaborate screen, with niches containing nine statues over the west window, is extremely picturesque.

D. O. HUNTER-BLAIR.

Thorns, Feast of the Crown of.—The first feast in honour of the Crown of Thorns (Festus sanctae coronae) was instituted at Paris in 1259, when St. Louis brought thither the relic of the Crown of Thorns, which was deposited later in the Royal Chapel, erected in 1241-8 to guard this and other relics of the Passion. The feast, observed on 11 August, though at first special to the Royal Chapel, was gradually observed throughout the north of France. In the following century another festival of the Holy Crown on 4 May was instituted and was celebrated along with the feast of the Invention of the Cross in parts of Spain, Germany, and Scandinavia. It is still kept in not a few Spanish dioceses and is observed by the Dominicans on 24 April. A special feast on the Monday after Passion Sunday was granted to the Diocese of Freising in Bavaria by Clement X (1668) and Innocent XI (1689) in honour of the Crown of Christ. It was celebrated at Venice in 1766 on the second Friday of March. In 1831 it was adopted at Rome as a double major and is observed on the Friday following Ash Wednesday. As it is not kept throughout the universal Church, the Mass and Office are placed in the appendices to the Breviary and the Missal. The hymns of the Office, which is taken from the seventeenth-century Gallican Breviary of Paris, were composed by Habert. The "Breviary" of Drevet and Blume contains a number of lyrical offices, hymns, and sequences for this feast.

Thorp, Robert, Venerable, priest and martyr, b. in Yorkshire; suffered at York, 15 May, 1591. He reached the English College at Reims 1 March, 1583-4, was ordained deacon in December following, and priest by Cardinal Guise in April, 1585. He was also Bishop of Dover, 1585, and consecrated at York in 1586. He was arrested in bed very early on Palm Sunday, 1595, at the house of his fellow-martyr, Thomas Watkinson, at Menthorpe in the East Riding of Yorkshire, someone having seen palms being gathered the night before, and having informed John Gate of Howden, the nearest justice of peace. Watkinson, an old Catholic yeoman who lived a solitary life, is described by the treacherous priest John Cecil as a clerk, so it is possible he was in minor orders. Both, though naturally timorous, met their deaths with great fortitude. Thorpe, condemned as a traitor merely for being a priest, was hanged, drawn, and quartered. Watkinson, condemned as a felon merely for harbouring priests, was only hanged. He was offered his life if he would go to church.

J. B. WAINWRIGHT.

Thou, Jacques-Auguste de, French historian, b. at Paris, 8 October, 1553; d. there, 7 May, 1617. The son of Christophe de Thou, first president of the Parliament of Paris, he studied at several French universities, especially at Valence, where he knew Scaliger. Both when he accompanied the ambassador Paul de Foix to Italy (1572-76) and when he went to live in Guineau (1581), it was always his aim to make the acquaintance of the most celebrated men of intellect, such as Muretus, P. Manutius, the Pithous, and Montaigne. During his sojourn in Guineau he knew Henry of Navarre, the future Henry IV. As Master of Petitions of the Parliament of Paris in 1585 and in 1588 as counselor of State, he was the opponent of the League. After the assassination of the Duke of Guise he did much to further the reconciliation between Henry III and Henry of Navarre (April, 1589) and set out for Germany with Gaspard de Schomberg for the help of Protestant princes against the League. After the death of Henry III he entered the service of Henry of Navarre, with whom he lived for five years in camp. He had an important share in the conferences of Suréms, which prepared the entry of Henry IV into Paris (21 May, 1594) and especially in compiling the Edict of Nantes (1598) which established the religious liberty and political influence of the Protestants. During the regency of Marie de' Medici he took part in the negotiations of the Treaty of Sainte-Menehould (1614) and Loudun (1616) between the Court and the rebellious Condé. His influence in the royal councils was exercised in behalf of Gallican ideas and he was victorious in his opposition to the reception in France of the Tridentine decrees.

An eminent Latinist, De Thou published several collections of Latin poems, but his fame is chiefly due
to his "Historie" written in Latin. His father, Christophe de Thou (1508-82), having left numerous materials for a national history, De Thou set to work writing it in 1591. His correspondence with foreign scholars procured for him valuable documents. In 1604 he published the first part, 1546-60; in 1606, the second, to 1572; in 1607, the third, 1572-74; and in 1610, the fourth, 1574-84. He intended carrying it down to the end of the reign of Henry IV (1610), but his narrative had reached only the year 1607, when he died. The last and unfinished portion of his work was published in 1620 by his friends Dupuy and Rigault. The best edition of the English translation is that of the eighteenth century by the Englishman Thomas Carte, published at London in seven volumes by Samuel Buchley (1733); there are French translations and summaries. At first the influence of Cardinal d'Ossat and of Du Ferron put off the condemnation of his work at Rome, but in 1609 to De Thou's great sorrow the Congregation of the Index pronounced against it. The Parlement of Paris replied by condemning Cardinal Bellarmine's book on the power of the pope. In his work De Thou commits errors of fact and of appreciation. In his judgment of Mary Stuart, for example, he is too often influenced by Bucchini, an impassioned enemy of the queen's memory. But such as it is his work has a certain value; Bossuet often made use of it in his "Histoire des variations", and he speaks of De Thou as "a great author, a faithful historian".

In 1620 were published his "Memoirs" in Latin: they cover the period between 1553 and 1601 and are an important source for the religious and literary history of the period. Some writers have claimed that his friend, Nicolas Rigault, was their chief author. The eldest son of Jacques-Auguste de Thou, Francois-Auguste (1542-10), whom we shall treat of presently, was chief of the command of Richelieu for keeping secret the conspiracy between Cinq-Mars and the Spaniards. The library collected by Jacques-Auguste was famous; it was open to scholars and foreigners. In his will De Thou appointed Pierre Dupuy his children's librarian. The library remained in the family until 1850 when it was sold to the Count of Prosper de Mérsi, and in the eighteenth century passed to the Rohan Soubise family. It then contained 12,729 works. Successive catalogues published during the seventeenth century are very important bibliographical documents.

GEORGES GOYAU.

THOU, NICOLAS DE, Bishop of Chartres, uncle of the historian Jacques-Auguste de Thou, b. at Paris, 1528; d. at Villebon, 5 Nov., 1598. He became a canon of the cathedral of Paris in 1547, and Bishop of Chartres by a Bull of 8 April, 1573. His aptitude for the League, shared by his brother, President Christophe de Thou (1508-82), made the position difficult when the people of Chartres, who were devoted to the League, shut their gates (17 Jan., 1589) to the troops of Henry III, subsequently welcomed the Duke of Mayenne, and recognized the aged Cardinal de Bourbon as king. Nicolas de Thou temporized, and on 20 April, 1591, received in his palace Henry of Navarre. The Origenists see X, 1, 15, at the beginning of the chapter on the 6th Century (pp. 374-5). The Decree of 27 Feb., 1594, and the next day Nicolas de Thou bestowed on the king the Collar of the Order of the Holy Ghost. He left various pastoral writings and a book entitled "Ceremonies observees au sacre et couronnement d'Henri IV, roi de France".

GEORGES GOYAU.
peror engaged upon a treatise which was to convert a sect of Monophysites known as the Acopli, suggested a more expeditious plan. If the writings of Theodore and the epistle of Ibas were anathematized, the Council of Chalcedon being thus revised and expurgated (Synodus...retractata et expurgata) would no longer be a stumbling block to the Mono-
pophysite missions, carried by (Def., I 2; IV, 4), made by Domitian, Bishop of An-
cyra, to Vigilii, tell the same story of an Origenist intrigue.

The leading Eastern bishops were coerced, after a short resistance, into subscribing. Mnemmas, Patriarch of Alexandria, was the first to protest against the condemnation of the Council of Chalcedon, and then yielded on the distinct understanding, as he told Stephen the Roman apocrisarius at Constantinople, that his sub-
scription should be returned to him if the Apostolic See disapproved of it. Stephen and Dacius, Bishop of Milan, who was then at Constantinople, broke off communication with him. Mnemmas had next to coerce his suffragans. They also yielded, but lodged protests with Stephen to be transmitted to the pope, in which they declared that they acted under compulsion. Euphrasius, Patriarch of Alexandria, resisted, then yielded and sent a message to Ibas, who, in the Sicilian Synod, had condemned him under compulsion. Zosimus, Patriarch of Antioch, and Peter, Bishop of Jerusalem, made a like resistance and then yielded (Facundus, "Def.", IV, 4). Of the other bishops, those who subscribed were rewarded, those who re-

fused were deposed or had to "conceal themselves" (Liberius. "Brev.", 24; Facundus, "Def.", II, 3 and "Cont. Moc.", in Gallandi, XI, 813). While the resistance of the Greek-speaking bishops collapsed, the Latin, even those like Dacius of Milan and Facundus, who were then at Constantinople, stood firm. Their general attitude is represented in two letters written to Ibas by Facundus at one of the inter-
ferences held by Vigilii before he issued his "Judici-
catum". He wished it to protect the memory of Theodore of Mopsuestia because Ibas had spoken of him in terms of commendation (Cont. Moc., loc. cit.). When in January, 547, Vigilii arrived at Constantin-
ople while Italy, Africa, Spain, Sicily, and the countries of Illyricum and Hellas through which he journeyed were up in arms against the condemnation of the Three Chapters, it was clear that the Greek-

speaking bishops as a whole were not prepared to

withstand the emperor.

But with regard to the merits of the controversy, theo-

dlogical errors and, in the case of Theodore, very seri-

ous ones, were to be found in the incriminated writ-
ings (Theodore was practically a Nestorian before Nestorius); the mistakes of Theodoret and Ibas were chiefly, but not wholly due to a misunderstanding of St. Cyril's language. Yet these errors even when ad-
mitted, did not make the condemnation an easy one. There were no good precedents for thus dealing harshly with the memory of men who had died in the peace of the Church. St. Cyrilian,

as Facundus argued ("Cont. Moc.", in Gallandi, X, 816), had erred about the rebaptism of heretics. Yet no one would dream of anathematizing him. The condemnation was not demanded to crush a heresy, but to conciliate heretics who were implacable enemies of the Council of Chalcedon. Both Ibas and Theodoret had been deprived of their bishoprics by heretics, and had been restored by the Holy See and the Council of Chalcedon on anathematizing Nestorius.

Yet the council had their writings before it, and, in the case of the epistle of Ibas, things were said which could easily be construed into an approval of it. If this made the condemnation look like an oblique blow at St. Leo and Chalcedon.

The matter was further complicated by the fact that the Latins, Vigilii among them, were for the most part ignorant of Greek and therefore unable to judge of the correctness of Nestorius's criticiza-
tions in his third epistle to Elia, probably drawn up by St. Gregory the Great, ascribes all the trouble to this ignorance. All they had to go upon was the general attitude of the Fathers of Chalcedon. These facts should be remembered in judging the conduct of Vigilii. He came to Constantinople in a very reso-

lute frame of mind, and his first step was to excommunicate Mnemmas. But he must have felt the ground was being cut from under his feet when he was supplied with translations of some of the worst passages in the writings of Theodore. In 548 he issued his "Judicaturn" in which the Three Chapters were con-
demned, and then temporized with the storm it raised when he showed how ill-prepared the Latins were for it. Next he and Justianus agreed to a general council in which Vigilii pledged himself to bring about the condemnation of the Three Chapters, it being understood that the emperor should take the first steps till the council should meet. The emperor broke his pledge by issuing a fresh edict con-

denming the Chapters. Vigilii had twice to take sanctuary, first in the Basilica of St. Peter, and then in the Church of St. Euphemus at Chalcedon, from which he issued an Encyclical to the whole Church describing the treatment he had received. The council was patched up and Vigilii agreed to a general coun-

cil but soon withdrew his assent. Nevertheless, the council was held, and, after refusing to accept the "Constitutum" of Vigilii (see VIGILII, POPE), it then condemned the Three Chapters. Finally he issued a decree pronouncing the council set free. But he died before reaching Italy, leaving his successor Pelagius the task of dealing with the schisms in the West. The most enduring of these were those of Aquileia and Milan. The latter came to an end when Fronto, the schismatic bishop, died about 551.

**ORIGINAL SOURCES.**—The writings of Facundus in P.L., LXVII, 527-578; Gallandi, XI, 601-821; Fulgentius Fern-

andus, Epist. VI in P.L., LXVII, Gallandi, XI, Liberarius, "Brevarium in P.L., LVIII, MANI, IX (Florence, 1739), 659-

700, Gallandi, XII; Pontianus, Epist. in P.L., LXVI, 995; Harboun, Concilia, III; The Chronicon of Victor Ti
cennesis is contained in P.L., LXVII, 957 sqq.; and Gallandi, XII; this is especially valuable for the history of the suppression of the schisms in Africa. For the schism in Italy the most impor-
tant documents are certain epistles of Pelagius I, Pelagius II, and St. Gregory the Great. For editions see Feliciani, POPE; Liberius II, POPE; Gregorius the Great, Gen. lit. lit. Duchiens, Vigil. et Pelag. in Rev. council. can. hom. (October, 1819), Councils, ed. W. G. Clark, IV (Edinburgh, 1869), 229 sqq., where also a
tabundant references to older literature of the subject will be found; Chapman, The first Five General Councils (London), 49-50; Dudden, Gregory the Great: MANN, Losses of the Popes in the early Middle Ages, I, pt. I (London, 1903); Hodges, Italy and the Councils, IV, V, VI; Gregory, Bull of Rome and the Pope in the Middle Ages, I (London, 1911).

F. J. BACCIUS.

**Three Rivers.** Dioecese of (Tripluvianensis), formed from the Archdiocese of Quebec, to which it is now suffragan, founded on 8 June, 1852. The dioecese at first comprised on the northern shore of the St. Law-

rence, the Counties of Champlain and of St. Maurice —the County of Maskinongé being at that time a part of the County of St. Maurice; on the southern bank, the Counties of Yamaska, Nicolet, Drummond, and
EPISCOPAL THRONE, CHURCH OF SS. NEREO ED ACHILLEO, ROME

twenty-four townships in the County of Sherbrooke. Later on, this territory was divided, especially for the erection of the Diocese of Sherbrooke and of the Vicariate Apostolic of Pontiac. Lastly, in July 1885, all the parishes of the southern shore were erected into the Diocese of Nicolet. It now comprises forty-three parishes and eight missions. The Catholic population is 84,000; non-Catholic 800, of whom 600 are Protestants.

The first bishop, Mgr. Thomas Cooke, died in 1870 and was succeeded by Mgr. Louis-François Lefebvre, administrator of the diocese from 1869 to 1898, year of his death. Mgr. F-X. Cloutier is the present and third Bishop of Three Rivers; born at Ste-Genève de Baiscan, Champlain, Quebec, 2 November, 1848, he was ordained priest, 22 September, 1872, appointed Bishop of Three Rivers, 8 May, 1896, and consecrated on 25 July following by Mgr. L.-N. Bégin, Archbishop of Quebec. The diocese contains 100 secular priests; 1 convent of Franciscan Fathers; 1 house of Oblate Fathers; 10 schools of brothers; commercial colleges, academies, etc., 4 under the direction of the Brothers of the Christian Schools, 3 under the direction of the Brothers of Christian Instruction, 2 under the direction of the Brothers of St. Gabriel, 1 under the direction of the Brothers of the Sacred Heart. There is also a juniorate in charge of the Brothers of Christian Instruction.

The institutes of women are: Ursulines, 7 convents; Sisters of the Congregation of Notre-Dame, 2 convents; Sisters of the Assumption, 4 convents; Sisters of the Good Shepherd, 1 convent; Gray Nuns of the Cross, 1 convent; Daughters of Jesus, 2 convents, 1 kindergarten for boys and 13 schools for girls and boys; the Sisters of Charity of Providence, with 4 orphanages, 2 boarding-schools for girls, 4 asylum, and 1 hospital; Dominican Sisters of the Holy Rosary, 1 orphanage, they also have charge of 2 religious institutions; Sisters Adorers of the Precious Blood, 1 monastery.

Three Witnesses. See John, Epistles of Saint.

Thronhjem. See Thronhjem.

Throne (Lat. thronus, cathedra, sedes episcopalis), the seat the bishop uses when not engaged at the altar. If the altar stands near the entrance to the choir, then, according to the "Ceremoniale episcoporum", the throne is to be placed at the apex of the apse in the centre of the stalls of the canons that join it to the right and left. If, however, the altar is placed close to the wall of the apse, or is only a short distance from this wall, the throne must be placed on the Gospel side of the choir. According to the "Ceremoniale episcoporum" the throne is to be made in modum cathedra et throni immobilitis (in the fashion of an immovable chair or throne) such as is still to be seen in many old churches. Consequently an ordinary chair, used temporarily or only for the moment, does not suffice as the throne of a bishop. Further directions are forma procella et sublimis, that is, the chair must have a high back and arms, and be raised above the floor so that three steps lead up to it. The steps are to be covered by a carpet, the throne itself is to have spread over it a silk cover of the same color as the bishop's vestments, but not of cloth of gold, unless the bishop should be a cardinal. The throne can be surmounted by a baldachino only when there is a baldachino above the altar, or when the altar has a ciborium altar over it. When in another diocese, a bishop can only use the throne by virtue of a letter of dispensation from the diocesan bishop. Should a cardinal be present, the bishop must yield the throne to the cardinal and use a fulditoreum next on the Gospel side of the altar; that is, a four-legged faldstool with arms. Auxiliary bishops must always use a fulditoreum. Abbots have the right to a throne in their own churches, but this throne can only have two steps leading to it, and cannot have a baldachino over it.

Time has made no essential changes in the episcopal cathedra. At different periods, especially in the twelfth and thirteenth centuries, the throne had the form of a fulditoreum, but as a rule it always showed the ancient characteristic type of a seat, secured to the spot where it stood, with arms at a back and some height. The modifications that it underwent in the course of time resulted solely from the changes in the style of the art, and were therefore merely conventional. The episcopal throne in the pre-Carolingian period has been already treated in the article Cathedra. Other examples of the same era are the throne at Naples in the Church of St. Januarius, and the one in the Church of Santa Maria della Santità; at Rome in San Pietro in Vincoli, San Gregorio in Celio, San Giovanni in Laterano, and San Giovanni in Laterano. In San Apollinare Nuovo, besides other thrones that are in part ancient stools, especially stools for the bath. Thrones belonging to the Middle Ages and the twelfth century are to be found at Canossa, Bari, in the grotto church of Monte Gargano, in St. Emmeram at Ratisbon in Santa Maria in Cosmedin and in San Clemente at Rome. Excellent examples of thirteenth-century thrones are those in the Churches of San Cesario, SS. Nereo ed Achilleo, and San Lorenzo fuori le mura, at Rome. There are surprisingly few thrones of the late medieval period still in existence. Episcopal thrones that are or were surmounted by a structure similar to a baldachino are those at Torcello, Grado, and Augsburg. That as early as the eighth or ninth century the throne did not always stand at the apex of the apse, but was also placed to the right of the altar, is evident from the Roman "Ordo" of that era. However, what may have been less usual at that period became from the twelfth century customary, because it became usual to place the altar near the wall of the apse, and also to place a reredos upon the table, at least on feast days.

Thuruburbo Minus, a titular see in Africa Proconsularis, suffragan of Carthage. Thuruburbo Minus is mentioned in the "Itinerar. Antonini", 44, and in the "Tabula

JOSEPH BRAUN.

Episcopal THRONE, WITH MOSAIC DECORATION, CHURCH OF S. CESARIO IN PALATIO, ROME.
Peutinger. It is to-day Tuburbo, a city of 2500 inhabitants, on the left bank of the Medjerda (ancient Bagradas), 21 miles by railway west of Tunis. Situated on a hill, the city proper occupies only a part of the ancient site. It was rebuilt in the fifteenth century by the Andalusian Moors. The Roman amphitheatre was still standing at the end of the seventeenth century, when it was destroyed in order to build a bridge. It was at Thuburbo Minus that the illustrious martyr St. Perpetua and St. Felicitas with their companions were arrested. The two bishops of this city of the time, Victor, present at the Conference of Carthage (411), where he had as his competitor the Donatist Maximinus; and Germanus, who signed (646) the letter of the bishops of the proconsulate to the Patriarch Paul of Constantinople against the Monothelites. Thuburbo Majus, another bishopric of Africa Proconsularis, was a Roman colony; the full name of which was Julius Aurelius Commodus Thuburbo Maius. Its many ruins may be seen at Hesshir Kasbat, on the banks of the Oued Melian about 34 miles south of Tebourba. It is the country of St. Servus (7 December, Roman Martyrology), who suffered for the Faith under Generica and Felix (or Felix). Four of its bishops are known: Sedatus, present at the Council of Carthage, 256; Faustus, at the Council of Arles, 314; Cyprianus, at the Conference of Carthage, 411, with his competitor, the Donatist, Rufinus; Benenatus, exiled by Hunicus, 484. It is impossible to determine the number of these martyrs from the diocese, number especially by the "Martyrologium Hieronymianum" as having suffered at Thuburbo.

S. Prêtres.

Thugga, titular see of Numidia, perhaps the Numidian fortress of Tocaí mentioned about 305 b.c. by Diodorus Siculus (XX, v, 4). King Masinissa probably captured Thugga from Carthage in the second century b.c. A pagus under Claudius I, Thugga was dependent on the Roman colony of Carthage. Under Marcus Aurelius it included a pagus and a curiæs; Septimius Severus erected into it the municipium, Septimianum Aurelium liberum Thugga, which became a colony in 261 under Gallien. Justinian built a fortress there which is still partly preserved (Procopius, De aedificiis, VI, 5). The existence of a praetor and tresvir implies why there were two legions, Saturninus and Honoratus, who assisted at the Council of Carthage in 256. A Donatist bishop, Paschius, went to the Council of Carthage in 411. Thugga is now Douggia, a village of Tunis, famous for its ruins, among which are the temple of the Capitol built under Marcus Aurelius, a theatre, three triumphal arches, Roman necropolis, and a Punic mausoleum.

Thugut, Johann Amadeus Franz de Paula, Austrian statesman, b. at Linz, 31 March, 1738; d. at Vienna, 28 May, 1818. He was the son of a paymaster of the imperial army, Johann Thugut. Until thirty years of age he was known by the affectionate nickname "Thunichtgut". Although baptized Johann Amadeus, Thugut was called through life Franz. A great many mythical stories are told of his childhood, such as the following. One day Maria Theresa found an abandoned infant on the steps of the Hofburg at Vienna, and it is said she had the name "Thugut" written on the infant's hand. Another tale relates that the empress while crossing the Danube to Maria-Tafel was attracted by the large eyes of the boy who steered the boat. She was told that he was a foundling, a good-for-nothing (Thunichquid). The truth is that Maria Theresa, on account of the services of the father, had the boy educated at the academy of Oriental languages that had just been opened. In 1754 Thugut entered the imperial service, first as a translator at Constantinople. In 1761 he was transferred to Russia, where he, by his knowledge of ancient languages and abilities and made him secretary of the state chancery. While he here he accepted an annual income of 13,000 livres from Louis XV as a secret agent of France. He still received the same pension from France when secretary from 1769 of the Austrian embassy at Constantinople. When Joseph II was raised to the ranks of the lower nobility on account of his meritorious services, Joseph II greatly desired to obtain the Province of Bukovina, as this would make a connection between Galicia and Transylvania. Thugut persuaded the Austrian Government in 1775 to buy the province. To reward him Thugut was made a Freiherr or baron. During the war of the Bavarian succession Maria Theresa employed Thugut to negotiate with Frederick the Great, but the negotiations led to nothing. His employments varied greatly during the reign of Joseph II. In 1780 he was ambassador at Warsaw, and during 1787-89, ambassador at Naples; in the intervening years he had an official position at Paris where he was on terms of friendship with Mirabeau and Lafayette.

Emperor Francis II first used Thugut as a military diplomat in Belgium, and finally in 1794, after the death of Prince Kaunitz, appointed him first of foreign affairs. While holding this office his aim was to check the growth of Prussia's power, and to subdue the wild forces of the French Revolution. Austria was to become a well-rounded, compact whole. Consequently, after the unfortunate occurrences in Belgium, which was too far from Austria to be easily held and ruled, he sought to obtain compensation in the Third Partition of Poland and in Italy. In 1795 he was able to make an offensive and defensive treaty with Russia that opened the way for Austria to gain Bosnia, a part of Servia, and the territories on the Venetian coast. At the same time, during the negotiations concerning the Rhine as a boundary between France and Germany, and on the question of secularization, Thugut spoke emphatically in regard to justice, morality, and the uncompromising duties of the emperor as the head of the empire. It was impossible for him to consent to the robbery of the possessions and other estates of the empire of their possessions. After strong opposition he only yielded to necessity when he agreed in the Treaty of Campo Formio to cede the left bank of the Rhine to France and to give compensation in Germany to the princes whose possessions had been encroached upon. He called this peace "an unfortunate peace, the infamy of which would make an era in the annals of Austria, unless, what was much to be feared, the annals of Austria did not soon themselves disappear". Thugut's greatest success, the alliance of Austria, Russia, and England in the second French war, led to his overthrow. In 1801 he resigned his position.

Both in life and in history Thugut seems to have been a kind of Jekyll and Hyde. Baptized Johann and called Franz, in the service of the emperor and sold to France, grasping and yet often rejecting opportunities with indignation, passionately hated and genuinely honoured, it is difficult to consider "Thугут" and "Thunichtgut" as one and the same person. Concerning Thugut, whom he succeeded after eight years as minister of foreign affairs, the courteously Metternich said: "Franz owed her enormous success not to her own abilities but to the high position she had charge of the conduct of affairs. The ideas which underlay the Austrian policy were clearly conceived by them, but probably at no time were they carried out more negligently. The ministry of Baron Thugut shows only an unbroken succession of blue
Thulus, John, Venerable, English martyr, b. at Up Holland, Lancashire, probably about 1568; suffered at Lancaster, 18 March, 1615 or 1616. He arrived at the English College, Reims, 25 May, 1593, and received tonsure from Cardinal Guise on 23 September following. He left for Rome, 27 March, 1590, where he was ordained priest, and was sent on the mission in April, 1592. He seems to have been a prisoner at Wisbech, Cambridgeshire, when he signed the letter of 8 November, 1598, in favour of the institution of the archpriest, and the letter of 17 November, 1600, against it. Later he laboured in Lancashire, where he was arrested by William, fifteenth earl of Derby, and was committed to Lancaster Castle, where his fellow-martyr Roger Wrenno, a wren, was confined. They managed to escape one evening just before the Lent assizes, but were recaptured the next day. After that he was imprisoned with thieves, four of whom he had killed. These were executed with the rest of the party. Thulus suffered after three years. His quarters were set up at Lancaster, Preston, Wigan, and Warrington. Wrenno was hanged next, and, the rope breaking, he was once more offered his life for conformity, but ran swiftly to the ladder and climbed it as fast as he could, saying to the sheriff, who remonstrated with him, "I have just received a letter that you have just read, you would be as much in haste to die as I am now." A curious metrical account of their martyrdom, as well as portions of a poem composed by Thulus, are printed by Father Pollen in his "Acts of the English Martyrs" (London, 1891), 194-207.

Thun-Hohenstein, Count Leo, Austrian statesman, b. at the family castle of Tetschen in Bohemia, 7 April, 1811; d. at Vienna, 17 December, 1888. He received his early education under the direction of the distinguished teacher, John Rohrwerk, and later studied law and philosophy at the University of Prague. After graduation he travelled through Germany, France, and England. The bent of his mind was eastwards politics, and he studied with especial interest the political system of England. In Paris he studied the prison system and the various benevolent institutions for working-men. As soon as he reached home he began to make use of the knowledge he had acquired and issued a series of ordinances for the furtherance of the moral and social reform. He was the author of several books on the administration in the various departments of the Austrian government, and of a number of books on the various institutions, especially the educational, economic, and social.
Shortly afterwards he entered political life and became a member of the Bohemian Diet. He also interested himself in the revival of the Czech language and literature, and in 1842 published a treatise entitled: "Über den gegenwärtigen Stand der böhmischen Schule und Erziehung." In 1846 the Moravian crisis broke out in Galicia, and Thun was appointed a member of the administrative board under Francis Stanislaus Kostka. He took up his residence at Lemberg with his wife, Countess Caroline Clam-Martinitz, whom he had recently married. At the outbreak of the revolution in the spring of 1848, Thun was appointed Resident of the administrative board and became the actual ruler of Bohemia, for the Archduke Francis Joseph, who had been selected as viceroy, was unable to assume the position. During the outbreak at Prague Thun was captured by the insurgents and imprisoned; they were willing to release him if he would give certain assurances, which he refused to do. When finally set free he supported the commander of the troops in Prussia in quelling the revolt by force of arms.

Thun rose rapidly, and in July, 1849, was appointed by the emperor minister of worship and education, the two offices being united for the first time in the person of Thun. He immediately set about reforming the methods of instruction to meet the demands of the times. He improved the primary schools and practically reorganized the administration of the courses of study of the gymnasium and the universities. He took a special interest in industrial education and was the first to place trade and technical schools on a firm basis. He also did much to encourage art, especially by making an art university of the Academy of Fine Arts, and by giving employment to artists, as Thun's work as a statesman deserves equal attention. In his memorials to the emperor of 7 and 13 April, 1850, on the religious condition, he made his first attempt to loosen the fetters in which Josephinism had bound the Church. In his first paper he demanded the annulment of the Placitum regium, in the second he insisted that no teacher of religion or professor of theology should be appointed without the consent of the bishop. In September, 1852, the emperor appointed Archbishop Rauscher as his plenipotentiary for drawing up a concordat, and Pius IX appointed the unceo Viale President of the concordat commission, but the two were laid before the committee of ecclesiastical affairs composed of five members, among which the predominating influence was naturally that of the minister of worship and education. Thun said himself that his share in the drawing up of this agreement was one of the "proudest and happiest recollections" of his life.

Thun acted both in his capacity as minister of education and minister of worship entirely in accordance with a rigid sense of duty, but he kept the two departments during his administration entirely distinct, so that Rauscher, who was appointed representative to the emperor, said of him: "Thun has a Catholic heart and a Protestant head." Grillparzer, who was less in agreement with Thun's policy, said: "I have a suicide to announce. The minister of worship has killed the minister of education." Austria now entered on a new era; it became a constitutional monarchy on 20 October, 1860, and Thun's office was abolished. The next year, however, the emperor appointed him a life member of the Upper House of the Imperial Parliament and he was a member of the Bohemian Diet for several terms. In both bodies he was always the pillar of the conservative Catholic party, was the leader of the Federalist party, and the champion of the claims of Bohemia for a full autonomy. He founded the "Vaterland," the organ of the Federalist party, and a powerful influence in the politics of the day.
become known through a series of much controverted historical works called the "Reinhardsbrunner Annalen", was badly damaged in the Peasants War of 1525 and was turned into a hunting castle in 1543; it belonged to the Prince of Salm-Salmburg and died. Other important Benedictine abbeys founded by the landgraves during the eleventh century were the Abbeys at Heiligenstadt and Saalfeld, and during the twelfth century those at Paulinzenz, Gosek, and Boscian. The Cistercian Abbeys of Volkenroda, Florta, and Gotha were founded by landgrave Henry (d. 1247), with whom the first dynasty of Thuringian landgraves became extinct. The war of succession which now broke out raged until 1263, when the branch of the Wettin family which ruled Sax-Meissen assumed control of Thuringia. In 1440 a quarrel arose as to the possession of the county, and by a family compact made at Leipzig in 1455 Thuringia was assigned to the Ernestine branch of the house of Wettin. Thuringia now formed a constituent part of the electorate of Saxony (q.v.), where the great schism of the sixteenth century had its beginnings. As early as 1530 the Catholic Faith was abolished, public worship forbidden, and churches and monasteries were largely destroyed, especially during the Peasants War of 1525. The Anabaptists found many adherents in Thuringia, particularly at Mühlhausen where the founder of the sect, Thomas Münzer, laboured for it. Within the borders of Thuringia the Catholic Faith was maintained only in the district called Eichsfeld, which was ruled by the Archbishop of Mainz, and to a small degree in the city and vicinity of Erfurt, a result also due to the energetic measures of this archbishop. By the Capitulation of Wittenberg of 1547 that closed the Smalkaldic War, John Frederick the Magnanimous lost both the electoral dignity and the country of Saxe-Wittenberg, retaining only Thuringia, which was partitioned by his sons into numerous duchies (see Saxe-Altenburg; Saxe-Coburg and Gotha; Saxe-Meiningen; Saxe-Weimar-Eisenach). While Thuringia was a landgraviate, there were a number of independent counts and nobles in the country whose possessions were finally absorbed either by the Saxon-Thuringian duchies or by Prussia. Only the principalities of Schwarburg and the principalities of Reuss have remained independent.

Protestant. HERMANN SIECHER.

Thurnmoe, JOHANNES (called Aventinus from the place of his birth), b. at Abensberg, Bavaria, 4 July, 1477; d. at Ratisbon, 9 January, 1534. He studied at the Universities of Ingolstadt, Vienna, Cracow, and Paris. In 1507 he returned to Ingolstadt, and in 1508 was appointed tutor to the younger brothers of Duke William IV of Bavaria. In his zeal for learning he founded the "Sodalitas litteraria Anglicostadensis", which, however, soon ceased to exist (1520). In 1512 he wrote the "Rudimenta grammaticae latinae". In 1517 he was appointed historiographer of Bavaria and was commissioned to write the history of the country. Many of his important authorities which he collected for this purpose have been preserved only in his copies. He embodied a critical treatment of them in a complete history of Bavaria, "Annales Bojorum", down to the year 1460. His condensed German version of it, the "Bayerische Chronik", is the first important history in the German language. Though he ranked as a Catholic, Thurnmoe was in sympathy with the Humanists, inclined to the opinions of the Reformers, rejected auricular confession, objection to the doctrine of transubstantiation, and opposed in violent language the claims of the hierarchy as excessive. For this reason his history was not published at Ingolstadt until 1554, and then only with omission of the passages hostile to the Church. The "Bayerische Chronik" was published as a work of the Frankfort-on-Oder Black Letter Press. The Bavarian Academy issued a critical complete edition of his works in five volumes (Munich, 1850-86). See the biographies by Wiedmann (Freising, 1858); Dittmar (Nordlingen, 1853); Welleck (Bamberg, Esslingen u. seine Zeit (Munich, 1877; Nordlingen, 1880).

PATRICK SCHLAPER.

Twning, EDWARD, VENERABLE. See NUTTER, ROBERT, VENERABLE.

Thwing, THOMAS, VENERABLE, martyr, b. at Heath Hall, near York, in 1635; suffered at York, 23 Oct., 1650. His father was George Thwing, Esq., of Kilton Castle and Heworth, nephew of Venerable Edward Thwing; his mother was Anne, sister of the venerable confessor Sir Thomas Gascoigne, of Barnsford Hall. Educated at Douai, he was sent to the University of Oxford in 1644 and thence to Cambridge. Until April, 1668, he was chaplain at Carlton Hall, the seat of his cousins the Stapletons. He next opened a school at Quoske, the dower-house of the Stapletons. In 1677 the "Institute of Mary" began their foundation in the house given by Sir Thomas Gascoigne at Dolebank. Thwing became their chaplain, three of his sisters being of the community. It was there that he was arrested in the early part of 1679. At the time of the Titus Oates scare, two servants who had been discharged from Sir Thomas Gascoigne's employ for dishonesty, sought vengeance and reward by disclosing a pretended plot on the part of Gascoigne and others to murder the king. In their first allegation no mention was made of Thwing. Gascoigne, Thwing, and others were removed to London for trial at Newgate. All were acquitted except Thwing, who was brought back to York for trial in March, 1650. Owing to his challenging the jurors, his trial was postponed to the summer assizes, and he was brought to the bar on 29 July. He was refused an impartial jury, and was found guilty on the very same evidence upon which his relatives had been acquitted. Upon receiving sentence, which in consideration of his gentle birth he had expected to be mitigated, he gave the felons and murderers found guilty at the same assizes, humbly bowing his head he replied "Innocens ego sum." The king at first reprimed him, but owing to a remonstrance of the Commons the death-warrant was issued on the day after the meeting of Parliament. He was drawn from York Castle, past the convent where his sisters were dwelling, to Tyburn, where the sentence was carried out. He declared his innocence, protested his loyalty to the king and his charity to his neighbour; prayed for the king and royal family, and begged the prayers of all true Catholics. His dying words were "Sweat Jesus, receive my soul". His mangled body was given to his friends, and buried in the churchyard of St. Mary, Castlegate. Relics of the martyr are now preserved at the Bar Convent, York, and at Oscott College.

Knorrborough, M.S.; Chalmers, Memoirs of Missionary Priests (Edinburgh, 1877),

J. L. Whitfield.

Thyatira, a titular suffragan see of Sardes in Lydia. According to Stephanus Byzantius, the name was given to the city by Seleucus I Nicator; it is more probable that it is of Lydian origin. A Macedonian youth.
Thymiás, titular see, suffragan of Nicomedia, in Bithynia Prima. It is an island situated in the Black Sea, mentioned by all ancient geographers, and which was 241 square miles wide. Its original name was Apollonia, because it had a temple to the god Apollo. It also bore the name of Daphne, whence came the name Daphnusia, almost as ancient as that of Apollonia, and which is the only one met with in the "Notitiae episcopatum". Its name of Thymiás is derived from the Thymi, a people of Thracian origin, who occupied all the coast of Bithynia. Le Quien (Oriens Christ., I, 629) mentions three bishops of Daphnusia: S. Sabas, venerated on 1 May; Leo, present at the Eighth Ecumenical Council in 869; Anthony, at the Photian Council of 878. One John was exiled to Daphnusia and martyred under Constans; his relics were later transported to Constantinople where they are still venerated.

The Diocese of Daphnusia is mentioned in the "Notitiae episcopatum" of Leo the Wise about 900 (Kelzer, "Ungedruckte Texte der Notitiae episcopatum", 553), and in that of Constantine Porphyrogenitus about 940 ("Georgii Cyprii Descriptio orbis romanii", ed. Kelzer, 65), and finally in "Notitia 13" of Parthey in the thirteenth century (Hierocles Synesius, 247). In 1261 the Latin fleet was engaged in the siege of the island when the Greek Emperor of Nicaea, Michael VIII Paleologus, captured Constantinople and thus put an end to the Latin Empire. The island of Daphnusia is now called Kefken or Kerpe-Adası, and lies west of the mouth of the Sangarius in the caza of Chile and the vilayet of Constantinople.

Thýra, HERMANN, German Jesuit, b. at Neuss on the Rhine, 1532; d. at Mainz, 26 October, 1591. He studied first at Cologne, and then, after 1522, at the Collegium Germanicum at Rome. On 26 May, 1556, he was received into the Society of Jesus by St. Ignatius Loyola, two months before the latter's death. In the same year Thyrus was made a professor of theology at Ingolstadt, where he taught for three years the "Magister sententiarum", and in the fourth year controversial theology. In 1560 he became a professor at Trier, and lectured on the Epistles of St. Paul. He was rector of the college at Trier (1565-70), provincial of the Jesuit province of the Rhine (1571-8), and from 1578 until his death rector of the college at Mainz. He did excellent service to the Catholic cause and the Counter-Reformation in Germany. The "Liber de religionis libertate", ascribed to him, was written most probably by his younger brother Peter, also a Jesuit. His "Confessio Augustana", with controversial notes, appeared at Dillingen in 1567. He also left several volumes of sermons. According to the testimony of van Reifenberg ("Historia Societatis Jesu ad Rhenum inferi"), he was skillful, industrious, frank, unaffected, and not lacking in shrewdness; and was in consequence highly esteemed by the archbishops of the Rhine, who often employed him in important matters. He was also a noted preacher, and left several volumes of sermons.

Tiara, the papal crown, a costly covering for the head, ornamented with precious stones and pearls, which is shaped like a bee-hive, has a small cross at its highest point, and is also equipped with three royal diadems. On account of the three diadems it is sometimes called triregnum. The tiara is a non-liturical ornament, which, therefore, is only worn for non-liturical ceremonies, ceremonial processions to church and back, ceremonial papal processions, such as took place upon stated occasions until Rome was occupied by the French, and at solemn acts of jurisdiction, as, for example, solemn dogmatic decisions. The pope, like the bishops, wears a mitre at pontifical liturgical functions. The tiara is first mentioned in the "Vita" of Pope Constantine (708-715) contained in the "Liber Pontificalis". It is here called cameralum; it is then mentioned in what is known as the "Constitutum Constantinianum", the papal donation of the Emperor Constantine, probably forged in the eighth century. Among the prerogatives assigned to the pope in this document there is especially a white ornament for the head called phrygum, which distinguished him; this naturally presupposes that, at the era the document was written, it was customary for the pope to wear such a head-covering. Three periods may be distinguished in the development of the tiara. The first period extends to the time when it was adorned with a royal circlet or diadem; in this period the papal ornament for the head was, as is clear from the "Constitutum Constantinianum", and from the ninth Ordo of Malbion (eleventh century), merely a helmet-like cap of white material. There may have been a trimming around the lower rim of the cap, but this had still in no way the character of a...
royal circlet. It is not positively known at what date the papal head-covering was adorned with such a circlet. At the time the Donation of Constantine appeared, that is in the eighth century, the papal head-covering had still no royal circlet, as is evident from the text of the document. In the ninth century also such circlet does not seem to have existed. It is true that the Ninth Ordo calls the papal cap regnum, but in the description that the Ordo gives of this cap we hear nothing at all of a crown, but merely that the regnum was a helmet-like cap made of white material. The monumental remains give no clue as to the period at which the papal head-covering became ornamented with a royal circlet. Up into the twelfth century the tiara was not only seldom represented in art, but it is also uncertain whether the ornamental strip on the lower edge is intended to represent merely a trimming or a diadem. This is especially true of the representations of the tiara on the coins of Gregory III (904–911) and Benedict VII (974–983), the only representations of the tenth century and also the earliest ones. Probably the papal head-covering received the circlet at the time when the mitre developed from the tiara, perhaps in the tenth century, in order to distinguish the mitre and tiara from each other. In any case the latter was provided with a circlet by about 1130, as is learned from a statement of Suger of St. Denis. The first known appearance of the word tiara as the designation of the papal head-covering is in the life of Paschal II (1099–1118), in the "Liber Pontificalis".

The second period of the development of the tiara extends to the pontificate of Boniface VIII (1294–1303). There are a large number of representations of the tiara belonging to this period, and of these the Roman ones have naturally the most value. The diadem remained a simple although richly-ornamented ring up into the second half of the thirteenth century; it then became an antique or tooth-edged crown. The two lappets (coudes) at the back of the tiara are first seen in the pictures and sculpture in the thirteenth century, but were undoubtedly customary before this. Strange to say they were black in colour, as is evident both from the monumental remains and the inventories, and this colour was retained even into the fifteenth century. When the tiara is represented in sculpture and painting as a piece of braiding, this seems to arise from the fact that in the thirteenth century the tiara was made of slips braided together. Of much importance for the tiara was the third period of development that began with the pontificate of Boniface VIII. It is evident from the papal treasures of 1296 that the tiara at that era had still only one royal circlet. A change, however, was soon to appear. During the pontificate of Boniface VIII a second crown was added to the former one. Three statues of the pope which were made during his lifetime and under his eyes, and of which two were ordered by Boniface himself, leave no doubt as to this. Two of these statues are in the crypt of St. Peter's, and the third, generally called erroneously a statue of Nicholas IV, is in the Church of the Lateran. In all three the tiara has two crowns. What led Boniface VIII to make this change, whether merely of love of pomp, or whether he desired to express by the tiara with two crowns his opinion concerning the double papal authority, cannot be determined. The first notice of three crowns is contained in an inventory of the papal treasure of the year 1315 or 1316. As to the tombs of the popes, the monument of Benedict XI (d. 1304) at Perugia shows a tiara of the early kind; the grave and statue of Clement V at Ussel in the Girola were mutilated by the Calvinists, so that nothing can be learned from them regarding the form of the tiara. The statue upon the tomb of John XXII is adorned with a tiara having two crowns. The earliest representation of a tiara with three crowns, therefore, is offered by the effigy of Benedict XII (d. 1342), the remains of which are preserved in the museum at Avignon. The tiara with three crowns is, consequently, the rule upon the monuments from the second half of the fourteenth century, even though, as an anachronism, there are isolated instances of the tiara with one crown up into the fifteenth century. Since the fifteenth century the tiara has received no changes worthy of note. Costly tiaras were made especially in the pontificates of Paul II (d. 1464), Sixtus IV (d. 1484), and above all in the pontificate of Julius II, who had a tiara valued at 200,000 ducats, made by the jeweller Caradosso of Milan.

Various hypotheses, some very singular, have been proposed as to the origin of the papal head-covering, the discussion of which here is unnecessary. The earliest name of the papal cap, camellacum, as well as the Donation of Constantine, clearly point to the Byzantine East; it is hardly to be doubted that the model from which the papal cap was taken is to be found in the camellacum of the Byzantine court dress. The adoption by the popes of the camellacum as an ornament for the head in the seventh or at the latest in the eighth century is sufficiently explained by the important position which they had at this period in Italy and chiefly at Rome; though they could not assume a crown, as they were not sovereign, they could wear a camellacum, which was worn by the dignitaries of the Byzantine Empire.

Tiberias, titular see, suffragan of Scythopolis, in Palestina Secunda. The town of Tiberias was founded on the lake in A. D. 17 by Herod Antipas, tetrarch of Galilee, who gave it the name of the reigning emperor, Tiberius. At the time of its foundation the Jews refused to dwell there, and Herod was forced to populate it with foreigners and people of low extraction (Josephus, "Ant. jud.," XVIII, ii, 3). What it was previously called is not known; St. Jerome makes it the site now of Recceath, now of Emath, now of Ceneroth or Kinmereth, towns of Nophthali (Jos., XIX, 35). The town seems to have been a little more than three miles in circumference. Although Tiberias gave its name to the neighbouring lake and is mentioned several times in the Gospels, it seems never to have been dwelt in by Christ. At the death of Herod Archelaus (6 B.C.), Herod Agrippa the Younger who made Sepphoris or Dioscora his capital. At the revolt of the Jews against the Romans the people of Tiberias sided now with one party, now with the other, and the Jewish historian Josephus, who was Governor of Galilee, only took it after several attempts ("Bell. jud.," II, xxi, 6; "Vita Josephi," 18 and 54). At the approach of Vespasian it submitted without resistance and was not disturbed; the Jews secured the privilege of dwelling there alone, to the exclusion of pagans, Christians, and Samaritans. Towards the end of the second century the Sanhedrin, having a triangular plate of fertile soil that stretches eastwards for four miles—the Plain of Geneareth. East of this the ground is broken and sterile, overgrown with bush, and strewed with volcanic rock. The lake is fed by several torrents and by copious hot springs on the north and west, but principally by the Jordan, which enters at the north-east corner and rushes out at the south-western extremity. The depth of the lake nowhere exceeds 150 feet. Its water is sweet and good to drink. Fish are so abundant that catches of 600 pounds are not rare, and in one exceptional season (1896) 9200 pounds of fish were hauled ashore in one huge net. Storms are alarmingly sudden and frequent. The hot atmosphere of the gorge (averaging in the shade 93° F. in summer, and 50° in winter) sucks down the cool air of the heights through the narrow waist to the east.
TIBERIOPOLIS

and west at the north end, and in half an hour the surface of the lake tosses furiously. Half an hour again suffices to restore the lake to a mirror-like calm.

To-day the shores are barren and desolate, with gloomy patches of volcanic soil to the north and west. There is scarcely a tree to be seen, nor even any verdure except where an overflowing torrent waters the north-western plain, nor any human habitation save the sombre houses of Tiberias to the west and a few straggling villages. But in the days of Christ nature and man united to render these shores singularly attractive. The vine and the fig flourished ten months in the year, and every variety of fruit ripened in the various seasons: thick woods surrounded the lake even down to the eighth century of the present era, and the plains yielded rich harvests twice in the year. Nine, perhaps ten, cities encircled the lake with an almost unbroken front of wharves and harbours. Ruins of theatres, hippodromes, temples, synagogues, baths, and villas witness to the presence of all the refinements of Greco-Roman culture. Fishing was an important industry (cf. Bethsaida—"Fishing-House", and Tarshish—"Pickling Factories"), and the fishermen, though reputed generally pious by the Rabbis, were a force to be reckoned with in troubled times. The fish were exported to all parts of the Roman world. The standing population of the towns, of which the smallest had at least 15,000 inhabitants, was largely increased by multitudes of sick who flocked, especially in summer, to the world-renowned springs near Tiberias.

TIBERIUS

Tiberiopolis, titular see in Phrygia Pacatiana. Tiberiopolis is mentioned by Ptolemy (V, 2, 25); Socrates (Hist. eccl., VII, 4); and Herodetus (Synec., 66, 9). It struck its own coins at least from the time of Trajan. Its exact site is unknown, but it was situated in the region of Egrí Gueus, casa of Kutahia, vilayet of Brusa. Ancient Greek "Notissae episcopatum" mention it among the suffragans of Laodicea. In the eighth century it was attached to the metropolitan see of Hierapolis and and such appears in the "Notissae episcopatum" until the thirteenth century. Le Quien (Oriens christ., I, 797) mentions five of its bishops known by their presence at councils: Eustathius at Constantinople (536); Silas at Constantinople (553); Anastasius at Constantinople (692); Michael at Nicæa (787); Theoctistus at Constantinople (879).

S. Pétridès.

Tiberius, the second Roman emperor (A. D. 14-37), b. 16 November, 42 b. c; d. 16 March, 37. A. D. He was the son of Tiberius Claudius Nero and Livia. By the marriage of his mother with Emperor Augustus he became the latter's stepson, and was adopted by Augustus in A. D. 4. In the year 10 he was appointed co-ruler with Augustus. Hard and secretive by nature and embittered by the neglect with which his stepfather allowed him to be treated, he did not arouse personal enthusiasm, and until recently was described by historians as a bloody tyrant. It is only during the last sixty years that he has been more fairly judged, and at present the opinion begins to prevail that he was a genuine Roman, a ruler faithful to his duties, just, wise, and self-contained. In his internal policies especially he is one of the most distinguished of all Roman emperors. Like Augustus he reformed and improved every department of the government, and promoted in every direction the prosperity of the empire of which Augustus had laid the foundation. He developed imperial power by declining to have his authority renewed from time to time by the Senate, as Augustus had done. The strong opposition which grew up against him was due to his taciturnity and domineering disposition, and to the influence of the prefect of the guard, Tius Sejanus, who alone possessed his confidence. The persecutions and executions for less-majesty, which
rapidly increased during the second half of his reign, and the gloom which pervaded Rome induced Tiberius to leave the capital altogether in the year 26 and to live partly in Campania and partly on the Island of Capri. Before this date the question as to the succession to the empire had led to a terrible family tragedy. By his first marriage Tiberius had a son called Drusus, while his second marriage with the immortal Julia, daughter of Augustus, was childless. After the death of his nephew Germanicus (a.d. 19), whom he had been obliged to divorce at the command of Augustus to the exclusion of his own son, he hoped to secure the succession for Drusus. A low intrigue was formed against this plan, in which the wife of Drusus, Livilla, who had illicit relations with Sejanus, took part. In the year 23 Drusus was poisoned by Sejanus and Livilla. However, when in 31 Sejanus formed a conspiracy to secure the throne for himself, Tiberius was warned by Livia, who had left Sejanus and returned to Rome. Tiberius spent his last years in constantly increasing seclusion, misanthropy, and cruelty on the Island of Capri, where it is said he abandoned himself to debauchery. However, these reports are at least coloured by prejudice and have not been satisfactorily proved. Neither is it probable that Tiberius was murdered.

The ministry and death of John the Baptist and of Jesus Christ occurred during the reign of Tiberius. According to St. Luke (iii. 1), St. John the Baptist was called by God, in the fifteenth year of the reign of Tiberius, to prepare the way for the Incarnate Word. Shortly before his death Tiberius recalled the procurator Pontius Pilate from Judea. Tertullian (Apologeticum, v. xxi), from whose Eusebius and Origen take the story, relates that Tiberius received a report concerning Christ and that he called upon the Senate to place Christ among the gods. The Senate rejected the request; Tiberius then threatened the accusers of the Christians with punishment. The narrative is not worth of belief, still it is probable that Tertullian knew a document that professed to be a report of Pilate.

Hydrography.—From this plateau flow the following rivers: to the north-west, with its tributaries, the Sutlej, which runs into the Gulf of Oman; to the north of the Himalayas, the T'sanpo or Brahmaputra River, which falls into the Gulf of Bengal after meeting in an estuary the Ganges, which follows a similar course on the southern side of the Himalayas; to the east, the great Ch'ang, Hsiang-shu, and Yang-tze; to the south-east, the streams of Indo-China, the Lutze-kiang (Irawadi), the Lu-kiang (Salwen), and the Lan te'an kiang (Me-kong). The principal lakes are: on the north-east, the Kuku-nor or Ts'ing hai; on the south, Lake Palti or Yamdok; on the plateau, the Iki-Namur, the Pang-kong, the Tengri-nor, and the famed Mansarovar and Rakas.

Geography.—Many roads lead to Lhasa: (1) by Si-ning in the Kan-su Province and the Kuku-nor; (2) from Sze-ch'wan to Ta-Tsienlu, Ta-tang, Litang and Champo; (3) from Yun-nan by Li-kiang (these are the three main routes from China); (4) from Siktsuen, in the south through the valley and the Gyang-tze; (5) from the west, by Leh, in Ladakh; (6) from Khotan, through the Aksai Chin, to Rudok. Tibet includes five provinces: (1) Amo, part of the Chinese province of Kan-su and the Kuku-nor region (Ts'ing-hai), inhabited by Tibetans and administered by a Chinese official at Si-ning; the other four provinces form Tibet proper which is controlled by the vicerey of Sze-Ch'wan; (2) Te'sien-tang, Eastern or Anterior Tibet (or K'ang, Kham, Khu, Khamdo), which extends between the Chinese Provinces of Sze-Ch'wan and Yun-nan, and the district of Lhorgor, frontier of Lhasa; (3) Wei Wu, or Chung-Tang, Central Tibet, Kingdom of Lhasa; (4) Tsang or Hou Tsang, Ulterior Tibet, i.e. south-west Tibet, extending to Lake Mansarovar, with the town of Shigatse, near which stands the Tashilumbo Monastery at the junction of the Nyang-chu and the Ts'an-po; (5) Ngari (O-Ii), Western Tibet, which includes the upper courses of the Indus and the Sutlej, and generally north-western Tibet with the towns of Gartok and Rudok, the Kailas Mountain, the Refuge of Siva; it is bounded by the British district of Kumaun.

Laos and Hierarchical Relations. Secular Administration.—At the head of the lamaist hierarchy of Tibet are the dalai lama and the parchen erdeni lama; the word “lama” is derived from a Tibetan word, in Chinese, wu shang, meaning “unsurpassed”. The dalai lama is a re-embodyment of one of the disciples of the reformer Tsong Kappa, and at the same time an incarnation of the Bodhisattva Avalokiteshvara; he lives at the monastery Po-ta-la at Lhasa; his title is Cheptsun Djamtso O Rinpoché (Venerable Ocean Treasure). The parchen erdeni lama lives at Tashilumbo. The supporters of the faith may receive the title of Nomden Hdn (regent), or Dharma Rgya. Enmity would render impossible the belief that if the 'hut ukhi'q or saitins were not chosen to represent the principles of the transmission of authority; these saitins are known as the “Living Buddhas”. The third lama in the hierarchy is the Cheptsun Dampa 'hut ukhi'q, Patriarch of the Khalkhas, living at Urga; the K'uk'han Nomden is the descendant of a seller sent in the sixteenth century by the dalai lama to the chief of the Ordo; his residence is at Kuku-Khoto; the metropolitan lama, Ch'ang K'tsa 'hut ukhi'q, has his see at Dolonnor; the head of lamaist monasteries is called K'ampa (abbot). The secular administration of Tibet is the province of the sha, the title of four ministers (kailon or kabloon) of the third rank of Chinese officials, elected as a rule by the Peking Government, on presentation by the Chinese ambas;
the treasury (shang shang) presided over by a kalan with three first-class councillors (tsai peng), and two second-class councillors (shang chokha); two controllers of the revenue (yets' angba); two controllers of streets and roads (hierbang); two supernintendents of police (sheduba); two controllers of the stud (lapen); there are six military commanders (lapen), with the rank of an emperor of China; two commanders of 200 men (jupen), twenty-four kwipen, and 120 ting pen. Civil and military officials are designed under the general term of fan muh.

History.—Little is known of the ancient history of Tibet. The first dynasty was founded by the Rong-pati; but the period of history begins at the end of the sixth century a. d. when the first king, Lantsang, made invasions into India. Lantsang's son is the celebrated Song-tsang Giam-po, one of the great champions of Buddhism; in 639 he married Bribieun, daughter of Anquvarman, sovereign of Nepal, and in 641 the princess of Wen ch'eng, daughter of the Chinese emperor T'ai-tsung. Under their influence, the Tibetan prince gave a great extension to Buddhism in his empire; he founded in 639 Lhasa, formerly Lha-idan, where for centuries his heirs governed the country with the title of zhalbo in Tibetan, and of tsepang in Chinese. The Tibetans were d. a. s. at that time the Khalif of Bagdad and they invaded the Chinese provinces of Yun-nan, Sze-ch'wan and Kansu, as far as Ch'ang ngan, capital of the T'ang emperors. The two most ancient historical edicts have been found by Dr. L. A. Waddell upon a lofty pillar of victory which stands at the foot of Potala Hill, under the castles of the ancient kings, now incorporated in the palace of the dalai lama; they date between a. d. 730 and 763, are the earliest historical Tibetan documents hitherto discovered, and throw a sidelight on the ancient history and geography of China. The eighteenth century was the culminating period of Tibetan power, which was destroyed when the Uighurs became the masters of the whole country between Pei'ting and Aksu.

During the eleventh century the priests of the Sakya Monastery began to be predominant in Tibet; they were called Hung Kao, Red Church, on account of the color of their garments and of their headgear. The lamas' name of the men, the marriage of monks, and sorcery were the chief causes of the reform undertaken by Tsong K'apa or Je Rinpoche (b. at Amo near Kuku-nor in 1358), founder of the Gelupa Sect, who adopted a yellow dress (khuong kiao), and obliged his disciples to return to the pure path of Buddha; he founded the Monasteries of Gadan and of Sera, and died in 1418, having established the lamaist hierarchy. His successor, Gedundub, built the Monastery of Tashilumbo, which became in the seventeenth century the residence of the second lama, the panch'en lama, who settled in 1641 to the west of Lhasa. The panch'en lama, Paldan-yeshes, died at Peking on the 27 Nov., 1780, during a visit to the Emperor of China. During the eighteenth century the Chinese Emperor, Kien-tung, began to establish his supremacy over Tibet; already in 1725 two high Chinese commissioners had been appointed to control the temporal affairs of the country, and in the first moon of 1793 an imperial edict ordered that future dalai lamas were to be chosen from the names of children drawn from a "golden urn". The present Chinese administration of Tibet includes an imperial resident (chu tsang ta ch'en) or obman (npang po) with an assistant resident (npang pan ta ch'en); among their duties, they act as intermediaries between China and Nepal (Gorkhas Country); a secretary (yi ts'ing chang-k'ing) has to deal with native affairs. The two Chinese commissioners (liang t'ai), of the class of sub-prefect, are stationed at Lhasa, Tashilunbo, and Nagri. The imperial resident is Chao Erh-fung (appointed March, 1908), formerly Director-General of the Szech'wan Hu-Pe Railway and acting viceroy of Szech'wan.

Travelers in Tibet.—Marco Polo and Rubruk mention Tibet but did not visit it; the first European traveller who appears to have visited Lhasa is the Venetian Odoardo de' Conti (1423-1500), and the second, the Portuguese Jesuit, Antonio de Andrade, daged Agra, 8 Nov., 1624, relating the journey of this father to Lake Mansarovar and to Rudok; Andrade erroneously called the country he visited, Cathay. Two centuries later, two other Jesuits, Grevel and d'Orves (1661) left Peking, and by the route of Si-ning reached Lhasa, where they resided two months; they returned to India via Nepal. Two other Jesuits, Desideri and Freyre, went (1715-10) from Lef to Lhasa, where the former lived until 1729, when he was obliged to leave on account of the intrigues of the Capuchins, who had founded a mission which lasted to 1760, when they were expelled by the Tibetans. One of these monks, Francesco Orazio della Penna di Billi, has written an account of Tibet. A most remarkable journey was made by the Dutchman Samuel van der Putte (1621-92): he went from India to Peking via Lhasa, and returned by the same road. In 1774 Warren Hastings, Governor of Bengal, sent George Bogle to the Court of the pan-ch'en lama; Captain Samuel Turner went on a visit in 1783 to the Court of the new pan-ch'en lama; finally the Englishman Thomas Manning visited Lhasa in 1811. Next we come to the celebrated journey to Lhasa of the Lazarists Huc (q. v.) and Gabet in 1844. For many years afterwards the exploration of Tibet was carried on by "pundits" in the Indian Government service, especially by Nain and Gogia, and theavid point of Tibetan diplomacy to the British Government was among the travellers to Tibet the Russian, Prjevalsky (1880-85); the American, W. W. Rockhill (1888-89, 1891-92), who went to the north-east of Tengri-nor, 110 miles west of Lhasa; the Frenchmen, Gabriel Bonvalot and Prince Henri d'Orlons with the Belgian missionary, De Dekem (1889-90); Captain Hamilton Bower (1891-92); Miss A. R. Taylor (1892); the Frenchman, Dutreuil de Rhins (who was murdered, 5 June, 1894, at Tungbumdo by the red lamas), and his companion, Fernand Grenard (who escaped); Sir George K. Littledale (1895); and Mr. A. H. Macdonald (1895-96). The author of this article was Captain H. H. P. Doasy (1899); the celebrated Swedish explorer, Sven Hedin; and finally the Russian captain, P. K. Kozlov.

Relations with China, Russia, and England.—By a separate article of the Che-fu Convention (13 Sept., 1876) it had been stipulated that the English Government might in the next year send a mission of exploration by way of Peking through Kansu and Kuku-nor, or by way of Szech'wan to Tibet, and thence to India. The Tsung-li-Yamans, having due regard to the circumstances, was, when the time arrived, to issue the necessary passports, and address letters to the high provincial authorities, and to the imperial resident in Tibet. The English did not take advantage of this article and countermanded the mission by Article 4 of the Convention signed at Peking, 24 July, 1886, regarding Burmah and Tibet. A convention with China was signed 14 Nov., 1875 at Batavia, settling the boundary between Sikkim and Tibet, and trade regulations were also signed in December, 1893. But the Tibetans occupied land inside the treaty boundary; on the other hand, Russian activity in Tibet was causing great anxiety to the Indian Government. Lord Curzon had attempted to open direct communication with the dalai lama; there were rumours of a Russo-
TIBURTUS

720 TIBURTUS

Tibetan agreement. Notwithstanding Russia's protest, the Indian Government proposed sending a mission to Lhasa. Finally this mission was organized in July, 1903, with Major Francis E. Younghusband at its head; this first mission was turned into a second mission with Younghusband as a commissary and Commander of the military escort. The English crossed the Jelep Pass (12 Dec., 1903), occupied Phari (19 Dec.), stormed Gyantse (12 April, 1904), and entered Lhasa on 3 August; the dalai lama was in flight. A treaty was signed on 7 September; the British left Lhasa on 16 October, and a new Apostolic Legation was opened on 25 December. The treaty was ratified by the Viceroys of India on 11 Nov., 1904; it included ten articles: The Government of Tibet engaged to respect the Anglo-Chinese Convention of 1896 and to recognize the frontier between Sikkim and Tibet; undertook to open forthwith trade-maritime, to which all British and Tibetan subjects should have free right of access at Gyantse and Gastok as well as at Yatung; the roads to Gyantse and Gastok from the frontier were to be kept clear of all obstructions; an indemnity of £500,000, reduced since to one-third this amount, was to be paid to the Indian Government for the expense incurred in the dispatch of armed troops to Lhasa; all forts and fortifications were to be razed and all armaments removed which might impede the course of free communication between the British frontiers and the towns of Gyantse and Lhasa. These terms were really very moderate. On 27 April, 1906, a convention was signed at Peking by Sir Ernest Mason Satow for Great Britain and by Tang Shao-yi for China, including six articles: the Lhasa Convention was confirmed; Great Britain engaged not to annex Tibetan territory or to interfere in the administration of Tibet; China was not to permit any other foreign state to interfere with the territory or internal administration of Tibet. Finally, in 1907, Russia and Great Britain also signed a convention: both parties engaged to respect the territorial integrity of Tibet and to abstain from all interference in its internal administration, not to send representatives to Lhasa, neither to seek nor to obtain, whether for themselves or for their subjects, any concessions for railways, roads, telegraphs, and mines, or other rights in Tibet. From this time the Tibetan frontier has been closed to all foreigners, and Tibet has been exiled by the Swedish explorer, Sven Hedin. The Dalai lama had fled to Urga, in Mongolia, which he left in the summer of 1907 to settle at the Kun Bum Monastery; afterwards, in 1908, he went to the celebrated pilgrimage of Shan-sh, Wu tai Shan, whence he returned to Peking. An audience was granted to him by the emperor and he was allowed to leave the Chinese capital on 21 Dec., 1908, and return to Lhasa, where he was not to stay long; a body of Chinese troops invaded Tibet, the dalai lama fled to Darjeeling, and the result of the policy of both Great Britain and Russia has been the virtual annexation of Tibet by China.

Missionaries.—Since the Capuchins were expelled in 1760, except the Lazarists Huc and Gabet, who paid a visit to Lhasa in 1844, no missionary entered Tibet proper. The Vicar Apostolic of Hindu Tibet, Giuseppe Antonio Borghi, Bishop of Batoisida, begged to be relieved of part of his work, and consequently, on 21 March, 1846, Gregory XVI conferred on Monsieur Berte a Vicariate Apostolic of Lhasa. The new vicariate was placed in charge of the Foreign Missions of Paris, and in 1847 Mgr Pérocheau, of Sze-ch'wan, sent Father Charles-Thomas Renou (b. 22 Aug., 1812; d. 18 Oct., 1885) through Batang to Ch-su-mu-to, some ten miles from Lhasa; but being discovered, he was sent back to Ch-engage. Renou being appointed Prefect Apostolic of Eastern Tibet was to enter his mission via Yun-nan, while Rabin, Prefect Apostolic of Southern Tibet, was to penetrate into the country by the way of Northern India with Fathers Krick and Bernard. Nicholas-Michel Krick (b. 2 March, 1819) and Auguste-Etiene Bourry (b. 26 Dec., 1828) were murdered by the Abors on 1 Sept., 1855. Finally the vicariate was established in the eastern portion of Tibet and Missionaries of the Order of Sze-ch'wan with Jacques-Leon-Thomine Desmazures (b. 17 Feb., 1804; d. 25 Jan., 1869), Bishop of Sinopolis (1857), who resigned in 1864. His successors have been Joseph-Marie Chauveau (b. 24 Feb., 1816; d. 21 Dec., 1877), Bishop of Sebastopolis (1859) and Joseph-Roselain (b. 27 Oct., 1838; d. 9 Sept., 1904), Bishop of Diana. The present vicar Apostolic is Pierre-Philippe Giraudou (b. 17 March, 1850), since 1901, Bishop of Tintn controllers of 2407 European priests, and 600 catechumens. It has endured cruel persecutions during recent years. Among the missionaries of Tibet must be mentioned the well-known traveller and scholar, Auguste Descodins (b. 1826), now living at Darjeeling, author of a large "Dictionnaire thibetain-latine-français," and of a Tibetan grammar, printed at Peshawar. He recollections of a journey through Tartary, Tibet, and China (1846-1853), tr. (New York, 1852); DESCODINS, LE THIBET, (Paris, 1865); RELATION D'UN VOYAGE EN TIBET (1854); NARRATIVES OF THE MISSIONS OF GEORGE BOYLE TO THIBET AND OF THE JOURNEY OF THOMAS BARTON TO LHASA, ed. by M. JULET (Paris, 1849); LES DERNIERS VOYAGES DANS LE TIBET (Paris, 1869); BEDIN, CELESTE ASIA AND TIBET (London, 1893); ISMAY, TRAVELS AND DISCOVERIES IN TIBET (New York, 1900); ROCHER, THE LAND OF THE LAMAS (New York, 1901); IDÉM, THE DALAI LAMAS OF LHASA (New York, 1899); ANDRE, DE TIBET ET LES TRAVERSIES DU TIBET INCONNU (Paris, 1892); CRONEIL, TIBET AND TURKESTAN (New York, 1903); BLACK, THE TRADE AND RESIDENCE OF TIBET (1891); MACDONALD, THE MISSIONARY LIFE OF TIBET (London, 1910); WADDILL, LHASA AND ITS MYSTERIES (London, 1910); LANDOR, THE OPENING OF TIBET (New York, 1905); DEASY, IN TIBET AND CHINESE TURKESTAN (London, 1911); YOUNGHUSBAND, INDIA AND TIBET (London, 1912). HENRI CORDIER.

Tiburtius, Valerian, and Maximus, Saints. See CECILIA, SAINT.

Tiburtius and Susanna, Saints, Roman martyrs, feast 11 August. The story is related in the legend of St. Sebastian that Chromatius, prefect of Rome, condemned several Christians to death. The prefect, however, was converted by St. Tranquinillus and baptized by Polycarp. Tiburtius, the only son of Chromatius, was also baptized through the persuasion of St. Sebastian, who was his godfather in baptism. Tiburtius during the persecution of Diocletian tried to escape from the house where he had been hidden, but being caught, he was brought before the prefect Fabianus and tried. He confessed his faith which he confirmed by a miracle, for protecting himself only by the sign of the cross he walked over red-hot coals barefoot without suffering any injury. But the miracle was ascribed to magic and Tiburtius was beheaded at the third mile-stone of the Via Laviniana. This was in the year 256. The spot of execution was called, "at the two laurel trees". Saint Susanna, virgin and martyr, is said to have been the daughter of St. Gabinus. She was beheaded at the year 293, at the command of Diocletian, in her father's house. This house and the adjoining one belonging to her uncle, the prefect Caius, which were near the two laurel trees, were turned into a church, later the titular church of St. Susanna ad duas domos (cf. Keil, "Itala pontificia", I, 61 sq.). The authenticity of the Acts of St. Sebastian and Susanna has been rightly questioned, and the day of death (11 August) are established by the witness of the oldest Martyrologies and the earliest places of worship.

Gabriel Meier.
Ticolia, titular see, suffragan of Cyrene, in the Libya Pentapolis. Under this name it is not found in any "Notitiae episcopatuum", nor in any geography sacred or profane. Nevertheless, at the Robber Synod of Ephesus (449), we find a Theodulus, Bishop of Ticolia in Libya (Mansi, "Conciliorum Collectio", IV, 24 August 1601). We find no trace of a Greek text. It is doubtful if Ticolia is the correct name of this city or see. In a "Notitiae episcopatuum", published by Gelzer (Byzantinische Zeitsschrift, II, 26), we find the see of Sicilia, evidently the same as ours. Which is the correct name? At the Council of Ephesus (431), among the bishops of the city, there was one Sisopatrum. There was a city otherwise unknown, which seems likewise to have been situated in Libya (Mansi, op. cit., IV, 1128, 1221). Just now it is impossible to say if these various names relate to the same city, or what is the correct name of this diocese.

S. VAILKÉ.

Tichborne, Nicholas, Venerable, martyr, b. at Hartley Mauditt, Hampshire; suffered at Tyburn, London, 24 August 1601. He was a recusant in the Trackfield, in 1592, but by 14 March, 1597, had been imprisoned. On that date he gave evidence against various members of his family. Before 3 Nov., 1598, he had obtained his liberty and had effected the release of his brother, Venerable Thomas Tichborne, a prisoner in the Westminster assayer's house. He is to be distinguished from the Nicholas Tichborne who died in Winchester Gaol in 1587.

With him suffered VENERABLE THOMAS HACKSHOT (b. at Mursley, Buckinghamshire), who was condemned on the same charge, viz. that of effecting the escape of the priest Thomas Tichborne. During his long imprisonment in the Gatehouse he was "afflicted with divers torments, which he endured with great courage and fortitude".

JOHN B. WAINWRIGHT.

Tichborne, Thomas, Venerable, b. at Hartley Hampshire, 1567; martyred at Tyburn, London, 20 April, 1602. He was educated at Rheims (1584-87) and Rome, where he was ordained on Ascension Day, 17 May, 1592. Returning to England on 10 March, 1594, he laboured in his native county, where he escaped apprehension till the early part of 1597. He was subsequently imprisoned, but in the autumn of 1598 was helped to escape by his brother, Ven. Nicholas Tichborne, and Ven. Thomas Hackshot, who were both martyred shortly afterwards. Betrayed by Atkinson, an apostate priest, he was re-arrested and on 17 April, 1602, was brought to trial with Ven. Robert Watkinson (a young Yorkshire man who had been educated at Rome and ordained priest at Douai a month before) and Ven. James Duckett, a London bookseller. On 20 April he was executed with Ven. Robert Watkinson and Ven. Francis Page, S. J. The last named was a convert from the Anglican Church and had been brought up in Antwerp. He had been ordained at Douai in 1600 and received into the Society of Jesus while a prisoner in Newgate. Ven. Thomas Tichborne was in the last stages of consumption when he was martyred.

EDWIN BURTON.

Ticonia (also Tyconius, Tyconius, etc.), an African Donatist writer of the fourth century who appears in some inscriptions, and some passages in Tertullian. He defended a milder form of Donatism than Per- manenianus. He admitted a church outside his own sect and rejected the re-baptism of Catholics. Per- manenianus wrote a letter against him, quoted by St. Augustine (Contra ep. Parmenian. I, i; P. L., XVIII, 33). Otherwise almost all we know of him is contained in Gennadius (De vir illustr., XVIII): "Tich- nian an African was learned in theology, sufficiently versed in history, and in the corrupting of the Greek text. It is doubtful if Ticolia is the correct name of this city or see. In a "Notitiae episcopatuum", published by Gelzer (Byzantinische Zeitsschrift, II, 26), we find the see of Sicilia, evidently the same as ours. Which is the correct name? At the Council of Ephesus (431), among the bishops of the city, there was one Sisopatrum. There was a city otherwise unknown, which seems likewise to have been situated in Libya (Mansi, op. cit., IV, 1128, 1221). Just now it is impossible to say if these various names relate to the same city, or what is the correct name of this diocese.

S. VAILKÉ.

Tichborne, Nicholas, Venerable, martyr, b. at Hartley Mauditt, Hampshire; suffered at Tyburn, London, 24 August 1601. He was a recusant in the Trackfield, in 1592, but by 14 March, 1597, had been imprisoned. On that date he gave evidence against various members of his family. Before 3 Nov., 1598, he had obtained his liberty and had effected the release of his brother, Venerable Thomas Tichborne, a prisoner in the Westminster assayer's house. He is to be distinguished from the Nicholas Tichborne who died in Winchester Gaol in 1587.

With him suffered VENERABLE THOMAS HACKSHOT (b. at Mursley, Buckinghamshire), who was condemned on the same charge, viz. that of effecting the escape of the priest Thomas Tichborne. During his long imprisonment in the Gatehouse he was "afflicted with divers torments, which he endured with great courage and fortitude".

JOHN B. WAINWRIGHT.

Tichborne, Thomas, Venerable, b. at Hartley, Hampshire, 1567; martyred at Tyburn, London, 20 April, 1602. He was educated at Rheims (1584-87) and Rome, where he was ordained on Ascension Day, 17 May, 1592. Returning to England on 10 March, 1594, he laboured in his native county, where he escaped apprehension till the early part of 1597. He was subsequently imprisoned, but in the autumn of 1598 was helped to escape by his brother, Ven. Nicholas Tichborne, and Ven. Thomas Hackshot, who were both martyred shortly afterwards. Betrayed by Atkinson, an apostate priest, he was re-arrested and on 17 April, 1602, was brought to trial with Ven. Robert Watkinson (a young Yorkshire man who had been educated at Rome and ordained priest at Douai a month before) and Ven. James Duckett, a London bookseller. On 20 April he was executed with Ven. Robert Watkinson and Ven. Francis Page, S. J. The last named was a convert from the Anglican Church and had been brought up in Antwerp. He had been ordained at Douai in 1600 and received into the Society of Jesus while a prisoner in Newgate. Ven. Thomas Tichborne was in the last stages of consumption when he was martyred.

EDWIN BURTON.

Ticonia Indians, a tribe of Indians of some importance, constituting a distinct linguistic division of the river settlements or wandering in the forests along the north bank of the upper Amazon (Marão or Solimões), about the confluence of the Javari, ranging from about Loreto in Peru to below Tabatinga in Brazil. They number about 2500 souls, nearly equally divided between the two sexes. One-third are Christians, the others retaining their primitive wild habits. Physically they are one of the finest tribes of the upper Amazon. In character they are frank, honest, and of affectionate disposition. The wandering Ticonia, some of whom at times reside temporarily in the river banks on the Guaporé and a collar of jaguar or monkey teeth, to which is added a painted robe on ceremonial occasions. They wear XIV.—46

the hair cut across the forehead and hanging down full length behind. They wear armlets of bright-coloured feathers and paint and tattoo their faces in various patterns. They live by hunting and fishing, and the preparation and sale of the curari poison, here called from them the "Ticuna" poison, is their only occupation. The Indians also use blow-gun arrows. In this manufacture they are recognized experts and hold the process a secret, although it is known that Styrchnos castanea and Cocculus toxicofera are among the ingredients. The poison is kept in cane tubes or clay pots of their making, and is the chief object of intertribal trade throughout the upper Amazon region. They also gather the forest products, as wax, rubber, gum, and sarsaparilla, for sale to the traders. They believe in a god of evil, Locasi, and a dreaded evil spirit, Nanula, or a deceased person. There is a sort of circumcision and baptismal ceremony in connection with the naming of children. They are fond of elaborate masked dances. Girls on arriving at puberty are closely sequestered for a long period, terminating with a general feast and drinking orgy, the liquor being the maca, or chicha, prepared from chewed and fermented corn or bananas. Wives are obtained by purchase. The dead are buried in great earthen jars, together with food and, in the case of a warrior, broken weapons, the ceremony concluding with a drinking feast.

Some effort at the conversion of the Ticuna was made by the Portuguese Carmelites from Brazil about the middle of the eighteenth century, but with no useful result, owing to the Indian dread of the Portuguese slave-hunters. About 1760 the Jesuit Father Francis Lucas, of the neighbouring mission of San Ignacio among the Pevas, friends and allies of the Ticuna, succeeded in gathering some of the latter into a new mission village which he called Nuestra Señora de Loreto (now Loreto, Peru), one of the "lower missions" of the Jesuit province of Mainas. At the time of the expulsion of the Jesuits in 1768 it was in charge of Father Segundo del Castillo and contained 700 souls, being one of the largest of the province. After the withdrawal of the Jesuits the mission was given over to the Franciscans, under whom the work was continued until interrupted by the long Revolutionary struggle beginning in 1810. Under the new republican government the missions were neglected and rapidly declined, but the Christian Ticuna are still served by resident priests at Loreto and Tabatinga, including the auxiliary villages. Marayc gives a vocabulary of the language.

From the American officer, Lieut. Herndon, we have the following interesting account (condensed) of the Ticuna mission station of Caballococha near Loreto, as he found it in 1832. The village is situated on the caño river, about a mile and a half from the entrance and at the same distance from the lake. It contains 275 inhabitants, mostly Ticuan Indians. These are darker than the generality of the Indians of the Marañon, though not so dark as the Marubos, and they are beardless, which frees them from the negro look that these last have. Their houses are generally plastered with mud inside, and are far nearer looking and more comfortable than the houses of the Indian vector poison, though the latter however entirely owing to the activity and energy of the priest, Father Flores, who seems to have them in excellent order. They are now building a church for him, which will be the finest in the Montaña (forest region). The men are all decently clad in frocks and trousers; and the women in the, much more costly, of cotton cloth around the loins, wear a short tunic covering the breast. Father Flores keeps the Indians at work, sees that they keep themselves and houses clean, and the streets of the village in order, and I saw none of the abominable drinking and dancing with which the other Indians invariably wind up on Sunday." Through the kindness of Father Flores he was able to witness a heathen incantation over a sick man. On approaching the house they heard a number of persons singing inside, and, says Herndon, "I was almost enchanted myself. I never heard such tones, and think that even instrumental music could not be made to equal them. I have frequently been astonished at the power of the Indians to mock animals, but I had heard nothing like this before. The tones were so low, so faint, so guttural, and at the same time so sweet and clear, that I could scarcely believe they came from human throats, and they seemed fitting in connexion, in which to address spirits of another world." When they entered, the singers fell, and they found only two men sitting by a fire of blazing copal gum, filling an earthen pot with the juice of chewed tobacco, and plainly showing by their manner that the ceremony was not intended for strangers.

Anthrop. Institute, XXIV (London, 1893).

JAMES MOONEY.
The original map of the lower course of the river measures 15', that of the middle course, from Benares to Patna, measures 4' 3" square. In addition there is a map of similar dimensions of the Gagra, the whole accompanied by numerous notes, sketches of particular parts, and maps giving details—an "enormous labour", as he calls it. He also wrote a work on the regions containing the sources of the chief rivers of India. In the field of religions he wrote on Brahminism a work directed against the errors of the Englishmen Z. Holwell and Alexander Dow. Others of his writings were on Indian idolatry, Indian asceticism, the religion of the Parsees, Mohamadanism, the relations of these religions to one another, etc. His writings in the department of the natural sciences are: astronomical observations on the sun-spots and the zodiacal light, studies on the astronomy, astrology, and cosmology of the Hindus, descriptions and observations of the flora and fauna of India. The department of history is represented by writings in Latin on the origin of the Hindus and of their religion, an account in German of the expeditions of Nadir Shah to India, the deeds of the Great Mogul Shah Alam in Persia, and in French the invasions of the Afghans and the conquest of Delhi, and the contemporary history of India for the years 1757–64. In linguistics he wrote a Sanscrit-Persian lexicon, treatises in Latin on the language of the Parsees, on the pronunciation of Latin, etc.

Tieffenaller sent these works in manuscript partly to the Danish scholar Dr. Kratzenstein at Copenhagen, partly to the celebrated French Orientalist and geographer A.H. Anquetil-Duperron (1731–1805). The latter gave due credit to the value and importance of the works, especially those on geography, in his addresses before the French Academy of Sciences ("Journal des Scavans", Dec., 1776), and made the writings of Tieffenaller partly accessible to the learned world in his "Recherches hist. et géogr. sur l'Inde" (1786), and also in his "Carte générale du courant du Gagea et du Gagra dressée par les cartes particulières du P. Tieffenthal" (Paris, 1784). A part of the manuscripts at Copenhagen were obtained by the German scholar Johann Bernoulli of Berlin who used them in connexion with his "Recherches" of Anquetil for the great work "Des Pater Joseph Tiefenthalert de Ges Jesu und apost. Missionarius in Indien historisch-geographische Beschreibung von Hindustan..." (3 volumes, quarto, Berlin-Gotha, 1785–87). The greater part of the first two volumes is devoted to Tieffenaller's writings, his maps, and sketches. The French edition, entitled "Description historique et géographique de l'Inde..." appeared at Berlin in three vols., 4to (1780–91). A large part of his manuscripts are probably still extant in Paris and Copenhagen.

**A. Huonder.**

**Tiepolo, Giovanni Battista (Giambattista),** b. in Venice in 1696; d. at Madrid, 27 March, 1770. The son of a sea-captain and marine merchant, who left behind him a considerable fortune, Tiepolo married, in 1721, Cecilia, the sister of the painter Guardi, by whom he had nine children. His earliest master was Lazzerini, but his artistic career was derived from a careful study of the works of Titian, Piazzetta, Ricci, and especially Veronese. Up to 1740 he painted in Venice and various places in the north of Italy, painting some remarkable works at Milan, in Brescia, and in one or two villas near Venice. He then, accompanied by his son, travelled to Wurzburg, where he resided for three years, executing some magnificent ceiling paintings in the palace of the archbishop. He was back again in Venice in 1753, full of commissions, elected President of the Academy of Padua, and holding high distinction in his native town. In 1761 he accepted the invitation of Charles III, King of Spain, to come to that country to decorate the royal palace of Madrid. Unfortunately, during his residence there he incurred the jealousy and the bitter opposition of Rafael Mengs. He is the last of the great Venetian painters; his works are magnificent in force, brilliance, and skill. As a draughtsman and colourist, few have approached him; as an etcher, he took a high position.

**Giovanni Domenico, son and pupil of the elder Tiepolo.** b. in Venice, 30 August, 1727; d. there, 3 March, 1804. He was his father's assistant but far in draughtsmanship and colouring. His best work is the ceiling in the Palazzo Ducale at Genoa. In his latter years, having satisfactory means, he retired to a villa near Venice and lived in comfort. His marriage had taken place in 1776, and was a scene of great pomp and magnificence. His widow married again after his decease, and the male line of Tiepolo died out with him.

**George Charles Williamson.**

**Tieney, Mark Aloysius, b. at Brighton, Sept., 1795; d. at Arundel, 19 Feb., 1862.** After his early schooling with the Franciscans at Baddesley Green, Warwickshire, he was educated at St. Edmund's College, Old Hall, which he entered in 1810 and where he was ordained priest, 19 Sept., 1818. He remained at the college as professor and procurator in 1818–19. He then served as assistant priest at Warwick Street, London, and afterwards at Lincoln's-inn Fields till his ill-health necessitated his removal to the country mission of Slindon in Sussex. In 1824 he was appointed chaplain to the Duke of Norfolk at Eastbourne, where he spent the rest of his life, devoting himself to historical and antiquarian studies. His chief object was to bring out a new edition of Dodd's "Church History of England", which should incorporate all the documents collected by himself and Kirk. The first volume appeared in 1839, but when he reached the fifth volume in 1843 the work was unfortunately discontinued, as the revival of the history of the seventeenth-century disputes between seculars and regulars...
was thought inopportune and gave offence. Meanwhile his position as an antiquarian had received public recognition, for in 1836 he was elected a Fellow of the Society of Antiquaries and in 1841 a Fellow of the Royal Society. He also acted as secretary to the Sussex Archaeological Society. After the restoration of the hierarchy he became the first canon penitentiary of the Diocese of Southwark, having long been a member of the old chapter. Shortly afterwards, hostilities with Cardinal Wiseman, whose policy he disliked and mistrusted, became very strained. Arising out of Tierney's biographical sketch of Lingard, a controversy began between them on the well-known question whether Lingard had been created a cardinal in pecto, by Leo XII, and Cardinal Wiseman addressed to his chapter a letter complaining of Tierney's criticism of his "Recollections of the last Four Popes". In answer to this Tierney wrote the "Reply to Cardinal Wiseman's Letter to his Chapter" (1858), which was not published. He also wrote "The History and Antiquities of the Castle of Arundel" (London, 1834) and several controversial pamphlets. For a time he acted as editor of the "Dublin Review", succeeding Quin the first editor.

Tigris, Saint, Irish saint, sister of St. Patrick. Much obscurity attaches to her life, and she has been frequently confounded with St. Darerca, another of the five sisters, who are treated of at length by Colgan. St. Tigris was the mother of five sons, all of whom became bishops: Sts. Lomam of Trim; Munis of Forgney; Brocnaid of Emlagh; Brocna of Breaghay; and Mugenc of All Duimi Glain. Jocelyn credits the saint with seventeen sons and five daughters, but Tirechan and the "Tripartite Life" are preferable authorities. Her husband's name was Gollit. The time and place of her death are uncertain.

Wrongful, Unchemical, January 1840: HEALY, Life and Writings of St. Patrick (Dublin, 1905).

Tilly, JOHANNES TESORCLE, COUNT OF, b. at Brabant in 1559; d. at Ingolstadt in April, 1632. He was a member of a noble family of Brabant named Tierscles. His mother was a devoted Catholic; his father took part at first in the revolt of the Netherlands against Spain, but by 1574 became a loyal adherent of Philip II. The son was educated by the Jesuits at Cologne. Like all the great men who fought for the Church and the empire during the era of the Reformation and the Counter-Reformation, Tilly has long been, at least by Protestant and rationalist historians, the man of genuine piety, remarkable self-control, moderation, and disinterestedness, a "monk in the garb of a general". He was honest, even to the enemy, a father to his soldiers, and humane to the common people, whom he protected as far as he could against acts of violence. As a general he was celebrated for his caution, his able grasp of situations, for the excellent preparatory training he gave his troops, and his never-failing readiness to meet the enemy and force him to give battle. He learned the art of war under the celebrated general, Alexander Farnese; at a later date Tilly surpassed his teacher. Up to 1594 he took part in the wars, some political and some religious, which laid waste the country from the mouth of the Rhine to the Seine: the War of Cologne, the revolt in the Netherlands, the War of the Holy League. In 1594 Henry IV would have been glad to have Tilly as one of his generals. During the years 1600-08, Tilly served Emperor Rudolph II and fought in Hungary against the Turks; in 1604 he rescued Gran; in 1605 he was commander-in-chief of the imperial forces; but the quarrel in the House of Austria and Rudolph's mental decay made success almost impossible. During the period 1610-30 Tilly commanded the army of Maximilian of Bavaria. Maximilian was a man very similar to Tilly; they seemed made to work together. Tilly was to command the army of the newly-founded League of the Catholic States of the empire.
TILMBRIAS

725 TILMBRIAS

During the era of peace up to 1820, Tilly created the Bavarian army, the flower of the army of the League, and the first standing army in the empire that was paid and fed, not by plundering and enforced contributions, but out of the regular revenues of the State. With these troops as his mainstay he took part in the subsequent war in Western Germany and the Holy Roman Empire during the years 1620–30. In 1620 the force of his attack gained the victory at the battle of the White Mountain (8 November) over the Bohemians who had revolted against the emperor. For four years Tilly was engaged in a contest with Ernst of Mansfeld and Christian of Brandenburg. Even after the war from Bohemia to the lands of the empire, so that Tilly was often hampered by political considerations. In 1622 Tilly forced Mansfeld to give battle at Wieseloch, but the result was indecisive. He then destroyed the army of George Frederick of Baden at Wimpfen, and that of Christian of Palatinate at Hochstädt, and took Heidelberg and Mannheim. After this Mansfeld's army dispersed and Tilly had now the strategic control of the whole of southern Germany. But in the next year, Mansfeld and Christian entered north-western Germany with fresh armies. As the estates of Hesse and some of those of Lower Saxony adhered to the imperial standard, Tilly was able to make an energetic advance against Mansfeld and to defeat him at Stadlton in 1623. Political considerations, however, prevented his pursuit of Mansfeld. The inhabitants of north-western Germany were roused to fanaticism against Tilly by the suggestion that he would force them to become Catholics. The districts on the middle course of the Weser which he garrisoned after his victory at Stadlton yielded so little that, in spite of all his efforts to feed his army by orderly methods, the soldiers suffered privations and took to plundering, which continued until the autumn, and finally forced him to leave them. The danger that the King of Denmark would take part in the war led Tilly in 1625 to beg the emperor to raise an army in the empire and to place it under Wallenstein's command. Wallenstein kept all the prosperous territories for himself and limited Tilly more than ever to the districts poor in revenue of south-western Germany. Tilly now found it increasingly difficult to maintain discipline because Wallenstein collected mercenary soldiers by the promise of rich booty, and raised these troops on a larger scale and more successfully than any previous command of his, at any time during the Thirty Years' War. Moreover, from 1627, and especially after the Edict of Restitution of 1629, Tilly was obliged to carry out numerous orders to restore to the Church lands which had been taken from it contrary to the religious peace; in this way he gained the reputation of being a bitter enemy of Protestantism. Despite the force of character, however, he overcame all difficulties.

In 1626 Tilly prevented the union of the Dukes with the Landgrave of Hesse who had revolted, and later, in August, destroyed the Danish army at Lutter on the Barenberg. In 1627 he drove the Danes over the Elbe, but on account of a wound, which prevented him from participating in the war, Wallenstein gained the honours of the victory in the campaign in Holstein. When he had recovered Tilly took Stade at the mouth of the Elbe, and thus gained control over the whole of north-western Germany excepting Bremen. He was not able to advance against the Hanseatic city on account of the enormous military difficulties of Wallenstein's about the same time at Stralsund and Magdeburg. The great success he had later led him to hope for a time that peace could be restored in the empire, but in this he was disappointed. Once more for political reasons he could not gain permission from the emperor to attack the Dutch, who exercised a certain hostility to Wallenstein, refused to give Tilly permission to go to Wallenstein's aid at Stralsund, and thus to bar Gustavus Adolphus from entering the empire. They also obliged Tilly and Wallenstein to dismiss a large part of their troops, a course that aroused a bitter and suspicious feeling in the emperor's camp. Tilly's authority over the troops of the last mentioned state was then a general began when he took command of the imperial army. As usual, he took the offensive as soon as he could and began operations near the Baltic coast. Gustavus Adolphus, however, avoided a battle and sought to tire Tilly out by marching about so as to wrest the initiative from him. Tilly put an end to this by marching against Magdeburg in March 1630; this was the boldest stroke of his entire career as a commander. Gustavus seized the opportunity to advance up the Oder into the territories ruled by the emperor; probably, however, Tilly's bold measures forced Gustavus to follow him, in order to relieve Magdeburg.

When Tilly stormed Magdeburg on 20 May, its Swedish garrison laid the city in ashes, and it lost its strategic importance; he was, therefore, obliged to retreat towards Thuringia. Gustavus Adolphus now showed himself to be superior to Tilly in tactics at the battle of Breitenfeld on 17 September. Tilly followed the methods of Alexander Farnese, but these proved unsuccessful against Gustavus Adolphus's more modern generalship. Tilly's army was nearly destroyed, and he, now seventy-two years old, was for a short time crushed by the blow. However, in the winter of 1630–1 Tilly's forces were reinforced by new troops to prevent the Swedes from marching into the territories of the chiefs of the League in Franconia. But on account of the insufficient means at his disposal, the fear of the Swedes, and the timidity of the emperor and of the Catholic estates, his army disbandied on the way. Undismayed, Tilly began again on a smaller scale. In March, after carefully making his arrangements, he stormed Bamberg, which had fallen into the hands of the Swedes, and gained there the first victory over them. He now planned to advance towards Eger in order to disperse the Swedes and then to attack the imperial quarters-general. The battle took place 15 April, and at its very beginning Tilly and Aldringen were severely wounded; this gave Gustavus Adolphus the victory. Before his death Tilly provided for the timely garrisoning of Ingolstadt and Ratisbon by the Bavarian troops, a measure which he thought of importance for the conduct of the war. Tilly was always victorious in every campaign in which he had sufficient resources. He died when the campaign against Gustavus had hardly begun. It is, therefore, unjust to judge of his ability as a commander by his failure at the beginning of his campaign. He was inferior to no commander of his own time.

KLÖPF, Tilly im 30-jährigen Kriege (Stuttgart, 1881); VILLARMEONT, Tilly ou la guerre de treize ans (Touray, 1880).

MARTIN SPARN.

Tirmbrias, a titular see in Pisidia, suffragan of Antioch. It is called Thymbrium in the official lists of the Roman Curia, the name being more or less misspelled in documents, but the spelling here adopted is that found on coins where the inhabitants are
called, in the genitive plural, ῥυμπριδίων. At a late period we find the form ῥυμπρίδα, neuter plural, or perhaps ῥυμπρίδα. The exact site of the city is unknown. It is mentioned by Strabo (XII, 7, 2); the critic of that name the Lucian of Samosatta, in the Gastronomia, indicates a locality near the upper part of that river, the lower part belonging to Byzantine Pamphylia. It was probably situated somewhere in the plain called ῤγαλία, in the valley of Koniah. In ecclesiastical writings it is mentioned as late as the third quarter of the fourth century. Le Quien (Or. Christian., I, 1099) names three of his bishops: Constantine, present at the Councils of Constantinople, 680 and 692; John, at the Council of Nicea, 787; Theodosius, at the Photian Council of Constantinople (879).

S. PÉTRIDÉS.

**Time.**—The problem of time is one of the most difficult and most keenly debated in the field of natural philosophy. To arrive at a satisfactory orientation in regard to this discussion, it is important to distinguish two questions: (1) What are the notes, or elements, contained in our subjective representation of time? (2) To what external reality does this representation correspond?

(1) As to the first question, philosophers and scientists in general agree in this: that the notion, or concept, of time contains three distinct ideas fused into one indivisible whole. (a) One is the idea of duration. Every mind distinguishes in time the past, the present, and the future, which parts are essentially exclusive simultaneity and can be realized only one after the other. (b) Again, time implies continuity. Speaking of events here below, in our own life, we cannot conceivably imagine an interval of duration, however short, in which we should cease to grow older, or in which moment should cease to follow moment. The march of time knows neither pause nor interruption. (c) Lastly, a continuous succession cannot be a continuous succession of nothing. Therefore the concept of time represents to us a reality, the parts of which succeed each other in a continuous manner. It matters little here whether this reality is purely ideal, or is realized outside of us, for we are dealing only with the concept of time. Such are the three essential elements of the subjective representation. From these considerations, it is clear that the question of the existence of time belongs to the domain of cosmology. By reason of its character as continuous, successive, divisible, and measurable, time belongs to the category of quantity, which is a general attribute of bodies, and cosmology has for its object the essence and general attributes of matter.

(2) The second question, relating to the objectivity of the concept of time, is one upon which philosophers, as well as scientists, are divided: no fewer than fifteen different opinions may be enumerated; these, however, may be grouped in three classes. One class embraces the subjective or immanent views, of which Kant is the chief representative; these regard time as completely a creation of the knowing subject. To Kant and his followers time is an a priori form, a natural disposition by virtue of which the inner sense clothes the acts of the external senses, and consequently the phenomena which these acts represent, with the distinctive characteristics of time. Through this form internal and external phenomena are apprehended by us as simultaneous or successive, anterior or posterior, to one another, and are submitted to necessary and universal time-judgments. To this class, also, belongs the view that time is not a thoroughly subjective, attribute to time only a conceptual existence. To Leibniz and others time is "the order of successions", or a relation between things that follow one another; but if these things are real, the mind perceives them under the form of instants between which it establishes a relation that is purely mental. According to Balmes, time is a relation between being and non-being; subjective time is the perception of this relation; objective time is the relation itself. The judgments that of being and non-being are found in every succession, the relation between these two ideas cannot represent to us a real continuousness, and therefore it remains in the ideal order. Locke considers time as a part of infinite duration, expressed by periodic intervals such as time of days, time of years, time of months, and time of minutes. According to Spencer, a particular time is the relation between two states in the series of states of consciousness. The abstract notion of a relation of aggregated positions between the states of consciousness constitutes the notion of time in general. To the relation Spencer attaches an essential character, and attributes relative objectivity to psychological time alone. For Bergson homogeneous time is neither a property of things nor an essential condition of our cognitive faculty; it is an abstract schema of succession in general, a pure fiction, which makes it possible for us to represent its existence in the mind. But besides this homogeneous time, Bergson recognizes a real duration, or, rather, a multiplicity of durations of unequal elasticities which belong to the acts of our consciousness as well as to external things. The systems of Descartes and of Baumann must also be classed within this category.

In opposition to this class of opinions which represent the existence of time as purely conceptual, a second class represent it as something which has complete reality outside of our minds. These opinions may fairly be described as ultra-realist. Certain philosophers, notably F. M. Mendel and the ancient Materialists, regard time as a basic category, independent of all created things and capable of surviving the destruction of them all. Infinite in its extension, it is the receptacle in which all the events of this world are enclosed. Always identical with itself, it permeates all things, regulating their course and preserving in the uninterrupted flow of its parts an absolutely regular mode of succession. Other philosophers, e. g. Clarke and Newton, identify time with the eternity of God or regard it as an immediate and necessary result of God's existence, so that, even were there no created beings, the continuation of the world would involve the repetitive succession of matter, time, duration, or time. These ultra-realist philosophers substantiate time; others again make it a complete being, but of the accidental order. For de San Time is an accident sui generis, distinct from all ordinary accidents; it is constituted as the local movement of parts which succeed each other in a continuous manner, but with perfect uniformity; by this accident, which is always inherent in substance, being and the accidents of being continue their existence enveloped in a succession which is everywhere and always uniform. Lastly, according to Dr. Halles, the substantival existence of the accidents of time involves an intrinsic without cessation, and this regular and continuous increase is by no means occasional or transitory, but always remains a veritable acquisition to the being which is its subject. Of this quantitative increment time is the representation. To sum up, all systems of this second class have as their distinctive characteristic the assertion of an external concrete reality—whether substantial or accidental—which adequately corresponds to the abstract concept of time, so that our representation of time is only a copy of that reality.

The two extreme classes of opinions in the system proposed by the majority of the Scholastics, ancient and modern. For them the concept of time is partly subjective, partly objective. It becomes concrete in continuous, notably in local, movement; but movement becomes time only with the
intervention of our intelligence. Time is defined as the measure of movement according to an order of anteriority and posteriority (numerus motus secundum prae et posteros). Once local movement is divided by the movement of the universal concept of time are found in it. Motion, being objectively distinct from rest, is something real; it is endowed with true continuity; nevertheless, in so far as it is divided by the intelligence, it contains successive parts actually distinct among themselves—some posterior—before which place a fleeting present. In the elaboration of the idea of time, therefore, movement furnishes the intelligence with a successive, continuous reality which is to be the real object of the concept, while the intelligence conceives it in that it has in common with the object itself, not in its constitutive and individual notes—and makes it, formally, time, by dividing the continuity of the movement, making actual that distinction of parts which the movement possesses only potentially. In fact, say the Scholastics, we never perceive time apart from movement, nor do we measure it in the eternal duration borrowed from local movement, particularly the apparent movement of the heavens.

Whatever be its objectivity, time possesses three inalienable properties. First, it is irreversible; the linking of its parts, or the order of their succession, cannot be changed; last time does not go on before first time. According to the Scholastics, the irreversibility of this property is found in the application to time of the principle of causality. As the parts of time, he says, are to each other in the relation of cause to effect, and as the cause is essentially antecedent to its effect, it is impossible to reverse this relation. According to the Scholastics, this immutability is based upon the very nature of concrete movement, of which one part is essentially anterior to another. Secondly, time is the measure of events in this world. This raises a knotty problem, which has so far not been theoretically solved. Time can be a permanent measure only if it is concretized in a uniform movement. Now, to know the uniformity of a movement, we must know not only the space traversed, but the velocity of the transit, that is the time. Here there is unquestionably a vicious circle. Lastly, for those who concretize time in movement, a much debated question is, whether time and space can be infinite, that is, from the beginning. St. Thomas and some of the Scholastics see no absolute impossibility in this, but many modern thinkers take a different view.

D. NTS.

Timoteo and Symphorian, Saints, martyrs whose feast is observed on 22 August. During the pontificate of Melchides (311-13), St. Timoteo came from Antioch to Rome, where he preached for fifteen months and lived with Sylvester, who later became pope. The prefect of the city, Tarquinus Perpenna, threw him into prison, tortured, and finally beheaded him in 311. A Christian woman named Theon buried him in her garden. This is related in the Liber de vir. The name of Timoteo occurs in the earliest martyrlogies.

According to a legend of the early fifth century, St. Symphorian of Autun was beheaded, while still a young man, during the reign of Marcus Aurelius.

His mother, the Blessed Augusta (7), encouraged him on his way to execution, 22 August, 178. Bishop Euphronio (d. 490) built a handsome church over his grave, connected with a monastery, which became popular at Tours. Symphorian lived from 1656 until its suppression in 1791. Abbot Germanus later became Bishop of Paris, where he dedicated a chapel to the saint. St. Symphorian is the patron saint of Autun. His veneration spread at an early date through the empire of the Franks. His cult was especially popular at Tours. St. Gregory relates a miracle wrought by the saint.

Acta SS., August, IV, 353-35, 491; RUTILIUS, Acts Martyrum; DIBERT, Saint Symphorian et son culte (3 vols, Autun, 1861); DUCHEREAU, Fastes épiscopaux, i, 32.

Timothy Almus. See EUTHYCIANISM; MONOPHYSITES.

Timothy and Titus, EPISTLES TO (THE PASTORALS).—TIMOTHY AND TITUS. —Saints Timothy and Titus were two of the most beloved and trusted friends of St. Paul. They were fellow laborers of St. Paul during many of his journeys. Timothy is mentioned in Acts, xvi, 1; xvi, 14, 15, 1; xviii, 5; xix, 22; xx, 4; Rom., xvi, 21; I Cor., iv, 17; II Cor., i, 19; Phil., i, 19; Col., i, 1; I Thess., i, 1; 2, 18; 11 Thess., i, I; I Tim., 2, 18; v; 20; II Tim., 1, 2; Philem., i, 1; Heb., iii, 23; and James, v, 19. Titus is in II Cor., v, 23; Col., ii, 18; 2, 6, 16; Tit., v, 18; xi, 12; Gal., ii, 1, 3; II Tim., iv, 10; Tit., i, 14; 4. St. Timothy has been regarded by some as the "angel of the church of Ephesus", Apoc., ii, 1-17. According to the ancient Roman martyrlogy he died Bishop of Ephesus. The Bollandists (24 Jan.) give two lives of St. Timothy, one ascribed to Polycrates (an early Bishop of Ephesus) and a contemporary of St. Ireneus and the other by Metaphrastes, which is merely an expansion of the former. The first states that during the Neronian persecution St. John arrived at Ephesus, where he lived with St. Timothy until he was exiled to Patmos under Domitian. Timothy, who was unmarried, continued Bishop of Ephesus until when he was over eighty years of age, he was mortally beaten by the pagans. According to early tradition Titus continued after St. Paul's death as Archbishop of Crete, and died there when he was over ninety.

EPISTLES TO TIMOTHY AND TITUS.—AUTHENTICITY. —The Epistle to Timothy is generally included in the "internal evidence" of the New Testament. This section will be devoted to the important question of authenticity, which would really require a volume for discussion. Catholics know from the universal tradition and infallible teaching of the Church that these Epistles are inspired, and from this follows their Pauline authorship as they all claim to have been written by the Apostle. There was no real doubt on this question until the beginning of the nineteenth century; but since that time they have been most bitterly attacked by German and other writers. Their objections are principally based on internal evidence and the alleged difficulty of finding a place for them in the lifetime of St. Paul.

A. Objection from the absence of Pauline vocabulary. — Moffatt, a representative writer of this school, writes (Encyc. Bib., IV): "Favourite Pauline phrases and words are totally wanting.... The extent and significance of this change in vocabulary cannot ade-

[Text continues]
Philem. Moreover, the noun ἄδεια is found in the Pastoral Epistles, II Tim., ii, 19.

Ἄπασθαρα (uncleanness) does not occur in I Cor., Phil., II Thess., and Philem. If that does not tell something, these Epistles why is it quoted against the Pastoral?

Τιλοβία (adoption).—This word is three times in Rom., once in Gal., but it does not occur at all in I and II Cor., I and II Thess., Phil., Col., and Philem. Why its omission should be used against the Pastors as not to be understood.

Father (Our Father).—Two expressions, God “our Father” and God “the Father” are found in St. Paul’s Epistles. The former is frequent in his earlier Epistles, viz., seven times in Thess., while the latter expression is not used. But in Romans “God our Father” occurs twice, and “the Father” once. In I Cor., we read God “our Father” once, and “the Father” twice; and the same has to be said of II Cor. In Gal. we have “our Father” once and “the Father” three times. In Phil., the former occurs twice and the latter once; in Col. the former only once, and the latter two. “The Father” occurs once in each of the Pastoral Epistles, and from the above it is evident that it is just as characteristic of St. Paul as “our Father”, which is found but once in each of the Epistles to the Romans, I and II Cor., Gal., and Col., and it would be absurd to conclude from this that all the remaining chapters were spurious.

But we need only say in II Thes., twice in Rom., once in I Cor., twice in II Cor., thrice in Gal., and not at all in I and II Thess., Phil., Col., and Philem., admitted to be genuine by Moffatt.

Ἄποκαλύφθεις (reveal), a word not found in II Cor., I Thess., Col., and Philem., and only once in Phil., in I Thess., II Cor., Phil., and Philem., so it is no test of Pauline authorship. Its compounds are not met in I and II Thess., Phil., Col., or Philem., and, with the exception of Gal., in the others sparingly.

Ἐφη (to be operative) is seen but once in each of Rom., Phil., Col., and II Thess.; and no one would conclude from its absence from the remaining portions of these Epistles, which are longer than the Pastors, that they were not written by St. Paul.

Ὑποτίθημα (perform), though several times in Rom. and II Cor., and once in I Cor. and in Phil., is written in II Thess., Gal., Col., and Philem., which are genuine without it.

Ὑποτίθημα (boast), only once in Phil., and in II Thess., and not at all in I Thess., Coloss., and Philem.

Ὑποτίθημα (folly) is five times in I Cor., and nowhere else in St. Paul’s Epistles.

To save the reader by going through the entire list. We have carefully examined every word with the like results. With perhaps a single exception, every word is absent from several of St. Paul’s genuine Epistles, and the exceptional word occurs but once in some of them. The examination shows that the list does not afford the slightest argument against the Pastors, and that St. Paul wrote a great deal without using such words. The compilation of such lists is likely to leave an erroneous impression on the mind of the unguarded reader. By a similar process, with the aid of a concordance, it could be proved that every Epistle of St. Paul has an appearance of spuriousness. It could be shown that Galatians, for instance, does not contain many words that are found in some of the other Epistles. A method of reasoning which leads to such erroneous conclusions should be discarded; and when writers make very positive assertions of this kind, they are responsible not only for falsifying the text in order to get rid of whole books of Scripture, their other assertions should not be readily taken for granted.

B. Objection from the use of particles.—Certain particles and prepositions are wanting. Jullicher in his “Intro. to the New Test.,” p. 181, writes: “The fact that brings conviction [against the Pastoral] is that many words which were indispensable to Paul are absent from the Pastoral Epistles, e.g. ἐπί, ἀποκαλύφθεις, ἐφῆ. But, as Jacquier points out, nothing can be conclusively inferred from this fact. Paul’s employment of them is not uniform, and several of them are not found in his unquestioned Epistles. Dr. Headlam, an Anglican writer, pointed out in a paper read at the Church Congress, in 1904, that ἐπί occurs twenty-six times in the four Epistles of the second century only, but not at all in all of his others, but not at all in Col., Phil., or Philem. ἀποκαλύφθεις occurs eighteen times in Rom., Gal., and Cor., but not at all in Col. or II Thess. The word ἐφῆ does not occur in II Thess., II Cor., Eph., Col., or Philem. We find that ἐφῆ does not appear at all in Rom., II Thess., Col., II Thess., and Phil., nor at all in Col. or II Thess. The necessity to go through the entire catalogue usually given by opponents, for the same phenomenon is discovered throughout. Particles were required in the argumentative portions of St. Paul’s Epistles, but they are usually very sparingly in the practical parts, where he resembles the Pastors. Then the employment also, too, depended greatly on the character of the amanuensis.

C. Objection from ἡ ἑπαξ ἐπιγραφήmena.—The great objection to the Pastoral is the admittedly large number of ἡ ἑπαξ ἐπιγραφήmena found in them. Workman (Expository Times, VII, 141) taking the term “epiγραφήmena” in its restriction to a particular Epistle and not again occurring in the New Testament, found from Grimm-Thayer’s “Lexicon” the following numbers of ἡ ἑπαξ ἐπιγραφήmena: Rom. 113, I Cor. 110, II Cor. 99, Gal. 34, Eph. 43, Phil. 41, Col. 38, I Thess. 23, II Thess. 11, Phil. 5, I Tim. 32, II Tim. 53, Titus 33. The numbers are somewhat reduced as they contain words from variant readings. These figures would suggest to most people, as they did to Dean Farrar, that the number of peculiar words in the Pastors does not call for any special explanation. Mr. Workman, however, thinks that for scientific purposes the proportionate length of the Epistles should be taken into account. He calculated the average number of ἡ ἑπαξ ἐπιγραφήmena occurring on a page of Westcott and Hort’s text with the following results: II Thessalonians 3-6, Philemon 4, Galatians 4-1, I Thessalonians 4-4, Romans 4-3. In the Pastors 4-9, II Corinthians 6-10, Colossians 6-3, Philippians 6-8, II Timothy 11, Titus and I Timothy 13. The proportion of ἡ ἑπαξ ἐπιγραφήmena in the Pastoral is large, but when compared with Phil., it is not larger than that between II Cor. and II Thess. It has to be noted that these increases in the number.

For a similar argument on Dante see Butler's "Paradise," XI.
The totals of hapax legomena for some of the plays are: "Julius Caesar" 93, "Comedy of Errors" 88, "Macbeth" 145, "Othello" 204, "King Lear" 3. The totals of hapax legomena are also given in "The Merchant of Venice" 148. This scrutiny of the words peculiar to each play throws light on another difficulty in the Pastoralas, viz. the recurrence of such expressions as "a faithful saying," "sound words," etc., "Moon-call" occurs five times in "The Tempest," and "mountaineer" three; "pulpit," six times; one scene "Julius Caesar" and never elsewhere; "hovel" five times in "King Lear"; "mountaineer" four times in "Cymbeline," etc. Compare, "God forbid," μὴ γενοσκεῖν of Gal., Rom., once in I Cor.—not in the other Epistles of St. Paul.
"Sound words" was used by Philo before St. Paul, in whom it may be due to intercourse with St. Luke. (See Plumptre's list of words common to St. Luke and St. Paul, quoted in Farrar's "St. Paul," I, 481.)
Mr. Workman has overlooked one point in his very useful article. The hapax legomena are not evenly distributed over the Epistles; they occur in groups. The most natural place of such a Col. is in the second chapter, where a new subject is dealt with (see Abbott, "Critic...Comment. on Ep. to the Ephes., and to the Coloss."). In "Internat. Crit. Comment.") This is as high a proportion as in any chapter of the Pastoralas. Something similar is observable in II Cor. These, etc. Over sixty out of the seventy-five hapax legomena in I Tim. occur in forty-four verses, where the words, for the most part, naturally arise out of the new subjects treated of. The remaining two-thirds of the Epistle have as few hapax legomena as any other portion of St. Paul's writings.
Compasses of 0, 1, 2, 3, 4, often objected to, are also found in his other Epistles.
The "Authorship of the Pastoral Epistles" was discussed in "The Church Quarterly" in October, 1906, and January, 1907. In the first the writer pointed out that the anti-Pauline hypothesis presented more difficulties than the Pauline; and in the second he made a detailed examination of the hapax legomena. Seventy-three of these are found in the Septuagint, of which St. Paul was a diligent student, and any of them might just as well have been used by him as by an imitator. Ten of the remainder are suggested as coming from a Pauline source. For, "Paul's vocabulary is not large, and we are able to suggest for such expressions as ἀγαθοπρεπής in I Tim., vi, 18, ἀγαθοπρεπὴς of Luke, vi, 9, ἀγαθοπρεπὴς, contracted from ἀγαθοπρεπεῖς, Acts, xiv, 17. St. Paul has ἐργασιμοῦ τῷ ἀγάθῳ Rom., ii, 10. From all that has been said, it is not surprising that Thayer, in his translation of Colson's "Lexicon," wrote: 'The monumental misjudgments committed by some who have made questions of authorship turn on vocabulary alone, will deter students, it is to be hoped, from misusing the lists exhibiting the peculiarities of the several books.'
D. Objection from style.—"The comparative absence of rugged as well as of refined language, the omission of words, all point to another sign-manual than that of Paul" (Ency. Bib.).—Precisely the same thing could be urged against some of St. Paul's other Epistles, and against large sections of the remainder. All critics admit that large portions of the Pastoralas are so much like St. Paul's writings that they actually maintain that they are taken from fragments of genuine letters of the Apostle (now lost). Various discordant attempts have been made to separate these portions from the rest, but with so little success that Jullicher confesses that the thing is impossible. On the other hand, it is a general opinion of the rest that all these Epistles, to a greater or less degree, are Paul's, and that the writer of them is the same and the writer. That being the case, and it being impossible to deny that portions indistinguishable from the rest are by St. Paul, it follows that the
early and universal tradition ascribing the whole of them to the Apostle is correct.

As we pass from one to another of the four groups of St. Paul's Epistles—(1) Thessalonians; (2) Galatians, Corinthians, Romans; (3) Captivity Epistles; (4) Pastoral Epistles—we find in the order of style side by side with very marked and characteristic resemblances, and that is precisely what we find in the case of the Pastoral Epistles. There are some striking points of connexion between them and Phil., the Epistle probably nearest to them in date; but there are many resemblances in vocabulary, style, and ideas connecting them with portions of all the other Epistles, especially with the practical parts. There are, for instance, forty-two passages connecting I Tim. with the earlier Epistles. The terms are nearly identical, but display an amount of liberty denoting the working of the same independent mind, not a conscious imitation. The Pastoral Epistles show throughout the same marks of originality as are found in all the writings of the Apostle. There are similar anacolutha, incomplete sentences, play on words, long drawn periods, like comparisons, etc. That they are altogether personal, and do not show the rugged fervour of style confined, for the most part, to the controversial and argumentative portions of his large epistles. (See the very valuable book by James, "Genuineness and Authorship of the Pastoral Epistles", London, 1906; also Jacquier, and Lassus. It may be in connexion, that Van Steenkiste, professor at the Catholic Seminary of Bruges, asserted, as long ago as 1876, that the inspiration of the Pastoral and their Pauline authorship would be sufficiently safeguarded if we accepted the view that they were written in the name and with the authority of the Apostle by one of his companions, say St. Luke, to whom he distinctly explained what he had to be written, or to whom he gave a written summary of the points to be developed, and that when the letters were finished, St. Paul read them through, approved them, and signed them. This, he thinks, was the way in which Hebrews also, was written (S. Pauli Epistol, II, 283).

E. Objection from the advanced state of church organization.—This objection is adequately answered in the articles HIERARCHY OF THE EARLY CHURCH, BISHOP, etc. See also "The Establishment of the Episcopate in the Church", By J. lưng, (London, 1909), 115. The seven, St. Stephen, Philip, etc., were set aside for their ministry by the Apostles by prayer and the laying on of hands. Immediately after this we read that they were filled with the Holy Ghost, and preached with great success (Acts, vi, vii). From St. Luke's usual method we may conclude that a similar ceremony was employed by the Apostles on other occasions when men were set aside to be deacons, presbyters, or bishops. We read of presbyters with the Apostles at an early date in Jerusalem (Acts, xv, 2) and to the earliest tradition, St. James the Less was appointed bishop three days after the Ascension of the Apostles, and succeeded by his cousin Simeon in A.D. 62. Sts. Paul and Barnabas ordained priests in every church at Derbe, Lystra, Antioch of Pisidia, etc. (Acts, xiv, 22). Bishops and priests, or presbyters, are mentioned in St. Paul's speech at Miletus (Acts, xx, 28). In his first Epistle (I Thess., v, 12) St. Paul speaks of rulers who were over them in the Lord,—see also Rom., xii, 8; "governments" are referred to in I Cor., xxi, 28, and "Pastors" in Eph., iv, 11. St. Paul wrote "to all the saints in Christ Jesus, who are at Philippi, with the bishops and deacons" (Phil., i, 1). In Eph., iv, 28; Eph., iv, 11. St. Paul is not giving a list of offices in the Church, but of charismatic gifts (for the meaning of which see HIERARCHY OF THE EARLY CHURCH). Those who were endowed with supernatural and transitory charisma were subject to the Apostles and presumably to their delegates. Side by side with the possessors of such gifts we read of "rulers", "governors", "pastors", and in other places of "bishops", "priests", and "deacons". These, we may lawfully assume, were the specially appointed divinely appointed by the Holy Ghost by the Apostles, by prayer and laying on of hands. Amongst these so appointed before A.D. 64 there were certainly ordained deacons, priests, and possibly bishops also. If so they had bishop's orders, but the limits of their jurisdiction were not as yet, perhaps, very clearly defined and depended solely on the will of the Apostles. It is assuredly in the highest degree likely that the Apostles, towards the end of their lives and as the Church extended more and more, ordained and delegated others to appoint such priests and deacons as they had been in the habit of appointing themselves. The earliest tradition shows that such a thing took place in Rome by A.D. 67; and there is nothing more advanced than this in the Pastoral Epistles. Timothy and Titus were consecrated bishops to rule with Apostolic authority and appoint deacons, priests, and bishops (probably synonymous in the Pastoral Epistles).

But a further objection is raised as follows: "The distinctive element, however, i.e., the prominence assigned to Timothy and Titus is intelligible only on the supposition that the author had specially in view the ulterior end of vindicating the evangelical profession of his labourers where this was liable for various reasons to be challenged... The craving (visible in Clem. Rom.) for continuity of succession as a guarantee of authority in doctrine (and therefore in discipline) underlies the efforts of this Paulistin to show that Timothy and Titus were genuine heirs of Paul" (Ency. Bib., IV).—If this craving is visible in St. Clement of Rome, who was a disciple of the Apostles there and wrote less than thirty years after their death, it is surely more likely that he was maintaining an organization established by them than that he was defending one of which they were ignorant. If these Epistles were written against people who challenged the authority of bishops and priests about A.D. 100, why is it that these opponents did not cry out against forgeries written to confute themselves? But of all this there is not the slightest shred of evidence.

F. Objection that the Roman epistle of St. Paul.—The writing in the "Ency. Bib." is never tired of accusing the defenders of the Epistles of making gratuitous assumptions, though he allows himself considerable liberty in that respect throughout his article. It is a gratuitous assertion, for example, to state that St. Paul was put to death at the end of the first Roman captivity, A.D. 63 or 64. Christianity was not yet declared a religion licita, and according to Roman law there was nothing deserving of death against him. He was arrested to save him from the Jewish mob in Jerusalem. The Jews did not appear against him during the two years he was kept in prison, and so the poet Pliny the Younger delivered had he not appealed to Caesar, so there was no real charge against him when he was brought before the emperor's or his representative's tribunal. The Epistles written during this Roman captivity are not that he supposedly had been arrested (Philem., 22; Phil., ii, 24). Lightfoot, Harnack, and others, from the words of Clem. Rom. and the Muratorian Fragment, think that he was not only released, but that he actually carried out his design of visiting Spain. During the years from 63—67 there was ample time to visit Crete and other places and write I Tim. and Titus. II Tim. appears from his second Roman prison soon before his death.

G. Objection from the errors condemned.—It is said that the errors referred to in the Pastoral did not exist in St. Paul's time, though the most ad-
vanced critics (Ency. Bib.) have now abandoned the theory (maintained with great confidence in the nineteenth century) that the Epistles were written against Marcion and other Gnostics about the middle of the second century. It is now conceded that they were known to Sts. Ignatius and Polycarp, and therefore written not later than the end of the first century or early part of the second. It requires a keen critical sense to detect the existence of errors against Marcion among the Epistles of Gnostics as early as the time of Ignatius, the seeds of which did not exist thirty or forty years earlier, or of which St. Paul could not have foreseen the development.

"The environment is marked by incipient phases of what afterwards bloomed out into the Gnosticism of the second century" (Ency. Bib.).) The publications of Gnostics are now praised by competent scholars at a much earlier date than that indicated by this writer. No known system of Gnosticism corresponds with the errors mentioned in the Pastorals; in reply to this, however, it is said that the "errors are not given in detail to avoid undue anachronisms" (ibid.). Sometimes opponents of the authenticity unfairly attack the actual contents, but here the Epistles are condemned for "contents" which they do not contain. An amusing instance of the precariouslyness of the subjective method is seen in this same article (Ency. Bib.). The writer arguing against the authenticity of the object of Gnosticism and postulates that "Philemon is the one private note of Paul extant." We are suddenly brought up, however, by a note (editorial?) within square brackets: "compare, however, Philemon." On turning to Philemon we find van Manen asserting, with equal confidence, that the Apostle had nothing whatsoever to do with that Epistle, and he supports his statement by the same kind of subjective arguments and assertions that we find running through the article on Timothy and Titus. He even throws out the absurd suggestion that Philemon was based on the letter of Pliny, which is given in full by Lightfoot in his edition of Philemon.

Hort in his "Judaistic Christianity" (London, 1898), 130-48, does not believe that the errors of the Pastoral had any connexion with Gnosticism, and he gives a very full reply to the objection with which we are dealing. We may quote from Weiss here, who makes some important distinctions: (1) We must distinguish prophecies about future false teachers, which imply that germs, to say the least, of the future evils are already perceptible (1 Tim., iv. 1-3; 2 Tim., iii., 1-5, iv. 3) from warnings about the present day. Such passages: Hebrews, Hymenaeus, and Philetus must not be taken as direct evidence of a general stream of false teaching; (2) Non-Christian teachers, the corrupters of Christian belief, must not be confounded with misguided Christians. The errors which St. Paul easily foresaw would arise amongst false Christians, and pagans cannot be urged against the Epistles as if they had already arisen. Hort makes out a good case that there is not the smallest trace of Gnosticism in the existing errors amongst the Ephesians and Cretan Christians, which are treated more as trivialities than serious errors. The duty laid on Timothy and Titus is not that of refuting deadly errors, but of keeping themselves clear, and warning others to keep clear of mischievous trivialities usurping the office of religion." He shows that all these errors have evident marks of Judaistic origin. The fact that St. Irenaeus, Hegesippus, and others used the words of the Gnostic in the second century is no proof that Gnosticism was in the mind of their author. Words of Scripture have been employed to confute heretics in every age. This, he says, is true of the expressions ψευδόμονος γρηγόρος, εξηράντας, αἰών, θεμπώνας, which have to be taken in their ordinary sense. "There is not the faintest sign that such words have any reference to what we call Gnostic terms."

Hort takes γεναλογίας in much the same sense in which it was employed by Polybius, IX, ii, 1, and Diodorus Siculus, IV, i, to mean stories, legends, myths of the founders of states. "Several of these early historians, or "logographers" are known to have written books of this kind entitled γεναλογίαι, Polybios, Antiquitates, Simonides, Simonides, the Younger, who bore the title δι Γεναλογίας, as did Pherecydes" (p. 136). Philo included under τὸ γεναλογικόν all primitive human history in the Pentateuch. A fortiori this term could be applied by St. Paul to the rank growth of legend respecting the Patriarchs, etc., which he refers in the "Book of Jubilees" and in the "Haggada." This was condemned by him as trashy and unwholesome. The other contemporary errors are of a like Jewish character. Hort takes ἀντίθεσις τῆς ψευδόμονος γρηγορίας to refer to the casuistry of the scribes as we find in the "Halacha," just as the ψευδόμονος and γεναλογίας designate frivolities such as are contained in the Haggada.

But it is not possible that these (ἀντίθεσις τῆς ψευδόμονος γρηγορίας) refer to the system of interpretation developed later in the Kabbala, of which a convenient description is given in Gigo's "General Introduction to the Scriptures" (see also "Kabbala" in "Jewish Encyclopedia" and Vigouroux, "Dict. de la Bible"). He who followed only the literal meaning of the text of the Hebrew Bible had no real knowledge, or γρηγορία, of the deep mysteries contained in the letters and words of Scripture. By "kabbalistic words were constructed from the initials of several, or sentences formed by using the letters of a word as initials of words. By ghematria the numerical values of letters were used, and words of equal numerical value were substituted for each other and new combinations formed. By themura the alphabet was divided into two equal parts, and the letters of one half on being substituted for the corresponding letters of the other half, in the text, brought out the hidden sense of the Scripture. These systems date back to time immemorial. They were borrowed from the Jews by the Gnostics of the second century. A few words are known to some of the early Fathers, and were probably in use before Apostolic times. Now ἀντίθεσις may mean not only opposition or contrast, but also the change or transposition of letters. In this way ἀντίθεσις τῆς ψευδόμονος γρηγορίας would mean the falsely-called knowledge which consists in the interchange of letters just referred to."

Again, we read: "The mischievous feature about them was their presence within the churches and their combination of plausible errors with apparent, even ostentatious, fidelity to principles of the faith—a trouble elsewhere reflected Acts XX. 29f, in connexion with the Ephesian church towards the end of the first century" (Ency. Bib.). We do not admit that Acts, xx, was written towards the end of the first century. The best scholars hold it was written by St. Luke long before; and so the critics of the Epistles, having without proof dated the composition of a genuine early New Testament book at the end of the first century, on the strength of that performance endeavour to discredit three whole books of Scripture.

I. Miscellaneous objections.—We bring together under this heading a number of objections that are scattered in the text, foot-notes, sub-foot-notes, of the various sections. The concern to keep the widow class under the bishop's control is thoroughly sub-apostolic (cp. Ign. ad Polycarp, iv. 5)."—That would not prove that it was not Apostolic as well. On reading the only passage referring to widows (1 Tim., v) we get a totally different impression from the one conveyed here. The great
aim of the writer of the Epistle appears to be to prevent widows from becoming a burden on the Church, and to point out the duty of their relatives to support them. Thirty years before the death of St. Paul the Superintendent of the poor widows of Jerusalem; and it is absurd to suppose that during all that time no regulations were made as to who should receive support, and who not. Some of few of those who were "widows indeed" probably held offices like deaconesses, of whom we read in Rom., vii, 1, and who were doubtless regarded after the departure of the Apostles and other ecclesiastical authorities. The suggestion that nothing was "done in order", but that everything was allowed to go at random, has no support in St. Paul's earlier Epistles.

(2) "The curious antipathy of the writer to second marriages on the part of the presbyters, episcopi, diaconi, and widows (ουκαία) is quite un-Pauline, but corresponds to the more general feeling prevalent in the second century throughout the churches."—That state of feeling throughout the churches in the second century should make an objector pause. Its Apostolic origin is its best explanation, and there is no need of the writer to show it was un-Pauline. It was St. Paul who wrote as follows at a much earlier date (I Cor., vii): "I would that all men were even as myself: But I say to the unmarried, and to the widows: It is good for them if they so continue, even as I." But I would have you to be without such an institution. (I Cor., vii, 7). But that is a way of thinking for the things of the Lord, how he may please God. But that he is with a wife, is solicitous for the things of the world, how he may please his God: and he is divided. ... He that giveth his virgin in marriage, doth well; and he that giveth her not, doth better."

It would be rash to suppose that St. Paul, who wrote thus to the Corinthians, in general, could not shortly before his death require that those who were to take the place of the Apostles and hold the highest offices in the Church should not have been married more than once.

(3) "The distinctive element, however, i. e. the prominence assigned to Timothy and Titus, is intelligible only on the supposition that the author had specially in view the ulterior end of vindicating the legitimate evangelical succession of contemporary episcopi and other office-bearers in provinces where this was the curious reason alleged (in the beginning of the second century).—These same have read these Epistles, from their very first appearance until now, without such a conclusion suggesting itself to them. If this objection means anything it means that the Apostles could not assign prominent positions to any of their disciples or delegates; which counter to what we read of Timothy and Titus in the earlier Epistles of St. Paul.

(4) "The prominence given to 'teaching' qualities shows that one danger of the contemporary churches lay largely in the vagaries of unauthorized teachers (Did., xvi). The author's cue is simple: Better let the community trust itself to itself, let those in authority be responsible for the instruction of the ordinary members! Evidently teaching was not originally or usually (1 Tim., v, 17) a function of presbyters, but abuses had led by this time, as the Didache proves, to a need of combining teaching with organized church authority. —What a lot of meaning is read into half a dozen words of these Epistles! In the very first Epistle that St. Paul wrote we read: "And we beseech you, brethren, to know them who labour among you, and are over you in the Lord, and admonish you: That you esteem them more abundantly in charity, for their work's sake" (1 Thess., v, 12-13).

The capacity for teaching was a gift, probably a natural one working through God's grace for the good of the Church (see HIERARCHY OF THE EARLY CHURCH), and there was no reason why the Apostle, who taught so much importance to teaching when speaking of his own work, should not require that those who were selected to rule the Churches and carry on his work should be endowed with the aptitude for teaching. In I Cor., iv, 11, we find that the same persons were "pastors and doctors". The writer who makes this objection does not admit that real bishops and priests existed in Apostolic times; so this is what his assertion implies: When the Apostles died there were no bishops and priests. After some time they originated somewhere, and somehow, and spread all over the Church. During a considerable time they did not teach. Then they began to monopolize teaching, and the practice spread everywhere, and finally the Pastoral were written to confirm this state of affairs, which had no sanction from the Apostles, though these bishops thought otherwise. And all this happened before St. Ignatius wrote, in a short period of thirty or forty years, a length of time spanned say from 1870 or 1880 till 1912—a rapid state of development indeed, which has no documentary evidence to support it, and which must have taken place, for the most part, under the very eyes of St. Paul and St. John. It seems there were Titus, Clement, Ignatius, Polycarp, and other disciples of the Apostles. The early Christians had more respect for Apostolic traditions than that.

(5) "Baptism is almost a sacrament of salvation (Tit., iii, 5).—It is quite a sacrament of salvation, only here. If the child is baptised, the teaching of the Acts, and in St. Paul's Epistles to the Romans, I Corinthians, Galatians, and Colossians, and in I Pet., iii, 21.

(6) "Faith is tending to become more than ever fides qua creditor."—But it appears as fides qua creditor in I Tim., i, 7, 2, 4, 5, 11; ii, 7, 15, iii, 9, 13, iv, 6, 12, vi, 11; II Tim., i, 5, 13; ii, 18, 22; iii, 10, 15, Tit., ii, 3, etc., while it is used in the earlier Epistles not only subjectively but also objectively. See viros in Preuschen, "Handwörterbuch zum griech. N. Testament." Faith is fides qua creditor only nine times out of thirty-three passages where viro occurs in the Pastoral.

(7) "The church to this unmythical author is no longer the bride or the body of Christ but our building or rather familia des, quite in the neo-Catholic style. There are several genuine Epistles of St. Paul in which the Church is not the bride of the body of Christ, and in calling it a building he was only following his Master who said: "On this rock I will build my Church." The idea of a spiritual building is quite Pauline. For we know, if our earthly house of this habitation be dissolved, that we have a building of God, a house not made with hands, eternal in heaven (II Cor., v, 1): "And I have so preached this gospel, not where Christ was named, lest I should build upon another man's foundation" (Rom., xv, 20); "For if I build up again the things which I have destroyed, I make myself a prevailing gainer" (Gal., ii, 18); "Let us work good to all men, especially to them who are of the household of the faith" (Gal., vi, 10); "You are fellow citizens with the saints, and the domestics of God, built upon the foundation of the apostles and prophets, Jesus Christ himself being the chief corner stone: in whom all the building, being framed together, groweth up into a holy temple in the Lord. In whom also ye are built together into an habitation of God in the Spirit" (Eph., ii, 19-22); "You are God's building. According to the grace of God that is given to me as a wise architect, I have laid the foundation. . . . Know you not, that you are the temple of God, and that the Spirit of God dwelleth in you?" (I Cor., iii, 9-17; compare I Pet., ii, 5; "Be you also as living stones built up, a spiritual house"; and I Pet., iv, 17: "For the time is, that judgment should begin at the house of God. And if first at us, what shall
be the end of them that believe not the gospel of God?" There is a development in St. Paul's use of the comparisons body and bride, which is exactly paralleled by his use of the words building and temple. They are applied first to individuals, then to communities and finally to the whole Church (see Galatians, "Dict. of the Bib.", s. v. Church). The Creed crystallizing in Rome and Asia Minor, are conveyed partly in hymnal fragments, which look like those in the Apocalypse of John, spring from the cultus of the churches. There are fragments of the Creed in I Cor. (see Corinthians, Epistles to the, The First Epistle— Its text and history, the unity of the Epistle were thus defined by the use of the creed before St. Paul's death. He wrote to the Colossians (Colossians 1:16): "Let the word of Christ dwell in you abundantly, in all wisdom: teaching and admonishing one another in psalms, hymns, and spiritual canticles" (cf. Ephesians, v. 19). The objections from the "Faithful Sayings" are fully answered in James, "The Genuineness of the Pastoral" (London, 1896), 132-4.

(9) "No possible circumstances could make Paul oblivious (through three separate letters) of God's fatherhood, of the believing man's union with Jesus, of the power and witness of the Spirit, or of reconciliation." These doctrines are not quite forgotten: I Timothy, i. 1, 4; II. Timothy, ii. 13; Titus, ii. 13; I. Peter, iii. 4, 5, 7. There was no necessity to dwell upon them as he was writing to disciples well acquainted with his teaching, and the purpose of the Epistles was to meet new problems. Besides, this objection could be brought against large portions of the genuine Epistles. There are several other objections but they are so flimsy that they cannot present any difficulty. What Sanday wrote in 1896 in his "Inspiration" (London) is still true: "It may be asserted without fear of contradiction that nothing really un-Pauline has been proved in any of the disputed epistles".

II. External Evidence.—The Pauline authorship of the Pastoral Epistles was always doubted by Catholics in early times. Eusebius, with his complete knowledge of early Christian literature, states that they were among the books universally recognized in the Church as was the Old Testament. ("Hist. eccl.", vii. 15, 3; "Presb. evang.", ii. 4, v. 7; vii. 6, 3). They are found in the early Latin and Syriac Versions. St. Clement of Alexandria speaks of them (Strom., II, III), and Tertullian expresses his astonishment that they were rejected by Marcion (Adv. Marcion, V, xxxi), and says that they cannot be written by St. Paul, as the language and the style of the Pastoral Epistles evidently the reception of a thing hitherto unknown of. There are asserted to St. Paul in the Muratorian Fragment, and Theophilus of Antioch (about 181) quotes from them and calls them the "Divine word" (Sετιν δόγμα). The Martyrs of Vienne and Lyons (180) were acquainted with them; and their bishop, Pothinus, was born about A.D. 87 and martyred in 177 at the age of ninety, takes us back to a very early date. His successor, St. Irenaeus, who was born in Asia Minor and had heard St. Polycarp preach, makes frequent use of the Epistles and quotes them as St. Paul's. He was arguing against heretics, so there could be no doubt on either side. The Epistles were also admitted by Heracleon (about 165), Hegesippus (about 170), St. Justin Martyr, and the writer of the "Second Epistle of Clement" (about 140). In the short letter which St. Polycarp wrote (about 117) he shows that he was thoroughly acquainted with them. Polycarp was born only a few years after the death of Saint Peter and Paul, and as Timothy and Titus, according to the most ancient traditions, lived to be very old, he was their contemporary for many years. He was Bishop of Smyrna, only forty miles from Ephesus, where Timothy resided. St. Ignatius, the second successor of St. Peter at Antioch, was acquainted with Apostles and disciples of the Apostles, and shows his knowledge of the Epistles in the letters which he wrote about A.D. 110. Critics now admit that Ignatius and Polycarp knew the Pastoral (von Soden in Holtzmann's "Hand-Kommentare", p. 115, "Encyc. Bib.", IV) and there is a very strong probability that they were known also to Clement of Rome, when he wrote to the Church, not only the church in Rome and Asia Minor, are conveyed partly in hymnal fragments, which look like those in the Apocalypse of John, spring from the cultus of the churches. There are fragments of the Creed in I Cor. (see Corinthians, Epistles to the, The First Epistle— Its text and history, the unity of the Epistle were thus defined by the use of the creed before St. Paul's death. He wrote to the Colossians (Colossians 1:16): "Let the word of Christ dwell in you abundantly, in all wisdom: teaching and admonishing one another in psalms, hymns, and spiritual canticles" (cf. Ephesians, v. 19). The objections from the "Faithful Sayings" are fully answered in James, "The Genuineness of the Pastoral" (London, 1896), 132-4.

(9) "No possible circumstances could make Paul oblivious (through three separate letters) of God's fatherhood, of the believing man's union with Jesus, of the power and witness of the Spirit, or of reconciliation." Bib.", IV) and there is a very strong probability that they were known also to Clement of Rome, when he wrote to the Church, not only..."
mistaken by the early Spaniards for the name of the chief or tribe.

Habitat.—The cognate tribes of the Timucuan linguistic stock held all of north Florida from about Cape Canaveral and Tampa Bay on the south to beyond the St. John’s River on the north. In 1562, during the period of the Spanish, whose chief, known to the French as Ouitina, had his settlement about the present Welaka, and ruled some forty villages, with perhaps 6000 souls. On the lower course of the river were the Satunibs, the enemies of the Timucua and nearly as numerous, and west of them, toward the Suwanee River, were the Potano, with over a thousand warriors or perhaps four thousand souls. Several other tribes were of minor importance.

Customs.—The Timucua were sedentary and semi-agricultural, but depended largely upon game, fish, wild fruits, and bread prepared from the stalks of various grasses. They lived in houses of poles, thatched with palmate leaves, and with granaries elevated on stakes to keep them out of reach of wild animals. Their villages were strongly stockaded and each important settlement had a large central town-house of logs, for tribal ceremonies and the reception of guests. They had large dug-out canoes. Their pottery, the work of the women, was of the finest type found east of the Mississippi. The principal weapon of the warriors was the bow, and a sort of spade-shaped club of hard wood. The numerous embankments and ancient roadways found in their country may be due in part to Spanish influence. Women wore a short fringed skirt, perhaps of some bark fibre, with their hair flowing loosely. Men went naked, except for the breechcloth, but had the whole body elaborately tattooed. They bunched the hair in a knot on top of the head, and wore inflated fish-bladders through holes in their ears. They were tall and well-made, described as of great strength and agility and remarkable swimmers.

The government by the chiefs was despotic, as was frequent among the Gulf State tribes. There were two hereditary classes, nobles, or chiefs, and commoners, and each tribe and each class was organized according to a clan system or hereditary family groups, usually bearing animal names. This clan system was so much interwoven with the tribal life that it persisted even under the mission system. Prisoners of war and their descendants constituted a slave class. Their military organization and methods were superior to what was found among the northern tribes. Scalping and mutilation of the slain enemy were universal, and the dismembered limbs were carried from the field as trophies or to serve for cannibal feasts. Polygamy was customary. Gross sensuality was prevalent. The chief gods were the Sun and the Moon, the Deer and other animals. They were extremely ceremonious, celebrating planting and harvest seasons, fishing and hunting expeditions, the going and return of war parties, marriages and funerals, each with special rites of prayer, fasting, feasting, dancing and purification by means of the “black drink” brewed from the leaves of the Ilex cassine. On certain great ceremonial occasions the first-born male infants of the tribe were delivered up by their mothers to be sacrificed to the Sun, in whose honour also a sacred fire was kept always burning in their temples. The dead were buried in the ground with the head to the right, which included fasting and cutting off the hair. Over the body of a dead chief was raised a mound of earth upon which was placed his shell drinking cup, surrounded by a circle of arrows stuck in the ground.

From the pictures of the artist Le Moyne we get a vivid idea of the appearance and customs of the Timucua tribes, while the questions in Father Pareja’s “Confessionario” throw curious light upon their beliefs, tabus, and ceremonial observance.

History.—The Timucua territory begins with the landing of the ill-fated Ponce de Leon near the present St. Augustine in 1513. The expeditions of Narvaez in 1528 and de Soto in 1539-41, landing at Tampa Bay, passed through the territory of the cognate tribes, but did not encounter the Timucua near the St. John’s, the French Huguenot, Ribault and Laudonnière attempted settlements at the mouth of St. John’s River, explored the middle course of the stream, and made acquaintance with the principal tribes. In 1565 the Spaniards under Menendez destroyed the French posts, butchered all the defenders, immediately after which Menendez founded the city of St. Augustine and began the permanent colonization of the country. Jesuit missionaries arrived and began their labours, but seem to have devoted their attention chiefly to the coast tribes of South Carolina, Virginia, and western Florida, probably because of the fact that the Indians of the St. John’s River were under Spanish control and for a time resisted the Spanish occupation. In 1573 a party of Franciscan missionaries arrived at St. Augustine, where some of their order had been from the beginning, and proceeded to organize work among the Indians of the vicinity. The work met a serious check from the recall of Governor Menendez to Spain, where he died in 1574, but in 1594, on request of Father Marron, custos of the Franciscan convent at St. Augustine, twelve other priests of the order were sent out, and the labour of Christianizing the Timucua was taken up with vigour.

Among those who arrived with this party was the noted Father Francisco Pareja, to whom we are indebted for almost all that is known of the language and customs of the tribe. He was stationed at first among the Yamassee on the Georgia coast, in whose language, according to Shea, he composed a summary of Christian doctrine. Later he was in charge at the Timucua mission of San Juan, apparently on Little Talbot Island, north of St. Augustine, and later still was custos of the monastery in that city, until transferred to the Mexican province in 1610, where he died in 1628. His various works in the Timucua language were published in 1627, and the praise of the mission posterity have been poured upon him from Spain with Father Pareja, several went to the Yamassee, while the others devoted attention to the Timucua, whose principal mission settlements were San Juan, already mentioned; San Pedro, on Cumber Island; San Mateo, probably about the mouth of the St. John’s; and Santa Lucia de Acuera, south of Cape Canaveral; besides the settlement immediately adjoining St. Augustine. The more western cognate Potano tribe, being hostile alike to the Timucua and the Spaniards, were not Christianized until a much later date, but, were restored to the mission fold. In 1597 the mission growth was interrupted by a disastrous revolt of the Yamassee in which several missionaries lost their lives, the Christian Timucua being also attacked. Some years later, however (16127), following a visit from the Bishop of Havana in 1602, Florida was erected into a Franciscan province, under the name of Santa Elena. From 1612 to 1615 inclusive, 43 Franciscans were added to the workers in addition to those already on the ground.

In 1655 the Spanish Indian population of the Florida province, which included north Florida and the coast country of Georgia and South Carolina. It was estimated at 26,000 souls, chiefly among the Timucua, Apalachee, and Yamassee. In 1687 a second outbreak of the Yamassee, apparently instigated by the English of Carolina, who claimed northern Florida as
within their chartered limits, resulted in the removal of that tribe bodily into (South) Carolina. In 1715 the same restless people headed a war against the English, resulting in their own expulsion and return to Florida. In 1718, following the outbreak against the Yamassees, by which the Timucca missions had also suffered, the chiefs of the latter tribe, as also the Apalachee chiefs, forwarded to the King of Spain an address of loyalty and of commendation for their Spanish governor. These documents, in the Indian and Spanish languages, are in existence. The Timucca address is signed by the chiefs of five towns—San Mateo, San Pedro, Asile, Machuaus, and San Juan de Guacara. In 1699 the Quaker Dickinson, from Philadelphia, shipwrecked on the south coast of Florida and rescued from the savages by the Spanish governor at St. Augustine, was sheltered for a time at the Timucca missions, and has left us a pleasant picture of their prosperous and orderly condition, and the friendly and religious character of their occupants, in striking contrast to that of the unchanged barbarians among whom he had been a prisoner.

It was near the end of the growing hostility of the Creek tribes that the Apalachee and other heathen tribes to constant inroads upon the Florida missions, furnishing them with arms and ammunition for the purpose, with the further inducement of a profitable sale for all captives to supply the Carolina slave market. Even as early as 1699 Carolina slaves were being driven out among the Indians tribes as far as the Lower Mississippi. While the wild tribes were thus armed and encouraged in their raids by the English, the Christian mission Indians, on the contrary, in accordance with a fixed, but suicidal, rule of the Spanish colonial government, were refused the use of firearms, even in self-defense, and on their missions were feeble, the missionaries being without troops except the Spanish fleet. In 1704 Moore invaded the Apalachee country with some fifty Carolina men and a thousand savage Creek, Catawba, and Yamassees, all armed with guns, and completely destroyed ten of the eleven missions towns, with their churches and orange groves, carrying off or destroying the vestments and sacred vessels. Four priests, a Spanish officer, and four soldiers were killed, and their bodies hacked to pieces, two of the missionaries being tortured and burned at the stake. Several hundred Apalachee warriors were killed and 1400 of the tribe carried away as slaves. In 1706 a similar raid into the Timucuan country completed the ruin of the missions. The remnant of the Apalachee fled for protection to the French at Mobile. The scattered Timucua were gathered together and formed into small settlements under the walls of St. Augustine. With the English colonization of Georgia and the ensuing war of 1740 all attempt at rehabilitating the Florida missions was abandoned. In 1753 only 138 Indians remained in the vicinity of St. Augustine. On the English occupation in 1763 they were expelled from their two villages and again became refugees. Somewhat later the survivors were colonized at a new settlement called Pueblo de Atimacana, on the Mobile River, near Mosquito lagoon, in the present Volusia county. A few seem to have resided there as late as the transfer of the territory to the United States in 1821 and it is possible that their descendants may still be found among the Seminole of Florida and Oklahoma.

Language.—With the exception of the Timuccua-Spanish document of 1688, already referred to, of which a copy was printed by Buckingham Smith in 1859, and another by Esteves the same year by Gatechot in 1880 (Am. Philos. Soc. Proc., XVIII), our knowledge of the Timucua language and dialects, as of the tribal customs and beliefs, rests almost entirely upon the works of Father Pareja and of Father Gregorio de Monilla, missionary in the same order and tribe, with the analysis described thereupon by Gatechot. A few words, mostly personal or place names, also occur in the early French and Spanish historians. Father Pareja’s works include: “Cathecismo en lengua Castellana y Timuquana” (Mexico, 1612); “Cathecismo y breve exposicion de la doctrina Cristiana ... en Lenguas Castellana y Timuquana” (Mexico, 1612); “Confesionario en Lengua Timuquana” (Mexico, 1612); “Confesionario en lengua Castellana y Timuquana” (Mexico, 1613); “Gramatica [or Arte?] de la Lengua Timuquana” (Mexico, 1614); “Catecismo de la Doctrina cristiana de los Indios [Timuquana] Lengua” (Mexico, 1617); “Cathecismo y Examen ... en Lengua Castellana y Timuquana” (Mexico, 1627). The works of Father Monilla include an “Explicacion de la Doctrina ... en Lengua Floridiana” (Madrid, 1631?); and Mexico, 1635–36); and a “Forma de administrar los sacramentos Flordianos” (Mexico, 1635). Of these works the Pareja “Cathecismo” (1612), “Cathecismo y breve exposicion” (1612), and “Confesionario” (1613), and the Monilla “Explicacion” (1635–36), and “Forma breve” (1635) form the subject of an extended study of “The Timucua Language” by Albert B. Gatechot in the “Proceedings of the American Philosophical Society,” vols. XVI–XVIII, Philadelphia, 1877–1880.

TINCKER, Mary Agnes, novelist, b. Ellsworth, Maine, 18 July, 1833; d. at Boston, Massachusetts, 4 Dec., 1907. At the age of thirteen she began teaching in the public schools. At fifteen her first literary work was printed. At twenty she became a Catholic, and even her Protestant relatives shared in her sufferings from Knownothing bigotry. In 1863 she became a volunteer war nurse, serving in Washington until she grew ill. Boston then became her home. Lay stories from her experiences among members of “The Catholic World,” where also her first novel “The House of Yorke” was issued as a serial (1871–72). It was followed by “Grapes and Thorn” (1873–74) and “Six Summer Months” (1876–77). The latter was the first fruit of her sojourn in Italy (1873–74). These three novels sounded a distinctly new note in Catholic literature, and the highest praise was given to them by American Catholic novelists. “Signor Mondalini’s Niece” (1879), in “No Name” series; “By the Tiber” (1881); “The Jewel in the Lotus” (1884); “Aurora” (1885); “The Two Coronets” (1887); “San Salvador” (1889); were issued by the same press, and her prominence on Catholic literary pages was maintained by them. She died in Rome, April 9, 1907. They reflected for the most part the beauty of Italy. A lapse from her religion cast its shadow perhaps over a few of her novels written during that time. She returned
to her religious duties many years before her death. Her last book, fittingly called "Autumn Leaves" (1916), was issued by a Catholic firm, and contained matter contributed not long before to "The Catholic World".

TALBOT SMITH in The Ave Maria (24 July, 1909); STEDMAN AND HUTCHINSON, Amer. Litt.

REGINA RANDOLPH JENKINS.

Tinigin, a titular see of Mauretanitania Tingitana (the official list of the Roman Curia places it in Mauretanian Cæsarea). Tingis, now Tangier, is an ancient Phoenician town; Greek legend ascribes its foundation to the giant Anteus, whose tomb and skeleton are pointed out on the beach or to Sophias, son of Heracles, who is said to have crossed the Strait a short journey from the walled town of Antaeopolis. The natives call it Tenga, Tinga, and Titiga, the Greek and Latin authors giving numerous variations of the name. Under the Romans this commercial town became, first, a free city and then, under Augustus, a colony (Colonia Julia, under Claudius), capital of Mauretanitania Tingitana. Portuguese in the fifteenth century, Spanish in the sixteenth, it became an English possession by the marriage of Charles II with the Infanta Catharine of Portugal. The English vacated it in 1834. When it was bombarded by the Prince de Joinville in 1844, it belonged to Morocco. The natives call it Tandja. It is about 125,000 inhabitants of whom 10,000 are Moslems, 10,000 Jews, 9000 Europeans (7500 Spanish). Towards the end of the third century Tingis was the scene of the martyrdom of St. Marcellus, mentioned in the Roman Martyrology on 30 October, and of St. Cassian, mentioned on 3 December. It is not known when the first Christians were established. In the sixteenth century, it was a suffragan of Lisbon, and in 1570 was united to the Diocese of Ceuta. Six of its bishops are known, the first, who did not reside in his see, in 1488. Tangier is now the residence of the Prefect Apostolic of Morocco, whose mission is in charge of the Frari Minor. It has a Catholic church, several chapels, schools, and a hospital.

S. PÉTRIDÉS.

Tininn (KINN). See OF, in Dalmatia, suffragan to Kalocsa-Bacs. Knin is a town on the right bank of the Kera, twenty-five miles north-east of Sebenico. It was fortified by the Romans, who called it Arula. At the request of Casimir IV, King of Croatia in 1050, a Bishopric of Knin was created, suffragan to Spalato; the bishop seems to have been attached to the court as preacher. Pallotti in his "Itinera sacra" IV (Venice, 1775), gives a history of the prelates of Knin from Mark in 1050 to Joseph in 1755. The residential succession was interrupted by the Saracen invasion in 1022; when Venice captured the district in 1788, the Bishop of Sebenico was appointed to administer the diocese, which was united in 1786 to Sebenico. The ruins of the old Cathedral of St. John the Evangelist are still visible. To-day the see is suffragan to Kalocsa-Bacs, according to the "Schematismus" of Kalocsa (1909); the "Gerarchia cattolica" says the see is merely titular, and this would explain the absence of statistics. The bishop, Monsignor Joseph Lányi, resides at Nagy-Várad, was born at Nagy-Várad, 29 June, 1870, ordained, 2 July, 1891; Abbot of St. Saviour's and canon of Nagy-Várad; appointed bishop, 7 Nov., 1906, in succession to Monsignor John Maiorose (b. at Aldebro, Archdiocese of Eger, 10 July, 1851, appointed, 27 July, 1855).

A. A. MACEDONIAN.

Tinos and Mykonos, Diocese of (Tinensis et Myconensis), a Latin diocese of the Cyclades, containing over 128 square miles, numbering 15,000 inhabitants. It is called "verdant" though it is so only in comparison with the other Greek islands more arid than itself. In ancient times it was called Hydrossa, i.e. abounding in water, though this is scarcely credible, and Ophiussa because of the number of serpents which inhabited it. Not far from the island a celebrated temple of Poseidon, discovered in 1902. The island subjected itself to Xerxes at the time of his expedition against the Greeks, but afterwards defected to Salamis and Platea; it became finally subject to Athens, then to Alexander of Philip, afterwards to the Romans, to whom it was given by Marcus Antonius, later to the Romans. It is not known when Christianity was established there. Le Quen (Oriens Christianus, I, 943) mentions three early bishops; Ecdicius, present in 553 at the Fifth Ecumenical Council; Demetrios, in 681 at the Sixth Council; Eustathius in 757 at the Seventh Council. The bishopric was a suffragan of Rhodes in the seventh and tenth centuries (Gelzer, "Ungedruckte ... Texte der Notizie Episcopatum", 542, 558); suppressed after the conquest of the island by the Venetians in 1207, it was re-established but as a metropolitan when Tinos passed into the power of the Turks in 1714. The metropolitan see was in its turn suppressed in 1833. "Echoes d'Orient", III, 287. Under the Venetian domination, which lasted from 1207 to 1714, Tinos had some Latin bishops; nevertheless the earliest known date only from 1329 (Le Quen, op. cit., III, 1059; Eubel, "Hierarchia catholic medii evi" I, 512; II, 276; III, 330). Little by little the island became almost completely Catholic. In 1781 it had 7000 Catholics dispersed throughout 32 villages (Hilaire de Barenton, "La France catholique en Orient", 221); some were of the Latin, others of the Greek Rite, and Le Quen (I, 943) affirms that at the same epoch there were more than 120 Greek Catholic priests subject to the Latin bishop. Under the Venetian domination the schismatics were dependent on a protopapas who in turn depended on the Patriarchate of Constantinople. The Latin bishopric, at first a suffragan of the Archbishopric of Rhodes, afterwards of Arcadia in Crete, is now a suffragan of Naxos. Since at least the year 1400, the title of Mykonos has been joined to its own; furthermore, the bishop administers the Diocese of Andros. The see numbers 4000 Catholics, 23 secular priests, a chapter-house, 26 parishes, a seminary at Xynara with only seven or eight students; the Franciscans have 2 houses and five religious. Of the Greek Tertiaries, about ten, the French Ursulines maintain an orphanage and a large boarding-school at Loutra, and they also direct through the Greek Sisters schools for girls, which number about forty in all. Tinos possesses an image of the Evangelist of the Annunciation discovered in 1823 which attracts each year on 25 March and 15 August from 3000 to 4000 schismatic pilgrims (Echoes d'Orient, V, 315).

S. VALIČE.

Tintern Abbey, in Monmouthshire, England, was founded in 1131 by Walter de Clare for Cistercian monks, who came from the Abbey of Aumome, in the Diocese of Chartres. It was founded only ten years before. Walter's son Gilbert, first son, was not, however, and probably also his grandson Richard Strongbow, conqueror of Ireland under Henry II, were buried at Tintern, the magnificent church of which dates from the end of the thirteenth century. The abbey received rich benefactions not only from the family of its founder but from other noble houses; and lists of
possessions, both from the taxation-roll of 1291, and at the time of the Dissolution under Henry VIII, are given in detail by Dugdale. The accounts submitted by the monks, Richard Wayte, in 1535, place the net income at under £200 a year; and the abbey, containing at that time thirteen monks, was suppressed under the Act of 1536 which dissolved the smaller monasteries. The king granted it in 1537 to Henry, Earl of Worcester, in whose family (afterwards dukes of Norfolk) it remained until the sale of his Monmouthshire property by the ninth duke, when it was acquired by the Crown.

The ruins of Tintern, which stands on the right bank of the river Wye, backed by a semi-circle of wooded hills, rank with Fountains Abbey in Yorkshire as the most beautiful in England. The church, measuring 245 feet in length, with transepts of 110 feet, is almost perfect, though roofless, the architecture being of the transitional style from Early English to Decorated. The window-tracery is especially fine. Hardly anything remains of the domestic buildings of the abbey, the stone having been used for cottages and farm buildings in the neighbourhood.

D. O. HUNTER-BLAIR.

Tintoretto, Il (JACOPO ROBUSTI), Italian painter, b. at Venice, 1518; d. there 1594. His father was a dyer; hence his surname of Tintoretto (the little dyer). In his early youth he displayed an extraordinary taste for the fine arts. He played well on the lute but his aptitude for painting was still more pronounced. His parents intended him as an apprentice of the aged Titian, but Jacopo, eager to distinguish himself, soon set up a studio of his own. His ambition was nothing less than to transform Venetian painting by adding to its distinguishing qualities of brilliancy and harmonious colouring and pleasant grace of form the merits of the Florentine and Roman Schools, a knowledge of anatomy which excels in the nude, dramatic mise en scene, a pose full of movement, a vigorous contrast of light and shade. According to his biographer, C. Ridolfi, he summarized his ideal in the ambitious formula: "The drawing of Michelangelo and the colouring of Titian" (Il disegno di Michelangelo, il colorito del Tiziano). To fit himself for carrying out this magnificent but difficult programme Robusti devoted himself to unremitting labour. He studied the ancient statues; he had sent to him from Florence the reductions which Daniel of Volterra had made in plaster of Michelangelo's masterpieces; "Dawn", "Noonday", "Twilight", and "Night"; he drew incessantly from the living model or the draped lay figure; he dissected dead bodies; he worked not only by sunlight but also by the flicker of torches in order to master the varied play of light and shade. This intense labour was not fruitless. Being lifted with the Reformation facility he executed a countless number of works, and even to the end of his life sustained a veritable fever of production.

In order to make himself known he proposed to the clergy of Santa Maria dell' Orto to paint two large pictures for that church (49 feet high, by 19 feet 6 inches wide), asking no payment but what would cover their cost. His work was received with such enthusiasm that Robusti painted the "Adoration of the Golden Calf" and the "Last Judgment". In this rapidly executed and spirited work he displayed a precocious virtuosity, assembling in a tumultuous whole a great number of figures with agitated gestures and attitudes. His aim was to attract public attention so that he fully succeeded. He painted several other pictures for this church, in which his talent, having grown more confident, shows more poise. These were: "St. Peter venerating the Cross"; "The Martyrdom of St. Paul"; "St. Agnes recalling to life the Prefect's Son"; the "Presentation of the Blessed Virgin". His latest pictures were painted for the Ducal Palace and the Confraternity of San Rocco (Scuola di San Rocco). For the Doges' Palace he first painted four scenes from the life of St. Mark (now scattered). The most remarkable is the "Miracle of St. Mark" (the saint releasing a slave about to be tortured), painted in 1548, which is now in the Venetian Academy of Fine Arts. Robusti's eminent qualities as a draughtsman, colourist, and composer are most happily combined and harmonized in this picture. Other pictures painted for the Sala delle Scuole piave perished in the fire of 1777. But the Ducal Palace still possesses many of his works. As examples of plastic beauty so popular at that time may be mentioned: "Pallas in chase of Mars", "Ariadne crowned by Venus", "St. George overcoming the Dragon", "The Marriage of St. Catharine". In this line he succeeded but without excelling, for his manner is not free from heaviness. Among the historic paintings may be mentioned: The legates of the Pope and the Doge at Parma before Barbara d'Este", the "Defence of Brescia in 1483", the "Capture of Gallipoli in 1484", "Genoa, Queen of the Sea".

In 1580 the Confraternity of San Rocco near the church of that name opened a contest for the decoration of a central ceiling whereon the "Glorification of St. Rocco" was to be depicted. Tintoretto had formidable competitors: Paolo Veronese, Giuseppe Salviati, Federigo Zuccaro. Instead of submitting the required sketch, Tintoretto, with his feverish ardour, in a short time completed a picture which he quickly put in place. It pleased the Brothers of St. Rocco, who confided to him the decoration of the walls and ceiling and displeasure of his rivals, who were offended by the indelicacy of the proceeding. Tintoretto worked on this vast undertaking from 1660 to 1594. It consists of 56 compositions, many of them, such as the "Calvary", of colossal size. It displays such fulness of light, such a triumph of invention and execution, that one comes away from it as if from too full and loud a concert, half deafened, missing the proportion of things and not knowing whether to believe one's senses" (Taine). Tintoretto also painted pictures for several Venetian churches, the chief of which were the "Crucifixion" and the "Resurrection" at San Cassiano, the "Marriage Feast of Cana" at Santa Maria della Salute, the "Baptism of Christ" at San Silvestro, the "Last Supper" at San Giorgio.
Maggiore and San Giovanni, and the "Life of St. Rose" at San Rocco. Robusti worked without merit as a portrait painter. At the Ducal Palace there is a series of portraits of the dogs; the museum of the Uffizi at Florence has the portrait of Sansovino, the Louvre that of the painter himself. His last religious composition, begun at the age of seventy and finished shortly before his death, is in the Hall of the Grand Council of the Doges' Palace. This gigantic work, measuring 32 feet 10 inches high, by 72 feet 2 inches wide, represents the "Last Judgment." "Although the colouring has grown dark, we cannot but admire the broad lines, the close and picturesque grouping, the immense masses set in motion with extraordinary vigour" (E. Mánta). Also, it may be added, very correctly, that the strength of the old man who is able to depict about 500 persons. Jacopo Robusti did not fully realize the ambitious programme he outlined for himself. He could not equal the drawing of Michelangelo, whom he took for his model, but he emphasized its defects by exaggerating the anatomical outlines and foreshortenings. These feats of skill are always out of place, but especially so in religious subjects, which Tintoretto too often treated unbecomingly. However, it is to his credit that he infused some scenes from the Passion a communicative tragic emotion. His colour is intense, but not too intense, and he wished to surpass it; his heavier and less brilliant. But he discovered certain sombre tints which are wonderfully adapted to the expression of sad and sorrowful sentiments and which accentuate the bright contrasts. In point of time he is the last of the great Venetian painters, but he belongs already to the period of decadence, because he never succeeded in overcoming his unshakable impetuosity or fusing into a harmonious whole his eminent but warring qualities.

**GASTON SORAI S.**

Tiraboschi, Girolamo, Italian scholar, b. in the region of Bergamo, 1731; d. 3 June, 1794. At an early age he entered the Society of Jesus. After serving as professor of rhetoric and belles-lettres (eloquenza) at the Brera in Milan, he was called by Francesco III, Duke of Modena, to take charge of his library (the Biblioteca Estense); this he directed with patient endeavours and skill, enriching it with many additions of books and manuscripts and providing it with catalogues. His chief work is the monumental "Storia della letteratura italiana", an exhaustive compilation of the materials within his reach. Actuated by the patriotic desire to defend his country's glory in the cultural arts against the attacks of foreign critics, he makes his history extend from Etruscan times down to 1700, and concerns himself with all matters of interest in belles-lettres, philosophy, history, the fine arts, medicine, jurisprudence, etc., accompanying the statement of his views with an abundance of precise documents. Written in a clear and attractive style, the "Storia" appeared in its first edition between 1772 and 1792. With an additional volume it was published a second time at Modena, between 1787 and 1794. His minor writings include: "Biblioteca Modenese", an account of writers born in Modena; "Memorie storiche modenesi"; "Vita di Fulvio Testi"; and many other historical and critical essays and articles.

Besides the editions of the Storia mentioned above, see the reprints of (Florence, 1805–18), Milan (in the Classico, 1822–29), and Venice (1858–60). J. D. M. FORD.
TIRASPOL

(TIRASPOL; KHERSON; CHERSOHN; CHERSONESE), Diocese of (TIRASPOLENSIS; CHERSOHNENSIS), in Southern Russia, suffragan of Mohilev, covers the governments of Saratov, Samara, Kherson, Ekaterinoslav, Taurida, and Bessarabia. It is one of the largest dioceses in Russia, and has an area of 804,346 square miles. There are in the diocese 350,000 Latin Christians, chiefly the descendants of German colonists, in 100 parishes, about 40,000 Armenian Catholics in 50 parishes, and over 300 Chaldean Catholics for whom there is one parish. The priests number about 210, 60 being Armenians. The bishop lives at Saratov, the capital of the government of the same name. The ecclesiastical institutions are, besides the cathedral chapter, the seminary for priests at Saratov, which has a rector, an inspector, a spiritual director, and five professors; there is also a seminary for boys at the same place, with three professors. Religious orders are not permitted. For some years the Armenian Catholics have had an Apostolic administrator of their own (Sarkis Ter Abrahimian) to whom all Armenian Catholics in the whole of Russia are subject. In important decisions he is dependent on the Bishop of Saratov and Kerch.

During the second half of the eighteenth century large numbers of German colonists went to Russia at the urgent request of the Empress Catherine II. These emigrants were chiefly from Bavaria, Württemberg, Saxony, Alsace-Lorraine, the Tyrol, and Switzerland; they settled in the fruitful but uninhabited lands in the southern part of Russia. The colonies founded by them have retained their German names, as Mannheim, Munich, etc., as well as the German language and character. Among the half-million German settlers there were about 150,000 Catholics, who settled in villages of their own, apart from the remainder of the colony. These Catholic villages were generally in the basin of the Volga and the Caspian Sea. The Catholics were cared for spiritually at first by a few priests who had emigrated with them, but these pastors soon succumbed to privations and the unaccustomed climate. After the Russian Government sent Catholic priests from the provinces on the Baltic. Alexander I transferred the pastoral care of the Catholic colonies to the Jesuits, who came among them in 1803. Unfortunately, the expulsion of the Jesuits from Russia in 1820 put an end to their fruitful labours. The German clergy replaced priests from Polish monasteries, chiefly Dominicans, Carmelites, Trinitarians, and Vincentians, many of them old, feeble men, and unaccustomed with the German language. The difference in tongues, the racial antipathy between priests and settlers, and the great distance from the residence of the bishop (St. Petersburg) enormously increased the difficulties of spiritual administration. Thus religious conditions grew gradually more and more intolerable. Negotiations between Rome and St. Petersburg led finally, in 1847, to a concordat, by which, in addition to several other concessions, a German diocese was established for the colonists of Southern Russia, to be suffragan to Mohilev.

Saratov on the right bank of the Volga was settled upon as the see of the bishop, but the diocese received its name from the small town of Tiraspol, which in the fourteenth and fifteenth centuries was the capital of Kherson. Besides its vast extent, the new diocese was also singular on account of the varying nationalities of its inhabitants, who included German, French, and Italian colonists, besides Russians, Poles, Armenians, Kirghiz, Circassians, Ossetes, Daghestanians, Greeks, etc. The diocese was promised to build a cathedral, an episcopal residence, a building for the episcopal curia, and a seminary, and to provide for the endowment of the cathedral chapter.

In 1850 the first bishop, the German Dominican Ferdinand Helanus Kahn, was installed. The auxiliary bishop was a Pole. The promises of the Government were not fulfilled. On account of age and ill-health the bishop was unable to correct the existing grievances, nor was he sufficiently energetic to fulfill his obligations. In 1857 a seminary was opened, it is true, but in rented and inadequate quarters; the number of German teachers was also insufficient. After Bishop Kahn’s death (1864) the see remained vacant for eight years, all communication between Russia and the Holy See being at that time interrupted. It was not until 1872 that the rector of the seminary, Franz Xaver Zottmann, was appointed bishop (b. at Ornbau in the Bavarian Diocese of Eichstätt in 1826). In 1864 he had visited Eichstätt and there secured some professors for the seminary.

Bishop Zottmann laboured by speech, writing, and example, and by extraordinary activity in all directions, for the spiritual, moral, and material improvement of his diocese. He collected the money necessary to build a suitable cathedral, obtained a building for the seminaries, and spared no sacrifice to train a capable body of German clergy. Without abandoning the rights of the Church, he kept on good terms with the Government, and thus could do much that was forbidden to the Polish bishops. He could issue pastoral letters in the diocese, undertake journeys for making confirmations and for visitation, arrange collections of monies, and even go to Rome. Where, in 1882, he was the first Russian Catholic bishop to pay homage to the pope. On account of illness he resigned in 1888, and died in his native city on 12 December, 1901. He had made his diocese one of the best organized in Russia. His work was warmly carried on, after his resignation, by Anton Zimmer, Bishop of a German colony near Odessa, and had been educated at the Tiraspol seminary. Zerr resigned in 1902 on account of ill-health, and was succeeded by Eduard von der Ropp. Scarcely two years had elapsed before von der Ropp was transferred to the See of Vilna. He was followed by the present bishop, Joseph Kessler, b. at Louis, a village of German colonists in the Government of Samara, in 1862; consecrated 28 October, 1904.

JOSEPH LINS.

Tirso de Molina. See Téllez, Gabriel.

Tizio da Garofalo, Benvenuto, an Italian painter of the Ferrarese school; b. in 1481 at Garofalo, whence, as was the custom among artists, he took his name; d. at Ferrara, 6 (or 16) September, 1559. With Mazzolino (1481-1530) and Dossi Dossi (1479-1541), Garofalo makes up the modest triumvirate of the Ferrarese school in the sixteenth century. At an earlier date the school could boast of such men as Cosimo Tura, Francesco Cozzà, and Ercole Roberti, and at one time in the sixteenth century was perhaps the foremost school of poetry and painting in Italy. In the wonderful frescoes of the Schifanoia Palace (1470), depicting the life of Principe Il Boiardo, all its own, half allegorical and half real, portraying the world of the day in heroic fashion with all the pomp and circumstance of festal parade, and a magnificent display like that described in the "Triomf" of Petrarch. These frescoes are not only the most precious document we have of the fourtienth and the worldly ideal of the fifteenth century, but they mark in Italy the beginning of what is known as "genre painting," that is, sketches from real life, but characterized by a good taste, a dignity, and a decorative sense so sadly lacking in similar work of the
Dutch school later. This new style forms the artistic glory of the House of Este, which had also the honour of pensioning Ariosto. Its spirit can be still recognized in the famous paintings (now in the Louvre) executed in 1512 for the Dukes Isabella by Mantegna, Perugino, and Lorenzo Costa. It survives in the works of Dossi Dossi—in the charming Judith of the Modena gallery, and in the incomparable Circe of the Casino Borgia.

Garofalo’s real vocation lay in such work. His peculiar talent consisted in feeling and giving naïve expression to the joy of life, the charm of the world around him, the beauty of elegant and rural customs, and all that is now called “idyllic”, but as it appeared to Italian courtiers of the Renaissance period. His youthful works—the Boar Hunt in the Palazzo Sciarra and the Procession in the Palazzo Colonna at Rome—gave promise of a Latin Kypp, less compound, more romantic, more artistic, and more refined than the Dutch artist. This was the result of his early study under Panetti and Costa, and of his companionship with his fellow pupil Dossi. In 1495 he had lessons at Cremona from Baccaccio, who initiated him into the secrets of Venetian colouring. But a few years later, when entering on early manhood, he fell unfortunately under an influence quite alien to his own genius. It was at Rome, where he spent three years (1509–1512), that he succumbed to the charm of the new idea. Raphael was painting the “Camera” or hall of the Segnatura, and that of the Heliodorus; Michelangelo was decorating the ceiling of the Sistine Chapel. Garofalo was overcome by these masterpieces; he was unable to refrain from the contemplation of a higher beauty than that which he himself had expressed.

From this moment disappears the charming artist, the delicate painter of contemporary life, into which Garofalo was developing. The first of the Roman works imposed on him an ideal beyond his power to realize. The Ferrarese Garofalo might have been a master of the second class of creative artists, indeed, but of true originality; after his visit to Rome, he was but a “Raphael in miniature”. It is not easy to criticise harshly works which are always sincere and whose worst defect arises from the conscientious pursuit of an ideal. All Garofalo’s works bear traces of this extreme conscientiousness of execution—a quality that became ever rarer in the school of Raphael. As a moral force Garofalo has no equal in the group that surrounded the master; in this respect he is superior to such a painter as Giulio Romano. Even his least successful works retain, amid their somewhat frigid and commonplace purity, that transparency, glow, and harmony which are the marks of all Venetian colouring. But though the eye is charmed, all illusion as to the artistic quality of the work soon disappears. The figures have no life, the expression is uncertain, ideal heads betray a lack of intellect. The larger the figure the more emphatic are its defects. No elegance of design or skill in execution can hide the fact that Garofalo’s art consists in a clever handling of pure abstractions.

Nevertheless, despite his many ambitious but insignificant (though never vulgar) works, the natural instinct of the Ferrarese school had not quite forsaken him. It asserted itself amid all his idealistic strainings, and led him to create a style of “tableaux de peinté”, little pious scenes as helps to private devotion, to be set up in bed-rooms and oratories. We have here the Bible interpreted in a familiar mode, reduced to the proportions of a “genre” picture and making a popular appeal. The vast number of these little paintings in the Borgia, Doria, and Capitol galleries at Rome is a sufficient indication of their vogue. This was the style so successfully developed by Fislicher and Rembrandt in the seventeenth century. But, even in this new departure, the false ideal with which Garofalo was smitten at Rome continued to stifle his native genius.

Ever more and more he condemned himself to be but the pale reflection of Raphael. One can follow step by step the progress of his seduction to the idea of decadence. The “Virgin in the Clouds with four Saints” (1518) in the Academy of Fine Arts at Venice is an excellent work; the Pietà (1527) in the Brera Gallery at Milan reveals an increasing frigidity of treatment. If one Madonna (1532) in the Modena Gallery is a charming picture, another of slightly later date no longer merits this eulogy. The large “Triumph of Religion” in the Ateneo at Ferrara is a purely “bookish” work, whose ensemble is null and whose stray pleasing episodes are hard to discover. Later even his sense of colour begins to fail; year by year it grows colder and finally deserts him. Henceforth he can produce only such melancholy monochromes as the “Kiss of Judas” in the Church of San Francisco at Ferrara.

Such was the gradual process of distortion under a foreign influence of this charming genius, adapted by nature to feel and proclaim the poetry and homely realities of life, but rendered sterile by an unnatural endeavour to give expression to an ideal which was not its own. In the pursuit of this ideal, we see Garofalo lose his native qualities one by one, his exquisite sensitiveness as painter and colourist being the last to forsake him. From 1550 till his death Garofalo was blind. His history is one of the most eloquent examples of a mistaken work. With him the Ferrarese school loses all its originality, and abandons the place it should have filled in the history of art. Venice soon occupies the vacany; she is destined to translate to canvas those formulæ for “painting from life”, which Ferrara had dimly foreshadowed. Giorgione, Titian, Palma, Bonifazio are to paint the laurels which Garofalo refused, and to deprive him of the honour of inaugurating a style so fruitful in the subsequent history of painting.
TITUS

TITUS, James (Joseph-Jacques), French draughtsman and painter, b. at Nantes, 15 Oct., 1836; d. at Buillon, Department of Doubs, 3 Aug., 1802. He studied at Paris at the Academy of Fine Arts and in the ateliers of Ingres and Flandrin. During this period of his career he became well acquainted with the darker side of the moral and political life of the city. The first paintings that he exhibited at the salon attracted great attention, especially the one picturing the meeting of Faust and Gretchen, now in the Luxembourg Museum. When the Commune came into power Tissot fled to England for fear of coming into conflict with the Government on account of the political intrigues of his brother. In England he gained a reputation as a portrait and genre painter. Tissot, however, was more of an illustrator than a painter, as is shown in the brilliant series of watercolours, "La femme à Paris", in which careful, correct work was done with much dash he dashed the follies of modern life. Later he issued a similar series of aquarelles on high life in London. The pieces of the former of these series entitled "La femme qui chante dans l'église" obliged him to go repeatedly to church during the service, and this suggested to him the conception of the picture, "Christ Appears to Consoledtwo Unfortunates in a Ruin". With this he mentioned work a new epoch began in the life of the painter and, in the course of time, of the man. The figure of Christ had so attracted him that he was never afterwards able to put it out of his mind. He went to Palestine where he spent a year in the most careful geographical and ethnographical studies. After this he spent ten years preparing the large number of aquarelles that compose his "Life of Christ". The absolutely modern conception of this work shows a complete break with the past. The work was entitled "La vie de notre Seigneur Jésus-Christ, 865 compositions d'après les quatre évangiles, avec des notes et des dessins explicatifs, par James Tissot" (Tours, 1896). The price was high, 5000 francs for the edition on Japanese paper, and 1500 francs for that on vellum. A cheaper popular edition in English was issued later. Tissot also designed a series of illustrations for the Old Testament, which, however, were not as fine as the earlier ones. The aquarelles on the New Testament have been called "a revolution in religious art".

BEDA KLEINSchMIDT.

Tithes (Anglo-Saxon, leotha, a tenth), generally defined as "the tenth part of the increase arising from the profits of land and stock, allotted to the clergy for their support or devoted to religious or charitable uses". A more radical definition is "the tenth part of all fruits and profits justly acquired, owed to God in recognition of his supreme dominion over men, and large to the paid to the ministers of the church". The custom of giving tithes reaches back into unknown antiquity. It is mentioned in Gen., xiv, without any thing to indicate that it was something newly instituted. Just as Abraham is there represented as offering one tenth of the produce of the good land of Melchisedech, so in Gen., xxviii, Jacob is recorded as giving a tithe of all his possessions to the Lord. Under the Mosaic Law the payment of tithes was made obligatory. The Hebrews are commanded to offer to God the tenth part of the produce of the fields, of the flocks and herds and of the fruit of the earth and of the vineyard (Lev., xxvii, 30; Deut., xiv, 22). In Deuteronomy there is mention not only of an annual tithe, but also of a full tithe to be paid once every three years. While it was to God Himself that the tithes had to be paid, yet we read (Num., xviii, 21) that He transfers them to His sacred ministers: "I have given to the sons of Levi all the tithes of Israel for a possession, for the ministry wherewith they serve me in the tabernacle of the covenant." In paying the tithe, the Hebrews divided the annual harvest into ten parts, one of which was given to the Levites after the first fruits had been subtracted. This was partitioned by them among the priests. The remainder of the harvest was then divided into ten new parts, and a second tithe was carried by the head of the household to the sanctuary to serve as a sacred feast for his family and the Levites.

If the journey to the temple was unusually long, money could be substituted for the offering in kind. At the triennial tithe, a third decimation was made and a tenth part was consumed at home by the householder with his family; the other seven parts remained to the poor. This triennial year was called the year of tithes (Deut., xxvi, 12). As the tithes were the main support of the priests, it was later ordained that the offerings should be stored in the temple (II Par., xxxii, 11). It is to be noted that the custom of paying out tithe was not the same as tithes were common to all ancient peoples. In Lydia a tithe of cattle was offered to the gods; the Arabian paid a tithe of incense to the god Sabas; and the Carthaginians brought tithes to Melkarth, the god of Tyre. The explanation of why the tenth part should have been chosen among so many numbers is to be found (apart from a common primitive revelation) that mystical signification of the number ten, viz., that it signifies totality, for it contains all the numbers that make up the numerical system, and indeed all imaginable series of numbers, and so it represents all kinds of property, which is a gift of God. All species of property were consequently reckoned in decades, and by consecrating one of these parts to God, the proprietor recognized the Source of his goods. However, the payment of tithes was also a civil custom. They were payable to the Jewish kings and to the rulers of Babylonia, and they are mentioned among the Persians, Greeks, Romans, and later the Mohammedans.

In the Christian Church, as those who serve the altar should live by the altar (I Cor., ix, 13), provision of some kind had necessarily to be made for the sacred ministers. In the beginning this was supplied by the spontaneous offerings of the faithful. In the course of time, however, as the Church took a wider and wider place in social institutions arose, it became necessary to make laws which would insure the proper and permanent support of the clergy. The payment of tithes was adopted from the Old Law, and early writers speak of it as a divine ordinance and an obligation of conscience. The earliest positive legislation on the subject is contained in the letter of the bishops assembled at Tours in 567 and the canons of the Council of Macon in 585. In course of time, we find the payment of tithes made obligatory by ecclesiastical enactments in all the countries of christendom. The Church looked upon this payment as "of divine law, since tithes were instituted not by man but by the Lord Himself" (C. 14, X de decim. III, 30). As regards the civil power, the Christian Roman emperors granted the right to churches of retaining a portion of the produce of certain lands, but the earliest instance of the enforcement of the payment of ecclesiastical tithes by civil law is to be found in the capitularies of Charlemagne, at the end of the eighth century. English law very early recognized the tithe, as in the reigns of Athelstan, Edgar, and Canute before the Norman Conquest. In English statute law proper, however, the term tithe is used to denote the twentieth part of the produce of Westminster of 1285. Tithes are of three kinds: predest, or that derived from the annual crops; mixed, or what arises from things nourished by the land, as cattle, milk, cheese, wool; and personal, or the result of industry or occupation. Predest tithes were generally called great tithes, and mixed and personal
and placed by his brother with the celebrated mosaicist, Sebastiano Zucato, but at the end of four or five pines he entered the studio of the aged painter Giovanni Bellini, at that time the most noted artist in the city. There he found a group of young men about his own age, among them Giovanni Palma da Serentina, Lorenzo Lotto, and Sebastiano Luciani, who were all to become renowned. The foremost of these innovators and their masters was Castelfranco, nicknamed Giorgione. With him Titian formed a friendship of which all his early works bore traces, so much so that at this period it is difficult to distinguish the young master of Cadore from him of Castelfranco. The earliest known work of Titian, the little "Ecce Homo" of the Scuola San Rocco, is long regarded as the work of Giorgione. And the same confusion or uncertainty is connected with more than one of the "Sacred Conversations", in which several holy persons (generally three or four) appear at half length in sweet and familiar association with the Blessed Virgin. The two young masters likewise represent the rest of the time, Venice what the cartoons of Leonardo and Michelangelo at the Signiery were to the Florentine School. That of Giorgione and Titian is known to us in part through the engraving of Fontana. An idea of Titian's talent in fresco may be gained from those he painted, in 1511, at Padua in the Carmelite church and in the Scuola del Santo, some of which have been preserved, among them the "Meeting at the Golden Gate", and three scenes from the life of St. Anthony of Padua, the "Murder of a Young Woman by Her Husband", "A Child Testifying to Its Mother's Innocence", and "The Saint Healing the Young Man with a Broken Limb." The arrangement and feeling are not the chief merits of these last-named works, but the beauty of the types, the grace of the female figures, the charm of the landscapes, and particularly the enchantment of the colouring must forever rank these frescoes with the most valuable works of Titian's youth.

Among the religious paintings of this period may be mentioned that of Antwerp, "The Doges Pesaro presented to St. Peter by Alexander VI" (1508), and the beautiful "St. Mark surrounded by Sts. Cosmas and Damian, Sebastian and Rococo" (Venice, S. Maria della Salute, c. 1511). Already the young painter was in possession of his type of Virgins with powerful shoulders and somewhat rounded countenances, and in particular he had elaborated an extremely refined type of Christ, the most beautiful example of which is the wonderful Christ of "The Tribute Money", at Dresden, a face whose delicacy of plasticity, and moral charm have never been surpassed by any other School. From the same period seems to date the "Triumph of Faith", a subject borrowed from Savonarola's famous treatise, "The Triumph of the Cross", and treated with a magnificent fire in the spirit of Mantegna's cartoons and Dürer's prints of the "Triumph of Maximilian" (cf. Male, "L'art religieux en France à la fin du moyen âge", 1908, 296 sq.)). These prints were executed by Andrea. But what may be called the most enduring works of Titian's youth are the profane and indeterminately allegorical ones, whose unmatched poetry of form and colouring has often a joy of life that it belies or transcends melancholy. Such for example is the charming picture of the "Three Ages", in the Ellesmere Gallery; such especially is the masterpiece in the Cassino Borgese, "Profane and Sacred Love", whose meaning has never been successfully penetrated (cf. Olga von
Gerstfeldt, "Venus und Violante" in "Monatsheft für Kunstwissenschaft", Oct., 1910), but which none of the less remains by the contrast of its two figures, the splendour of the motif, the depth of the landscape, the rhythm and mystery of the composition one of the imperishable elegies of all paintings and which even Giorgione does not equal in his "Concert".

Giorgione died in 1511 and the aged Bellini in 1516, leaving only a portion of such masterpieces without a rival in the Venetian School. For sixty years he was to be the absolute and undisputed head, the official master, and as it were the painter laureate of the Republic Serenissime. As early as 1516 he succeeded his old master Bellini as the pensioner of the Senate. Fifteen years later began the relations with Charles V, Francis I, Alfonso and Isabella d'Este, the Houses of Ferrara and Urbino, which made him the first of the princely painters of the Renaissance and the one whose position was most international and most glorious of all. However he rarely left Venice. Married to a tenderly loved wife, solidly established in his habits of work, and like all Venetians strongly attached to the life of Venice, he regarded nothing as being worth a separation from his home, his studio, or his country. Except for a visit to Rome in 1545, and two or three visits to Augsburg between 1548 and 1551 to meet the emperor, he never left Venice save to return to Cadore. Even the liveliest curiosity regarding his art, the ardent desire to learn, which to the end of his life impelled him to acquire all that he could concerning art, as he had already devoured all the substance of Bellini and Giorgione, could not induce him to leave his work and his easel. Venice was in every respect a most favourable centre, a meeting-place for artists from all parts of the world, from North and South, Germany and Florence. Leonardo da Vinci passed through the city in 1500, Dürer stayed there in 1506, Fra Bartolommeo in 1508, Michelangelo in 1529; and the commissioner of the city, especially in books and prints, the permanent society of artists and men of letters, could not leave Titian ignorant of what was being done in the world. No invention of art was unfamiliar to him, and all his life he displayed the same eagerness to enrich his style with new elements, the same consuming anxiety for perfection.

During the period (1516-30) which may be called the period of his bloom and maturity, the artist freed himself from the traditions of his youth, undertook a class of more complex subjects and for the first time attempted the monumental style. His most noteworthy work in this style, the "Assumption" of the Church of the Frari (1518), now in the Academy of Venice, is not, despite its celebrity, a very decided work. In more than one sense it is one of his coldest productions. The solution of the problem attempted—that of uniting in the same composition two or three scenes superimposed on different levels, earth and heaven, the temporal and the infinite—was continued in a series of works such as the retable of San Domenico at Arezzo (1520), the retable of Brescia (1522), the retable of San Nicolo (1523, at the Vatican), each time attaining to a higher and more perfect conception, finally reaching an unsurpassable formula in the Pesaro retable, (1526), in the Church of the Frari at Venice. This perhaps is his most perfect and most studied work, whose patient development is set forth with supreme display of grandeur and freedom of originality and style. Here Titian gave a new conception of the traditional groups of donors and holy persons moving in aerial space, the plans and different degrees set in an architectural framework. To this period belongs a still more extraordinary work, "The Dead Christ in the Catacombs of St. Peter's at Verona" (1530), formerly in the Dominican Church of S. Zani- polo, and destroyed by an Austrian shell in 1867. There now exist only copies of this sublime picture (there is an excellent one at Paris in the Ecole des Beaux Arts). The association of the landscape with a scene of murder—a rapidly bristling granite, a cry rising above the old oak-trees, a Dominican escaping the ambush, and over all the shudder and stir of the dark branches—this is all, but never perhaps has tragedy more swift, startling, and pathetic been depicted even by Tintoretto or Delacroix.

The artist continued simultaneously his series of small Madonnas which he treated more and more amid beautiful landscapes in the manner of genre pictures or poetic pastoral, the "Virgin with the Rabbit" in the Louvre being the finished type of these pictures. Another marvellous work of the same period, also in the Louvre, is the "Entombment", surpassing all that has been done on the same subject. This was likewise the period of the exquisite mythological scenes, such as the famous "Bacchanals" of Madrid, and the "Bacchus and Ariadne" of London, perhaps the most brilliant productions of the neopagan culture or "Alexandrianism" of the Renaissance, many specimens of which, although not surpassed even by Rubens himself. Finally this was the period of perfect mastery when the artist composed the half-length figures and busts of young women, such as "Flora" of the Uffizi, or "The Young Woman at Her Toilet" in the Louvre (also called, without reason, "Laura de Dianti" or "The Mistress of Cesare Borgia") which will always remain the ideal image of harmonious beauty and the grace of life at one of the periods which best knew the happiness of existence.

During the subsequent period (1530-50), as was foreshadowed by his "Martyrdom of St. Peter", Titian devoted himself more and more to the dramatic style. From this time date his historical scenes, of which unhappily it is difficult to judge, the most characteristic having been much injured or destroyed; thus the "Battle of Cadore", the artist's greatest effort to master movement and to express even tumult, his most violent attempt to go out of himself and achieve the heroic, wherein he rivals the "War of Pisa", "The Battle of Anghiari", and the "Battle of Constantine", perished in 1577, the year of Titian's death, in the fire which destroyed all the old pictures adorning the Doge's Palace. There is extant only a poor, incomplete copy at the Uffizi, and a mediocre engraving by Fontana. In like manner the "Speech of the Marquis del Vasto" (Madrid, 1541) was partly destroyed by fire. But this portion of the master's work is adequately represented by the "Presentation of the Blessed Virgin" (Venice, 1539), one of his most popular canvases, and by the "great "Ecce Homo" (Vienna, 1541), one of the most
pathetic and life-like of masterpieces. The School of Bologna and Rubens (Miracles of St. Benedict, St. Francis, etc.) many times borrowed the distinguished and magisterial mise-en-scène, the grand and stirring effect, and these horses, soldiers, lictors, these powerful stirrings of crowds at the foot of a stairway, while over all are the light of torches and the flapping of banners against the sky, have been often repeated. Less successful were the pendentives of the cupola at Sta. Maria della Salute ("Death of Abel", "Sacrifice of Abraham", "David and Goliath"). These violent scenes viewed in perspective from below—like the famous pendentives of the Sistine Chapel—were by their very nature in unfavourable situations. They were nevertheless much admired and imitated. Rubens among others applying this system to his forty ceilings (the sketches only remain) of the Jesuit church at Antwerp.

At this time also, the time of his visit to Rome, the artist began his series of reclining Venuses (the flesh-tints with the gold of the hair, the delicate tone of the linen, countless other beauties of detail merged in the harmony of the whole, nothing obstructs itself independently.” It is impossible to enumerate, even briefly, Titian’s splendid gallery of portraits; princes or doges, cardinals or monks, artists or writers, no other painter was so successful in extracting from each physiognomy so many traits at once characteristic and beautiful. Holbein was also individual, but how much less the artist; Van Dyck is perhaps more graceful but how much more monotonous and affected. Among portrait-painters Titian is comparable only to the greatest, a Rembrandt or a Velasquez, with the interior life of the former, and the clearness, certainty, and obviousness of the latter. The last-named qualities are sufficiently manifested in the "Paul III" of Naples, or the sketch of the same pope and his two nephews, the "Aretino" of the Pitti Palace, the "Eleanora of Portugal" (Madrid), and the series of Charles Fiths of the same museum, the "Charles V with a Greyhound" (1533), and especially the "Charles V at Mühlberg" (1548), an equestrian picture which as a symphony of purples is perhaps the ne plus ultra of the art of painting.

During the last twenty-five years of his life (1550-76) the artist, more and more absorbed in his work as a portrait-painter and also more self-critical, unable to be satisfied and insatiable of perfection, finished only a few great works. Some of his pictures he kept for ten years in his studio, never wearying of returning to them and retouching them, constantly adding new expressions at once more refined, concise, and subtle. His palette lost the incomparable freshness which characterized the great work of his maturity; the tone became softened, the matter itself grew heavier and more dense, there is less variation, resplendence, and brilliance, but in the gamut selected there were never more powerful notes nor bolder execution. The artist subjects to his ideas and methods the simplification which summed up the experiences of a long life. For each of the problems which he successively undertook he furnished a new and more perfect formula. He never again equalled the emotion and tragedy of the "Crowning with Thorns" (Louvre), in the expression of the mysterious and the divine he never equaled the poetry of the "Pilgrims of Emmaus", while in superb and heroic brilliancy he never again executed anything more grand than "The Doge Grimani adoring Faith" (Venice, Doge’s Palace), or the "Trinity", of Madrid. On the other hand from the standpoint of flesh tints, his most moving pictures are those of his old age, the "Danae" of Naples and of Madrid, the

"Antiope" of the Louvre, the "Rape of Europa" (Boston, Gardner collection), etc. He even attempted problems of chiaroscuro in fantastic night effects ("Martyrdom of St. Laurence", Church of the Jesuits, Venice; "St. Jerome", Louvre). In the domain of the real he always remained equally strong, sure, and master of himself; his portraits of Philip II (1498) and his his son (1502) among others, some of himself are numbered among his masterpieces.

So until the end, until that tragic "Pietà" of the Academy of Venice, which was found incompletely in his studio, the aged master strove indefatigably in pursuit of an ever-changing ideal, or rather one which changed as he believed he had given it full expression.

Even before a new epoch in the discovery of an artist hitherto unknown to him, revealed to him a new aspect of beauty, the great old man unweariedly recommenced his work and endeavoured to incorporate in it the new elements which he had just perceived. This it is which gives to his work as a whole its great significance and to his very countenance, beneath the health and balance of an iron constitution, an air of sadness and distress the like of which is only found in Rembrandt's last portraits. In fact no one ever expended such obstinate effort in the attempt to realize perfection. It is this which gives to certain works a tense character and elsewhere an aspect of deliberativeness, which occasionally causes an appearance of coldness. But in the end he is always regarded as the exemplar and the greatest of painters. "Titian is one of those who come closest to the spirit of antiquity", writes Delacroix in his "Journal", and in a note for the "Dictionnaire des beaux arts" defining the art he cites the work of Titian, and indeed there is no other modern work which shares so fully with the marbles of the Parthenon the privilege of externally enchanting and moving us.

LOUIS GILLET.

Title of Ordination. See Alimentation.

Titopoliaceae (Titopoliaceae), titular see, suffragan of Selcuk. Tradition in Isauria (Origen christ., II, 1023) mentions three of its bishops: Artemius at the Council of Constantinople in 381; Mommeus at the Council of Chalcedon in 451; Domitius at the Council Trullan in 692. The see is mentioned in the sixth century "Notitia episcopatum of An- toch (Echos d'Orient, X, 145). About 522 the ecclesiastical province of Isauria was ceded to the Patriarchate of Constantinople and henceforth Titopoliaceae figures in the "Notitia episcopatum" of that Church, as it does also about 900 in that of Leo the Wise (Gelzer, "Ungedruckte ... Texte der Notitie episcopatum", 557), and about 940 in that of Con- stantine (Gelzer, "Cyprian Dict and other orbis roman", ed. Gelzer, 76). The town is mentioned by "Hieroclis Synecdemus" ed. Burckhardt, 37, by George of Cyprus, 42, and by Constantine Porphyrogenitus "De thém.", 38, as one of the cities of the Isaurian Decapolis. Its exact site is unknown.

RASMUS, Anna Minor (London, 1890), 390.

S. VAILHÉ.

Titular Bishop. See Bishop; In Partibus Infidelium.

Titulus. In pagan times titulus signified an inscription on stone, and later the stone which marked the confines of property. Under Trajan it signified at Rome the limits of the jurisdiction of the priests, which is the germ of the meaning it bears in its ecclesi- to-ceremonial-archeological usage. Baronius explains that a cross sculptured on a church was the titulus which designated it as belonging to Christ, just as imperial property was indicated by the titulus fasces. Nothing remains to say about the use which certain public Christian edifices of Rome before Constantine were situated. The earliest Christians assembled in the halls of private houses, and these oratories were therefore called ecclesia domestica. St. Paul mentions those at Rome and Corinth; in accordance with the most ancient Roman traditions, they were those of Aquila and Priscilla. A new term, the basilica of Pudentiana on the Viminal. These ecclesia domes- tica became the domus ecclesiae, and later domus Dei, i.e. the dominicum; and in this last period they received the name tituli, from the name of the founder or proprietor who held the property in custody for the Church. A populous Christian community, like that of Rome, by the end of the third century must have possessed a domus Dei, a social centre which served as church, bishop's residence, refectory, dispensary of charity, hospice, tribunal, and seat of the episcopal government, as was the case at Antioch, Carthage, etc., in the fourth century. The centre of this episcopal government was located at the Lateran, in the palace formerly belonging to Fausta, daughter of Maximianus. The history of the Lateran begins with A. D. 313 and the most recent excavations there have revealed six Romano public and private edifices, but no Christian building earlier than Constantine. According to de Rossi the centre of episcopal administration before the Lateran was a Christian building at San Lorenzo in Damaeo, where in the fourth century the archives of the church were kept, and where now the central chancery (Cancellaria Apostolica) of the Papal government is situated.

According to the Liber Pontificalis, Pope Fabian about 250 divided the regions of Rome among the deacons, creating ecclesiastical districts. Probably these districts were provided with an edifice which was the centre of administration and served that purpose for several centuries after Constantine, although no traces of such buildings survive. The beginning of the seventh century had nothing to do with these diocesan districts. In the fourth century, although the domus Lateranensis was the chief Christian edifice of the city, Rome possessed several places of assembly for the Christian community, which Ammonius Marcellianus calls confraternitas; the unity of the presbyterium was broken and other ecclesiastical groups were created within the city, similar to the present city parishes independent of one another and dependent on a common centre, under the direction of presbyters permanently appointed. To each one a basiliaca was assigned, dominium domus Dei; the presbyters resided near this edifice, which in the language of architecture is called titulus. The most ancient text which alludes to a titulus is the apology of St. Athanasius against the Arians (xx). The most ancient inscription relating to a titulus goes back to A. D. 377. The Liber Pontificalis attributes the foundation of the tituli to different popes of the first half of the fourth century, and this information, which seems genuine, is in part confirmed by inscriptions and by the names given to the churches. The tituli presby- terales therefore go back to the peace of the Church which was not founded at one time, but all this was part of the progress of the Christian propaganda among the people of Rome. At the close of the fifth century there were twenty-five tituli; the Liber Pontificalis confirms this number and attributes their foundation to Pope Evaristus at the beginning of the second century. The last titulus recorded in the Liber is that of Vesta under Innocent I. The report of the Council
of Rome (1 March, 499), contains the list of the names of the presbyters and their tituli. From this and from the report of a council held by Gregory the Great in 585, we know there were twenty-five tituli, which number, with few exceptions, remained the same until about 1120 when it is given as twenty-eight. Three or four of the Gregorian tituli do not appear in the list of the council of 499, while the list of Pope Symmachus gives five which are not found in the council of 585. This difference is explained by establishing the location and the surroundings of the churches and identifying them with those of Pope Gregory. The titular churches are all found at a distance from the classic centre of the City, and correspond to an epoch in which paganism preponderated at Rome. From the studies made and from existing monuments it is safe to attribute the foundation of many tituli to the third century and of most of them to the fourth.

After the presbyteral tituli came the diaconiae; these are not found in Roman documents before the seventh century. The Liber Pontificalis mentions them for the first time in the life of Benedict II (684-63). From then on the diaconiae were chartered institutions, and in a measure replaced for the Romans the frumentio of Byzantine times and the doles of bread of the best days of the empire. They were established in the centre of the city, with the materials, or on the site of, public edifices in a period when there was a lack of a motive for building Christian churches away from the Forum or the Palatine. Under Pope Adrian (772-95) their number was fixed at eighteen. From the beginning of the twelfth century cardinal deacons adopted the names of their diaconiae and the number of eighteen was maintained until the sixteenth century. By the twelfth century cardinal deacons as well as the presbyters had long been dispensed from personal service at the tituli, since which time tituluses of itself acquired a meaning analogous to that of the present time.

Titus, Bishop of Bostra, b. about 362-371. Sozomen (Hist. eccl., III, xiv) names Titus among the great men of the time of Constantius; he also tells (op. cit., III, xxv) of a meeting of bishops held upon the advice of Julian the Apostate. It was expected that the re-establishment of paganism would occasion riots in Bostra as it had elsewhere. Julian wrote to Titus that he would hold him and the clergy responsible for any outbreak. Titus replied that though the Christians were equal in number to the pagans they would obey him and keep quiet. Julian then wrote to the Bostrians urging them to expel Titus because he had calumniated them by attributing their quiet conduct not to their own good dispositions but to his influence. According to Sozomen (op. cit., III, xxv) Titus was one of the bishops who signed the anti-Christian letter addressed to Jovian by the Council held at Antioch (363), in which the Nicene Creed was accepted, not, however, without a clause "intended somewhat to weaken and semiarianize the expression bygoveias" (Hefele, "Councils", II, p. 283; ANTIQUE HEAD OF TITUS, Vatican Museum.

Titus, Roman Emperor 79-81, b. 30 Dec., 41; d. 13 Sept., 81; son of the Emperor Vespasian, and from the year 70 Caesar and coregent; he was highly educated and a brilliant poet and orator in both Latin and Greek. He won military fame in the war in the years 69-70, against the revolted Jews. In April, 70, he appeared before the walls of Jerusalem, and conquered and destroyed the city after a siege of five months. He wished to preserve the Temple, but in the struggle with the Jews who rushed out of it a soldier threw a brand into the building. The siege and taking of the city were accompanied by barbarous cruelties. The next year Titus celebrated his victory by a triumph; to increase the fame of the Flavian dynasty the inscription on the triumphal arch represented the overthrow of the helpless people as an architectural achievement. The historical significance of the destruction of the Jewish state is that the Jews have since then been scattered among foreign nations. As ruler Titus was by no means popular; he shared in the voluptuousness of the Rome of that era, and was responsible for the acts of violence which occurred during the administration of his father. Consequently an evil reign was expected. However, in the short period of his independent authority, Titus agreeably disappointed these anticipations. His noble benevolence was exhibited in the saying that the day was lost in which he had done no one a kindness; he gained the honourable title of "amor et deliciam generis humani" (the darling and admiration of the human race). During his reign Italy suffered from two severe calamities. On 24 Aug., 79, the celebrated eruption of Vesuvius buried the cities of Pompeii, Herculaneum, and Stabiae, and some months later a fearful conflagration did great damage at Rome. On both occasions Titus showed a fine humanitarianism. His actions were not free from ostentation and seeking after effect. He died from the effects of his luxurious life.

"Contra Manichaeos" is the most important work of the kind that has come down to us, and its historic value is very great because of the number of quotations it contains from Manichaean writers. In one place Titus seems to favor Origen's view that the pains of the damned are not eternal (on this point see especially Ceillier, "Histoire générale des auteurs sacrés et éclesiastiques", VI p. 54, who seems disposed to acquit him of this error). The work consists of four books of which the fourth and the greater part of the third are only extant in a Byronic translation. The Greek and Syriac texts of the Contra Manichaeos were published by Lagarde (Berlin, 1859). Earlier editions of the Greek text suffer from an insertion from a work of Severian own to the displacement of a leaf in the original codex. For Contra Manichaeos, and other writings attributed to Titus see Migne and Galland. Several exegetical fragments of this commentary were published by Sickenbergers in Texte u. Untersuchung, VI (new series), Aarbodev-Skalland, Patrology (St. Louis, 1908), 270-1.

Empire (London, 1850-83), 22; KLEMENZ LöFFLER.

Tius (Tium), titular see, suffragan of Claudiopolis
in Hōnorias. According to Strabo (542, 545, the
town was not remarkable save as the birthplace
of Philetius, founder of the royal dynasty of Pergamus.
The coins give Dionysius as the founder; in fact it was
the site of a temple of Aesculapius and one of Jupiter.
Le Quien (Oriens christ., I, 575) mentions among its
bishops: Apramagonius at the Council of Ephesus in
431; Andrew in 518; Eugenius in 536; Longinus at the
Sixth General Council in 681; Michael at the Seventh
General Council in 787; Constantine at the Eighth
General Council in 805. The author of an account of the
transfer of the relics of St. Euphemia of Chalco-
don (Acta SS., Sept., V, 274-83). This see figures in
all the "Notitiae episcopatuum". Novel xxix of
Justian locates the town in Paphlagonia. George
Paschymerus (III, 312) mentions Tium among the
Byzantine towns which escaped the ravages of the
Sclauks in 1289. This modern village of Filissi stands
on the ruins of the ancient Tium, which included the
remains of ramparts and sculptures. The village is
in the caza of Hamidyse and the vilayet of Castamouni,
not far from the mouth of the Filissi-Tehal, the Billeu-
se, and the Ayvaz. There are modern buildings on
the outskirts of the town. St. Euphemia of Chaldon,
the "Euphemia of Paphlagonia", is represented by
the church of St. Euphemia, the "Basilica of Euphemia"

S. VALIERE.

Tivoli, Dioecese of (Tiburtina), in the Province of
Rome. The city is situated where the Anio, issu-
ing from the Sabine hills, leaps down from a height
of nearly 300 feet and enters the Roman Campagna.
The water power of the beautiful falls, which attract
many tourists to the city, is utilized in various indus-
tries and supplies the electric current that lights
Rome. The slopes of the neighboring hills are cov-
ered with olives, vineyards, and gardens; the most
important local industry is the manufacture of paper.
The great cascade has existed only since 1835, when
the Gregorian tunnel through Monte Catilino was
completed, to give an outlet to the waters of the Anio
submerged in the city. The city is noted for its
churches and monasteries, among which the Palatine
"Grotto of Neptune" and the "Cascatelle" are an-
cient. There are ruins of two old temples, one of Her-
acles Saxonus, commonly called "of the Sybi", the
other of Tiburtus, both overlooking the great cascade.
Near the Roman gate is the "Tempio della Tosse".
Among the monasteries and churches are: the Monas-
try of St. Maria Major de la Carità, the Monastery
of St. Maria Maggiore, the Monastery of St. Maria degli
Olivi, containing interesting fifteenth-century fres-
ccoes; also St. Maria of Quintiliano, built on the ruins
of the villa of Quintilius Varus. In the environs are
many ruins of ancient villas, the largest being the
famous construction of the Emperor Hadrian, which
comprised a villa, gardens, stables, shipyard, library,
etc., and covered 173 acres of ground. Many of the
treasures of the Vatican Museum were discov-
dered here. The most notable of the modern villas are
the Villa d'Este, erected by Pirro Ligorio for
Cardinal Ippolito d'Este (1549), and decorated with
frescoes by Coreccio; at present it belongs to the Arc-
hduke Franz Ferdinand of Austria.

According to some of the ancient writers, Tivoli was
founded by the Siculi; according to others, by a colony
of Argives. It is first mentioned in Roman history in
493, as included in the alliance against the Volscians,
but in 381 it sided with the Volscians and was
thereupon conquered, it shortly afterwards (339)
allied itself with Prænesta (Palestrina); for some time
it was in the Confederation and in the Social War be-
came a municipium. It was strongly fortified by
Belisarius in the Gothic War, but almost destroyed by
Totila in A. D. 540. After the Lombard invasion it
was in the power of the Byzantines and formed part of
the Patrimony of St. Peter. It had a count, repre-
senting the emperor. In 916 Pope John X. uses a
memorable victory there over the Saracens. In the
Middle Ages it rebelled at times against the popes,
under Henry IV and V, and against Innocent II; at
other times it fought against the Roman rebels, as
under Eugene III and Adrian IV. In the thirteenth
century the Senate of Rome succeeded (under Inno-
cent IV) in imposing a tribute on the town, as ar-
gesed to itself the right of appointing a count to gov-
ern it in conjunction with the local consuls. In the
fourteenth century it sided with the Guelphs and
strongly supported Urban VI against Clement VII.
Cesare Borgia was tutor and later Braccio da Mont-
tone once, repulsed from the city by the papal forces,
it was wrested by internal factions, in consequence
of which Pius II constructed the fortress which still
exists. Alexander VI withdrew it from the jurisdic-
tion of the Roman Senate. In 1527 it was sacked by
bands of the supporters of the emperor and the
Colonna, important archives being destroyed during
the attack. In 1547 it was again occupied by the
Duke of Alba in a war against Paul IV, and in 1744
by the Austrians.

Tivoli is the birthplace of St. Severinus (sixth cen-
tury), of Popes St. Simplicius and John IX, also of
the Roman martyr and birectric of the Church St.
Chlorus. There are also several ancient churches that
counts many martyrs, among them St. Getulius, St.
Symphorosa with her seven sons, martyred in the days
of Hadrian; at a later period a basilica was erected
over the place of their martyrdom. Other martyrs
were Vincentius, Majorius, and Gennaroius. The dea-
con St. Cletus was later confounded with the pope of
that name, really St. Anacletus. The first known
bishop was Candidus (465); among his successors
were: Gualterus (1000), upon whom the feast of St.
Lawrence, patron of the city, was instituted; Otto
(1149), during whose episcopacy Eugene IV died at
Tivoli; Giovanni da Gabenna (O.P. (1357), who died
in the odour of sanctity; Filippo de' Rudini, O.P.
(1367), sent by the Romans to Gregory IX to induce
him to return to Rome; Fra Lorenzo, O.M. (1450),
reformer of the clergy; Cardinal Giulio Roma (1634),
restorer of the cathedral and founder of the seminary;
Cardinal Marcello Caffarelli (1552), who completed
the work of his predecessor; Gregorio Barnaba
Chiaromonti (1782), afterwards Pius VII. The dio-
ce is immediately subject to the Holy See. In the
process of concentrating the Italian seminaries the
course of theology at Tivoli was suppressed. There
are 42 parishes; 13,000 inhabitants; 99 secular and 35
regular priests; 11 religious houses and 6 of sisters;
1 college for boys, and 1 for girls.

TIAZCALA

TLAXCALA (TLAXCALENSIS), a former diocese of the
colony of New Spain. It was the fifth diocese es-
established in the Americas by order of seniority;
the second established in Mexico (the first in title being
Yucatán); and the first diocese of the colony of New
Spain with an acting bishop, Fray Julián García, Domi-
nican, nominated by Clement VII, at the re-
quest of Charles V. At first Fray García was only
presented as Bishop of Yucatán; the royal provision
of Charles V reads: "We present you (Rev. Father
Julián García) to the Bishopric of Yucatán and Santa
Maria de los Remedios", but, as the territory dis-
covered and conquered by Hernando Cortés became
known to the Church, Clement XIV, in the document sent
to Bishop García in 1552 says: "We have designated
those bishops who shall succeed you, that you call your-
selves not bishops of Santa María (de los Remedios or
of Yucatán) but "Tenuxitlán" and of other lands to
be mentioned." This document denotes the new
name of the bishop but does not determine it. Father
García himself in his first declaration enlightens us

U. BENIGNI.
by saying: "We choose the town of Tlaxcala as the seat of our cathedral church." Bishop Garces reached New Spain in 1527 and took possession of his see. Subsequently finding that it was impossible to hold the choir office at Tlaxcala because there was no cathedral, but only an altar covered with thatch work, and as a sumptuous church with three naves had been erected in the new city of Puebla de los Angeles, the bishop declared that the chapter should pass to the latter city, and transferred thither the episcopal see on 3 October, 1539. This change was approved by

Indian hieroglyphic of its name represents two hands beating a tortilla, or corn cake, which is the meaning of the word "tlaxcallan". In former times this republic was thickly populated, but epidemics, emigrations, and the work of constructing the canal of Nochis-tongo to drain the valley of Mexico brought about the extinction of the entire population of the Indians and the reduction of the population not to an insignificant number. In the archives of Tlaxcala is a royal document, bearing the date of 1539, which orders that the Indians of Tlaxcala be exempted from all works of servitude. This prerogative was conceded in return for their services to Hernán Cortés during the conquest. It is doubtful whether this order was ever carried out, for a document dated 1625 states that the city of Tlaxcala contained 300,000 inhabitants in the sixteenth century, while only 7000 remained when this document was written. The city of Puebla, which is the residence of the bishop and of the governor of the state, was founded in 1531 by the auditor Juan de Salmerón and Fray Toribio de Motolinía (see MOTOLINIA). The cathedral of Puebla, one of the most beautiful in the whole republic of Mexico, was finished by Bishop Palafox in 1649. There are, counting colleges and parochial schools, about three hundred Catholic schools in the archdiocese. The Protestants have ten colleges. The conciliar seminary was raised to the rank of a Catholic university on 5 August, 1907. It has an attendance of 275 students. Among the notable churches should be mentioned that of Nuestra Señora de los Remedios situated on the top of the Pyramid of Cholula. This pyramid was built by the Indians before the advent of the Spaniards; it measures 177 feet in height and 1444 feet on each side of its base, and is, therefore, larger than, although not as high as, the great pyramid of Egypt. The level space on the top, upon which the church is built, measures 46,144 sq. feet.

Besides the two bishops already mentioned, other notable ones were the successor of Bishop Palafox, Diego Osorio de Escobar y Llanas, who was viceroy of Mexico in 1664, and D. Pelagio Antonio Labastida y Dávalos, who was driven from his see during the reform era and did not return until 1863 as Archbishop of Mexico. The present archbishop, Ramón Ibarra y González, translated from the Diocese of Chilapa, Guerrero, was preconized first Archbishop of Puebla in 1903, and the Diocese of Huajuapan de León, erected at the same time, was suffragan to Puebla. Tlaxcala had in 1931 a population of 2812. The town is now silent and desolate. The ancient buildings, preserved for the traditions which cling to them, and the resident Indians transport the visitor to the time of the conquest. The State of Tlaxcalan has an area of 1594 sq. m., and a population (1910) of 185,805.

CAMILLUS CRIVELLI.

Tlax, titular see in Lycia, suffragan of Myra. Tlos was one of the six cities forming the Lycian confederacy and is said to have been founded by the hero Tlos, son of Tremilus. It is mentioned by Strabo (XIV, 665); Pliny (V, 28); Ptolemy (V, 3, 5); Stephanus Byzant. (s. v.; Hierocles (684, 16). It had its own coinage. It is to-day the village of Dourívar in the Baza of Maceri, v. Tlos, beautifully situated in the midst of the ancient acropolis, 984 feet above the Xanthus valley, surrounded by precipices, whose sides form inaccessible walls. On the northern side these rocks are broken by hundreds of tombs, some of which bear inscriptions mentioning the people and the "ceremonies" or municipal council. Among its monuments the principal is the theatre. Until the thirteenth century this see is
mentioned by the "Notitia episcopatum" as a suffragan of Myra. Le Quien (Origi. chr., I, 979) gives a list of five known bishops: Andreas, at Chalcedon, 451 (signed in 458 the letter of the Lycian bishops to Emperor Leo); Eustathius at Constantinople, 431; Patriarch Peter, 536 (also known as Novella 115 of Justinian); John, at the Council of Trullo, 692; Constantine, at Nice, 787; Constantine, at Constantinople, 870.

Toaldo, Giuseppe, priest and physicist, b. at Pianezze, 1719; d. at Padua, 1797. In his fourteenth year he entered the seminary of Padua, in which he subsequently taught mathematics and Italian literature. While connected with the seminary he edited the works of Galilei (1744), for which he wrote an appreciative preface and critical notes. In 1754 he was appointed pastor of Montegalda; and, eight years later, was called to the chair of astronomy in the University of Padua. Toaldo, like his contemporaries, Divisch and Becaria (both priests), gave special attention to the study of atmospheric electricity and to the means of protecting buildings against lightning. He published a number of pamphlets on this subject, among which were "Dei conduttori metallici a preservazione degli edifici dal fulmine" (1772) and his pamphlet "Dei conduttori metallici a preservazione degli edifici dal fulmine" (1774) contributed largely to the popularization of the time-lag system, and to the use of the "Franklinian rod"; and through his exertions lightning-conductors were placed on the Cathedral of Siena, on the tower of St. Mark's, Venice, on powder magazines, and ships of the Venetian navy. Toaldo was a member of many of the learned bodies of Europe, notably of the Royal Society, London.

Brother Pontamian.

Toaba Indians, one of the few still unconquered savage tribes of the great Chaco wilderness of South America, and notable alike for their persistent hostility to the white man and for their close resemblance in language, customs, and manner of living to the celebrated Abipón, among whom the famous Jesuit Dobrizhoff, known as Brunet, found a mission station a century and a half years ago. They are of Guaycuran linguistic stock, which includes also the Abipón, Mocoví, and a number of other tribes of similar predatory habit, and range, in alliance with the Mocoví, through the forests and marshes of the Chaco region on the west bank of the Paraguay River about the lower Pilcomayo and Vermejo, in Paraguay and north-east Argentina, sometimes extending their forays westward to the frontiers of Oran and Tarija. They are known under various names, the most common being from the Guarani toba, signifying "opposite", i.e. those living on the opposite bank of the Paraguay from the Guarani. They number now perhaps 2000 souls.

Physically they are tall and well-built, with firm countenance, and from going constantly barefoot the soles of their feet are toughened to resist thorns and sharp rocks. Both sexes go nearly naked except when in the presence of strangers, and wear their hair long, the men sometimes by means of a band or turban. On special occasions they wear shirts or skirts of skins or of woolen stuff, of their own weaving, from the sheep they now possess, together with head-dresses, belts, and wristlets of ostrich feathers. They tattoo their faces and upper bodies with vegetable dye. They get their food entirely by hunting and fishing but raise a little corn. They have large herds of horses and are fine horsemen. The men are expert in the making of dug-out canoes and fish traps, while the women are expert potters and net weavers. Their huts are simple structures of willow branches covered with grass, sometimes large enough to have several compartments. Their weapons are the bow, lance, and wooden club, besides which they now have some guns. They bury the dead aged or sometimes killed by their own children from a feeling of protection for their helpless. For the same reason, when a mother dies her infant is buried with her. Men have only one wife at a time. There is no head chief, the government resting principally with the old men. Religion is known to them, which seems to consist chiefly of a special reverence for the rising moon, and the propitiation of a host of invisible spirits which are held responsible for sickness and other misfortunes. In war they are distinguished for their ferocity and barbarous cruelty, and are dreaded alike by settlers, travellers, and Christianized Indians throughout the whole northern Chaco frontier. In 1882 they massacred an entire exploring expedition of fifteen men under command of the French geographer, Crévaux. In 1854, however, the American expedition up the Paraguay, under Captain Arno held friendly intercourse with them. Some special studies of their language, which seems to be the same as that of the Abipón, have been made by Carraza and Quevedo. An interesting, though strongly anti-religious, account of their latter-day condition and habits is given by the Italian engineer, Pelleschi.

In the early colonization period of the eighteenth century the Toaba, with the Abipón and Mocoví, were among the most determined and constant enemies of the Argentine-Paraguayan settlements and missions, and hardly a half year ever passed without a raid or retaliatory punitive expedition. On one occasion six hundred Toaba attacked Dobrizhoff's mission, but were repelled by the military, who were reinforced with the aid of his firearms, of which the savages were in deadly terror. The missionary received an arrow wound in the encounter. In 1756 a number of Toaba and Mataco were gathered into the Mission of San Ignacio de Ledeona, on the Rio Grande tributary of the Vermejo, where they numbered 600 souls at the time of the expulsion of the Jesuits in 1776. Some later attempt was made by the Franciscans to restore the Chaco missions, but with the end of Spanish rule the missions declined and the Indians scattered to the forests. (See Mataco Indians; Mocoví Indians.)

TOBIA.—(1) Tobías (I Par., xvi, 8), Heb. tóbyyádha "Yahweh is good"; Sept. Tohías, one of the Levites whom Josaphat sent to teach in the cities of Judea. The name is omitted in the Vatican and Alexandrian codices, but given in the other important Greek MSS. and the Vulgate.

(2) Tobías (2 Macc., x, 10), Heb. tóbyyádha, qeri tóbyyádha which is the reading also of verse 14; Sept. χρισματος (verse 10), tois χρισματων αθρ. (verse 14), which infers the reading tóbyydha; Vulg. Tobia; one of the party of Jews who came from Babylon to Jerusalem, in the time of Zorobabel, with silver and gold vessels, and made a crown for the head of Jesus, son of Josedec.

(3) Tobía (1 Esdr., ii, 60), Heb. tóbyyád, "Jah is
my good”; Sept. Töβen (Vat.), Töβias (Alex.), the same name occurring in II Esdr., vii, 62, as Töβaš and in the apocryphal III Esdr., v, 57 as bezrous (Vat.) or bezs (Alex.), one of the families that, on their return from exile, could show no written proof of their genealogy.

D.—Tobias (II Esdr., ii, 10), an Ammonite who together with Sanballat the Horonite opposed the fortification of Jerusalem by Nehemiah (II Esdr., ii, 19; iv, 3; vi, 17; xiii, 4, 8). He is called “the servant” (Heb. ‘ebed). We can only conjecture what that means. Cheyne (Encyclopedia Biblica, s. v.) thinks that from ‘ebed, servant, Aramaic was made for ‘aḏīb, the Arab.

(E).—Tobias (II Mach., iii, 11), the father of Hiranus.

(F).—Tobias (Tob., i, 9, and passim), the son of the following.

(G).—Tobias the elder, the chief character in the book that bears his name.

A. Name.—In Cod. Alex., βῆθος λόγως Τοβίας; in Vat., Τοβίας; in Sinaitic, Τοβίας; in Latin MSS. Liber Tobiae, Liber Tobit et Tobia, Liber uirgineus Tobia. In the Vulgate and Heb. Ms., Tobiai. Tobias and Tobit are the names of Tobit’s father and son have the same name, Tobias, ἤβογγα. In other texts and versions, the name of the father varies: Tobith, my good” is Jehovah, in Heb. Munster; Tobir or Tobiri in the Sept.; Tobis, or Tobit, standing for Tobith, “goodness” of Jehovah, in the Old Latin.

B. Text and Versions.—The original text, supposed to have been Hebrew, is lost; the reasons assigned for an Aramaic original warrant only a probable opinion that an Aramaic translation influenced our present Greek versions.

(1) Vulgate Versions.—St. Jerome had not yet learned Aramaic, when, with the aid of a rabbi who knew both Aramaic and Hebrew, he made the Vulgate version. The rabbi expressed in Hebrew the thought of the Aramaic MSS. and St. Jerome straightway put the same into Latin. It was the work of only a day (cf. Pref. in Tobian). The Old Latin certainly influenced this hurried version. The Vulgate recension of the Aramaic version tells the story in the third person throughout, as do the Aramaic of Neubauer and the two Hebrew texts of Gaster (HL and HG), whereas all the other texts make Tobias speak in the first person up to iii, 15. The following passages in the Aramaic and Vulgate show the wagging of the dog’s tail (x, 9); the comparison of the coating on Tobias’s eye to the membrane of an egg (xii, 14); the wait of half an hour while the gall of the fish effected its cure (xii, 14); Tobias’s closing of the eyes of Raguel and Edna in death; also ii, 12; iii, 18; 24; vi, 16–18, 20, 21; vii, 4, 5; ix, 12b. Some parts of the Vulgate, such as the account of Tobit’s (vii, 18; viii, 4), were looked upon at times as Christian interpolations of Jerome until they were found in one of Gaster’s Hebrew texts (HL). Lastly, the Vulgate and HL omit all mention of Akhikhar; Achiar of Vulg., xi, 20, is an interpolation of the Vulgate.

(2) Aramaic Versions.—Besides the Aramaic version used by Jerome and now lost, there is the extant Aramaic text recently found in an Aramaic commentary on Genesis, “Midrash Bereishit Rabba”. The writing of this midrash is fifteenth-century work; it contains the Book of Tobias as a Hopkins on the proceedings of Tobit and Tobias to give rise to God (Gen., xxviii, 22). Neubauer edited the text, “The Book of Tobit, a Chaldean Text from a unique MS. in the Bodleian Library” (Oxford, 1878). He thinks that it is a briefer form of Jerome’s Aramaic text. This is not likely. The language is at times a translation of Greek and gives evidence of being a translation of one or other of the Greek texts. It agrees with the Vulgate in that from the outset the tale of Tobias is told in the third person; otherwise it is closer to Codex Vaticanus and closer still to Cod. Sinaiticus.

(3) Greek Versions.—There are three Greek recensions of Tobias. We shall refer to them by the numbers given to the Vatican and Sinaitic codices in the list of codices in “La sainte bible”, I, 672–673 (1902). (a) AB, the text of the Alexandrian (fifth century) and Vatican (fourth century) codices. This recension is found in many other codices of the Greek text, has been used for centuries by the Greek Church, is incorporated into the Sixtine edition of the Septuagint, and has been translated into Armenian as the authentic text of that rite. AB is preferred to the Sinaitic recension by Noldke, Grimm, and others, and yet rated by Nestle, Ewald, and Harris as a compendium rather than as a version of the entire original text. It condenses Edna’s prayer (x, 13), omits the blessing of Gabael (ix, 8), and has three or four unique readings (iii, 18; iv, 8; xi, 8). (b) Ν, the text of the Sinaitic (fourth-century) Codex.—Its style is very much more diffuse than that of AB, which seems to have omitted set purpose many στιχος of Ν—cf. ii, 12, “on the seventh of Dusrot sic cut the web”; v, 3, the incident of the bond divided into two halves; v, 5, the long conversation between Raphiel and young Tobias; vi, 8; x, 10; xii, 8, etc. Ν omits iv, 7–19, and xii, 6–9, of AB. (c) The Text of Codices 44, 106, 107 for vi, 9–xii, 8.—The first portion (i, 1–vi, 8) and the last (xii, 9 to end) are identical with AB; the remainder seems to be an attempt at a better version of the original text. Independent work is shown by vi, 9, to vii, 17; viii, 1, to xii, 6, is very close to the Syriac and nearer to Ν than to AB; xii, 7–xiii, 8 resembles each text in various small details. Distinctive readings of these curiae are Edna’s Gnostic prayer, “Let all the earth praise thee” (vii, 15); and the fact that Anna saw the dog running before Tobias (x, 5). (d) What seems to be a third recension of the second chapter is presented in Grenfell and Hunt, “Oxyrhynchus Papyri” (Oxford, 1911), part viii. The text differs from both AB and Ν and consequently the Greek curiae.

(4) Old Latin Versions.—Previous to the Latin Vulgate translation of the Aramaic recension (see above) there existed at least three Old Latin versions of a Greek text which was substantially Ν; (a) The recension of Codex Regius Parisiensis 3654 and Cod. 4 of the Library of Alexandria, the text was transmitted by the recension of Cod. Vat. 7, containing i–vi, 12; (c) the recension of the “Speculum” of St. Augustine.

(5) Syriac Version.—Down to vii, 9, it is a translation of AB; thereafter, it agrees with the Greek cursive text, save that xiii, 9–18, is omitted. This second part is clearly a second recension; its proper names are not spelled as in the first part. Ahiqar (xiv, 10) is Achiar (ii, 10); ‘Edna (vii, 14) is ‘Edna (vii, 2); ‘Arag (ix, 2) is Raga (iv, 1, 20).

(6) Hebrew Versions.—There are four Hebrew versions of this deutero-canonical story: (a) HL, Hebrew Londini, a thirteenth-century MS., found by Gaster in the British Museum, and translated by him in the “Proceedings of the Soc. of the Bibl. Archaeology” (xviii and xx). Besides a cento of scriptural exhortations, this MS. contains the narrative portion of Tobias, translated, Gaster thinks, from a text that stood in closest relation to the Aramaic now lost. It is to be believed, this MS. in the least probable, that the thirteenth-century Jewish author of HL made use of the Vulgate. (b) HG, Hebrew Gasteri, a text copied by Gaster from a midrash on the Pentateuch and published in the “Proc. of the Soc. of Bib. Arch.” (xix). This MS. might not be agreed with the Vulgate in the least style of that of the Vulgate recension. (c) HF, Hebrew Faggi, a very free translation of AB, done in the twelfth century by a Jewish...
Tobias

scholar; it is found in Walton's "Polyglot." (d) HM, Hebrew Munster, published by Munster in Basle A. d. 1542, found in Walton's "Polyglot." This text agrees as a rule with Neubauer's Aramaic, even when the latter is at variance with AB. It is, according to Ginsburg, of fifth-century origin. The Hebrew, together with the Aramaic, contains reference to the dog, which plays a prominent part in the other versions.

The foregoing review of the various and diverse recensions of the Book of Tobais shows how hard it would be to reconstruct the original text and how easily textual errors may have crept into our Vulgate or are unexplained, which it depends.

C. Contents.—Unless otherwise stated, these references are to the Vulgate recension, whereas the Douay is a translation. The story naturally divides itself into two parts: (1) the fidelity of Tobias the elder and of Sara to the Lord (i, i–iii, 26); (a) the fidelity of Tobias (i, i–iii, 6),—before the captivity (i, 1–10), during the captivity (i, 11–iii, 6) shown by his acts of mercy to fellow captives (i, 11–17) and especially to the dead (i, 18–25), acts that resulted in his blindness (ii, 1–18); the taunts of his wife (ii, 19–20), and the recourse of Tobias to God in prayer (ii, 21–22). The marriage of Tobias and Sara, da Raguic and Edna (iii, 7–23). The very day that Tobias in Ninive was taunted by his wife and turned to God, Sara in Ecbatana was taunted by her maid as the murderess of seven husbands (iii, 7–10), and turned to God in prayer (iii, 11–23). The prayers of both were heard (iii, 24–25).

(2) The fidelity of the Lord to Tobias and to Sara through the ministrations of the angel Raphael (iv, 1–xii, 22).—(a) Raphael cares for the young Tobias on his journey to Gabael in Rages of Media to obtain the ten talents of silver left in bond by his father. (b) He is made as a guide and his life saved by the angel as the long instruction by his father (iv, 1–23); Raphael joins him as a guide (v, 1–28); Tobias while bathing in the Tigris is attacked by a large fish, catches it, and, at the advice of Raphael, keeps its heart, liver, and gall (vi, 1–22); they pass through Ecbatana, stop at Raguel's; Tobias asks Sara for wife and receives her (vii, 1–20); by continence and exorcism and the odour of the burning liver of the fish and the aid of Raphael, he conquers the devil who had slain the seven previous husbands of Sara (vii, 21–24); Raphael gets the money of Gabael in Rages, and brings him to Tobias his marriage, which the Lord has ordered (ix, 1–12). (b) Raphael cures the blindness of the elder Tobias, on the return of his son, and manifests the truth that he is an angel (x, 2–xii, 31).

Conclusion: The hymn of thanksgiving of Tobias the elder, and the subsequent history of both father and son (xiii, 1–xiv, 7).

D. Purpose.—To show that God is faithful to those that are faithful to Him is evidently the chief purpose of the book. Neubauer (op. cit., p. xvi) makes out the burial of the dead to be the chief lesson; but the lesson of almsgiving is more prominent. Elsewhere (op. cit., p. 249) he states fidelity to the Mosaic code as the main drift of the author, who writes for Jews of the Dispersion; but the book is meant for all Jews, and clearly inculcates for them many secondary lessons and one that is fundamental to the rest.—God is true to those who are true to Him.

E. Canonicity. (1) In Judaism.—The Book of Tobias is deutero-canonical, i.e., contained not in the Canon of Palestine but in that of Alexandria. That the Jews of the Dispersion accepted the books as canonical Scripture is clear from its place in the Septuagint. That the Palestinian Jews revered it is attested by the existence of the Aramaic translation used by St. Jerome and that published by Neubauer, as also from the four extant Hebrew translations. Then, most of these Semitic versions were found as Midrasim, or haggadas, of the Pentateuch.

(2) Among Christians.—Despite the rejection of Tobias from the Protestant Canon, its place in the Christian Canon of Holy Writ is undoubted. The Greek Catholic Church has always held it to be the work of St. Polycarp (A. d. 117), "Ad Philadelphios," x, urges almsgiving, and cites Tob., iv, 10, and xii, 9, as authority for his urging. Deutero-Clement (A. d. 150), "Ad Corinthus," xvi, has praises of almsgiving that are an echo of Tob., xii, 8, 9. St. Clement of Alexandria (A. d. 214) in "Stromata," i, 20, 30, cites Tobias and "Sommata," i, 21; ii, 23 (P. G., VIII, 583, 1089), "What thou hastest, do not unto another" (Tob., iv, 19). Origen (about A. d. 230) cites Scripture, Tob., iii, 24, and xii, 13, in "De ortonatis," II, Tob., ii, i, in sec. 14; Tob., xii, 12, in sec. 31 (cf. P. G., XXI, 448, 461, 553); and writing to Africanus (P. G., XI, 80) he explains that, although the Hebrews do not use Tobias, yet the Church does. St. Athanasius (A. d. 350) uses Tob., xii, 7, and iv, 19, with the distinctive phrase, "as it is written," cf. "Apol. contra Haereses," I, 12, 9, and "Quaestiones," I, 16, 4 (P. G., XXV, 268, 616). In the Western Church, St. Cyprian (about A. d. 248) very often refers to Tobias as of Divine authority just as he refers to the other books of Holy Writ; cf. "De mortalitate," x; "De operc et leemosynis," v, xxv; "De patientia," xviii (P. L., IV, 556, 560, 634); "Ad Quirinum," i, 20, for Tob., xii, 1; for Tob., ii, 2, and iv, 5–11; iii, 62, for Tob., iv, 12 (P. G., IV, 679, 728, 729, 767). St. Ambrose (about A. d. 370) wrote a book entitled "De Tobias" against usury (P. L., XIV, 759), and introduced it by referring to the Biblical work of that angel as "a prophecy that has been fulfilled," i.e., in the Western Church, however, the canonicity of Tobias is clearest from its presence in the Old Latin Version, the authentic text of Scripture for the Latin Church from about A. d. 150 until St. Jerome's Vulgate replaced it. The canonical use of Tobias in that part of the Byzantine Church whose language was Syriac is seen in the writings of St. Ephraem (about A. d. 362) and of St. Archelaus (about A. d. 278). The earliest canonical lista all contain the Book of Tobias; they are those of the Council of Hippo (A. d. 393), the councils of Carthage (A. d. 397 and 419), St. Isidore's "Calendar," St. Augustine's "Calendar" (A. d. 397). Moreover, the great fourth- and fifth-century MSS. of the Septuagint are proof that not only the Jews but the Christians used Tobias as canonical. For the Catholic the question of the canonicity of Tobias is infallibly settled by the decisions of the Councils of Trent, Session IX (8 April, 1546) and of the Vatican, Session III, ch. 2 (24 April, 1870).

Against the canonicity of Tobias are urged several rather trivial objections which would at first sight seem to impugn the inspiration of the narrative. (a) Raphael told an untruth when he said he was "Aras, rias the son of the great Ananias" (v, 18). There is no untruth in this. The angel was in appearance just what he said he was. Besides, he may have meant by "asar yah, "the healer of Jah"; and by "asarnyah, "the goodness of Jah." In this event he only told the young Tobias that he was God's helper and the offering of the firstborn. The absence of this fact would be a falsehood. (b) A second objection is that the angelology of Tobias is taken over from that of the Avesta either directly by Iranian influence or indirectly by the intro}
The answer is that the reading seven is doubtful; it is in Ἰ, AB, Old Latin, and Vulg.; it is wanting in the Greek cursive text, Syriac, and HM. Still, admitting the reading of the Vulgate, the Amoraim Spantas have infiltrated into Avestic religion from the seven Angels of Hermetic Revelation and not vice versa. Moreover, there are not seven Amoraim Spantas in the angelology of the Avesta, but only six. They are subordinated to Ahura Mazda, the first principle of good. True, he is, at times, grouped with the six lower spirits as seven Amoraim Spantas; but in this grouping we have not by any means seven angels, as the Amoraim Spantas state.

F. Historical Worth. (1) To Protestants.—The destructive criticism which, among Protestants, has striven to do away with the canonical books of the Old Testament has quite naturally had no respect for those books the critics call apocryphal. The Book of Tobit is to them no more than are the Testament of Job, the Book of Jubilees, and the story of Ahikar. From the standpoint of historical criticism it is to be grouped with these three apocryphal (J. T. Marshall, Principal of the Baptist College, Manchester, in Hastings’s ‘Dict. of the Bible’, s. v.). Simrock in his ‘Ueber die ant. und u. a. Myth.’ (Bonn, 1858) reduces the story to the folk-lore theme of the gratitude of the departed spirit; the yarn is spun out of this slim thread of fancy that the souls of the dead, whose remains Tobías buried, did not forget his benevolence. Erb (Encycl. Biblica, s. v.) finds traces of Iranian legend in the name of the demon Asmodeus (Tob., iii, 8) which is the Persian ʿÂšēma dārō; as also in the dog.—“with the Persians a certain power over evil spirits was assigned to the dog.” And again: “the Jewish nation takes up a foreign legend, goes on repeating it until it has given it the final form of Torah, settles down on some story-writer who is able to shape it into an edifying household tale, capable of ministering comfort to many succeeding generations.” Moulton, “The Iranian background of Tobit” (Expository Times, 1903, p. 257), considers the book to be Median folk-lore, in which the Semitic and Iranian elements meet. On the Ahikar story, cf. “The Story of Ahikar from the Syriac, Arabic, Armeniān, Ethiopic, Greek, and Slavonic versions” by Conybear, Harris, and Mrs. Smith, a work which will be brought back to 407 b. c. in a new edition soon to appear (Expository Times, 1912, p. 212).

(2) To Catholics.—Until recently there never was question among Catholics in regard to the historicity of Tobías. It was among the historical books of the Old Testament, the Fathers had always referred to both elder and younger Tobías and to the other personages of the narratives as to facts and not to fancies. The stories of alms-giving, burial of the dead, angelophany, exorcism, marriage of Sara with Tobías the younger, cure of the elder Tobías,—all these incidents were taken for granted as fact-narrative; nor was there ever any question of likening them to the similar figures in the Arabian Nights, the original of the Strap.*). Jahn, “Introductio in libros sacros”, 2nd ed. (Vienna, 1814), 452, gives the stock objections to the historicity of Tobías, and suggests that either the entire composition is a parable to teach that the prayers of the upright are heard or at most only the main plot is fact-narrative, the rest on the index (26 Aug., 1822). Anton Scholz, “Die heilige Schrift”, II, iii, p. 12, and Movers in “Kirchlexikon” (first ed., I, p. 481) hold that Tobías is a poetic fiction. Casparin, in “Revue biblique” (1899, pp. 50–62), tries to show that the sacred writer of Tobías has no idea of the Ahikar story and worked it over rather freely as a vehicle to carry the inspired thought of the moral he wished to convey to his readers. Barry, “The Tradition of Scripture” (New York, 1906), p. 128, says: “Its relation to other stories, such as The Grateful Dead and the tale of Ahikar, has been used in illustration of the romantic nature ascribed to it by modern readers; so, too, the symbolical names of its personages, and the borrowings, as they say, from Persian mythology of Asmodeus, etc.” Hobart, “Spurious Introduction to the study of the Old Testament” (New York, 1901), 343–7, gives at length the arguments in favour of the non-historical character of the book and attempts no refutation of the same.

With these and a few other exceptions, Catholic exegetes are unanimous in clearly recognizing the historicity of Tobías. Cf. Wetstein in “Kirchenlexikon” (first ed., s. v. Tobías); Reusch, “Das Buch Tobías”, p. vi; Vigouroux, “Manuel biblique”, II (Paris, 1883), 184; Cornely, “Introductio in utriusque testamenti libros sacros”, II (Paris, 1887), i, 378; Danko, “Hist. revelationale” (2d ed., Tübingen, 1863), 480; Kaulen, “Einleitung in die heilige Schrift” (Freiburg, 1890), 215; Zschokke, “Hist. sacræ A. T.”, 245; Kaulen in “Kirchenlexikon” (2nd ed., s. v. Tobías); Seisenberger, “Practical Handbook for the Study of the Bible” (New York, 1911), 345. This almost unanimous concurrence among Catholic exegetes may be taken with the decision of the Biblical Commission (23 June, 1905). By this decree Catholics are forbidden to hold that a book of the Holy Writ, which has generally been looked upon as historical, is either entirely or in part not history properly so called, unless it be proven by solid arguments that the sacred writer did not wish to write history; and the solidity of the arguments against the historicity of an historical book of the Bible we are not to admit either readily or rashly. Now the arguments against the historicity of Tobías are not at all solid; they are rather mere speculations for which it would be best not to admit. We shall examine some of these conjectures.

(a) The Ahikar story is not in the Vulgate at all. As it is in AB, Ḥ, and the Old Latin, St. Jerome undoubtedly knew it. Why did he follow the Aramaic text to the exclusion of this episode? He may have looked upon it as an interpolation, which was not written by the inspired author. Even though it were not an interpolation, the Ahikar episode of Tobías has not been proven to be a legend drawn from a non-canonical source. (b) The angelic appellation and all incidents connected therewith are no more difficult to explain than the similar phenomena in Daniel and Acts, xii, 6. (c) The demonology is not unlike to that of the New Testament. The name “Asmodeus” need not be of Jewish origin; but may just as readily be explained as Semitic. The Aramaic word ʿâšmeḏelāy is cognate with the Hebrew ṣahmēḏ, “destruction.” And even though it be a mutilated form of some Iranian ancestor of the Persian ʿĀšēma dārō, what more natural than a Median name for a demon whose obsession was accomplished upon Median soil? The slaying of the seven husbands was allowed by God in punishment of their lust (Vulg., xvi, 19); it is the youth Tobías, the son of the father, that suggests (according to AB, Ḥ, and Old Latin) the demon’s lust as the motive of his killing all rivals. The binding of the devil in the desert of Upper Egypt, the farthest east of the then known world (viii, 3), has the same figurative meaning as the binding of Satan for a thousand years (Apoc., xx, 2). (d) The book’s connection with the prophet Hosea is mere conjecture (cf. Gigot, op. cit., 345). Divine Providence may have brought about these similarities of incident, with a view to the use of them in an inspired book.

(e) Certain historical difficulties are due to the very imperfect condition in which the text has reached us. (i) It was Theglathphalsasar III who led Nephthali (IV Kings, xv, 29) into captivity (734 b. c.),
and not, as Tobias says (i. 2), Salamanar. Yet this reading of the Vulgate, Old Latin, and Aramaic is to be corrected by the name Emeser (Acts 7:21). This latter reading would be equivalent to the Hebrew כִּנֵּנְו (kênên), a transliteration of the Assyro-Babylonian kēnum šar. As the appellative šar, "king," may precede or follow a personal name, kēnum šar is kēnum šar Emeser, and is therefore a correction of the Vulgate. It can readily be read that, twelve years after the departure of Israel out of Samaria, Sargon's scouts completed the work and routed some of the tribe of Nephthali from their fastnesses. (ii) A like solution is to be given to the difficulty. Sennacherib is said to have been the son of Salamanar (i. 18), whereas he was the son of the usurper Sargon. The Vulgate reading here, as in i. 2, should be that of AB and ℗, to wit, Emeser; and this stands for Sargon. (iii) In B, xiv, 15, Ninive is said to have been captured by Asshur (Assu) and Nabuchodonosor. This is a mistake of the scribe. ℗ reads that Achiacharos took Ninive and adds that "he praised God for all He had done against the children of Ninive and Assyria." The word for Assyria is אֱלֹהִים, Hebrew 'as干货, Aramaic ʼādār; this Greek word misled the scribe to write 'Amalou, i.e., the Median King Cyaxares. According to Berossus, Cyaxares was, in his campaign against Ninive, allied to the Babylonian King Nabopolassar, the father of Nabuchodonosor; the scribe of B has written the name of the son of that of the father, as Nabopolassar is to Ninive; and hence an anachronism. Not at all: it is an ancient Median town, which the Seleucids restored.

G. Origin.—It is likely that the elder Tobias wrote at least that part of the original work in which he uses the first person singular, cf. i. 1-iii. 6, in all texts except the Vulgate and Aramaic. As the entire narrative is historical, the work must have been purely geographical. After revealing his angelic nature, Raphael bade father and son to tell all the wonders that God had done them (Vulg., xii, 20) and to write in a book all the incidents of his stay with them (cf. same verse in AB, ℗ Old Latin, IF, and HM). If we accept the view that the document is a mixture, we naturally conclude that it was written originally during the Babylonian Exile, in the early portion of the seventh century B.C., and that all save the last chapter was the work of the elder and younger Tobias. Almost all Protestant scholars consider the book post-Exilic. Early with 320 B.C.; Ligen, the bull of 280 B.C.; Grätz, to a. D. 130; Kohut, to a. D. 226.

The introductions of Cornelius, Kaplen, Damerko, Gotoff, Seeliger, Cordier, Blum, and others are based upon these considerations. During the Middle Ages, the Book of Tobit is widely distributed in the books of the Bible, and its text is preserved in many manuscripts of the Vulgate, Old Latin, Italian, and Hebrew. The text is further divided into seven chapters, and the first three chapters are often included in the Book of Tobit.

WALTER DRUM.

Tocqueville, Charles-Alexis-Henri-Maurice Clerel de, writer and statesman, b. at Versailles, 17. Jan. 1805; d. at Cannes, 16. April, 1859. He was the great-grandson of Malesherbes, the defender of Louis XVI. As a judge at Versailles in 1830 he formed a friendship with Gustave de Beaumont, with whom he travelled to America in 1831. Tocqueville's letters show that he foresaw what strides the Church was destined to make in America and likewise the dogmatic nothingness which would result from Unitarianism and the absurdities of Illuminism. Two publications resulted from this journey: the collective work of the two friends published in 1832 under the title "Du système pénitentiaire aux Etats-Unis et de son application en France"; the second, Tocqueville's personal work, is the celebrated book "La démocratie en Amérique," of which the first volume appeared in 1835 and the second in 1840. The work won for Tocqueville admission to the Académie des sciences morales et politiques (1838) and the French Academy (1841). The library of the Seminary of St-Sulpice preserves a copy of "La Démocratie" annotated by Mgr Bruté, first Bishop of Vincennes, who registered in the margin a number of exceptions to Tocqueville's assertions. Those notes have been transcribed by Mgr Bauard. Tocqueville held that democracy could exist only by seeking a moral support in religion, and that religion could prosper only by accommodating itself to democracy, but he is inclined to regard as too severe the doctrinal, disciplinary, and liturgical exactions of Catholicism, and in Mgr Bauard's opinion his work leaves the impression that he was only half Catholic. He relegates to the end of the first part the history of what he calls "the accidental or providential causes" of the maintenance of the democracy, and his work would be clearer if he had treated in the beginning the geographical and economic conditions of America. As his work progresses he loses sight of American democracy and deals in a general way with democracy, and vice versa.

As a deputy for Valognes from 1839 Tocqueville sat at the opposition and voted for liberty of instruction. Under the Second Republic he was a member of the Constituent and Legislative Assemblies and vice-president of the latter.

The Roman expedition had been for some weeks under way when Tocqueville assumed the portfolio for foreign affairs in the Odilon Barrot cabinet (2 June—31 October, 1849). He caused it to be proceeded with, at the same time, to the French ambassador Corel:le: "The Roman question is the main one which threatens to bury us all." He recommended that Oudinot's army remain in the provinces of Rome, which were, he wrote to Corelle, "the property of the Christian world," and according to his instructions Pius IX's return should have been accompanied by an amnesty and the granting of a Constitution.

Under the Empire he returned to private life and undertook his work "L'ancien régime et la révolution," of which only the first part appeared (1856). In pages of beautiful religious psychology Mgr Bauard has shown how Tocqueville's mind and conscience, chiefly under Madame Swetchine's influence, climbed upwards toward a profoundly Christian death. These pages are an interesting document on XIV.—48
the evolution of the Liberal ideas of the middle of the nineteenth century. After Tocqueville's death Gustave de Beaumont collected his works in nine volumes. Tocqueville's memoirs of the Republic of 1848 were published in 1893, his correspondence with Gobineau in 1903.

De Beaumont, Notice sur Alexis de Tocqueville (Paris, 1897); D'Escorial, Tocqueville et la démocratie libérale (Paris, 1897); Faure, Politiques et moralistes du 19e siècle, 3rd series (Paris, 1900); Marcel, Études politiques sur Alexis de Tocqueville (Paris, 1910); Falloux, Correspondance d'Alexis de Tocqueville avec Mme Swetchine in Correspondance (25 Feb., 1866); Rambaud, La foi et ses victoires, II (Paris, 1884).

Georges Goyau.

Todeschi, Francesco. See Pius III, Pope.

Todi, Diocese of (Tudertina), in Central Italy, is immediately dependent on the Holy See. The city of Todi stands on a steep hill commanding the valley of the Tiber. Its triple walls may still be seen; the innermost, built of rough grey travertine stone, is of Umbrian or Etruscan origin; the middle wall is Roman, and the outside wall dates from the sixth or seventh century. The cathedral, in Lombard style, contains ten pillars of oriental marble. S. Fortunata is a splendid specimen of Italian Gothic. S. Maria della Consolazione, one of the most harmonious works of the Renaissance, was begun in 1508 by Cola Matteucci; the cupola was constructed in 1606. The church of the Servites of Mary contains the body of St. Philip Benizi, whose statue is the work of Bernini. Almost all the churches possess pictures by Polinari, a native of Todi. The communal hall (1267) is also worthy of notice. On the pre-Roman coins the city is called Tusere; the Romans called it Tuder, or Tuderum. It was sacked by Crassus in the Civil War (83 B.C.); Augustus established a colony there. During the war of the Goths it withstood Tolita during a long and severe siege. The Lombards failed to capture it, and Todi and Perugia remained the two chief fortresses defending the passage through the duchy from Rome to the Exarchate. It was included in Pepin's donation to the Holy See. In the eleventh century Todi was a republic, and in 1340 its municipal statutes were drawn up by the juristonsult Bartolo. In the factions of the Middle Ages Todi was almost always Ghibelline, and was in constant conflict with Siena. Boniface IX gave the city to the Malatesta of Rimini, but soon took it back. During the fifteenth century, it often changed rulers—Bonifacio, Pandolfo Malatesta, Francesco Sforza (1434), Piccinino, Gabriele Catalani (Guelph), who was treacherously slain (1475). The city fell into the hands of Giordano Orsini, who was expelled by Cardinal Giuiliellia della Rovere (Julius II). The factions were ended by the agreement of the Chiaramonti and the Alti. In 1503 the Orsini were again expelled, on which occasion the fortress of Gregory X, reputed impregnable, was destroyed.

Todi is the birthplace of Fra Jacopone, the adversary of Boniface VIII and supposed author of the "Stabat Mater", and of the humanist Antonino Pasini (Antonio da Todi). The city honours several martyrs, its bishops, among whom are St. Terentius, or Terentianus, martyred under Diocletian. Other bishops are: St. Callistus, killed by the Goths, succeeded by Fortunatus, whose body was taken to France; Theophylactus (787) sent by Poppo of Arles to England and to the Council of Frankfort (794); Rustico Brancalone (1179), several times a papal legate; Rainuccio degli Atti (1326), expelled from the city by the partisans of Nicholas V, the antipope; Andrea degli Atti (1350), the restorer of ecclesiastical discipline; Guidelmo Dallavigna (1405), who tried to induce the antipope Benedict XIII to renounce his claim; Bartolomeo Aglioni (1436), imprisoned during the troublesome times; Marcello Sante (1606), who erected the seminary; Carpegno (1638), who promoted study and discipline; Cardinal Ulderico; Cardinal Giambattista Alieri (1649), brother of Clement X, a famous canonist; the brothers Filippo (1709) and Ludovico Gualtieri (1719), who erected a new seminary; Francesco M. Pasini (1760), under whom the restoration of the cathedral was completed. The diocese contains 49,200 inhabitants, 98 parishes, 97 secular and 15 regular priests, 6 religious houses of men and 8 of women, 1 boys' college, and 2 girls' schools.

Cappelletti, Le chiese d'Italia, XXII (Venice, 1887); Lisoni, Memorie storiche de Todi (Todi, 1860).

U. Benigni.

Tokio, Archdiocese of (Tokionnai), comprises 21 provinces or 15 departments with a population of over 16,000,000 inhabitants. From 1866 until 1879 Japan formed only one vicariate Apostolic administered by Mgr Petijean, the first vicar Apostolic of the country (1866-1884). In 1876 it was divided into two vicariates; that of South Japan, extending from Biwa Lake to the Yezo Islands, with Mgr Petijean at Osaka, and that of North Japan, comprising the northern provinces from Biwa Lake to the Kurile Islands, ruled by Mgr Osouf (1876-1906), the new vicar Apostolic, residing at Tokio. In 1891 Leo XIII established the ecclesiastical hierarchy in Japan, and erected the Diocese of Hakodate out of the eight northern provinces and the Yezo, Sado, and Kurile Islands. The same year Mgr Osouf was created Archbishop of Tokio, with the Bishops of Nagasaki, Osaka, and Hakodate as his suffragans. When, in 1886, Mgr Petijean visited the territory of the future Archdiocese of Tokio, he found only two missionaries at Yokohama, where he had built (1865) a church usefully for the use of foreigners. Japanese converts numbering only a few dozens. The actual expansion took place during the thirty years of Mgr Osouf's administration. It was also Mgr Osouf who erected the cathedral of Tokio (1878), and was the first envoy of the pope to the mikado, to whom Leo XIII, 12 Sept., 1883, had him present an autograph letter. The
archdiocese numbers (1911) one archbishop, Mgr Bonne, 27 missionaries, 2 native priests, 23 catechists and 9,558 Catholics. Tokio has 4,186 Catholics divided into six parishes, while Yokohama, the cradle of the mission, besides the parish for foreigners, which number 492, has another church for the Japanese, who number 1215. In different towns and villages there are churches or chapels, and the inhabitants are provided with priests. Until lately a great many of these parishes and stations had their parochial schools, which, however, had all to be closed for want of means. Besides their ordinary work the missionaries direct a seminary for native priests, two homes for Catholic students, an institute for destitute girls (86 inmates), an infirmary for the aged and homeless, and a hospital with 74 lepers. They also publish two monthly magazines. Engaged in charitable, educational, and mission work are: 42 Brothers of Mary, of whom 9 are Japanese; six Jesuit Fathers, of whom one is Japanese; four Fathers of the Divine Word; 45 Ladies of St. Maur (12 Japanese); 23 Sisters of St. Paul (4 Japanese); and 21 Ladies of the Sacred Heart. The chronological order of their work is as follows: in 1873 the Ladies of St. Maur founded in Yokohama an asylum for destitute girls (236 inmates); an academy for foreigners (1874); and a high school for Japanese (1895). In Tokio they founded an academy (1887), and a forger school and music school for girls of the highest nobility (1896), and in Shizunoka another high school (1903). The total number of their pupils is 947. The Sisters of St. Paul established in Tokio (1881) an asylum for destitute girls (108 inmates), an academy for foreign girls, and another one for Japanese. The total number of their pupils is 477. The Brothers of Mary direct in Tokio a college (1888) with 830 pupils belonging to the best families, and in Yokohama a commercial school for foreigners (1899) with 106 pupils. The Ladies of the Sacred Heart in Tokio have charge of an asylum and also a Buddhist Church, both for Japanese and Japanese (1908). Already they have 121 pupils. The Jesuit Fathers arrived in Tokio in 1908, with the intention of starting a Catholic university. Finally, in 1909, Mgr Mugabure, coadjutor (1902) and successor of Mgr Oesouf (1906-1910), entrusted four of the western provinces to the care of the Fathers of the Divine Word, residing at Kamazawa. In 1911 the number of baptisms was 1383; marriages, 83; burials, 1149; confirmations 452; Easter Communions, 3512.

M. STEICHEN.

Toledo, Archdiocese of (Toletanensis), primate see of Spain, whose archbishop, raised almost always to the dignity of cardinal, occupies the first place in the ranks of the higher Spanish clergy. Its suffragan dioceses are Coris, Cuenca, Madrid-Alcalá, Plasencia, and Sigüenza. In the course of its long and varied history the diocese has undergone many changes which have successively extended and contracted its vast territory. Geographically its present position is a very unique one, as it consists of four sections separated one from the other and surrounded by other dioceses. The first or principal section (in which the city of Toledo, the capital of the diocese, is situated) is in the centre of the peninsula in the region which was known as the Kingdom of Toledo or New Castile. This section comprises the greater part of the civil Province of Toledo (the district in the north-west belonging to the Diocese of Avila; the extreme eastern strip forming a part of the Diocese of Cáceres; and on the western side it takes a small strip from the eastern section of the provinces of Cáceres and Badajoz. It is bounded on the north by the dioceses of Madrid-Alcalá and Avila; on the south by the Diocese of Plasencia; and on the west by the Diocese of Plasencia. The second territorial section is formed by a half, approximately speaking, of the eastern part of the Province of Guadalajara, surrounded by the dioceses of Madrid-Alcalá, Segovia, Sigüenza, and Cuenca. The third territorial section is formed by a great portion of the Province of Albacete on the western side (the ancient Vicarage of Alcázar), surrounded by the dioceses of Cuenca, Murcia, and Jaén; and the fourth territorial section consists of the eastern portion of the Province of Jaén (rural deanery of Cazorla) and the north-eastern portion of the Province of Granada (rural deanery of Huescar) surrounded by the dioceses of Jaén, Murcia, Cartagena, and Guadix.

Christianity was introduced into Carpetania in the first century. According to an ancient and venerable tradition the Roman, St. Eugenius, is named as the first bishop of Toledo and the founder of the see. Certain chronological lists give a series of bishops of Toledo prior to and following St. Eugenius, but modern historical criticism has rejected them. A fierce persecution raged in Toledo under the emperors Diocletian and Maximus, St. Leocadia being one of the most illustrious of the martyrs (9 Dec., 306). It has been asserted that after the Edict of Milan (313) Emperor Constantine raised Toledo to the rank of a capital city, but there is absolutely no foundation for this, as the prelates of Toledo continued to rank simply as bishops. Among the most famous during the Roman occupation were Melanius (286?–306?), who is supposed to have consecrated the church of Toledo and who wrote the life of St. Severus, martyr; Audentius (367?), author of "De fide adversus hereticos" (which has been lost); and Isichius (Hesychius), writer, orator, and poet, in whose time the Visigoths took possession of Carpetania and its capital Toledo (466 or 7). The diocese attained great importance during this period, as it was the principal ecclesiastical court of the Gothic Court. It was raised to the rank of a metropolitan and became the centre of a vast ecclesiastical province. At this time Toledo had as suffragan dioceses: Acci, Arcabricia, Basta, Beraia, Bigastrum, Castulo, Complutum, Dianium, Elotana, Illies, Olismes, Oretum, Osuna, Segobriga, Segontia, Valeria, Valeria, and Ucri. Under the bishop or archbishop Montanus Toledo commenced to extend its primateal jurisdiction, although it was not until many centuries afterwards that this title was conferred upon it. During the Visigothic period many bishops, illustrious for their faith and holiness, governed the See of Toledo. Among these may be mentioned: Julian I, author of various apologetic and moral treatises; Euphemius or Epiphanius, in whose time the Visigoths were converted to Christianity; and Auranus (603–15), who successfully defended the claim of Toledo for metropolitan supremacy which was disputed by Cartagena.

The archbishops of the seventh century (615–90) were distinguished for their holiness: St. Eladius (615–33); St. Eugenius III (646–57), poet, theologian, and musician; St. Idefonso (659–68), the most notable prelate of Toledo during the Gothic epoch, conqueror of the Jovinian heresy, favoured with celestial manifestations, author of a celebrated book in defence of the virginity of Mary and of other dogmatic, moral, and historical treatises; and St. Julian II (680–90), author of many works, the best known of which is the "De fide adversus Wambam". During the Musulman occupation (a period of 373 years) the condition of the Christians who continued to live in the territories they had conquered was subject to many vicissitudes, but the See of Toledo did not cease to exist during this long period of captivity. Cirila (747–783?) wrote the life of his predecessor, St. Idefonso; St.
Eulogius, the noble martyr of Córdova (859), to whom are attributed various Latin treatises, was elected to the see but never took possession of it; Bonitus (862 or 66) wrote an apologetic work in defence of the Abbot Samson. Among the archbishops of the Mozarabic period Elipandus (783–808) is a notable exception to the rest, apostatizing, and embracing and propagating Nestorianism.

With the reconquest of Toledo in 1085 by Alfonso VI of Castile, the diocese entered upon a new and more prosperous era, favoured as it was by donations and privileges not only of the Castilian sovereigns, but of other potentates and of all social classes. It was thus that it reached that height of power and splendour which made it the envy of all the churches of the kingdom, and which enabled it to contribute such large sums to all national enterprises, to the erection of notable monuments, to the succour of the needy, and to the general diffusion of learning and culture. The first bishop of this period was the Frenchman Bernard, a Cluniac monk and Abbot of Sahagun (1086–1124), in whose time the principal church of Toledo was once more restored to Catholic worship, and Urban II by a Bull (1088) expressly conferred on Toledo the dignity of primacy over the churches of Spain, a declaration which, however, did not prevent the other churches from disputing with Toledo this high distinction. It was during the pontificate of Urban II that the Roman Rite was substituted for the ancient Isidorian or Mozarabic Rite (1089).

Archbishop Rodrigo Jiménez de Rada (1210–47) is one of the most notable figures of his time; a statesman, counsellor of kings, strenuous warrior, and a learned writer, he conferred innumerable services on the Church and the State. He assisted at the great battle of Las Navas de Tolosa; annexed the village of Quesada and the district of Cazorla to the diocese; commenced the building of the cathedral at Toledo, which is still in existence; defended and consolidated the primacy of his see; and contributed to the foundation of the first general schools (Estudios generales). Rodrigo began a great historic work, basing it on Christian and Arab sources, completing the plan with the section called "De Rebus Hispaniae", last and best of his historical works. Gil de Albornoz (1339–50), cardinal, was a great statesman and warrior, and founder of a famous college for Spaniards at the University of Bologna, which produced many celebrated men.

Pedro Tenorio (1376–99), an enterprising and energetic man, was very influential during the reigns of Henry II, John I, and Henry III; he restored buildings and works of public utility, and at his own expense he founded the Hospital of Villafranca del Puente, which is still in existence and in active use. Pedro González de Mendoza (1483–95), called el gran cardenal de España, was of noble lineage and the counsellor of the Catholic sovereigns; he displayed a princely prodigality in the many works which he undertook and completed. Among these may be mentioned the Colegio Mayor of Valladolid and the Hospital of Santa Cruz for foundlings. His successor, Fray Francisco Ximénez de Cisneros (1495–1517), is perhaps the most illustrious of all the prelates of Toledo, and at the same time one of the most prominent figures in the history of Spain. In him were united qualities which were found combined, for he was a learned and saintly religious, an austere and energetic reformer, a conqueror and statesman, the father of the poor, and the Maecenas of Spanish arts and letters. Among the titles conferred on him were Cardinal of St. Balbina, confessor of Isabella the Catholic, inquisitor general, and regent of the kingdom. The Church, humanity, and his diocese found in him a protector and benefactor. He extended the limits of the Diocese of Toledo to Africa, adding Oran and its territory, which he personally and at his own expense conquered (1509). Only some of the many works which he accomplished can be mentioned: among these being the foundation of the University of Alcalá de Henares; the printing of the Complutensian Polyglot Bible; the foundation of the library of the cathedral of Toledo; and the restoration of the Mozarabic Rite in a private chapel. Several monasteries owe their foundation to him, as well as the College of San Juan de la Penitencia at Toledo for the education of virtuous orphan girls, and three public wheat granaries for the benefit of poor labourers at Toledo, Alcalá, and Torrelaguna (his native place).

Some of the archbishops who succeeded Cisneros were distinguished for the liberality with which they promoted the arts, filling the cathedral of Toledo with priceless works of art, the glory of the Spanish Renaissance. Alonso de Fonseca (1524–34) gave during his lifetime to the chapter of Toledo an annual income of 400,000 maravedis to be devoted to providing marriage portions for poor girls; Juan Tavera (1534–45), cardinal, distinguished prelate, and statesman, founded the general Hospital of San Juan Bautista, outside the walls of Toledo; Juan Martínez Guijeno, better known under the Latinized form of his name, Silicius (1546–57), cardinal, ardent patriot, and protector of the needy, founded at Toledo the College of Nuestra Señora de los Remedios (commonly known as the Colegio de Doñellas nobles), an important institution which is still in existence; the Colegio de Infantes, where the choir boys of the cathedral are educated and instructed; and the Monasterio de Recondo, which he endowed and for which he endowed a small synagogue of St. Maria la Blanca. The Dominican archbishop, Bartolomé Carranza de Miranda (1559–1576), learned theologian and canonist, was the author of the "Suma Conciliorum omnium" published at Venice (1573). Notwithstanding his learning and piety, he was suspected of heresy by the Inquisition, and eventually acquitted. The learned and pious García de Loaysa Girón (1598–99), stren-
TOLEDO

vus, an upholder of ecclesiastical discipline, collected and published (with annotations and emendations) the “Collectio conciliorum Hispaniae”. Cardinal Bernardo de Sandoval y Rojas (1599–1618) was liberal and charitable, and a great patron of letters. His strategy was advantageous to the diocese; he established its rights over the district of Cazorla; secured the ordinary episcopal jurisdiction in the diocesan territory over the Order of St. John of Jerusalem; and restored to the diocese the important town of Briguja.

According to reliable statistics the Diocese of Toledo comprised at that time 4 cities, 183 towns, 322 villages and hamlets, with 816 parishes and 751,733 souls. The archiepiscopal estate yielded at the time a revenue of 300,000 ducats. The receipts of the chapter were also ample; the manufacturing industries yielded more than 40,000 ducats annually. The revenues of all the churches of Spain combined did not greatly exceed in value the archiepiscopal estate of Toledo. Cardinal Infante D. Fernando de Austria (1618–41), brother of Philip IV, the successor of Sandoval y Rojas, distinguished himself as an able military commander and as Viceroy of the Low Countries, where victory crowned his military efforts. The cardinal-archbishops who succeeded him were Gaspar de Borja (1643–45); Baltazar Moscoso (1646–65); Pascual de Aragon (1666–77); and Luis Fernandez Porto Carrero (1678–1709). All took an active part in the politics of their time as viceroys, counsellors of state, and governors of the realm. Cardinal Francisco Antonio Lorenzana (1772–1800) understood how to wield, at a time when the Church was passing through a crisis, a power which would have done credit to the great prelates instrumental in the restoration of the Spanish Church in the past. Generous and liberal, “Padre de los Pobres” (Father of the Poor) as he is simply styled in his epitaph, litterateur, patron of arts and letters, promoter of national industries and all works of public utility, he carried his zeal into all these spheres. He rebuilt many of the city and country churches of his diocese, made large bequests to the Church, improved the archiepiscopal library, defrayed the expenses of the monumental work entitled “P. P. Toletanorum quotquot extant opera”, and of the Gothic Missal and Regal of the Mozarab Rite. In the city of Toledo the erection of the university building, the foundation of the hospital for the insane, and of the Real Alcazar (which he also restored), and la Fonda de la Caridad (a free lodging-house) are a few of the many works that still bear witness to his zeal. His successor, Luis Maria de Borbon, an Infante of Spain, (1800–23), was president of the regency during the absence of Ferdinand VII. Cardinal Pedro de Ingannoz (1824–36) published some works in defence of the rights of the Church and of ecclesiastical discipline, and commenced the great seminary building.

Cardinal Juan Ignacio Moreno (1875–84), in his youth professor in the Notariado, published a work entitled “Tratado sobre el ortogramiento de poderes públicos”, and as the bishop of various Spanish dioceses (lastly that of Toledo) he defended the Church against the aggressions of revolution, taking part also in Roman affairs, as his high position as cardinal demanded. At this time the Archdiocese of Toledo lost much territory by the cession to the Priorate of the Military Orders, which takes up the entire civil Province of Ciudad Real, and was erected by Pius IX, 18 Nov., 1875. Cardinal F. Zeferino Gonzalez was an illustrious Dominican and the restorer of Scholasticism, author among many other well-known works of the “Estudios sobre la Filosofia” and “Estudios Religiosos, Filosóficos, Científicos y Sociales”. He had on various occasions declined episcopal honours, but at length, after having occupied the sees of Cordova and Seville, he was raised to that of Toledo, governing from 1884 to 1885, when he resigned the dignity. A still greater reduction in the territorial boundaries of the Diocese of Toledo took place at this, time, when the Bull of 7 Aug., 1885, created the Diocese of Madrid-Alcalá, which comprises the entire civil Province of Madrid. Cardinal Miguel Miguel y Rio (1886–92) was a conspicuous figure at the Vatican Council when, as Bishop of Cuenca, he pronounced the decisive discourse which determined the proclamation of papal infallibility. He was learned and charitable, and completed the seminary commenced by Ingannoz. Cardinal Antolin Monseisello (1892–97), a prolific and finished writer, orator, and statesman, wrote among other works: “Manuel del Seminarista”, a catechism; various articles touching upon ecclesiastical discipline; and many sermons, panegyrics, and pastoral letters. Cardinal Sancha (1898–1900) devoted himself mainly to the study of social questions. He wrote “Regimen del terror en Italia Unitaria” and the “Kulturkampf”, and numerous discourses and pastoral letters. Cardinal Gregorio Maria Aguirre, of the Franciscan Order, has, since October, 1909, occupied the primatial see of Spain.

Toledo is one of the greatest art centres not only of Spain but of the civilized world. Of its principal religious edifices, among which are to be found notable works of art in the styles prevailing from the thirteenth to the eighteenth centuries, the following may be mentioned: the cathedral, a magnificent five-naved Gothic structure, with numerous additional sections commenced in 1227 by King St. Ferdinand and Archbishop Jimenez de Rada; the Franciscan Monastery of San Juan de los Reyes, built in 1476 by Ferdinand and Isabella, to which is attached a church and cloister in ornate Gothic style, and which has recently been richly decorated; the church of the ancient hospital of Santa Cruz founded by Cardinal Gonzalez de Mendoza, dating from the early part of the sixteenth century, is one of the most beautiful examples of the Plateresque of the Fifteenth and Sixteenth centuries. Of great interest also are a number of the churches of Toledo in which remains of the Visigothic period are preserved, and others built in the Moorish style, called mudéjar by the Spaniards, which

Tomb of Cardinal Taveira in the Alferia Hospital, Toledo
Alonso Berruguete, 1557
is the Arabic style adopted after the reconquest of the city by Alfonso VI. Mention must also be made of other notable buildings although not of Christian origin—the ancient mosque del Cristo de la Luz (reconstructed in the tenth century) and the synagogues of San Miguel (thirteenth century?) and del Transito (fourteenth century). Many excellent architects, sculptors, and painters worked in Toledo in the numberless monastic and parochial churches of the city, but especially in the construction and embellishment of the cathedral. Among the painters, the most important was Dominico Theotocopoulos, called "El Greco", native of Crete, who established himself at Toledo and produced numerous works (chiefly of religious character) which are highly prized and studied at the present time, and which represent one of the most curious phases of Spanish art, marking the point of departure of the modern national art. Many important religious buildings are also to be found in various parts of the diocese, among which may be mentioned: the ancient collegiate church (at present a parish church) of Talaver de la Reina, a three-naved Ogival building started by Archbishop Jiménez de Rada in 1211 and finished between the thirteenth and fourteenth centuries; the ancient collegiate church of Teruel (also at the present time as a parochial church), a three-naved edifice founded and endowed by Doña Teresa Enriquez (built between 1509 and 1518), an interesting example of the florid Ogival style and the Gothic Plateresque of the transition period; the parochial church of Tembleque, also of the early sixteenth century, an example of the transition period from the Gothic to the Renaissance; and the parochial church of Tepes, a magnificent temple of three naves, designed by the celebrated architect Alonzo Covarrubias and built between the years 1533 and 1552 in the style of the transition period Gothic Plateresque and Grecian Romanesque.

Famous in the history of Toledo are its councils, held in greatest veneration by the sovereign pontiffs, and the source of the purest religious and moral doctrines. They were national and provincial; those held in the years 396 and 400, first of those whose acts have been preserved, opposed the heresy of the Priscillianists and legislated for the reform of the clergy. In 440 or the beginning of 448 a national council seems to have been convened which once more condemned the doctrines of Priscillian. The second provincial council (527) promulgated five canons in which various points of discipline were established. In the national council held in 540 decisions concerning the reformation of certain disciplinary usages and practices were adopted. The most famous of all the councils of Toledo was the third national council (held in 599), in which King Recared, the prelates, and the grande, proclaimed the abjuration of the Arian heresy and made a profession of faith according to the doctrine of the Council of Nicaea. In addition, the bishops issued religious decrees against the remaining vestiges of ancient idolatry, restricted the rights of the Jews, commanded that the statutes of previous councils and the decisions of the sovereign pontiffs be observed, and promulgated other canons of great importance for the reformation of accepted usages and the restoration of ecclesiastical discipline. Another national council (597) promulgated two canons relative to the episcopal and priestly state. In the provincial council commonly called the Council of Guadarrama (810) the metropolitan jurisdiction of the bishops of Toledo over the entire Province of Toledo was explicitly stated. In the fourth national council (633), one of the most important held in Spain, presided over by St. Isidore of Seville, very important measures in both canonical and political matters were adopted. The fifth national council (636) was also political in its preoccupations, which were directed towards the defence of the king. The sixth (638) approved constitutions relating to discipline, morals, and political matters. The seventh (646) established certain canons which had been promulgated in previous councils. In the national council which is said to have been held in 650 the heresy of the Monothelites, who denied that Christ had two wills, was condemned. In the reign of the Visigothic king, Recesvind, besides the councils which are classed as doubtful, were held: the eighth provincial council (653), in which some interesting points relating to discipline and civil law were decided; the ninth provincial (655), in which matters of discipline were discussed; and the tenth provincial (656) in which certain canons referring to the monastic life were sanctioned. The eleventh provincial council (675), held during the reign of Wamba, formulated certain prescriptions in regard to discipline and the reformation of certain usages, concerning the clergy in particular. The twelfth (681) and the thirteenth (683) national, and the fourteenth (694) provincial, councils were held during the reign of Evigius. The twelfth and thirteenth councils approved certain canons relating to discipline and other usages commonly in practice; and the fathers assembled at the fourteenth professed their adherence to the Sixth Oecumenical Council. The fifteenth confirmed the doctrine contained in an apologetic treatise written by St. Julian, Archbishop of Toledo, who presided at the council. The sixteenth and seventeenth (694) councils were also national; the first imposed penance and declared an anathema against Archbishop Sisbert (who had plotted against King Egica), and the second discussed various disciplinary measures. It is believed that still another national council was held during the Visigothic period between 700–712, the acts of which have been lost, but it is said that canons relative to the preservation of the integrity of faith and to the regulation of certain usages were promulgated.

After the reconquest of Toledo by the Christians (1085) at least ten provincial councils were held in the city of Toledo, some of them being of great interest for the canonical history of Spain. Archbishop Raimundo convened that held in 1123 in which certain different points relative to the apostolic character of the archbishop and the canons with regard to the distribution of the revenues of the Church were adjusted and the number of canonsries definitely fixed. The archbishop, Infante Don Juan de Aragón, presided over the council of 1323 which prescribed a formula with regard to articles of faith, the seven sacraments, and formulated canons relative to points of discipline. The provincial councils of 1324 and
30th of each month; "El Castellano", a purely Catholic publication without political affiliations (founded in January, 1903), issued every Tuesday and Saturday; "El Forven" (founded in August, 1886) also a political supporter of the Carlist cause, and published weekly.

There is no complete history of the Diocese of Toledo. The bibliography of the city, its territory, its monuments, and its famous men is complete in itself. It is not necessary to refer to some books which principally concern the questions treated in this article are given.

Coelho, Historia eclesiástica y real de España (MSS. in the library of the Chapter of the Church of Toledo); Casteñón and Fernández, "Primera de la Santa Iglesia de Toledo" (Madrid, 1645), 2nd ed.; the account of the early church and the curia of Toledo is carefully compiled; especially important is the caution, owing to the abundant use of the "false chroniclers": Sánchez, Defensa cristiana y año de las siete puertas de las Españas que pasa la Santa Iglesia de Toledo (Madrid, 1728); España sagrada, V, VI, VII, VIII (Madrid, 1760-52); Lorenzana, PP. Toledoanorum quatuor extant opera (Madrid, 1782-93); Tejada y Ramírez, Colección de cánones de la Iglesia esqpañola (Madrid, 1645-59); La Fuente, Historia eclesiástica de España (Madrid, 1860-66); Paños, La mano (Toledo, 1857); Martín Gancedo, Historia de la ciudad de Toledo (Toledo, 1859); de Palacios, Los concilios de Toledo (Barcelona, 1888); de Cidelio, Toledo en el siglo XV (Madrid, 1901).

Conde de Cidillo.

Toledo, Diocese of (Toletana in America) Ohio, U. S. A., formed out of the Diocese of Cleveland and erected into a separate jurisdiction, 15 April, 1910. It includes the Counties of Lucas (Toledo), Allen, Crawford, Defiance, Fulton, Hancock, Henry, Ottawa, Paulding, Putnam, Sandusky, Seneca, Van Wert, Williams, Wood, and Wyandot; an area of about 1,600 square miles. The principal towns are Lima, Tiffin, Fremont, Defiance, and Delphos. Estimated Catholic population, 125,000.

There are 88 parishes with resident priests and 25 missions, 85 diocesan priests and 31 of the regular clergy. The number of parish schools is 65, with an enrolment of 13,500. One college (Jesuit) and three academy-colleges provide the departments for higher education.

The work of charity and reform is supplied by three orphanages, two hospitals, one home for the aged poor, and one house of reformation, on Father Shepard.

History.—The country bordering on Lake Erie was in the path of missionaries and trading explorers, who, in the seventeenth century, made their way from Quebec to the Upper Great Lakes. French settlers ventured down from Detroit, and a French fort was established on the Maumee in 1668. Traders followed this river to its source in Indiana, whence it was not difficult to reach the more important posts about Vincennes. The lake shore would also have been the natural route for the Jesuit Fathers, who, in the latter half of the eighteenth century, journeyed from Detroit to visit the Hurons, and Father Pierre-Joseph de Bonnaux, returning to the north with Céloron's company from the expedition to the Ohio, entered Lake Erie on the way to Detroit, at the mouth of the Maumee (Miami of the Lake), 5 Oct., 1749.

Bishop Fenwick, writing to Father Bade in August, 1815 ("Catholic Chronicle in Ohio"), speaks of the Catholic Magazine; speaks of Catholic Indians along the Seneca River who crossed to Malden and Sandwich in Canada for marriage and baptism. Father Edmund Burke, who signs himself "Vicaire général du Haut Canada", and was stationed near the present Monroe (Fremont), Michigan, in 1834, visited, not Fort Meigs, as has been asserted, but Fort Miami, at the rapids of the Maumee; and in 1825 Bishop Fenwick's vicar-general, Father Gabriel Richard, who as early as 1806 had attended Monroe from Detroit, indicates that the district "de la Baie Miana" was considered as one with that of St-Antoine on the Huron.
Even after Detroit had become a separate diocese, the Rev. P. Carabin, pastor at Monroe, enumerates many on his lists as "inhabitants of Toledo" (1837). The building of water-ways along the line of the Michigan and Grand Rapids. Often the Wesback and Lake Erie did much to open up the country to German and Irish immigrants invited by Bishops Fenwick and Purcell, of Cincinnati, to avail themselves of the opportunities of labour and farming.

After 1830 organized congregations began to take the place of scattered missions, and a resident pastor was placed at St. Mary's, Tiffin, in 1831.

In 1841 Rev. Amadeus Rappe organized St. Francis de Sales's Parish, Toledo, of which he was pastor until his appointment as first Bishop of Cleveland in 1847. Associated with him and succeeding him in this pastorate was Rev. Louis de Goesbriand, first Bishop of Burlington, Vermont. Among the pioneer priests of this section were Fathers Badin, Ignatius Mullon, Edward T. Collins, Projectus J. Machebeuf (afterwards Bishop of Denver), E. Thienvont, and Henry Camden Juncker (later Bishop of Altoon), men eminent for learning as well as piety; and those had the credit of making the Respectful and Serviceable Fathers, under the leadership respectively of Father Tschennens (1832) and Father Francis de Sales Brunet (1844). Members of the latter congregation (C.P.P.S.), which was introduced by Father Brunner, are still (1912) in charge of parishes and missions in the Diocese of Toledo.

The growth of Catholicism was particularly noticeable in the city of Toledo. At the date of its erection into an episcopal see there were within the city twenty parishes. This rapid increase had been greatly promoted by a steady influx after 1870 of Poles and Hungarians, employed largely in factories, quarries, and public works.

Among the priests prominent in Toledo in this period of development were: the Rt. Rev. F. M. Boff (1859), who in 1872 was made Vicar-General of Cleveland and held the unique distinction of having served as administrator of that diocese not less than six times in a period of forty years (d. 22 March, 1912); Father Edward Hannin (1863), who was administrator of the Diocese of Cleveland from the resignation of Bishop Rappe to the appointment of Bishop Gilmour, and who when over seventy years of age undertook the care of the parishes and edifices in the Middle West; and Rev. Patrick F. Quigley, whose widely-noticed action against state interference in parish schools, in the matter of reports and truancy, gave occasion for much hostile demonstration, especially on the part of members of the A. P. A. This priest's contention before the several courts was ably if not successfully maintained by the Hon. Frank H. Hurd, a convert to Catholicism, and a congressman, celebrated for his convincing advocacy of free trade.

The commercial advantages of the city and the number of Catholics had long drawn attention to Toledo; and on the death of Bishop Bremann (1908) the bishops of the Province of Cincinnati recommended to the Holy See the division of the Diocese of Cleveland. The request was favourably considered, and Toledo was named as the seat of the new diocese, with St. Francis de Sales's designated as its cathedral church. Rt. Rev. John P. Parrell, D.D., who had been consecrated Bishop of Cleveland, 1 May, 1909, was appointed temporary administrator. Rt. Rev. Joseph Schrems, D.D., first bishop, was born at Wesselhofen, near Ratisbon, Bavaria, 12 March, 1866. Following his elder brother, Rudolfin, who had become a Benedictine monk at St. Vitus, near Philadelphia, he came to the United States in 1877.

He completed his course of humanities when but 16 years of age at St. Vincent's College, near Pittsburgh. After a few years spent in teaching, he was accepted by Bishop Richter as a student for the Diocese of Grand Rapids, and entered the Seminary of Montreal in 1884. On 29 June, 1889, Rev. Mr. Schrems was ordained priest in the cathedral at Grand Rapids. He was successively assistant and pastor at St. Mary's Church, West Bay City, and was transferred to St. Mary's Church, Grand Rapids, Oct., 1900. In 1903 he was appointed vicar-general of the diocese, and was named domestic prelate, Jan., 1906. Meantime he had brought about the establishment of a high school at Grand Rapids, thus demonstrating the feasibility of intermediate grades for the Catholic common school. On 22 Feb., 1911, he was consecrated titular Bishop of Sophene and auxiliary to the Bishop of Grand Rapids. He at once espoused the cause of workmen in their difficulties with the employers in the furniture factories, skilfully averted a panic, and contributed much to bring about an agreement. On 11 Aug., 1911, he was transferred to the See of Toledo. A notable demonstration marked his entry into the city on Sunday, 1 Oct., and on 4 Oct. he was enthroned in his cathedral church.

Toledo, Francisco, philosopher, theologian, and exegete, son of an actuary, b. at Cordova, 4 Oct., 1532; d. at Rome, 14 Sept., 1596. He studied philosophy at Valencia and theology under Domingo Soto at Salamanca. At the age of twenty-three he taught philosophy at Salamanca, and, after his ordination, entered the Society of Jesus there, 3 Jan., 1558; and he made his novitiate at Simancas. In 1559 he went to Rome and was professed in 1564. He successively filled the posts of master of novices, professor of philosophy for three years, Scholastic and moral theology for six years, and prefect of studies of the Roman College. He was theologian of the Sacred Penitentiary and preacher to the pope and cardinals for twenty-four years, accompanied Monsignor Comendone on his mission to the Emperor Maximilian and King Sigismund of Poland, and was the envoy of various popes to Vienna, Poland, Germany, Bavaria, and Louvain, where he received Baius's abjuration of the propositions which had been condemned by Pius V and Gregory XIII. Clement VIII created him cardinal, 17 September, 1593; this dignity, it seems, he desired to renounce in 1594 so that he would be free to retire and die in one of the Jesuit houses. He was largely instrumental in the reconciliation of Henry IV to the Church and to Charles IX; at his death he had a memorial service for him in Paris. As a religious he is classed by Marianists as of ordinary virtue; he was dispensed from religious obedience by a secret papal Brief, lived in
the papal palace, sought the cardinal's hat, and in the last years of his life intervened in Jesuit affairs with disastrous results. Gregory XIII considered him one of the most learned men of his age, and Soto ranks him as a genius.

His philosophical works, especially "De anima", adopted as a text-book in the University of Salamanca, give indications of a philosophical method reminiscent of both matter and method. Irrelevant questions are set aside, others are weighed or reduced, and certain problems are stated and discussed in a broader spirit. His Scriptural commentaries he examines every sentence of the text, points out their relationship, gives Patristic references in the annotations, discusses the principal themes of each book, and presents his arguments clearly and lucidly. By some he is considered the foremost interpreter of his century, and his exegetical works certainly deserve the first place. In his theological works he is clear, concise, and orderly. He proclaims himself a disciple of St. Augustine and St. Thomas, although on certain questions he is quite at variance with them, as for example the proximate cause of predestination, which for him is praevisio bona opera.

In regard to the famous Scotist teaching that the Word would have become man even if Adam had not sinned, he says: it is neither true, probably not true, nor general. His works may be divided into three classes: (1) Philosophical: "Introductio in dialecticam Aristotelis" (Rome, 1561), thirteen editions, apparently the first work of a Jesuit to be printed in Mexico; "Commentaria una cum questionibus in universam Aristotelis logicam" (Rome, 1572), seventeen editions; "Commentaria de physica ausecultatione" (Venice, 1573), fifteen editions; "De generatione et corruptione" (Venice, 1575), seven editions; "De anima" (Venice, 1574), twenty editions; "Opera omnia. Opera philosophica" (Lyons, 1596–92), only one volume issued. (2) Theological: "In Summa theologica S. Thome Aquinis enarratio" (4 vols. Rome, 1889), published by Father José Pápa, S.J.; "Summa casuorum sive instructio accedendum" (Lyons, 1599), forty-six editions (Spanish tr., Juan de Salas; Italian, Andrea Verna; French, Goffar; summaries in Latin, Spanish, French, Italian). (3) Exegesis: "Exercitationes Joannis Evangelistae commentarium" (Rome, 1592), nine editions; "In prima XII capita Sacrosancti Jesu Christi D. N. Evangelii secundum Lucam" (Rome, 1600), printing supervised by Father Miguel Vázquez, S.J.; "In Epistolam B. Pauli Apostoli ad Romanos" (Rome, 1600), printing supervised by Father Alonso de Chaise, S.J.; "Exercitationes historicas in Bibliam vulgata", corrected by direction of Clement VIII; "Regula hebraica pro lingua sancta intelligenda", Summas: "Motivos y adversaristas de cosas dignas de reformación cerca del Breviario".

Toleration. History of.—In any attempt to deal historically with the attitude of the Church towards religious toleration two considerations have to be kept in mind. In the first place, nearly all ecclesiastical legislation in regard to the matter draws upon a process through which heretics are in wilful revolt against lawful authority, that they are, in fact, apostates who by their own culpable act have renounced the true faith into which they were baptized, breaking the engagements made by them, or by sponsors in their name, when they became members of the Church of Christ.

It is easy to see that in the Middle Ages this was not an unreasonable assumption. The Church of God was then indeed as a city set upon a hill. No one could be ignorant of her claims, and if certain people repudiated her authority it was by an act of rebellion inevitably carrying with it a menace to the sovereignty which the rest of the world accepted. This at least was the case with the Cathari, the Albigenses, and the Hussites, with the Lollards and the Hussites, and it was still the case with the immediate followers of Luther, of Calvin, of Knox, and of the other early Reformers. Only by degrees and after a considerable lapse of time did generations come into being who could be regarded as inculpably heretical, for the passing of invincible degrees into institutions invested with their education took place entirely under heretical influences, but also that they could attain adult life without being effectively confronted with the claims which the true Church makes upon the loyalty of reasonable men. It might plausibly be maintained, for example, that such conditions were at no time realized among the Huguenots of France, or in the more Catholic districts of Central Europe. Hence we cannot be entirely surprised that there were those who excused such measures as the Revocation of the Edict of Nantes, or who supported the repressive legislation which was inaugurated by the Catholic sovereigns of Poland and Hungary in the sixteenth and seventeenth centuries.

In the second place it is to be remembered that owing to the fact that the canon law deals very largely with the enunciation of principles of right and wrong which are of their own nature irreformable, the direct repeal of its provisions has never or very rarely been resorted to. This course undoubtedly has the great advantage of inspiring respect for the sanctity and stability of the law, but the consequence follows that there remain upon the statute-book a number of enactments which owing to circumstances, conditions are to all practical intents and purposes obsolete. The medieval legislation of the Church with regard to usury, testamentary dispositions, marriage, and especially heresy, largely falls under this category, while the natural result of the retention of a considerable mass of obsolete law in sacred councils of the Church, or at least temporary, uncertainty, under which some will favour and others resist the legislation that is passing away. For example there was bound to be a period during which rigidists would still appeal to the very uncompromising measures in dealing with heretics which were contemplated by them, and on the other hand, larger-minded contemporaries, who were themselves perhaps living under political conditions which forced them to appreciate the advantages of toleration, tended to treat these same provisions as a dead letter and to deny them all validity in practical life. The effect of both these policies of firm repression an evil germ which threatened indefinite mischief to the well-being of Christian society. Every lawfully-constituted society must put down on principle the propagation of such sedition as threatens its own existence, and this is not persecution so long as reason and justice are respected in the use of necessary measures.

Persecution begins when no reasonable proportion is observed between the force used in compulsion and the importance and power of the interests which it is sought to control. To determine the exact point at which legitimate repression passes into persecution is hence a matter of extreme difficulty. For this reason...
we should probably obtain a clearer view of the toleration of the Church in past history by studying the relation of the papacy to the peoples which like the Jews and pagans were recognized as lying outside her direct jurisdiction. Regarded as a centre of spiritual authority the Holy See did not claim the unbaptized as subjects, but still the popes as sovereigns of a temporal state had to adopt a definite attitude towards them. Thus we meet in the Dominions of these relations as a whole and comparing them with the ideas which prevailed among secular rulers of the time, the principles formulated, and for the most part acted upon, by the popes, set an example of mildness to the rest of Europe. As early as a. d. 598, Gregory the Great laid down that Jews, who for the protection of pagan races against forcible conversion, and that it has freely tolerated such religious rites amongst savages as were not openly debasing and immoral. The history of the preaching of Christianity in the New World shows many examples in which the fanatical zeal lay with the profiteering Spanish adventurers who conquered the country, while ecclesiastical authority advocated sympathy with the natives and indulgence for their religious observances. On the other hand this indulgence shown to pagan customs, obviously enough, could not be extended with the same enthusiasm to Mohammedan India, considerably desired to abolish the practice of suttee by which the wives of the upper classes were required to commit suicide upon the death of their husbands. This, however, was not effectively prohibited, even in the British provinces, until 1829. With regard to the toleration of Christian heretics and schisms the reader will do well to consult the article INQUISITION. No very systematic measures of repression seem to have come into practice before the twelfth century. The aggressive attitude adopted in the case of the Priscillanists (q. v.) and Donatists (q. v.) was owing less to the action of the bishops than to that of the emperor. On the other hand, it cannot be disputed that after the authority of the popes was firmly established, ecclesiastical campaigns were undertaken against the Cathari, the Waldenses, and Albigenses as well as later on against the followers of Wickliff and Hus. Moreover isolated executions for heresy (burning at the stake being commonly employed for this purpose) were known before the twelfth century both in East and West; though at the same time the actual infliction of the punishment, then as after, must be regarded as an act of the civil power rather than of any ecclesiastical tribunal. But in such an Inquisition heretics are not regarded as having been first formally set up, at any rate in embryo, about the second half of the thirteenth century no measures of extreme severity were in the beginning prescribed or generally adopted. The Fourth Council of Lateran in 1215 imposed as a penalty the deprivation of all consecrated goods. Convicted heretics, even though repentant, were excluded from public offices and were compelled to wear a badge. If their retraction was insincere they were liable to be confined in a public prison. At the same time it must not be forgotten that all these medieval heresies, as such an historian as Gairdner has noticed (Lollardy, I, 46), struck at the foundations of social order. M. Guiraud's account of the extravagant teaching of the Cathari and Albigenses is conclusive upon the point. It cannot be doubted that the severities which then began to be exercised in the name of religion were justified. It seemed rather to orthodox churchmen that the Church was so menaced by these subversive doctrines that her very existence was at stake. Under these circumstances it was not wondered that the ordinances of the canon law, for the most part formulated at a time when Albigensian teachings were a present danger, should have inclined to the (cf. Vacander, "La question du meurtre rituel chez les Juifs" in "Etudes de critique et d'histoire religieuse", 3d series, Vol. II. 67 and 383). In the later Middle Ages there may be traced through a long series of pontificates the repeated confirmations of the Bull, assignable probably in the first instance to Pope Calixtus II (c. 1120) and known as "Sicut Judaeis". It was a sort of papal charter of protection to the Jews and consequently enshrined certain words of one of Gregory the Great's letters just referred to. "As licence", says this document, "ought not to be allowed to the Jews to presume in their synagogues beyond what is permitted by the law so they ought not to be interfered with in such things as are allowed. We therefore, although the Pope prefers to continue in the hardness of heart rather than be guided by the hidden meaning of the prophets to a knowledge of the Christian faith, do nevertheless, since they invoke our protection and aid, following in the footsteps of our predecessors and out of the mildness of Christian piety, extend to them the shelter of our protection. The document then lays down (1) that the Jews are not to be compelled by force to embrace Christianity, but are only to be baptized of their own free will; (2) that apart from a judicial sentence in a court of law no one is to injure them in life or limb or to take away their property or to interfere with their customary rights as they may have enjoyed in the places where they live; (3) that they are not to be attacked with sticks and stones on occasion of their festival celebrations, nor are they to be compelled to render any feudal services besides such as are customary; (4) that no synagogues held in the churchyards are to be violated. (See M. Stern, "Urkundliche Beiträge", n. 171.) This charter reissued and confirmed as it was by some twenty or thirty pontiffs during a period of 400 years is certainly of much more weight as laying down the Church's view of the duty of toleration, as an abstract principle, than the edicts issued by the Holy See exercised on the whole a markedly restraining influence on the persecuting spirit of the Middle Ages. In particular, more than one of the popes, beginning with Innocent IV, issued Bulls exonerating the Jews from that charge of ritual murder, which, as in the well-known story of little Hugh of Lincoln, prejudiced public opinion so strongly against them.
TOLERATION

side of severity and that to the lawmakers of that age toleration seemed only a weakness. "The proscription of the Albigenses," says M. Guiraud, "was not the ferocity of a man of misfortune, but too often attributed to the princes of that age. It was inspired by a consideration which has been happily defined by saying that heresy was at that time as much a crime against social order as against religion" (Guiraud, "Chartulaire de Frouille," I, lxxvii). "The mainspring of the anti-Lollard movement, a Hadrian who sums up the practical effects of the Lollard movement by saying 'Wyclif produced no permanent religious impression upon the mass of the people. His teaching was misunderstood and caused a revolt of the peasants which resulted only in disaster" (Kirchengeschichte, I, 380, 383). It may be expected that the first fruits of the Reformation would be likely to mitigate the prevalent view of the mischievous nature of heresy. The political and social evils to which the teaching of Luther and Calvin gave rise, as well as the fanatical persecution of the Catholics by so many of their followers, are made clear beyond dispute in such a work as that of Josselin's "History of the German People," to which the reader may be referred. It was only natural that the concept of heresy as an attack upon law and order and as well as upon religion should be thereby deepened. Moreover in nearly every case where the repression of heretics has led to a further persecution of religious views, for example, the Massacre of Saint Bartholomew (q. v.) or the revocation of the Edict of Nantes (see Huguenots), the persecuting initiative has come far more from temporal rulers than from the Church or its representatives. On the other hand, the ferocity of the theological persecutors makes them the most fiercely denounced inquisitors. Even the "gentle" Melanchthon wrote to Calvin to congratulate him on the burning of Servetus. "The Church," he said, "both now and in all generations, owes and will owe you a debt of gratitude." "Let there be no pity," Luther exhorted his followers; "it is a time of wrath not of mercy. . . Therefore, dear Lords, let him who can slay, smite, destroy" (see Beard, "The Reformation and Modern Thought"). "John Knox," said Acton (History of Freedom, p. 44), "thought that every Catholic in Scotland ought to be put to death. Most severe there is none so much as his infamous "tu quoque" argument. The Church has often given proof of her moderation when brought into relation with those whom she was not logically compelled to treat as rebels. No better examples can perhaps be afforded than in the history of the foundation of some of the colonies in the New World, and notably that of the Province of Maryland (q. v.).

HERBERT THURSTON.

TOLERATION, RELIGIOUS.—Toleration in general signifies patient forbearance in the presence of an evil which one is unable or unwilling to prevent. By religious tolerance is understood the magnanimous indulgence which one shows towards a religion other than his own, accompanied by the moral determination to leave it and its adherents unmolested in private and public, although internally one views it with complete disapproval as a "false faith". Since, in this view, it is not treacherous to treat it justly, it only fosters the laicist standpoint of principle, leaving its historical development to be discussed in a special article, we shall consider: I. The Idea of Tolerance; II. The Inadmissibility of Theoretical Dogmatic Tolerance; III. The Obligation to Show Pratical Civil Tolerance; IV. The Necessity of Public Political Tolerance.

I. The Idea of Tolerance.—Considered in the abstract, the general idea of toleration contains two chief moments: (a) the existence of something which is regarded as an evil; (b) the magnanimous determination not to interfere with the evil, but to allow it to run its course without molestation. Viewed under the former aspect, toleration is akin to patience which also connotes an attitude of forbearance in the face of an evil. Patience, however, is rather the endurance of subjective evils (e. g. misfortune, sickness), toleration of ethical evils. When not an evil but some real good (e. g. truth or virtue) is in question, toleration gives way to interior approbation and external promotion of such good. No one will say: "We must show toleration towards science or patriotism was not possible to the ancients, who recognized by all as laudable and desirable. A second idea akin to toleration is connivance (conniventia, dissimulatio), which means the deliberate closing of one's eyes to evil conditions so as not to be obliged to take measures against them. The distinction between connivance and toleration lies in the fact that the latter not only closes its eyes to the evil but also openly concedes it complete liberty of action and freedom to spread. It is indeed in this deliberate granting of liberty that the characteristic quality of toleration lies. For the intolerant person also regards what opposes him as an evil and a source of annoyance; but, it is done by force as opposed to connivance, so that he shows his intolerance. Not all intolerance, however, is a vice, nor is all tolerance a virtue. On the contrary, an exaggerated toleration may easily amount to a vice, while intolerance keeping within just limits may be a virtue. This statement is substantially in agreement with Aristotle's definition that virtue in general holds the right mean between two extremes, which are as such both vices. Thus the intolerance shown by parents towards grave faults in their children is an obligation imposed by conscience, although, if it be carried to the extreme of cruelty, it degenerates into a vice. On the other hand, excessive toleration towards an evil becomes under certain circumstances a vice, for example, when secular rulers look with folded arms upon public immorality.

The above remarks show that manifold distinctions are necessary before we are in a position to develop the true principles which underlie real toleration. Viewing our subject partly from the ethical and religious, and partly from the political standpoint, we find three distinct kinds of tolerance and intolerance, which refer to entirely different domains and thus rest on different principles. As regards the former, which alone concerns us here, we must distinguish especially between the thing and the person, the error and the erring. According as we consider the thing or the person, we have theoretical, dogmatic, or practical civic tolerance, or intolerance. Distinct from both is political tolerance, since the distinction between the individual and the State must also be considered. We must inquire somewhat more closely into these three kinds of tolerance and their opposites before considering the principles which underlie each.

(1) By theoretical dogmatic tolerance is meant the tolerating of error as such, in so far as it is an error; or, as Lezins concisely expresses it, "the recognition of the relative and subjective right of error to existence" ("Der Toleranzbegriff Lockes u. Puffendorfs" Leipzig, 1900, p. 2). Such a tolerance can only be the outcome of an attitude which is indifferent to the truth of truth, and which places truth and error on the same level. In philosophy this attitude is commonly termed skepticism, in the domain of religion, it develops into religious indifferentism which declares that all religions are equally true and good or equally false and bad. Such an internal and external indifference towards all religions, especially the Christian religion,
is nothing else than the expression of personal unbelief and lack of religious convictions. A person who is tolerant in the domain of dogmas resembles the botanist who cultivates in his experimental beds both edible plants and poisonous herbs as alike valuable growths, while a person intolerant of error may be compared to a market-gardener, who allows only edible plants to grow, and eradicates noxious weeds. Just as vice possesses no real right to existence, whatever toleration may be shown to the vicious person, so also religious error can lay no just claim to forbearance and indulgence, even though the erring person may merit the greatest affection and esteem. There is, of course, no toleration in religious freedom, but this liberty is not equivalent to an inherent right to sin or to err in religion. The "freedom of thought" claimed by free-thinkers is really vitiated by an internal contradiction, since the intellect is bound by the laws of thought and must in many cases yield to the force of evidence. But if by freedom of thought we are to understand the personal right of the individual to form on all questions such internal convictions as he may judge right, this ethical freedom also has its limits, since the inner spiritual life is at all events subject to conscience and to the moral order of the universe, and is, therefore, bound by ethical obligations which no man may disregard. The so-called "freedom of belief", which asserts the right of each person to believe what he pleases, is open to the same criticism. For, if the psychological liberty to accept the widest phantasies and the most foolish stories is an undeniable prerogative of the human soul, ethical freedom and the ethical right to freedom of belief are nevertheless conditioned by the presumption that a person will spurn all false religions and cling solely to that which he has recognized as alone true and consequently alone legitimate. This obligation was justly enunciated in Art. 111 in "Dei Veritatem" and "Dei Delictis" of 1 November, 1885; "Officium est maximum amplexi et animo et moribus religiosum, nec quam quisque maluerit, sed quam Deus justerit quamque certa minimeque dubitandi indicis umam ex omnibus veram esse constituerit." (The gravest obligation requires the acceptance and practice, not of the religion which one may choose, but of that which God prescribes and which is known by certain and indubitable marks to be the true one). (Cf. Denzinger, "Enchiridion", 9th ed., Freiburg, 1900, n. 1701.) The mere description of this kind of tolerance as "theoretical", as "enforced", as "opposed to the absolute", as "incompatible with true toleration" cannot be a vice. For it is essentially nothing else than the expression of the objective intolerance of truth towards error. In the domain of science and of faith alike, truth is the standard, the aim, and the guide of all investigation; but love of truth and truthfulness forbid every honourable investigator to countenance error or falsehood. It, therefore, follows that well-considered opposition to actual or supposed error, in whatever domain, is simply the antagonism between truth and falsehood translated into personal conviction; as impersonal adversaries, truth and falsehood are bitterly opposed, and no, and consequently, in accordance with the law of contradiction, they can tolerate no mean between them. This theoretical dogmatic intolerance—so often misunderstood, so often confounded with other kinds of intolerance, and as a result unjustly condemned by the theologian, artist, and statesman as an incontestable right, and is unhesitatingly accepted by everyone in daily intercourse.

(2) Practical civic tolerance consists in the personal esteem and love which we are bound to show towards the erring person even though we condemn or despise his error. The motive for this difference of attitude is to be sought in the ethical commandment of love for all men, which Christianity has raised to the higher ideal of charity or love of neighbour for the sake of God. One of the most beautiful outgrowths of this charity is shown in the correct Christian attitude towards the heterodox. This relation, rooted solely in pure love, is commonly meant when one speaks of "religious tolerance". It springs, not from pharisaic pride or from pity pluming itself on its superiority, but chiefly from respect for another's religious convictions, which out of true charity we do not wish to disturb to no purpose. Since innocent error may attain to the firmest and sincerest conviction, the person's salvation does not seem to be greatly imperilled until good faith turns into bad faith, in which case alone the feeling of pity has no animal origin. The heterodox person must, as a rule, be presumed, until the contrary is clearly established. But even in the extremest cases, Christian charity must never be wounded, since the final judgment on the individual conscience rests with Him who "searches the heart and the reins". The same measure of respect which a Catholic claims for his religion must be shown by him to the religious convictions of non-Catholics. Here obtains the principle which Gregory IX once recommended in a Brief (6 April, 1233), addressed to the French bishops concerning the attitude of Christians towards the Jews: "The Jews are not enemies of Christ, but enemies of Christ in paganism. They are included in the Christian people, as pagans are included in the Christian, just as the heretics are included in the orthodox people, and Christians in Paganism now existentibus cupimus exhibe to."

(3) Public political tolerance is not a duty of the citizens, but is an affair of the State and of legislation. Its essence consists in the fact that the State...
grants legal tolerance to all the religious denominations within its boundaries, either through its written constitutions and codes or as a matter of prescriptive right based on long tradition. This tolerance may under certain circumstances amount to the principle of equality of rights or parity, even to the full enjoyment of all civil rights, entirely regardless of one's religious belief. Since the modern State can and must maintain towards the various religions and denominations a more broad-minded attitude than the unyielding character of her doctrine and constitution permit the Church to adopt, it must guarantee to individuals and religious bodies not alone interior freedom of belief, but also, as its logical correlative, to manifest that belief outwardly—that is, the right to proclaim it, to instruct and to propagate it, and to religious convictions without the interference of others, and to give visible expression to these convictions in prayer, sacrifice, and Divine worship. This threefold freedom of faith, profession, and worship is usually included under the general name of religious freedom. Toleration and religious liberty are not, however, interchangeable terms, since the right implied in state tolerance to grant full or limited religious liberty involves the further right to refuse, to contract, or to withdraw this freedom under certain circumstances, as is clear from the history of toleration laws in every age. Nor is the issue of the names, Schismatic and Orthodox, internal, eternal, necessary, and unalterable character of truth, is only a dreary relapse into the scepticism of the sophist Protagoras, against which Socrates raised the banner of truth and virtue. The mutability of truth with the passage of time is also a thesis of Modernism. In the Decree "Lamentabilis" of 3 July, 1907, Pius X condemned the Modernistic proposition: Veritas non est immutabilis plus quam ipse homo, quique que cum ipso, in ipso et per ipsum evolutur (Truth is no more unchangeable than man, since with him, in him, and by him it is evolved). (Cf. Denzinger-Bannwart, "Enchiridion", 11th ed., Freiburg, 1911, n. 2058.) The final consequence of this suicidal system led F. Nietzsche to intellectual Nihilism: "Nothing is true, everything is allowed." The transference of this destructive scepticism to the domain of religion breeds religious indifferentism, which is no less unreasonable and immoral and insane, since it also sins against the sacredness of truth.

Nowhere is dogmatic intolerance so necessary a rule of life as in the domain of religious belief, since for each individual his eternal salvation is at stake. Just as there can be no alternative multiplication tables, so there can be no alternative religious beliefs. No fact of its existence, protests against all other religions as false. But the love of truth requires each man to stand forth as the incorruptible advocate of truth and of truth alone. While abstract truth, both profane and religious, asserts itself victoriously through its impersonal evidence against all opposition, its human advocate, engaging in personal contest with adversaries of flesh and blood like himself, must have recourse to words and writing. Hence the sharp, yet almost impersonal clash between opposing views of life, each of which contends for the palm, because each is thoroughly convinced that it alone is right. But the very devotion to truth which supports these convictions determines the kind of polemics which each believes himself called on to conduct. He whose sole concern is for truth itself, will never besmirch his escutcheon by lying or calumny and will fight all the more fiercely from all enemies of the truth for which he fights or in good faith believes he fights, is, by reason of its innate nobility, incompatible with any blemish or stain, he will never claim licence to abuse. Such an ideal champion of truth is fittingly designated by the English word "gentleman." He may, however, by a false counter-stroke carry an unjust, malicious, and insulting attack, since...
his adversary has no right to employ invective, to falsify history, to practise sordid proselytism, etc., and may, therefore, be driven without pity from his false position. These principles obtain universally and for all men—for scholars and statesmen, for Catholics and Protestants. If, therefore, the Catholic Church also claims the right to exclude heresy, on condition with regard to her teaching, it is unjust to reproach her for exercising this right. With the imperturbable conviction that she was founded by the God-Man Jesus Christ as the "pillar and ground of the truth" (I Tim., iii, 15) and endowed with full power to teach, to rule, and to judge, none of this dogmatism; none of the heretic's indisputable right, but also as a sacred duty. If Christian truth like every other truth is incapable of double dealing, it must be as intolerant as the multiplication table or geometry. The Church, therefore, demands, in virtue of her Divine commission to teach, the unconditional acceptance of all the truths of salvation which she teaches and proposes for belief, proclaiming to the world with her Divine Founder the stern warning: "He that believeth and is baptized, shall be saved: but he that believeth not shall be condemned" (Mark, xvi, 16). If, by conceding a convenient right of option or a falsely understood freedom of conscience, were we to allow the Christian Church to accept or reject her dogmas, her constitution, and her sacraments, as the existing differences of religions compel the modern State to do, she would not only fall in her Divine mission, but would end her own life in voluntary suicide. As the true God can tolerate no strange gods, the true Church of Christ can tolerate no strange Churches beside herself, or, what amounts to the same, she can recognize none as theoretically justified. And it is just in this exclusiveness that lies her unique strength, the stirring power of her propaganda, the unfailing vigour of her progress. A morally stable and firmly established Church must have the exclusive right to salvation. The Christian Church includes as an essential element its necessity for salvation. In her doctrine the Church must maintain that intolerance which her Divine Founder Himself proclaimed: "And if he will not hear the church, let him be to thee as the heathen and publican" (Matt., xvii, 17). This explains the intense aversion which the Church has displayed to heresy, the diametrical opposite to revealed truth (cf. I Tim., i, 19; II Tim., ii, 25; Tit., iii, 10 sq.; II Thess., ii, 1, 11). The celebrated church historian Dollinger writes very pertinently: "The Apostles knew no tolerance, no leniency towards heresies. Paul inflicted formal excommunication on Hymenaeus and Alexander. And such an expulsion from the Church was always to be inflicted. The Apostles considered false doctrine destructive as a wicked example. With weighty emphasis Paul declares (Gal., i, 8): 'Be not deceived; God is not mocked: for whatsoever a man soweth, that shall he also reap. For he that sows to his flesh shall of the flesh reap corruption; but he that sows to the Spirit shall of the Spirit reap eternal life. And let us not be weary in well doing: for in due season we shall reap, if we faint not.' The infliction of eternal damnation pertains not to the Church, but to God, Who alone can scrutinize the conscience. The task of the Church is confined exclusively to the formulating of the principle, which expresses a condition of salvation imposed by God upon Himself, and does not extend to the examination of the consciences of the persons, who may or may not satisfy this condition. Care for one's own salvation is the per-
TOLERATION

sonal concern of the individual. And in this matter the Church shows the greatest possible consideration for the good faith and the innocence of the erring person. But that is no reason why the erring person should then state that eternal salvation of the heterodox solely and exclusively to "invincible ignorance," and thus makes sanctifying ignorance a convenient gate to heaven for the stupid. She places the efficient cause of the eternal salvation of all men objectively in the merits of the Redeemer, and subiective in justification through baptism or through good faith enkindled by the perfect love of God, both of which may be found outside the Catholic Church. Whoever indeed has recognized the true Church of Christ, but contrary to his better knowledge refuses to enter it, and whoever from Jesus Christ, an in truth of his heart fails to investigate his doubts seriously, no longer lives in good faith, but exposes himself to the danger of eternal damnation, since he rashly contravene an important command of God. Otherwise the gentle breathing of grace is not confined within the walls of the Catechumenation, but in the hearts of those who stand afar, working in them the marvel of justification and thus ensuring the eternal salvation of numberless men who either, like upright Jews and pagans, do not know the true Church, or, like so many Protestants educated in gross prejudice, cannot appreciate its true nature. Thus all such, the Church does not regard as Heaven's household, but who declare that there are essential means of grace which are not within the reach of non-Catholics. In his allocation "Singulari quadam" of 9 December, 1854, which emphasized the dogmas of the Church as necessary for salvation, Pius IX uttered the consoling principle: "nonnulla per certum partem habendum esse, quae vero religionis ignorantia laborent, si ca est invincible, nulla iopes obtinigre hujusce rei culpa ante occulto Domini" (But it is likewise certain that those who are ignorant of the true religion, if their ignorance is invincible, are not, in this matter, guilty of any fault in the sight of God) (Denzinger-Bannwart, 11th ed., Freiburg, 1911, n. 1647.)

As early as 1713 Clement XI condemned in his dogmatic Bull "Unigenitus" the proposition of the Jansenist Quesnel: "Extra ecclesiam nulla conceditur gratia," i.e. no grace is given outside the Church, n. 1370. In 1690 the Roman Inquisition, had already condemned in 1690 the Jansenistic proposition of Arnauld: "Panagi, Judei, heretae aliquie hujus generis nullum omnino accipient a Jesu Christo influxum" (Pagans, Jews, heretics, and other people of the sort, receive no influx of grace) whatsoever from Jesus Christ. In him, as is often stated, the Church on the contrary toward the erring the Church indeed goes further than the great catechism of Martin Luther, which on "pagans or Turks or Jews or false Christians" passes the general and stern sentence of condemnation: "wherefore they remain under eternal wrath and in everlasting destruction." Certain who are conversant with the teachings of their Church know how to draw the proper conclusions. Absolutely unflinching in their fidelity to the Church as the sole means of salvation on earth, they will treat with respect, as ethically due, the religious convictions of others, and will see in non-Catholics, not enemies of Christ, but brethren. Recognizing from the Catholic doctrine of grace that the possibility of justification and of eternal salvation is not withheld even from the heathen, they will show towards all Christians, e.g. the various Protestant bodies, kindly consideration. On dogmatic questions, of Dohle, "Dogmatik," II (5th ed., Paderborn, 1912), 444 sqq., 453 sqq.

III. THE OBLIGATION TO SHOW PRACTICAL CIVIC TOLERATION.—For the practical attitude of Catholics towards the heterodox the Church has inculcated the strict command of neighbourly love, which corre-

sponds to Christian charity: "Thou shalt love thy neighbour as thyself." The sincerest love for the erring is indeed quite compatible with keen repug-

nance for the error. The latter is the true spirit of the Church. The very definition of practical civic tolerance (see above, 1, 2) springs the maxim which St. Augustine expresses as follows: "Diligite homines, interrete errores; sine superbia de veritate presumite, sine avteria pro veritate certate" (Love men, slay error; without pride be bold in the truth with humility. Pro and Contra lit. Petil., I, xxix, n. 31, in P. L., XLIII, 259). God is a God of love, and consequently His children cannot be sons of hate. The gospel of the Divine

paternity in heaven is also the joyous tidings of the brotherhood of all men on earth. For all without exception, the highest of His capacity of high

priest during the night before His Passion, and for all He shed His Blood on the Cross. The sublime example of Christ affords a striking indication of the manner in which we should regulate our conduct towards those who differ from us in faith, for we know that, to speak, a drop of the redeeming Blood of Christ glistens on every historian's pen. And the secret into the inner shrine of another's conscience with feelings of doubt and distrust is forbidden to all in accordance with the principle: "Nemo presumitur malum nisi probetur" (No one is presumed to be evil until proved to be so). And St. Paul declares: Charity is patient, kind, charitons not perversely . . . is not provoked to anger, thinketh no evil" (1 Cor., xiii, 4 sq.). By this Christi-

an love alone is the truly tolerant man, the true disciple of Christ, recognized. But did not the medieval Church by her bloody persecution of heretics and her example under foot this commandment of love and thus nullify in practice what in theory indeed she always inculcated with honeyed words? The enemies of the Church search eagerly the musty documents which tell of inquisitorial courts, autos-da-fe, chambers of horror, instruments of torture, and blasting pyres. Without any palliation of the historical facts, let us examine a little more closely this reproach, and see what importance is to be attached to it.

(1) When the inglorious origin of his forbears is constantly cast in the teeth of an honest nobleman, and so the wise and mild Alexius, who had already condemned in 1690 the Jansenistic proposition of Arnauld: "Pagani, Judei, heretae aliquie hujus generis nullum omnino accipient a Jesu Christo influxum" (Pagans, Jews, heretics, and other people of the sort, receive no influx of grace) whatsoever from Jesus Christ. In him, as is often stated, the Church on the contrary toward the erring the Church indeed goes further than the great catechism of Martin Luther, which on "pagans or Turks or Jews or false Christians" passes the general and stern sentence of condemnation: "wherefore they remain under eternal wrath and in everlasting destruction." Certain who are conversant with the teachings of their Church know how to draw the proper conclusions. Absolutely unflinching in their fidelity to the Church as the sole means of salvation on earth, they will treat with respect, as ethically due, the religious convictions of others, and will see in non-Catholics, not enemies of Christ, but brethren. Recognizing from the Catholic doctrine of grace that the possibility of justification and of eternal salvation is not withheld even from the heathen, they will show towards all Christians, e.g. the various Protestant bodies, kindly consideration. On dogmatic questions, of Dohle, "Dogmatik," II (5th ed., Paderborn, 1912), 444 sqq., 453 sqq.

III. THE OBLIGATION TO SHOW PRACTICAL CIVIC TOLERATION.—For the practical attitude of Catholics towards the heterodox the Church has inculcated the strict command of neighbourly love, which corre-

sponds to Christian charity: "Thou shalt love thy neighbour as thyself." The sincerest love for the erring is indeed quite compatible with keen repug-
formal heresy still remains one of the most grievous sins. Material heresy on the other hand, i.e., an error in faith entertained in good faith and uncorruptedly, is in itself neither sinful nor punishable, except where the error is itself inexcusable. In excusable error are all who possess subjectively the firm and honest conviction that they have the true faith of Christ, thus including the vast majority of non-Catholics, who were born and educated in their particular form of belief in the Middle Ages, while using her punitive power only against formal heretics who through baptism had belonged to her body from birth, the Church openly proclaimed her incompetency to take action in the case of Jews and pagans, since over these she possessed no jurisdiction. The Church has been both an organized Roman state and a theocratic (religious) state, it was compelled to stamp crimes against faith (apostasy, heresy, schism) as offences against the State (cf. Cod. Justin., I, 5, de her.: “Quod in religionem divinam committitur, in omnium furtur injuriam”). Catholic and citizen of the State becalmed in violence against heretics, whose theocratic (religious) State, it was compelled to stamp crimes against faith were high treason, and as such were punishable with death. This was the universal opinion in the Middle Ages. This idea of the execution of heretics had not the slightest connexion with the essence of the Church or her constitution, and to the Church’s mind, the Decretal of St. Cyprian (d. 258) disapproved of all external means of coercion, such as were customary in the Old Testament, and claimed for the New Testament as “spiritual weapon” (spiritualis gladius) excommunication, which was worse than death. The earliest example of the execution of a heretic was the beheading of the ring-leader of the Priscillanists by the usurper Maximus at Trier (385); this called forth a protest from St. Martin of Tours, St. Ambrose, and Pope Siricius (cf. Histor. polit. Blätter, XC, 1890, pp. 330 sqq.). Even St. Augustine, who towards the end of his life favoured state reprisals against the Donatists, always opposed the execution of heretics (cf. Ep. c [alias cvxii]: “Corrigi eos cupimus, non necari”). During the long dominion of the Merovingians and Carolingians, heresy was never regarded as a civil crime, and was chastised with no civil penalty. A change came only in the eleventh century, when Manicheism, which had earlier escaped the imperial power of the Eastern emperors Theodosius (d. 395) and Justinian (d. 565), revived in the orgies of the Catharists and Albigenses. These disruptive sects attacked marriage, the family, and property, wherefore even Leo has to admit: “Had Catharism become Chalcedonian, its impenetrable invincibility has approved fatal” (History of the Inquisition, I, 117). Influenced by the Roman code, which was rescued from oblivion, the Hohenstaufen emperor, Frederick II, who was anything but a warm supporter of the papacy, introduced the penalty of burning for heresy by imperial law of 1224 (e.g., Mercurialis, IV Leg., II, 326 sqq.). The popes, especially Gregory IX (d. 1241), favoured the execution of this imperial law, in which they saw an effective means not alone for the protection of the State, but also for the preservation of the Faith. And indeed the danger to the common weal seen in Catharism inclined neither the State nor the Church to mildness, just as in the time of St. Augustine the ill-famed Circumcelliones of the Donatists bore every sign of a public rebellion. Would not even a modern state have to proceed against these murderers and incendiaries with weapon in hand? Unfortunately, neither the secular nor the theocratic authorities were able to distinguish between dangerous and harmless heretics, seeing forthwith in every (formal) heresy a “contumelia Creatoris”, which the theocratic State was called upon to avenge with the pyre. This inability to distinguish may be easily traced even in the writings of
presuppositions and concrete relations; these impose an obligation which neither State nor Church can disregard. We will first consider the State in itself, and then the specifically Catholic State.

(1) The State is under obligation to make external conditions subservive the public good, and to protect the moral integrity of its citizens; and yet it has not the authority to impose its will on the conscience of the individual.

(2) The Church, on the other hand, has the authority to impose its will on the conscience of the individual; but it has no authority to impose its will on the State.

(3) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(4) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(5) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(6) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(7) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(8) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(9) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(10) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(11) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(12) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(13) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(14) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(15) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(16) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(17) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(18) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(19) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(20) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(21) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(22) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(23) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(24) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(25) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(26) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(27) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(28) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(29) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(30) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(31) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(32) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(33) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(34) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(35) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(36) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(37) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(38) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(39) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.

(40) The Church, therefore, has the right to impose its will on the State, but the State has no right to impose its will on the Church.
religion peace compels the modern State to concede tolerance and religious freedom. Without this peace, the State cannot continue; the commonwealth is inconceivable. The history of the world could not easily display before the eyes of a patriot a more revolting picture than the fratricidal struggles which resulted from the Reformation in the religious wars of Europe. Wherever separate religious parties live in the same land, they must work together in harmony for the public weal. But this would be impossible, if the State, instead of remaining above party, were to prefer or oppress one denomination as compared with the others. Consequently, freedom of religion and conscience is an indispensable necessity for the State.

From the standpoint of natural law and Christian public law, however, this political tolerance is subject to a threefold limitation, since neither the completely unreligious character of the State nor the unbridled liberty of all imaginable cults may be set up as a principle of government, nor finally may the separation of State and Church be lauded to the skies as the perfect state ideal. These three limitations can be easily justified.

(a) To propose for the State such downright irreligion as a drastic remedy against intolerance is to adopt a false morality. The State, in whose name the pen is raised, is also responsible for the sin. For the “State without God”, pledged to the “Principles of 1789,” would be an immoral monster, which through lack of internal vitality would as surely encounter decay and destruction as did the atheistic Revolutionary State of France at the opening of the nineteenth century. If it is true that human society as a whole is bound to recognize the supreme dominion of God, then no State can shirk the obligation of confessing this God and of publicly venerating Him. The religionless State would be nothing less than an atheistic State, bearing in its very nature the germ of disintegration; and its atheisticism is directed not only against God but against the State. The pantheistic is not a whit better; for Hegel’s motto, “the State is God,” is pure nonsense, since it makes the absurd claim that the State is the original source of all right, and sets the omnipotent State in the place of God (cf. Syllab. Pkt IX, prop. 39). A commonwealth that is to endure can be erected only on a theistic basis, since the fundamental ideas of justice, fidelity, and obedience, indispensable for the preservation of the State, can exercise their full influence only in them. Furthermore the respect for property, the observance of the laws of chastity, avarice to revenge, high taxation, and the banishment from the body of the individual in God. Consequently, not alone Christian statesmen like Montesquieu and Guizot, but also freethinkers like Macchivelli and Voltaire, strongly defended the religious foundations of the State. Even the pagan Cicero (De nat. deor., I) frankly recognized the impossibility of a State without the fear of God, on which the union of men depends. Fichte and Kant to the contrary in Germany. The French Revolution is characteristic of the struggle for the salvation of God against the Church. In his Encyclical “Vehementer nos,” of 11 February, 1806, Pope Pius X sharply denounced for its injustice the violent breach of the Concordat by the French Government, instancing as the chief grievance that, by the official recognition of its own irreligion, the French people propitiated themselves to the worship of God. Fichte had expressed the conviction that “atheists have strictly speaking no place in the state” (“Politik”, I, Leipzig, 1897, p. 320); the philosopher John Locke would hear nothing of state tolerance towards atheists. With a strange perserverence of judgment, he would indeed extend this intolerance to Catholics also, the firmest believers in God among all classes of mankind and the surest supporters of throne and altar. But even as things are, the commonwealth is inconceivable. The history of the world could not easily display before the eyes of a patriot a more revolting picture than the fratricidal struggles which resulted from the Reformation in the religious wars of Europe. Wherever separate religious parties live in the same land, they must work together in harmony for the public weal. But this would be impossible, if the State, instead of remaining above party, were to prefer or oppress one denomination as compared with the others. Consequently, freedom of religion and conscience is an indispensable necessity for the State.

(b) A well-ordered commonwealth can no more recognize the maxim of unlimited and unbridled religious freedom than it can adopt as a principle of irreligion. For state toleration of all forms of religion without exception, which could be justified only on the basis of disruptive atheism or a deistic indifferentism, is in palpable contradiction to natural law and to every rational system of polity (cf. Encyclical of Pius IX “Quanta cura” of 8 December, 1864). If the State as such is under the same obligation to confess and venerate God as the individual, it must set bounds to religious freedom at least at the point where the unrestricted exercise of this freedom would lead to the subversion of state security and public morality. The case is thus exactly like that of unbridled liberty. The Church, the conscience of the religious community, is not only the depositary of the religious conscience, but the state receives undue authority, intrigues most immoral and most dangerous to the State have disguised themselves in the mantle of religion: the cults of Moloch and Astarte, religious prostitution and community of women, ritual child-murder and Anabaptist horrors, conventicles for debauchery and anarchistic secret societies, etc. No State with a regard for its own preservation will hesitate to raise a barrier against moral, religious, and political anarchy; and to repel with vigour all such attacks aimed, under the mask of freedom of belief, at the existence of society. Free competition between virtue and vice could be upheld by the same reasoning. There are certain deceits and vices which display their immorality so plainly that the State must mercilessly apply her penal law and, in the interest of the community, prevent their propagation. Thus England, in general so indulgent towards paganism in her colonies, could not tolerate the continuation among the Hindus of the ritual murder of children and the burning of widows (the Sutte), forced under severe penalties in 1802 and the latter in 1829 (cf. Lecky, “Democracy and Liberty”, I, London, 1896, pp. 424 sqq.). Again, although the Constitution of the United States guarantees complete freedom of belief, the American people always found Mormonism unbearable, and never rested until, by forbidding polygamy and the Mormonism, the Christian conception of marriage had been recognized (see Mormons). Not even the atheistic Revolutionary State of France granted an unlimited freedom of religious opinions in its “Déclaration des droits de l’homme” (1791), since it added the clause: “pourvu que leur manifestation trouble pas l’ordre public établi par la loi”... Almost all modern States have admitted this limitation of religious freedom into their constitutions.

(c) Christian public law erects a third barrier to complete religious freedom in forbidding that the principle of the separation of Church and State be reduced to the formalism and legalism which is fundamentally the best form of the State; this does not mean that in certain exceptional cases actual separation may not be more beneficial for both Church and State than their organic union. While this separation may be always viewed as relatively the better condition; it does not thereby become the ideal state. The latter is only then attained when Church
and State proceed hand in hand and in perfect harmony to promote by their common efforts the temporal and eternal happiness of their common subjects. As it is unnatural for a married couple to live separately, so it should result that the separated members of the Christian Church are not harmful in particular instances as the better or less harmful arrangement in view of quarrels which have arisen, so also the ideal relation between Church and State is to be found, not in the separation of the two, but in their harmonious co-operation (cf. Pius IX, Encyclical of the Quas Illud, of 8 December, 1864; Sullivan, Supra, p. 55).

As a practical proof of the internal advantages of a separation in principle, it is usual to point to the example of the United States, which has extended the blessing of its liberal Constitution in recent years to its newly-acquired colonies of Porto Rico and the Philippine Islands. But while this has been gratefully acknowledged, it must be said that in the American case the law of separation was unfortunately only a pretext for a more violent attack on the rights of the Church. Not without good reason did Leo XIII in his Brief of 1902, addressed to the American hierarchy, express his approval of a wise and patriotic adaptation to the national spirit of the legal constitution of the United States, and yet do so with a good conscience, although in his Encyclical "Immortale Dei" of 1 November, 1885, he had declared the harmonious union of the two highest powers the ideal situation, and had referred to concordate as the means of arranging questions bordering on both jurisdictions. If the United States forms the sole honourable exception to the rule, this is due partly to the fact that the State neglects neither the religious factor at large nor Christianity, as is shown by the strict laws concerning Sunday observance, Christian monomony, and the celebration of Thanksgiving Day. What F. Walter wrote fifty years ago is still true to-day: "Even in the United States of North America, to which people so readily appeal, religion is not regarded as a matter of indifference to the State, but is presupposed as the State's complement" ('Naturrecht und Politik im Lichte der Gegenwart', Bonn, 1932, p. 79).

(2) By a Catholic State we understand a community which is composed exclusively of Catholic subjects and which recognizes Catholicism as the only true religion. In this case also the relations between Church and State may be different, according as the two powers are closely united or are kept apart. If the United States forms the sole honourable exception to the rule, this is due partly to the fact that the State neglects neither the religious factor at large nor Christianity, as is shown by the strict laws concerning Sunday observance, Christian monomony, and the celebration of Thanksgiving Day. What F. Walter wrote fifty years ago is still true to-day: "Even in the United States of North America, to which people so readily appeal, religion is not regarded as a matter of indifference to the State, but is presupposed as the State's complement" ('Naturrecht und Politik im Lichte der Gegenwart', Bonn, 1932, p. 79).

(a) Every religious State, Catholic or Protestant, presupposes by its very existence that all or nearly all the citizens have the same faith, otherwise it would be contrary to natural justice and practically impossible. In certain cases such a State must take drastic measures to expel or exclude all elements which do not fit into its framework. Thus a Protestant religious State in Scotland under the reign of Queen Elizabeth by clearing the country of all Catholics and Lutherans and the Diet of Upsala in 1593 strove to preserve the strictly Lutheran character of Sweden by making the immigration of Catholics punishable with death. The situation of the Catholic religious State in the Middle Ages was somewhat, though not entirely, similar. The medieval idea required that the State should lend the secular arm to the Church for the maintenance of all its doctrines, laws, and ordinances, and that in return the Church should render aid in the support of the State in purely secular affairs. Thus State and Church formed the two all-embracing members of the one Christian body, assisting and supporting each other in the broad field of all secular and ecclesiastical interests.

Empire and papacy, like body and soul, formed an organic whole, and the State was regarded as the Church and the Church as the State. This was the idea of an Imperial Church and State, and the two words were interchangeable terms. The rebel against the Church was regarded as likewise a rebel against the State, and conversely the political revolutionary was by that very fact an enemy of the Church. Whoever was stricken with excommunication finally incurred also the temporal ban, and the imperial ban brought excommunication in its train. It is true that many advantages must be conceded to the religious State. We see an imposing and elevating idea rendered concrete in the supreme dominion of the Christian spirit throughout the civic, national, and religious life, in the organic relation of the religious State to the Church, and in the strengthening of the state authority by the Church and of ecclesiastical authority by the State. These great advantages, however, must not cause us to overlook the numerous drawbacks which this mystical marriage of Church and State involved. First of all, in consequence of the fusion of the objects of the State and of religion, the Catholic State is compelled to adopt an attitude of fundamental intolerance towards all errors of faith, which became so many crimes against the State. Viewed from the historical standpoint one may justly doubt whether the bloody persecutions resulted in greater blessings and advantages for the nation than they brought Christendom (cf. De Laveley, "Le gouvernement dans la démocratie", I, Paris, 1892, pp. 157-62). It is certain that the odium for all those severities and cruelties had to be borne, not by the State which inflicted them, but rather by the Church, since she seemed to stand behind all these measures as the secret motive force, even though she did not know, much less justify many of them. We endeavoured above without partiality to appraise these accusations against the Church at their true value. To refer briefly to another gloomy aspect of this question, the prohibitive right to the practice of religious affairs might easily become a dangerous prerogative, inasmuch as the infliction of excommunication for purely political offences must necessarily have brought ecclesiastical penalties, especially when they were unjustly inflicted, into great discredit among the people. On the other hand, the right of protection exercised by the sovereign in ecclesiastical matters, often without or even against the wish of the popes, had for its unavoidable consequence the loss of public respect for all authorities. The proverbial contest between imperium and sanctitatem, which has always been the yet raging battle in the Middle Ages, redounded in fact to the advantage of neither. A third disadvantage, arising essentially from the religious State, may not be passed over in silence; this consists in the danger that the clergy, trusting blindly to the interference of the secular arm in their behalf, may easily sink into dull resignation and spiritual torpor, while the laity, owing to the religious surveillance of the State, may develop rather into a race of hypocrites and pietists than into inwardly convinced Christians. A Catholic clergy which relies on State assistance for its pastoral activity lacks that glowing zeal for souls which springs from heartfelt conviction. The freedom, and the liberty of religion are grievously impaired when practices of piety are made compulsory by the State. The last and most serious disadvantage associated with the religious State lies in the imminent danger that the
claim of the Church to supremacy over the State must almost necessarily call forth the opposite extremes of Cesaropapism. The early protectorate of the State thus developed into unbridled central control and enserfment of the Church. Such in fact has been the historical sequence. Not alone in the Eastern Empire, in which Byzantine Cesaropapism won its greatest triumphs, but also in the Western Empire these unworthy tendencies were all too clearly revealed under the reign of the Roman emperors, so that the exclusion of any compulsory system that would bind the citizens to receive certain religious rites (e. g. baptism, burial) from clergymen appointed by the State. With freedom of belief are intimately associated the personal right of changing one's religion and the right of the parents to the care and maintenance of the religious education of the children. The State must likewise recognize and protect the right of the various denominations to hold property and right of self-government, in so far as these rights are enjoyed by all legally constituted corporations. Wherever such a State, in disregard of the budget from the public ownership, all recognized religious associations must receive equal consideration, unless a particular association, in virtue of a special title (e.g. the secularization of religious property), has legal claims to exceptional treatment. Finally, legal equality must be granted to the adherents of all denominations in both their civic and national capacities, especially in the matter of appointment to public office. Concerning Christian States in which various religions exist, F. Walter, the well-known professor of public law, made the wise observation: "The government as such, entirely regardless of the nature of the belief of its subjects, must maintain towards every church the same attitude as if it belonged to this Church. In the consistent and upright observance of this standpoint lies the means of being just to each religion and of preserving for the State its Christian character (loc. cit., p. 491)."

Indeed is the solution of the manifold problems from which it occurs in practice, they are almost without exception to the detriment of Catholics.

advise the pontiff in matters theological, particularly in the preparation of the condemnation of the errors of Queenel. As cardinal he assisted at the con-
claves which elected Innocent XIII and Benedict XIII. His published works are the "Philosophia
mensis et sensum" (with the addition of natural theology and ethics, Rome, 1702). His "De primatu
Petri" (in the second series of the miscellany, printed from the manuscripts in the library of the
Roman College, Rome, 1867), and a little pamphlet containing "Daily Prayers for a Happy Death" (in
Latin, Vienna, 1742; also in German, Augsburg, 1850).

Charles Mackesy.

Tomb, a memorial for the dead at the place of burial, customary, especially for distinguished persons,
among nearly all peoples. It is of much importance in the history of art because the development
of plastic art can be traced almost in its entirety by means of tombs for the tombs,
having, as a rule, been erected in churches, are better
preserved. Apart from the sepulchral slabs in the Catacombs,
sarcophagi ornamented with portraits, and scattered examples of
mausolea, tombs may be divided into four special classes.

The first class consists of tombs with recumbent tombstones;
among such are the stone or metal plates inserted in the flooring of churches. These are the oldest Christian monuments. Originally, at least in Germany, they were ornamented with a cross having a long shaft; from the eleventh century they also bore the figure of the deceased. The monumental metal plate of the tomb of King Rudolph of
Swabia (d. 1081), in the cathedral of Merseburg, is of this era. During the Gothic period an engraved brass plate was the favourite sepulchral monument, while the Renaissance returned to the plate cast in relief, such as the plates by Peter Visher of Nuremberg.

The second class consists of detached altar-tombs, that is, a raised tomb containing the body of the deceased. On the variety rises like a table above the place of burial. Romanesque art generally left the side walls of the altar-tomb without ornament, while Gothic art adorned them with numerous small figures, as those of relatives, mourners, praying figures, and allegorical forms. On the lid the deceased was represented at full length. Numerous examples are to be found in all medieval cathedrals and monastic churches. Even England, where there are but scanty plastic remains, has a rich treasure of such monuments. Probably no altar-tomb is more celebrated than that of Emperor Maximilian at Innsbruck. Another worthy of mention is Charles the Robust's tomb at Dijon by Claus Sluter. More elaborate monuments have frequently an additional struc-
tecture above and around them, as a baldachin, e. g. the tomb of the Della Scala at Verona; chiefly that of Oansignorio (d. 1375). During the Renaissance the baldachin assumed an entirely monumental form, almost that of a triumphal arch; fine examples are the monuments of Galileo Visconti in the Certosa at Pavia and of Francis I at Saint-Denis.

The third class may be called mural tombs, that is, altar-tombs set originally in a niche against a wall, and later raised upon pillars, caryatides, or a solid understructure. They were decorated on all sides with rich plastic ornamentation. They were customary as early as the Gothic period and attained their highest development in Italy, where the inordinate craving for fame and the longing to be remembered by posterity led to the production of those magnificent sepulchral monuments for physicians, lawyers, professors, statesmen, and, by no means last, prelates, which fill the churches from Venice to Naples. During the period of the early Renaissance it was a favourite custom to place a recumbent statue of the deceased upon a state bed or a sarcophagus and to set this at a moderate height; this structure is surrounded by standing or kneeling angels who draw back a curtain of the niche in which the Madonna is often visible. A fine example is the tomb of Leonardo Bruni (d. 1444) in Santa Croce at Florence. During the late Renaissance undue consideration was paid to architecture, as in the sepulchral monument of Giovanni Pesaro in the Frari church at Venice. In the seventeenth and eighteenth centuries the art of sculpture obtained again a greater opportunity in the treatment of tombs, but unfortunately only in the monotonous Baroque style. Hardly more than the figure of the deceased was brought into prominence. It was placed within an altar of similar style or upon a broad podium and was surrounded by all kinds of symmetrical figures, in the most daring positions. In a material sense these tombs are often very fine but they frequently lack the desired spiritual earnestness and repose.

The fourth class consists of hanging sepulchral monuments (memorial tablets). These occur as early as Gothic art in the form of funeral escutcheons and coats of arms made of wood or leather; and are especially prominent in the period of the Rococo and Baroque styles. Besides the altar-shaped tablet often constructed in several stories, the cartouche containing a portrait of the deceased was very popular in sepulchral monuments of this class.

Since the modern era put an end nearly everywhere to the burial of the dead within the church building, a new form of sepulchral art has gradually developed; it has produced works of the greatest beauty in all countries, but has also shown great perversions of the artistic sense, especially in Italy where the tendency is more to an excess of technic than to the conception of the eternal. The finest sepulchral monument of modern times is perhaps the one designed by A. Bartholomé and erected at Pére Lachaise.

Beda Klein Schmidt.

Tomb of the Blessed Virgin Mary.—The tomb of the Blessed Virgin is venerated in the Valley of the Cedron, near Jerusalem. Modern writers hold, however, that Mary died and was buried at Ephesus. The main points of the question to be taken into consideration are as follows.

I. The apocryphal works of the second to the fourth century are all favourable to the Jerusalem tradition. According to the “Acts of St. John by Prochorus,” written (160-70) by Lencius, the Evangelist went to Ephesus accompanied by Prochorus alone and at a very advanced age, i. e. after Mary’s death. The two letters “B. Ignatii missa S. Joanis,” written about 370, show that the Blessed Virgin passed the remainder of her days at Jerusalem (Funk, “Patres ap.”, 1901, II, 214-16). That of Dionysius the Areopagite to the Bishop Titus (363), the “Joannis liber de Dormitione Mariæ” (third to fourth century), and the treatise “De transitu B. M. Virginis” (fourth century) place her tomb at Gethsemane. From an historical standpoint these works, although apocryphal, have a real value, reflecting as they do the tradition of the early centuries. At the beginning of the fifth century a pilgrim from Armenia visited “the tomb of the Virgin in the valley of Joseph’s son Salmon;” about 431 the “Breviarius de Hierusalem” mentions in that valley “the basilica of Holy Mary, which contains her
sepulchre." Thenceforth pilgrims of various rites repaired thereto to venerate the empty tomb of Mary. St. Gregory of Tours, St. Modestus, St. Sophronius, Patriarch of Jerusalem, St. Germanus, Patriarch of Constantinople, St. Andrew, Bishop of Crete, John of Thessalonica, Hippolytus of Thebes, and Venerable Bede teach this same fact and bear witness that this tradition was accepted by all the Churches of East and West. St. John Damascene, preaching on the feast of the Assumption at Gethsemane, recalls that, according to the "Euthymian History", III. xli (written probably by Cyril of Scythopolis in the fifth century), Iuvenal, Bishop of Jerusalem, sent to Constantinople in 452 at the command of the Emperor Marcian and Pulcheria, his wife, the shroud of the Blessed Virgin preserved in the church of Gethsemane (P. G., XCVI, 747–51). The relic has since been venerated in that city at the Church of Our Lady of Black Monastery.

II. There was never any tradition connecting Mary's death and burial with the city of Ephesus. Not a single writer or pilgrim speaks of her tomb as being there; and in the thirteenth century, Pordicas, prothonotary of Ephesus, visited "the glorious tomb of the Virgin at Gethsemane", and describes it in his poem (P. G., CXXXIII, 696). In a letter sent in 431 by the members of the Council of Ephesus to the clergy of Constantinople we read that Nestorius "reached the city of Ephesus where John the Theologian and the Mother of God, the Holy Virgin, were separated from the assembly of the holy Fathers", etc. Tillemont has completed the elliptical phrase by adding arbitrarily, "have their tombs". He is followed by a few writers. According to the meditations of Sister Catherine Emmerich (d. 1824), compiled and published in 1832, the Blessed Virgin died and was buried not at Ephesus but three or four leagues south of the city. She is followed by those who accept her visions or meditations as Divine revelations. However, St. Brigid relates that at the time of her visit to the church of Gethsemane the Blessed Virgin appeared to her and spoke to her of her stay of three days in that place and of her Assumption into Heaven. The revelations of Ven. Maria d'Agreda do not contradict those of Catherine Emmerich.

III. As the soil is considerably raised in the Valley of the Cedron, the ancient Church of the Sepulchre of Mary is completely covered and hidden. A score of steps descend from the road into the court (see plan: B), at the back of which is a beautiful twelfth century porch (C). It opens on a monumental stairway of forty-eight steps. The twentieth step leads into the crypt, which was built in the sixth century, and consists of two semicircular arches and a vault from the rock. It forms a cross of unequal arms (D). In the centre of the eastern arm, 52 feet long and 20 feet wide, is the glorious tomb of the Mother of Christ. It is a little room with a bench hewn from the rocky mass in imitation of the tomb of Christ. This has given it the shape of a cubic alabaster, about ten feet in circumference and eight feet high. Until the fourteenth century the little monument was covered with magnificent marble slabs and the walls of the church were covered with frescoes. Since 1187 the tomb has been the property of the Mussulman Government which nevertheless authorizes the Christians to officiate in it.

Tomi, a titular metropolitan see in the Province of Scythia, on the Black Sea. It was a Greek colony founded by Miletus. In 29 B.C. the Roman Emperor Augustus made the country from the Odrysians, and annexed it as far as the Danube, under the name of Limes Scythicus. The city was afterwards included in the Province of Moesia, and, from the time of Diocletian, in Scythia Minor, of which it was the metropolis. In A.D. 10 Cæsar was exiled thither for eight years, and died there eight years later, celebrating the town of Tomi in his poems. Few places had so many Christian memories as this town, in the barbarous country of the Getae; e. g. Sts. Macrobius, Gordianus, and their companions, exiled to Scythia and slain in 319, venerated on 13 Sept.; Sts. Argeus, Narcissus, and Marcellinus, also slain under Licinius and venerated 2 Jan.; a great many others whose names only are known, and who are mentioned in the Roman Martyrology for 3 April, 20 June, 5 July, and 1 October. The first bishop may have been Evangelicus, mentioned in the Acts of Sts. Epistus and Action (200) and St. Germanus, who lived at the end of the third century. Eusebius (De Vita Constantini, III, 7) mentions a Scythian bishop at Nicea who may have belonged to Tomi. Mention should be made of St. Bretainian, martyred under Valens, and whose feast is observed 25 Jan.; Gerondius, at the Council of Constantinople in 381. St. Theotimus, writer and friend of St. Chrysostom, venerated 20 April; Timotheus, at Ephesus in 431; John, ecclesiastical writer, d. about 448; Alexander, at Chalcedon in 451; Theotimus II, in 458; Paternus, in 519; and Valentinian, in 550. The Province of Scythia formed a single diocese, that of Tomi, an autonomous archdiocese, subject to the Patriarchate of Constantinople. It is mentioned in 640 in the Etchmiadzin Synod of 1881 and 1883. Eusebius of Caesarea (c. 265–340), in his "Church History" (I, 28), mentions a bishop of Tomis, but it is rather a title of the bishop of Thessalonica. The eparch of Tomi is mentioned as a suffragan of the metropolitan of Thessalonica.

S. VALLEIUS.
Tongerloo, Abbey of, near Antwerp, Belgium, founded in 1128 in honour of the Blessed Virgin, by de Giselbert, who not only gave the land, but also himself became a lay brother in it. The first religious were sent from St. Michael's Abbey, Antwerp, under Henry, who had come with St. Norbert to Antwerp to extirpate the Tanchelmite heretics. The charter of its foundation was signed, amongst others, by St. Bernard of Clairvaux and by the Blessed Waltman, first Abbot of Antwerp. The Bishop of Cambrai granted synodal rights to the abbots. From very small beginnings the abbey grew to be in time one of the most important in Belgium, making its spiritual and social influence felt in a large district called Campine, now in north-east Belgium and south Holland, then a wild district in which but scanty provision was found for the spiritual and social needs of its scattered inhabitants. Considering the scarcity of priests and the good done by the religious of Tongerloo, the bishops of Cambrai, the chapters of Liège and Maastricht, and several landowners confided the charge of parishes, with the right of patronage, to the abbey; thus it came to pass that in time the abbey had to provide priests for some forty parishes, or small Norbertine residences, in these parts.

With the erection of new dioceses (1559-60) in Belgium and Holland, heavy burdens were cast on the abbey, for not only had it to provide the funds, but the new Bishop of Bois-le-Duc was put at its head as abbot. This state of affairs lasted until 1590, when, to obtain its independence, the abbey had to give up much property in support of the new diocese. Meanwhile the Calvinists had become very powerful in Holland and, in their hatred of the Catholic Church, had put many Catholics to death. Amongst those who received the martyrdom are reckoned three religious of Tongerloo, viz.: Arnold Vessem and Henry Bosch in 1557, and Peter Janssens in 1572. The abbey has always promoted education. Bishop Ophovius says that its religious were educated in omni pietate et doctrina et Miraeus, that it was fœcandum pastorum Seminarium. It possessed one of the largest libraries, and was able to take up the work of the Hollandists. (See Backx; Premonstratensian Canons, Bollandists.)

Spilkerck, De Abby van Tongerloo (Antwerp, 1888), pp. xii-552.

F. M. Geudens

Tongini, Salvator, philosopher, b. at Rome, Italy, 25 Dec., 1820; d. there, 12 Nov., 1865. At the age of seventeen he entered the Society of Jesus. After the usual noviciate, literary and philosophical studies, a half-decade was spent in teaching rhetoric at Reggio and humanities at Forlì. Then four years were passed in the study of theology, under the eminent assistants: Perrone, Passaglia, Ballerini, and Patrizi. Immediately after this, in 1853, the young priest was assigned to the chair of philosophy in the Roman College, and there during twelve years distinguished himself as a teacher and author. Within a few days of his forty-fourth birthday he was appointed assistant to the provincial of the Roman Province; but his health gave way before a year had elapsed. Father Tongiugi wrote a well-known course of philosophy, "Institutiones philosophicae", which he published in three volumes at Rome in 1861 and at Brussels in 1862. Nine editions appeared during the next eighteen years, some of them modified by Claude Ramière. A compendium of the same work and a separate volume on ethics also came from his pen. All his works are still used as text-books for college or seminary. On some of the mooted questions in philosophy the author departed from Scholastic traditions, rejecting the Peripatetic theory of matter and form, denying the real distinction between accidents and substance, and also casting doubt on the resultants of mechanical and chemical forces could produce the life-activity seen in the vegetable world. These doctrines, though not widely accepted, yet stimulated the Scholastics to make better use of the researches carried on in the physical sciences.

Tong-king. See Indo-China.

Tongues, Gift of, or Gnosis (γνωση) or Solla (γνωση της ψυχας), a supernatural gift of the class gratia gratis datas, designed to aid in the outer development of the primitive tongue. The theological bearing of the subject is treated in the article CHIRISTIANITY (11). The present article deals with its exegetical and historic phases.

St. Luke relates (Acts, ii, 1-15) that on the feast of Pentecost following the Ascension of Christ into heaven one hundred and twenty disciples of Galilean origin were heard speaking "with divers tongues, according as the Holy Ghost gave them to speak". Devout Jews then dwelling at Jerusalem, the scene of the incident, were quickly drawn together to the number of approximately three thousand. The multitude embraced two religious classes, Jews and proselytes, from fifteen distinct lands so distributed geographically as to represent "every nation under heaven". All were "confounded in mind" because every man heard the disciples speaking the "wonderful things of God" in his own tongue, namely, that in which he was born. To many the disciples appeared to be in a state of inebriation, wherefore St. Peter undertook to justify the anomaly by explaining it in the light of prophecy as a sign of the last times.

The glossolaly thus described was historic, articulate, and intelligible. Jerusalem was then as now a polyglot region and could easily have produced one hundred and twenty persons who, in the presence of a cosmopolitan assemblage, might express themselves in fifteen different tongues. Since the variety of tongues is attributed to the group and not to individuals, particular disciples may not have used more than their native Aramaic, though it is difficult to picture any of them historically and socially without at least a smattering of other tongues. The linguistic conditions of the country was larger and more diverse than those of Switzerland to-day. The number of languages spoken equalled the number of those in which the listeners "were born". But for these Greek and Aramaic would suffice with a possible admixture of Latin. The distinction of "tongues" (v. 8, διαλεκτος; v. 11, γνωση; 11, γνωση της ψυχας) was large and general, the cause of astonishment was that so many of them should be heard simultaneously and from Galileans whose linguistic capacities were pre-
sumably underrated. It was the Holy Ghost who impelled the disciples "to speak," without perhaps being obliged to infuse a knowledge of tongues unknown to them, or the physical or psychic condition of the auditors was one of ecstasy and rapture in which "the wonderful things of God" would naturally find utterance in acclamations, prayers or hymns, conned, if not already known, during the preceding week, when they were "always in the temple," side by side with the strangers afar, "praising and blessing God" (Luke xxiv., 52, 53).

Subsequent manifestations occurred at Cesarea, Palæstina, Ephesus, and Corinth, all polyglottic regions. St. Peter identifies that of Cesarea with what befell the disciples "in the beginning" (Acts, xi., 15). There, as at Ephesus and Jerusalem, the strange incident, marked the baptism of several converts, who operated in groups. Corinth, standing apart in this and other respects, is reserved for special study. In post-Biblical times St. Ireneus tells that "many" of his contemporaries were heard "speaking through the Spirit in all kinds (ωσανον των) of tongues," "(οὐκ εἰς μέσον τούτῳ, οὗν Εφεσος, οὗν Κρήτη, οὗν Κορίνθιον, V. vii.). St. Francis Xavier is said to have preached in tongues unknown to him and St. Vincent Ferrer while using his native tongue was understood in others. From this last phenomenon Biblical glossolaly differs in being what St. Gregory Nazianzen poetically termed in a letter of St. John Chrysostom and set out of the range of ornamental Exegetes observe too that it was never used for preaching, although St. Augustine and Thomas seem to have overlooked this detail.

St. Paul's Concept (I Cor., xii.-xiv.).—For the Biblical data thus far examined we are indebted to the bosom friend and companion of St. Paul—St. Luke. That being true, the views of St. Paul on supernatural glossolaly must have coincided with those of St. Luke. Now St. Paul had seen the gift conferred at Ephesus and St. Luke does not distinguish Ephesian glossolaly from that of Jerusalem. They must therefore have been alike and St. Paul seems to have had both in mind when he commanded the Corinthians (xiv, 37) to employ none but articulate and "plain speech" in their use of the gift (9), and to refrain from such use in church unless even the unlearned could grasp what was said (18). No tongue could be genuine "without voice" and to use such a tongue was the act of a heathen. To him the impulse to praise God in one or more strange tongues should proceed from the Holy Ghost. It was even then an inferior gift which he ranked next to last in a list of eight charismata. It was a mere "sign" and as such was intended not for believers but for unbelievers.

Corinthian Abuses (I Cor., xiv. passim).—Medieval and modern writers wrongly take it for granted that the charism existed permanently at Corinth—as it did nowhere else—and that St. Paul, in commending the gift to the Corinthians, therewith gave its guaranty that the characteristics of Corinthian glossolaly were those of the gift itself. Traditional writers in looking this point place St. Luke at variance with St. Paul, and attribute to the charism properties so contrary as to make it inexplicable and prohibitively mysterious. There is enough in St. Paul to show us that the Corinthian peculiarities were ignoble accretions and abuses. They made of "tongues" a source of schism in the Church and of scandal without (xiv, 23). The charism had deteriorated into a mixture of meaningless inarticulate gabble (9, 10) with an element of uncertain sounds (7, 8), which sometimes might be construed as little short of blasphemy (xii, 3). The Divine almighty now and then, but the general effect was one of confusion and disedification for the very unbelievers for whom the normal gift was intended (xiv, 22, 23, 26). The Corinthians, misled not by insincerity but by simplicity and ignorance (20), were actuated by an undisciplined religious spirit (πνεύμα), or rather by frenzied emotions and not by the understanding (15). Reports to the "gift of tongues" at certain Protestant revivals is a fair reproduction of Corinthian glossolaly, and shows the need there was in the primitive Church of the Apostle's counsel to do all things "decently, and according to order (40).

The faithful adherence of the text of inspired Scripture makes it obligatory to reject those opinions which turn the charism of tongues into little more than childish babbling (Eichhorn, Schmidt, Neander), incoherent exclamations (Meyer), pyrotechnical utterances (Wieseler), or prophetic demonstrations of the archaic kind (see 1 Kings, xix, 20, 24). The unalloyed charism was so much an enemy of the Corinthian Church. Latin commentators have believed the contrary, but the ancient Greeks, St. Cyril of Alexandria, Theodoret, and others who were nearer, agree to it and the testimony of the texts and above studied seems to bear them out. (See Charismata.)

Tonica Indians (or Tonica).—A small tribe constituting a distinct linguistic stock living, when first known to the French, in small villages on the lower Yazoo river, Mississippi, in alliance with the Yazo and Ofoogus, and numbering perhaps 600. Their tribal name signifies "the people." They may be identical with the people of "Tunico," encountered by the De Soto expedition in 1540, apparently about north-eastern Louisiana. Their definite history begins in the summer of 1838 with the visit of the missionary brothers of the Q10. The early contacts of the Fathers Montigny, Davion, and La Source. They had been decimated just before by a smallpox epidemic, which had ravaged the whole lower Mississippi country, and numbers were still dying, of whom several, including a chief, received baptism. In the next year Fr. Antoine Poul was in charge among them, studying their language and ministering to the allied tribes. In this year the French commandant Iberville visited them, and in 1700 the Jesuit, Father Jacques Gravier, descending the Mississippi, stopped off to wait upon Davion, who was prostrated by fever. The Tonica, accordingly, grew friendly toward the French. This may have been due in part to their lack of kinship with any of the surrounding tribes. In the fall of 1702 Fr. Nicholas Foucault, of the same order, who had arrived in the previous year to assist Davion, was murdered with three other Frenchmen, while asleep, by treacherous Kora guides in collusion with the Yazo. In consequence of these murders Father Davion retired to the French fort at Mobile until, at the urgent request of a delegation of Tonica chiefs, who promised full reparation upon the guilty ones, he returned, probably in 1708. In 1706, in consequence of Chickasaw raids instigated by the Carolina slave-traders, the Tonica fled across the Mississippi and settled near the mouth of Red River, Fr. Davion accompanying them. Their neighbours, the Taensa, were likewise compelled to remove by the same enemy.
In 1719 the historian La Harpe stopped at the Tonicas village and found Father Davion still there and "very much revered", although preaching fearlessly against their polygamy and heathen ceremonial. They had given up their worst heathenisms and the head chief, with his family, was a daily attendant at the services.

Charlevoix visited their principal town in 1721 and described the Cahurah, but wrote nothing of the neighboring tribes by reason of their cannibal habit, on account of which they were universally known among the other Indians as "the Man Eaters". Of their cannibal practices there is abundant record and it is this propensity which led to their outlawry and final destruction.

In the various difficulties with the powerful Natchez, beginning in 1716, the Tonicas, almost alone of the Indian tribes, rendered efficient service to the French. In the final war, beginning in 1729, they again supported the French. In retaliation a large body of fugitive Natchez, aided by the Chickasaw and Kora, fell upon the Tonica (1731) and defeated them in a desperate battle, killing their best warriors and their head chief Cahur-Joligo. They never recovered from this blow and in 1738 they still had only about 250 souls in a village above Ponte Coupée but some time between 1784 and 1803 the remnant removed to the neighbourhood of Marks ville, Louisiana, on the Red River, where some thirty mixed bloods still remain, besides a few others scattered in the Chickasaw Nation, Oklahoma, and elsewhere.

In 1886 Dr. Albert Gatschet of the Bureau of American Ethnology collected from the survivors the first recorded vocabulary of the language, by which he was enabled to classify it as constituting a distinct stock. This was supplemented in 1909 by Dr. John R. Swanton, of the same Bureau, who also undertook several interesting myths. The Tonicas were an agricultural tribe and in arts, customs and general culture closely resembled their neighbours, the Natchez and Taensa. Both sexes had the head artificially flattened, went nearly naked except on ceremonial occasions, and wore the hair at full length down the back.

The men did most of the heavy work, spending most of their time in the corn fields and rarely hunting, so that they ate but little meat. They buried in the ground and kept a light burning, and a watch beside the grave for four nights until the soul was supposed to have reached the spirit world. They had a temple of a sacred fire and according to Father Gravier, had nine principal gods, viz. the Sun, Thunder, Fire and the gods of the four cardinal points, Sky, and Earth. There is no record of the bloody rites characteristic of the Natchez and Taensa.

TONKAWA INDIANS.—A tribal group or confederacy, of low culture status and constituting a distinct linguistic stock, formerly occupying not only the Trinity and Colorado Rivers, in Eastern Texas, but now represented by a single rapidly dwindling remnant of about forty souls. They may have numbered originally 2000 souls, including the Tonkawa proper, the Yojuna, Mayeye, Ervpiame, and others. The origin of the name Tonkawa cannot be known. They call themselves Titikanwacht, "natives". They were inveterate rovers, planting nothing, but subsisting entirely by the buffalo and other game, the fruit of the mesquite and cactus, and wild roots. They dwelt in buffalo skin tips or brushwood shelters, were notable horsemen, and carried the bow, spear, shield, with the usual head-dress of feathered cap and buffalo horns on ceremonial occasions. They were superior hunters and brave and active warriors. They were hated by all the neighboring tribes by reason of their cannibal habit, on account of which they were universally known among the other Indians as the "Man Eaters". Their cannibal practices there is abundant record and it is this propensity which led to their outlawry and final destruction.

In 1719 they first became known to the French through La Haye's expedition into what is now Eastern Oklahoma. In response to their request, the Franciscan Father Francisco Ano de los Dolores in 1748 established for their benefit the Mission of San Francisco Xavier on the Arkansas River near the site of present-day Anadarko. This was the first mission to be established for the Indians on the Arkansas River. In 1755 the Tonkawa mission was closed and the Indians were removed to a mission on Guadalupe River about 1755.

Another band of the same connection, the Ervpiame, established on request of their chief in the Mission of San Francisco-xavier de Naxera on San Antonio River in 1722, had been consolidated with the larger body at the second station. With the decline and abandonment of the Texas missions, 1790-1800, the mission Indians for the most part rejoined their tribes and relapsed into barbarism. In 1778 the Tonkawa were still estimated at about 1200 souls, but another smallpox epidemic immediately thereafter cut them down one-half. In 1855 the Government settled them, with several other tribes, on a reservation on the Clear Fork of the Brazos River, but in consequence of the opposition of the Texans it was found necessary to remove them in 1857 to a new reservation on Washita River, Oklahoma, known as the Tonkawa Reservation. Taking advantage of the confusion of the Civil War, a combination of the neighboring tribes—who had a hatred toward the Tonkawa on account of their cannibalism and their activity as scouts for the troops—surprised the Tonkawa camp in a night attack, 25 October, 1862, killing 137 out of a total of 305. They never recovered from this blow. After years as refugees about Fort Griffin, Texas, under military protection, the remnant numbering only 90, were gathered together in 1884 and again removed to a small reservation in Oklahoma, near the present Ponca. They are now citizens, with lands allotted in severalty. Our knowledge of the Tonkawa language is based chiefly on Gatschet's studies of manuscript material with the Bureau of American Ethnology.

JAMES MOONEY.
Tonsure (Lat. tonsore, "to shear"), a sacred rite instituted by the Church by which a baptized and confirmed Christian is invested into the clerical order by the shearing of his hair and the investment with the surplice. The person thus tonsured becomes a partaker of the common privileges and obligations of the clerical state and is prepared for the reception of orders. The tonsure itself is not an ordination properly so styled, but is the simple prescription of a person to the Divine service in such things as are common to all clerics. Historically, the tonsure was not in use in the primitive Church during the age of persecution. Even later, St. Jerome (in Euseb., xlv) disapproves of clerics shaving their heads. Indeed, among the Greeks and Romans of the Classical period, shaving the head was an act of submission. On this account, the shaving of the head was adopted by the monks. Towards the end of the fifth, or beginning of the sixth, century, the custom passed over to the secular clergy.

As a sacred rite, the tonsure was originally joined to the first ordination received, as in the Greek Church it still is to the order of lector. In the Latin Church it began as a separate ceremony about the end of the seventh century, when parents offered their young sons to the service of God. Tonsure is to be given by a candidate's ordinary, though mitred abbots can bestow tonsure on their own subjects. No special blessings are necessary, but the recipient must have heard the rudiments of the Faith and be able to read and write. The ceremony may be performed at any time or place. As to the monastic tonsure, some writers have distinguished three kinds: (1) the Roman, or that of St. Peter, when all the head is shaved except a circle of hair; (2) the Eastern, or St. Paul's, when the entire head is denuded of hair; (3) the Celtic, or St. John's, when only a crescent of hair is shaved from the front of the head. In Britain, the Saxons opposed the Celtic tonsure called it the tonsure of Simon Magus. According to canon law, all clerics are bound to wear the tonsure under certain penalties. But on this subject, Taunton (loc. cit. inf.) says: "In English-speaking countries, from a custom arising in the days of persecution and having a prescription of over three centuries, the tonsure of the head is in the tonsure of the body, and seems, with the tacit consent of the Holy See, to have passed out of use. No provincial or national council has ordered it, even when granting of clerical dress; and the Holy See has not inserted the law when correcting the decrees of those councils."

Toottell, Hugh, commonly known as Charles Dodd, historian, b. in 1671 or '72, at Durton-in-Broughton, Lancashire; d. at Harvington Hall, Worcestershire, 27 Feb. 1743. He was educated at the English College, Douay (1688-1693), and St. Gregory's Seminary, Paris (1693-1697). After ordination he returned to England in 1698 as chaplain to the Molyneux family at Mosborough Hall, Lancashire. In 1711 he returned to the Continent where he is said to have witnessed the siege of Douay (1712) as chaplain to an English regiment; certainly he wrote in that character a short "History of the English College at Douay" (1713) which purported to be by a Protestant chaplain. As it attacked the Jesuits, Father Thomas Hunter published his "Modest Defence" (1714), to which Dodd replied in "The Secret Policy of the English Society of Jesus" (1715). From 1716 he was again at Mosborough till 1718, when he returned to Douay to collect materials for his grand work "The Church History of England from 1500 to 1888," which occupied him for twenty years. The work was written at Harvington Hall, where he resided from 1722 till his death, first as assistant chaplain, then (from 1726) as chaplain. During his sojourn abroad he wrote and published "Pax Vixi: an Essay to the Three Churches" (London, 1721); and while at Harvington he composed several spiritual, controversial, and historical treatises most of which have never been published. Many of these MSS. (a complete list of which is given by Gilling, Bibl. Dict. Engl. Cath., xvi, 540-554) are most remarkable. It is rare to see a complete and authentic history of the Church up to the time of Dodd. Dodd's translation of Pansani's memoirs was subsequently used by Berington (see PANSANI).

EDWIN BURTON.

Torah. I. Use of Word.—Torah, תורת (cfr. Hiph. of תבש), signifies first "direction, instruction as, for instance, the instruction of parents (Prov., i, 8), or of the wise (Prov., iii, 1). It is used chiefly in reference to the Divine instruction, especially through the revelation to Moses, the "Law," and to the teaching of the Prophets concerning the will of God. In the sense of law "Torah" refers only to the Divine laws. "Torah" is applied to the books containing the teaching of the Mosaic revelation and the Law, that is, the Pentateuch. In Jewish theology Torah signifies, first, the totality of Jewish doctrine, whether taken as a basis for religious knowledge and conduct, or as a basis for study. The body of Biblical writings, especially the Pentateuch, being the source of religious teaching and law, the "Torah" is said to embrace the entire Scriptures (cfr. Blau, "Zur Einleitung in die hl. Schrift," Budapest, 1894, 16 sq.), or to passages from the Prophets and the Hagiographa, for instance, "Ab. zara," 17a, in reference to Prov., v, 8, and "Sanh.," 91b, in connexion with Ps. lxxxv, 5. The expression, however, generally signifies the Pentateuch. In passages at Ps. lxxix, 36, and "The Scriptures [Torah] consist of three parts, Torah, Prophets, and Hagiographa." (Midrash Tanchuma to Ex., xix, 1) "Torah" is used in two senses—one general, meaning the whole Scriptures, the other special, signifying the Pentateuch. Elsewhere (cfr. Gen. xxiii, 13-15; 24) the Torah is plainly distinguished from the non-Pentateuchal books by the comparison of migra (מִּגְרָה) and Torah. Besides the "written Torah," תּוֹרָתָה, which is the Judaism which holds to tradition speaks of an "oral Torah," מֵּרָאוֹת, the commentaries and the ordinances which put into effect the laws contained in the Pentateuch. This oral Torah, it is claimed, was revealed to Moses and has been preserved in Israel by tradition (see TALMUD).

II. Torah in the restricted sense of Pentateuch.—The Torah relates the preparatory measures for and the establishment of the Old Testament theocracy, and contains the institutions and legal provisions which the theocracy found its visible expression. The Old Testament itself calls the entire work after its main contents (הָּאָּלוֹת) or sefar (סִפְּר), that is, "the book of the Torah," as in II Eed., vii, 2; to emphasize its Divine origin it is called torath Yahweh, sefar torath
In this one-year cycle the Pentateuch is divided into fifty-four Sabbath lessons generally called large parashiyot. A Jewish intercalary year consisting of thirty-five lunar months and the following month, isdefended, and the final section is always read on the day of the “joy of the Law” (בְּשַׁדֹּא הַמַּעֲשֵׂה יְבוּשֹׁם), that is, the ninth day after the feast of booths (twenty-third day of Tishri). In ordinary years, when there are forty-seven sabbaths, two parashiyot are joined on each of seven Sabbath in order to complete the number, and Genesis is there are twelve sabbath parashiyot, in Exodus eleven, in Leviticus and Numbers ten each, and in Deuteronomy eleven. They are named from and quoted by the first words. In the printed editions of the Bible they are indicated, as they are also the opening words of the open or closed parashiyot, by בְּשַׁדֹּא or בְּשַׁדֹּא, with exception of the twelfth lesson, at the beginning of which (Gen., xlvi, 28) only the breadd of a letter should remain blank. Concerning the distribution of the fifty-four parashiyot for the year, cf. Loeb, “Rev. des études juives”, VI, 230 sqq.; Dersbourg, ibid., VII, 146 sqq.; Schmid, “Über verschiedene Einteilungen der L. Schrift” (Graz, 1892), 4 sqq.

The Old Synagogue and the Talmud firmly maintain the Mosaic authorship of the Torah, but doubts are entertained regarding a number of passages. In Baba bathra,” only the last eight verses of the creation, which open on the seventh day of Moses, are assigned to another author. On the other hand Simon (loc. cit.) teaches, referring to Deut., xxxi, 28, that these verses were also written by Moses under Divine direction (cf. also Josephus, “Antiq. Jud.”, IV, vii, 48). During the Middle Ages doubts were expressed as to the possibility of Moses writing certain sentences; for instance, by Rabbi Yishaaq (to Gen., xxxvi, 11) who was opposed by Aben Ezra, and as well by Aben Ezra himself (to Gen., xii, 6; Ex., xxv, 4; Deut., i, 1; xxxi, 22). Taken altogether, even in the succeeding period the belief in the Mosaic authorship remained undisputed, at least by the orthodox Jews. They hold, moreover, the Divine origin of the entire Torah, and the eighth of the thirteen articles of faith formulated by Maimonides and incorporated into the prayer-book reads: ‘I believe with full faith that the entire Torah is in our hands, and of this one which was given to our teacher Moses, whom be peace” (See PENTATEUCH).

F. SCHÜHLEIN.

Torrito, FRANCESCO, often called IL MORO (The Moor), Veronese painter and engraver, b. at Verona about 1456; the date of his death is unknown, but in a letter of Aretino he is spoken of as still living in 1546. He studied at Venice under Giorgione, and later returned to his native place, where he married a daughter of Count Zemovello Giusti. He then became a pupil of Libera, who adopted him as his heir. Torrito seems to have remained at Verona, executing commissions for portraits, and painting frescoes in churches and on the fronts of houses, as was the Veronese fashion of those days. His work shows the varying influence of his Venetian master and of the Veronese artists, which he finally blended into a distinct style of his own, but retained the rich, glowing colour schemes acquired from the great Giorgione. Fine examples of his frescoes may still be seen at Verona, in the cathedral (“Nativity” and “Assumption”, signed and dated 1534) and in the Church of St. Ferrino (“Virgin and Child in Glory”) amongst others are in St. Eufemia and the town hall. His portraiture can be studied at Naples, at Venice, and in the Brera Gallery. Two portraits represent the artist himself, one at Munich, signed and dated 1516, the other, a red chalk drawing, in the Christ Church Collection.

GEORGE CHARLES WILLIAMSON.

TORINO ALFONZO MAGROVEJ, SAIN, Archbishop of Lima; b. at Mayorga, Leon, Spain, 1538; d. near Lima, Peru, 23 March, 1566. Of noble family and highly educated, he was professor of laws at the University of Salamanca, where his learning and virtuous life led to his appointment as Grand Inquisitor of Spain by Philip II and, though not of ecclesiastical rank, to his subsequent selection for the Archbishoipr of Peru. He received Holy Orders in 1576 and two years later was consecrated bishop. He arrived at Pieta, Peru, 600 miles from Lima, on 25 May, 1581. He began his mission work by travelling to Lima on foot, baptizing and teaching the natives, his favourite topic being: "Time is not our own, and we must give a strict account of it." Three times he traversed the eighteen thousand miles of his diocese, generally on foot, defenceless and often alone; exposed to tempests, tornades, deserts, wild beasts, tropical heat, fever, and savage tribes; baptizing and confirming nearly one half a million souls, among them St. Rose of Lima, St. Francis Solano, Blessed Martin of Porres, and Blessed Maria. He built roads, schools, houses, and hospitals innumerable, and many hospitals and convents, and founded the first American seminary at Lima in 1591. He assembled thirteen diocesan synods and three provincial councils. Years before he died, he predicted the day and hour of his death. At Pachacay he foretold his own return, but continued labors until his last, arriving at Sana in a dying condition. Dragging himself to the sanctuary he received the Viaticum, expiring shortly after. He was beatified by Innocent XI in 1679 and canonized by Benedict XIII in 1726. His feast is celebrated on 27 April.

DE HEBRERA, Life of Torino.

EDWARD L. AYME.

Tornelli, GIOBADO FRANCESCO, Italian Jesuit, preacher and writer, b. at Cameri, 1 February, 1693, of a distinguished family from Novara; d. at Bologna, 6 April, 1752. He entered the Society in 1710, and manifested oratorical powers; after teaching classics, he entered upon a career of preaching, which lasted for almost twenty years. He first spoke at Venice (1733), and then with increasing popularity at Rome, Milan, Florence, and Bologna. Many have traced the success of Tornelli, however, did not possess Segneri's vehemence, impassioned eloquence, or force of imagination, and directness. Brilliant rather than solid, he lacked originality and depth; but he had imagination and dramatic feeling. For his pathos and easy, popular style he was summoned the "Metastasio" of the Italian pulpit. To polished diction he added a refined and affecting delivery. Shocked by the licentious songs then common, Tornelli tried to remedy the evil by adapting sacred hymns to the popular airs. Many criticized him for having thus exposed the mysteries of religion to ridicule and contempt. A Jesuit, Sanchez de Luma, defended him in his "Riposta alla censura; canzone pete marinereche per la festività di Maria Santissima." The Accademia della Crusca requested Tornelli to enter that body and offer to publish his works, but he modestly declined. Tornelli's principal works are: "Sette canzonette in aria marinereca sopra la sette principale feste di Nostra Signora" (Milan, 1738); "Prediche a tesori mistici" (Milan, 1753, Bassano, 1820, with a preface by Noghera, Savona, 1889); "Panegirici e discorsi sacri" (Bassano, 1768). Sommervogel and Carrara doubt the authenticity of the "Bisinate," a burlesque poem, written in Milanese dialect and sometimes attributed to Tornelli. There is a story of the orator in the potenza illustrissimo, III, p. 305.

CARRARA, Nuovo dizionario storico (Bassano, 1790); BERTINI, Nuova opera di storia, XXXIII (Venice, 1801); Prediche scelte di Segneri, Tornelli e d'alti (Turin, 1834); DE ANGELIS in Biographie ancienne et moderne, XLVI (Paris, 1826); Scuola di prediche dei piu celebri oratori italiani (Rome, 1837); ABBAGNANO, Lari di estensione sacra, II (Turin, 1839), 346-49; NAT, Dei grandi santuari vaticani, sull'opera di Hennequin, p. 61; Felicità del patronato del Governo del Gesù" etc., (Turin, 1870); DE BACKER, Bibl. des ecritures de la C. de J. Barb., IV, 909; SOMMERVIGEL, Bibl. de la C. de J., VII, 103, 71; VII, 103-4, J. C. REVILLE.

TORONTO, a titular see in Macdonia, suffragan of Thessalonica. Torone was a colony of Chalcideans from Euobea, on the south-west coast of the peninsula Sithonia, the modern name of which is Longos; this is the middle peninsula of Chalcidice, lying between the Toronic Gulf, called to-day, Cassandria, and the Gulf of Singitcites (Mt. Athos). Built on a hill, in a fine situation, it had a beautiful cove, Keraia (deaf), because the sound of the sea-waves could not be heard there, thus giving rise to the proverb: "Deafer than the port of Torone." Torone had thirty small cities under its government; like the other Grecian cities of the region, it furnished Xerxes with men and ship, and in the Persian War it passed under the rule of Athens. In 424 B.C., the Olymphanian, Lysistratus, opened its gates to Brasidas; it was shortly afterwards retaken by Cleon. After the peace of Nicias it was ceded to the Athenians; in 379 B.C., it was taken by Agesipolas; in 364-3, by the Athenian, Theophrastus; in 348-5, it was restored to the other cities of Chalcidice to its own kingdom. In 169 Torone repelled an attack made by the Roman fleet. Since then history is silent about this city which Pliny calls a free city. Its ruins, in the vilaet of Salonica, still bear the ancient name, pronounced by the Greeks, Toroni. Torone does not appear in any of the "Notitia episcopatum," and we know of no bishop of the diocese.

S. FÉRIOUX.

TORONTO, Archidioecese of (Tornentina), in the Province of Ontario, Canada. When constituted a diocese, it embraced all Upper Canada west of the Newbrnte district, but at present is limited to the counties of York, Simcoe, Ontario, Peel, Dufferin, Lincoln, and Welland. The first missionary in this district was Father Joseph Le Caron, a Recollect, who celebrated Mass on the shore of Georgian Bay in 1615. Then began the Huron missions, the story of which, related with heroism of Recollect Father Jesuit, is told elsewhere in this work; suffice it to say here that all the missions among that people and some of those attempted among their Neutral kindred lay within the present archdiocesan limits. During the century and a half following the destruction of these nations, a few priests are known to have been in this district; among these were Father Hennepin, in 1678, and Abbé Picquet, who visited Fort Rouillé (Toronto) in 1752. A Catholic chaplain was attached to the troops at Newark (Niagara-on-the-Lake) in 1794, and about the same time missionaries began to visit occasionally the few Catholics of York (Toronto) and the neighboring territory. Among these was Father Jesuit, who afterwards Vicar Apostolic of Nova Scotia, who held the office of Vicar-General of Upper Canada. After 1804 Father Macdonell came as often as his extended field of labour allowed, and, when Bishop of Kingston, resided at York for some years. In 1826 there were two resident priests in this region, one at York, the other at Niagara.

The Diocese of Kingston was divided on 17 Dec., 1841, and Father Power, bishop-elect of the western portion, having permission to name his episcopal city, chose Toronto, the provincial capital. This first bishop, Michael Power, born at Halifay, 8 Nov., 1817, in 1840, was Vicar-General of the Diocese of Montreal when raised to the episcopate. Consecrated on 8 May, 1842, he laid the cornerstone of the cathedral, introduced
the Jesuits, and made arrangements to bring the Loreto nuns to the diocese. Appointed by the Government to the Council of Public Instruction, he presided over that body. He died on 1 Oct., 1847, of typhus contracted while attending the immigrants at the fever-sheds. His successor, Armand-François-Marie Comte de Charbonnel, a Sub-dean, born at Montréal on 12 Sept., 1802, Dec., 1847, was consecrated by Pius IX in the Sistine Chapel, 26 May, 1850. He gave his paternal estates to liquidate the debts of his diocese, introduced the Basilians (Annonay), the Brothers of the Christian Schools, and Sisters of St. Joseph, and was present at the First and Second Provincial Councils of Quebec. The diocese was enlarged in 1856 by the erection of Hamilton and London as sees. With his fellow-bishops of Upper Canada, he engaged in the struggle for separate schools, which had a successful outcome under his successor. In 1860 he resigned to join the Capuchins, being appointed titular Bishop of Sozonopolis, and afterwards titular archbishop of the same see. He died on 29 March, 1891. His successor at Toronto was John Joseph Lynch, C. M., who was born at Clones, County Monaghan, Ireland, 6 Feb., 1816. As a Lazarist, he did missionary and professorial work in Ireland and the United States, being named to the seminary of the Sisters of Charity at Niagara, New York, when appointed (28 Aug., 1859) titular Bishop of Echinus, and coadjutor with right of succession to Bishop de Charbonnel.

On the resignation of Bishop de Charbonnel on 26 April, 1860, Bishop Lynch became Bishop of Toronto. He brought to the diocese the Redemptorists, Carmelites, Sisters of the Precious Blood, and Sisters of Our Lady of Charity of Refuge; was present at the Third and Fourth Provincial Councils of Quebec; and also at the Council of the Vatican, where he favoured the immediate promulgation of Papal Infallibility, and acted on the commissions on missions and Oriental rite. In 1865 the diocese was raised to metropolitan rank. He died on 12 May, 1888. In 1879 Bishop Lynch received as auxiliary Timothy O'Mahony, titular Bishop of Eudoeia, and former Bishop of Armidale, Australia, who died on 8 Sept., 1892. On 22 May, 1879, John Walsh, second archbishop, born at Mooncoin, County Kilkenny, Ireland, 23 May, 1830, was ordained for the Diocese of Toronto, of which he was vicar-general when appointed Bishop of Sandwich in 1867. On 13 August, 1889, he became Archbishop of Toronto, where he renovated the cathedral, and founded St. John's Industrial School. The Congregation of the Sacred Heart of Jesus, organized at his suggestion. He was noted as a writer and printer. His death occurred on 31 July, 1898. Denis O'Connor, C.S.B., his successor, was born at Pickering, Ontario, 28 March, 1841. A Basilian, he taught for several years in that community, being superior of the Assumption College, Brantford, when chosen Bishop of St. Augustine's Seminary, Ontario, where he was consecrated on 19 Oct., 1890. On 27 January, 1899, he was created Archbishop of Toronto. Here he established several new parishes, gave special attention to conferences for the clergy and to the study of Christian doctrine by the young. In 1898 he resigned, being appointed titular Archbishop of Laodicea. He died at St. Basil's Noviciate, Toronto, 30 June, 1911. His successor, Fergus Patrick McEvoy, was born at Lindsay, Ontario, 8 December, 1886. Ordained for Kingston, he was transferred to the new Diocese of Peterborough, where he was rector of the cathedral, and then went to Hamilton where he was Rector of the cathedral and vicar-general, and received the papal honours of private chamberlain and domestic prelate. Consecrated Bishop of London, Ontario, 6 Aug., 1899, he was promoted to Toronto, 13 April, 1905. He founded new parishes, rebuilt the cathedral palace, erected a new archiepiscopal residence, and began St. Augustine's Seminary, donated by Mr. Eugene O'Keefe (private chamberlain to His Holiness). At the First National Council of Canada, Archbishop McEvoy was chairman of the commission ad novas materias; he was also instrumental in founding the Catholic Church Extension Society of Canada. He died on 10 May, 1911.

Civil incorporation took place on 20 March, 1845, under the title of "The Roman Catholic Corporation for the Diocese of Toronto in Canada". All ecclesiastical property in the archdiocese, except that belonging to religious communities, is vested in this corporation. There have been three synods (1842, 1863, 1882) and one provincial council (1876). Both clergy and people of the diocese were for the most part French extraction, with a small percentage of English and Scotch. There are however three parishes exclusively French, three mixed (French and English), 1 for Poles, Italians, Ruthenians, and Syrians, respectively, and one Indian mission. In the archdiocese are 58 churches with resident pastors and 37 mission churches, 81 diocesan priests, and 39 of religious orders or communities; 39 separate schools, 2 high schools, 6 academies, 2 industrial schools, 1 domestic science school, 1 college for young men, 2 ladies' colleges, and 1 diocesan seminary (in course of erection). There are the factories of the Catholic missions. The Catholic population is about 70,000. The Basilians have St. Michael's College, 1 novitiate and scholasticate, 2 parishes and 2 missions; the Carmelites, a monastery, novitiate, and house of studies, 2 parishes and 1 mission; the Jesuits, 1 parish, 1 Indian mission, 2 other missions and a memorial chapel on the spot where Fathers de Brebeuf and Lalemant were killed; the Redemptorists, 1 monastery and 1 parish (they also give missions throughout the province). The Brothers of the Christian Schools have the De La Salle Institute, St. John's Industrial School, a junior novitiate, and 6 separate schools; the Institute of the Blessed Virgin (Sisters of Loretto); a mother-house for America, a novitiate, a ladies' college, 3 academies, 6 separate schools, and 1 domestic science school; the Sisters of St. Joseph, their mother-house and novitiate, a ladies' college, 3 academies, 1 high school, 21 separate schools, a House of Providence for the aged poor, St. Vincent's Home for Invalids, Sacred Heart Orphanage, and St. Michael's Hospital; the Sisters of Our Lady of Charity of Refuge, a convent and novitiate, a girls' industrial school and refuge; the Sisters Adorers of the Precious Blood, a novitiate and convent. The charities of the central prison, the hospitals (for the poor, of which one is only a chapel), and the hospitals for the insane belong to St. Michael's Cathedral, but are temporarily filled by the Basilians. The jails, hospitals, and military barracks are attended by the parochial clergy of their respective districts.

The city of Toronto has a population of 376,240 (about 45,000 Catholics), and is an educational and commercial centre. There are 22 city parishes, with 40 secular and 12 regular priests. St. Michael's Cathedral, modelled after York Minster, is of the Gothic style of the fourteenth century. It was solemnly dedicated on 29 September, 1848. Toronto University has Catholic representatives on its Board of Governors, Senate, and Staff, and Catholic students under the various faculties. Federated with this institution is St. Michael's College. Catholic pedagogical students attend the provincial normal school and faculty of education. There are sodalities and community activities in every parish. Catholic newspapers and benefit societies. The Catholic Church Extension Society of Canada aids the Northern and Western missions; St. Vincent de Paul Society relieves the poor; a Children's Aid Society under the same patron protects children of dissolute parents; the St. Elizabeth Nurses' Association cares for the sick in their homes. The Catholic Truth Society and
the Holy Name Society are strongly established. The priests have a Eucharistic League and also a society which cares for infirm members of the clergy.

**EDW. KELLY.**

**Torquemada, Tomás de, first Grand Inquisitor of Spain, b. at Valladolid in 1420; d. at Avila, 16 Sept., 1498. He was a nephew of the celebrated theologian and cardinal, Juan de Torquemada, and in his early youth he entered the Dominican monastery at Valladolid, and later was appointed prior of the Monastery of Santa Cruz at Segovia, an office which he held for twenty-two years. The Infanta Isabella chose him as her confessor while at Segovia, and when she succeeded to the throne of Castile in 1474 he became one of her most trusted and influential counsellors, but refused all high ecclesiastical preferrments, choosing to remain a simple friar. At that time the purity of the Catholic Faith in Spain was in great danger from the numerous Marranos and Moriscoes, who, for material considerations, became subjects of the Catholic Church for the sake of the indications of the so-called 'Heretical' Church. The Marranos committed serious outrages against Christianity and endeavoured to judaise the whole of Spain. The Inquisition, the work of the Catholic sovereigns had been established by Sixtus IV in 1478, had, despite unjustifiable cruelties, failed of its purpose, chiefly for want of centralization. In 1483 the pope appointed Torquemada, who had been an assistant inquisitor since 11 February, 1482, Grand Inquisitor of Castile, and on 17 October extended his jurisdiction over Aragon.

As papal representative and the highest official of the court, Torquemada directed the entire business of the Inquisition in Spain, was empowered to delegate his inquisitorial faculties to other inquisitors of his own choosing, who remained accountable to him, and settled the appeals made to the Holy See. He immediately established tribunals at Valladolid, Seville, Jaen, Avila, Cordova, and Villa-real, and, in 1484, at Saragossa for the Kingdom of Aragon. He also instituted a High Council, consisting of five members, whose chief duty was to assist him in the hearing of appeals (see INQUIZITION).**

**—The Inquisition in Spain.** He convened a general Spanish inquisitors' meeting at Seville, 20th November, 1484, and presented an outline of twenty-eight articles for its guidance. To these he added several new statutes in 1485, 1488, and 1498 (Reuss, "Sammelungen der Instruktionen des spanischen Inquisitionsgebrechte", Hanover, 1788). The Marranos found a powerful means of evading the tribunals in all the Jews of Spain, whose riches had made them very influential and over whom the Inquisition had no jurisdiction. On this account Torquemada urged the sovereigns to compel all the Jews either to become Christians or to leave Spain. To frustrate his designs the Jews agreed to pay the Spanish government 30,000 ducats if left unmolested. There is a tradition that when Ferdinand was about to yield to the enticing offer, Torquemada appeared before him, bearing a crucifix aloft, and exclaiming: "Judasis Iscarioi sold Christ for 30 pieces of silver; Your Highness is about to sell him for 30,000 ducats. Here He is; take Him and sell Him." Leaving the council table he left the room. Chiefly through his instrumentality the Jews were expelled from Spain in 1492.

Much has been written of the inhuman cruelty of Torquemada. Llorente computes that during the Inquisition's office (1483-98) 8800 suffered death by fire and 66,504 were punished in other ways (Historia de l'Inquisition, IV, 252). These figures are highly exaggerated, as had been conclusively proved by Hefele (Cardinal Ximenes, ch. xviii), Gams (Kirchen-geschichte von Spanien, III, 66-76), and many others. Even the Jewish historian Graetz contents himself with stating that "under the first Inquisitor Torquemada, in the course of fourteen years (1485-98) at least 5000 Jews were burnt as impudent heretics" ("History of the Jews", Vol. I, Philadelphia, 1897, IV, 356). Most historians hold with the Protestant Pechel (Das Zeitalter der Entdeckungen, Stuttgart, 1877, pp. 119 sq.) that the number of persons burnt from 1451 to 1504, when Isabella died, was about 2000. Whether Torquemada's ways of ferreting out Jewish heretics are not a matter that has to be decided not only by comparison with the penal standard of the fifteenth century, but also, and chiefly, by an inquiry into their necessity for the preservation of Christian Spain. The contemporary Spanish chronicler, Sebastian de Olmedo (Chronicon magistri Romani generalis Predicatorum, fol. 80-81), calls Torquemada "the hammer of heretics, the light of Spain, the saviour of his country, the honour of his order".

**MICHAEL OTT.**

**Tortes (TURBRIUS), Francisco, Hellenist and polemicist, b. in Herrera, Palencia, about 1500; d. at Rome, 21 November, 1584. He was the nephew of Dr. Tortes, Bishop of the Canary Islands. He studied at Salamanca and lived in Rome with Cardinal Aspasia and Seripando. In 1562 Pius IV sent him to the Council of Trent, and on 8 January, 1567, he became a Jesuit. He was professor at the Roman College, took part in the revision of the Sixtine Vulgate, and had Hosius and Baronius for literary associates. His contemporaries called him bellum librorum Praedicatorum, for his rapidity with which he examined the principal libraries. He defended the doctrines of the Immaculate Conception, the authority of the sovereign pontiff over the council, the Divinely appointed authority of bishops, Communion under one kind for the laity, the impropriety of the Apocrypha, and the attack on the Isidorian decreets, and pleading the antiquity of the feast of the Presentation of the Blessed Virgin, which Pius V had suppressed, worked for its reinstatement. Blondel accuses him of want of critical judgment, and Nadal of mordacity against Protestants. He wrote more than seventy books, principally polemical, against Protestants, and translations especially of Greek Fathers, many treatises of whose works he found hidden away in libraries.

**SOURELLIUS, Bibliotheca Scriptorum S. J. (Rome, 1670), 260; NIEBERGEM, Variae litterariae V (Bilbao, 1890), 57; NICOLAS ANTONIO, Bibliothec Hispano Nova (Madrid 1754), 487; HURMANN, Oeconomicae (I, 1795), 176; SOMMOVOLG, Bibliotheca, VIII (Brussels, 1895), 113 sqq.**

**PÉREZ GÓYENA.**

**Tortes Nasarto, Bartolomé de, Spanish poet and dramatist, b. at Tortes, near Badajoz, towards the end of the fifteenth century. The date of his death is not known, and little is known of his life. He was a cleric and a man of some learning. About the year 1514 he was living in Rome, where he enjoyed the patronage of Pius IV, who placed him in the capacity of chaplain. Following the publication of a satire from his pen in which he attacked the vices of the Court, he was banished from Rome and took refuge in Naples, where we lose sight of him. In the latter city was published, in 1517, a collection of his lyric and dramatic works under the title "Colloquia." These consist of satires, epistles, romances, ballad, and some miscellaneous poetry, but chiefly of eight
plays which he calls "Comedias". Aside from their literary merit, these latter are of more than passing interest, for their author gives us a theory of his own on the subject of the drama, and with them he set a type or model that was to be followed by later authors. He divides comedies into two classes, namely, "Comedias de Noticia" and "Comedias de Favor". Under the first heading he would include those dealing with real happenings, that have been actually seen; and under the second, things of the fancy, imaginary incidents that seem true though in fact not true. In the development of the plot, he would follow the division of Horace into five acts, these acts he would change the name of these to "Torricellias", as they seemed to be no more than convenient resting places. He would have not less than six nor more than twelve characters, and in some of his plays there is a tendency to observe theunities of time, place, and action. Among his better known comedies are "Himenea", "Serafína", and "Tiernaria". The authentic editions of the "Propaladian" are: those of Naples (1517), Seville (1520–26), Toledo (1535), and Madrid (1573–90). The "Biblioteca de Autores Españoles" publishes several romances of Torrel (vols. X, XVI, and XXXV). Moratin, Orígenes del Teatro Español en La Biblioteca de Autores Españoles. II (Madrid, 1846–80); Bohórquez, Teatro Español anterior a Lope de Vega (Hamburg, 1832); Ticknor, Hist. of Spanish Lit. (Boston, 1869).

VENTURA FUERTES.

TORRICELLI, EVANGELISTA, Italian mathematician and physicist, b. at Faenza, 15 Oct., 1608; d. at Florence, 25 Oct., 1647. Modigliana, in Tuscan Romagna, and Piancaldoli, in the Diocese of Imola, are named as the birthplace by different biographers. Torricelli was educated at the Jesuit college of Faenza, where he showed such great aptitude for the sciences that his uncle, a religious of the order of the Camaldolese, sent him to Rome in 1626 for the purpose of study. There he fell in with Castelli, the favourite pupil of Galileo, who instructed him in the work of the master on the laws of motion. Torricelli showed his thorough understanding by writing a thesis on the path of projectiles. Castelli sent this essay in manuscript to Galileo with strong recommendations of his young friend. Galileo invited Torricelli to his house, but for personal reasons he was unable to accept until three months before the death of the blind scientist (1641). The grand duke prevailed upon him to remain at Florence and to succeed Galileo at the Academy. He solved some of the great mathematical problems of the day, such as the finding of the area and the centre of gravity of the cycloid. This problem gave rise to disagreeable discussion on the part of Roberval as to priority and originality. Torricelli's honesty, manliness, and modesty are distinctly shown in his reply. His chief invention was the barometer. Pump-makers of the Grand Duke of Tuscany attempted to raise water to a height of forty feet or more, but found that thirty-two feet was the limit to which it would rise in the suction pump. Strange enough, Galileo, who knew all about the weight of air, had recourse to the old theory that "nature abhors a vacuum", modifying the law by stating that the "horror" extended only to about thirty-two feet. Torricelli at once conceived the experiment. He filled a tube with quicksilver, a liquid fourteen times as heavy as water, expecting the column which would counterbalance the air to be proportionally smaller. He filled a tube three feet long, and hermetically closed at one end, with mercury and set it vertically with the open end in a basin of mercury, taking care that no air-bubbles should get into the tube. The column of mercury invariably fell to about twenty-eight inches, leaving an empty space (Torricellian vacuum) above its level (1643). He expressed his sorrow at the fact that Galileo had not made this discovery in connexion with the pressure of air. The barometer is to-day one of the most important instruments in physics and chemistry, while the Torricellian method of getting a very high vacuum is still often employed. Another discovery was the law of efflux of a liquid through a small aperture in the wall of a vessel. He also constructed a number of large objectives and built, along with the microscopes. His literary contributions are noted for their conciseness, clearness, and elegance. His manuscripts have not all been published and are carefully preserved at Florence. The following have appeared in print: "Trattato del moto" (Florence, before 1641); "Opera geometrica" (Florence, 1644); "Lazioni accademic" (Florence, 1715); "Espérienza dell' argento vivo" (reprint, Berlin, 1897).

FABRONI, Vita Galilei, I (Pisa, 1778), 345–400; TIMABOCHI, Storia della lett. u. VIII (Florence, 1812), 204–10; FUGEDORFF, Biographisch-th. Handworterbuch, 11 (Leipzig, 1863), 1119. WILLIAM FOLX.

TORRUBIA, JOSÉ, b. towards the end of the seventeenth century at Granada, Spain; d. in 1768 in the monastery of Araceli. He entered the order of St. Peter of Alcántara in the Philippines Islands, whither he had gone as missionary and as secretary to Fugueras, the commissioner-general of Mexico, he was imprisoned for four months, as a result of opposition on the part of the ecclesiastic orders to reforms attempted by the commissioner. He returned to Cadiz and thence went to Rome, where he withdrew from the order of St. Peter and became a Franciscan. In 1732 he was again in the Philippine Islands as superior of a convent. He travelled in America and Asia, remaining in China. In 1750 he returned to Spain, whence he made three trips to Rome. A linguist, scientist, collector of fossils and of books, writer on historical, political, and religious subjects, Torrubia was held in high esteem in Spain and at Rome, and by none more so than by Pope Benedict XIV. Among his many works may be mentioned: "Roman Ceremonial of the Displaced Religious of St. Francis in the Province of St. Gregory in the Philippines" (Manila, 1728); "Disertacion histórico-politico-geográfica de las islas Filipinas (Madrid, 1738, 1753); a poem against Free-masonry (Madrid, 1751); "Introducción a la historia natural de España" (Madrid, 1754); German tr., Halle, 1773; Italian tr. of a part printed under his direction at Rome with the title "La gigantologia española"; second volume, on insects, never printed; "History of the Seraphic Order" (Rome, 1768).

PAUL H. LINEHAM.

TORTONA, DIOCESI DI (BERTONISNEO), in Piedmont, Italy. The city is situated on the banks of the northern Apennines, on the right bank of the Oltretorrente, in a plain rich in cereals, wine, hemp, rice, and silk. The cathedral is of the sixteenth century, built after
Charles V had destroyed the ancient cathedral situated on a hill which dominated the city, to make room for his fortress. In the cathedral, besides pictures of the Lombard School, there is an antique sarcophagus carved with the myths of Phaeton and of Castor and Pollux. Other churches are the very ancient S. Maria Canale, S. Giacomo, and the oratories of Loreto and S. Rocco.

The town of Dertona was founded, or established as a Roman colony, in 147 B.C., at the time of the construction of the Via Posthumiana, which connected Piacenza with Genoa. As two other very important roads for Pisa and Poenus began here, Dertona was, under the Empire, an important military station. From the ninth century it was under the rule of its bishop. In 1860 it became a city and in the struggles of the Middle Ages Tortona was the faithful ally of the Guelfs, for which reason it was several times destroyed, e.g., in 1558 by Barbarossa and in 1563 by the Savoyards. From 1568 to 1347 the city was alternately under the dominion or protectorate of the imperial vicars, the marquesses of Montferrat, the Visconti of Milan, and the kings of Naples. From 1347 it formed a part of the Milanese state, the fate of which it shared until 1735, when by virtue of the Treaty of Vienna it was occupied by the King of Sardinia.

According to the legend, which is, however, a late one, the first Bishop of Tortona was St. Martianus martyred under Hadrian. It is certain that, in the first half of the fourth century, Tortona was subject to the Diocese of Vercelli. The first bishop, according to Savio, was St. Innocent, who he believes was the predecessor of St. Exuperantius (381), the first of whom has no historical record, and who was highly praised in a sermon of St. Maximus of Turin. Few other names of bishops of the early period are known; but from the tenth century the list is more complete, comprising: Giseprandus (about 943), who was at the same time Abbot of Bobbio; Ottone (1060), a monk; and the Bishop of Henry IV; Guido (1068), who went to Palestine; Bishop Pietro, one of those who in 1241 were made prisoners by Frederick II, while on their way to attend the Council of Rome. Melchiorre Busseto was killed by the followers of the Marquess Guglielmo of Montferrat, for which the marquess lost all his rights of patronage in the Diocese of Tortona, and was compelled, barefoot and clad in a shirt only, to walk from the scene of the bishop's murder to the cathedral. In the time of Michele Mariano (1461) the body of St. Rochus was found at Vaghar, which was the cause of a lengthy controversy with Arles, which possessed the relics of St. Rochus of Montpellier. Uberto Gambara (1528), afterwards a cardinal, was always absent as papal legate or nuncio in Germany, and renounced the bishopric in favour of his relative Cesare (1548), present at the Council of Trent. Maffeo Gambara (1562) distinguished himself in reforming the church, as did also his successor Paolo Aressi (1693). In 1685 the diocese was suppressed by the French Government and united with Casale, and on its re-establishment in 1814 it was taken from the metropolitan See of Turin and made suffragan to Genoa. The diocese has 296 parishes, 317,885 souls, 570 secular and 30 regular priests, five monasteries, five convents for women, three educational institutions for males, and five for females.

TORTOSA, Diocese of (DEUTHERSCHEN, DERTOSA), Spain, suffragan of Tarragona, comprises about 115 square miles, principally in the civil province of Tarragona and Castellon. Its principal cities are Tortosa and Castellon. The "Gerarchia Cattolica" (Rome) places the date of creation of the diocese in the fourth century. Local tradition and historians claim St. Paul as founder of the diocese, and St. Rufus, son of Simon of Cyrene, as its first bishop. J. L. de Riquer (Viaje Literario, vol. V) would explain the origin of the tradition in regard to St. Rufus by the fact that the first bishop after the reconquest of Tortosa from the Moors was named Rufin (Gaufridus), Abbot of the Monastery of St. Rufus, Avignon. Liria (364) and Herod (about 400) present national historians as the first bishops of whom there is record, are not given by La Fuente or Gams. La Fuente gives Urso (516) as the first known bishop. During Moorish rule in Tortosa the see was vacant or under a lay patron. St. Mary the Virgin of the seventh century is supposed to have been the first bishopess. The see was occupied by the Moors until its reconquest by Raymond Berenger of Barcelona in 1158, when it was reconstituted by Berenger, Archbishop of Tarragona; rebuilt from May or June, 1347 until 1597; consecrated 8 June, 1597; again consecrated 5 Feb., 1621 to 1725, with latter additions to the antependium. The style, mainly Gothic, has merit. The cloister is thought to be originally of the twelfth century. A special chapel contains the holy ribbon or sash in the church of the Blessed Virgin, in an apponition on the night of 24 March, 1163, and which since 1629 is sent to the palace in Madrid before a royal birth. The cathedral archives contain many valuable codices, Bulls, etc.

The diocese was the scene of a dispute between Christians and Jews in 1415-1414, and figured prominently in the Western Schism, as the papacy of Benedict XIII and Clement VIII resided at Piacenza, in the diocese. The provincial council of Tortosa (1429) did much to remove the evil effects of the schism. Among distinguished bishops of the diocese were Cardinal Augustin Spinola (1623-26) and Adrian VI, elected pope while holding the Bishopric of Tortosa 1516-22, and to whom the privilege of the red calotte worn by bishops of this diocese is attributed. The present bishop of Tortosa is Dr. D. Pedro Rocamora y Garcia (b. 1832). The diocese is divided into 12 archpriestships and contains: 193 parishes; 540 secular parochial clergy; a diocesan seminary; the Collegeium Maximum of the Jesuits of the Aragonese Province; 30 institutions of ecclesiastical vocations; 31 important convents and houses of sisters; numerous primary and secondary schools; one Catholic daily, "El Restaurador" (Tortosa); 5 Catholic weeklies; one Catholic fortnightly; and two Catholic monthlies.
TOSCANELLI

OBSERVATORY OF THE Ebro & ROquetas, Catalo-

nia, Spain. The founder and present director is Fa-

lino Nicolai, S.J. The construction of the build-

ings was commenced in March, 1903; they were
dedicated on August 30, 1905, the date of a total
eclipse of the sun, it was possible to make all the
observations in the observatory. See "Instrucciones
para la observacion del eclipse de sol del 30 de
Agosto de 1905", published by the observatory.
The observatory comprises branches in astrophysics,
meteorology, and geophysics.

With the exception of some of the meteorological
apparatus which is installed in the open air, the as-
sparatus is distributed in six buildings, a seventh
being devoted to the library and general offices,
and a small building apart for the mechanician.
All these build-
ings are separate, so as to obtain the greatest possible
accuracy in the results. In the building for the mag-
netic observations, all iron or any other substance
which could exert a contrary magnetic influence
is carefully excluded. The observatory is at some
distance from the nearest town, on an elevation
which dominates the valley of the Ebro. There is no
electric car line or other factor in this valley which
could act as a disturbing influence. (See Boletín
Mensual del Observatorio de El Ebro vol. 1, no. 1,
with introduction, an observatory publication.)
The Government declared this institution a public
utility on October 18, 1904.

The observatory publishes a monthly bulletin, in
which the observations, reduced to their absolute
values, are given in tables. Other scientific treatises
published by the observatory are: "Discurso relativo
al Establecimiento de la nueva Sección de Astronóm-
ia y Física del Globo", by Father Cirera; "La
Sección de Astronomía y Física del Globo y la Meta-
rología española"; "Los Eclipses de 8 de Mayo de
1910 y 26 de Abril de 1911"; and "Recientes pro-
gresos de las Ciencias Astronómicas en España".

CHARLES J. MULLALLY.

TOCANELLA. See VITERO AND TOCANELLA, DIACONE.

TOCANELLI, PAOLO DAL POZO, mathematician,

astronomer, and cosmographer, b. at Florence in 1397;
d. there, 10 May, 1482. Tocanelli, who was one of the
most distinguished scientists of the fifteenth cen-
tury, was the son of the Florentine physician Do-
mic Tocanelli. He began his mathematical studies
at Florence under Giovanni dell'Abaco. At the
age of eighteen he entered the University of Padua
where he studied mathematics, philosophy, and
medicine. In this period he formed his life-long
friendship with Nicholas of Cusa who studied law
and mathematics at the same university. The two
professed to be the cultists of the Encyclopaedist
Compendium. Both left the university in 1424, Nicholas with the
title of doctor decretorum and Paolo as a doctor
of medicine. In consequence of this Tocanelli after-
wards was frequently called Paolo fisico. While
Nicholas of Cusa went back to Germany Tocanelli
returned to Florence, where he spent the remainder
of his life with the exception of short journeys in Tuscany
and brief sojourns at Todi and Rome. At Florence
Tocaneli took up scientific studies in various direc-
tions which brought him into connexion not only with
distinguished artists, as Brunelleschi, but also with
the greatest scholars of Italy and other countries.
He may indeed be said to have been the centre of
the learned world of that era. His contemporaries pro-
moted him one of the most distinguished mathema-
ticians of his time. Regiomontanus and Cusa sought
his opinion in the most abstruse questions of theoretical
mathematics, or supported their assertions by his
authority. Thus Nicholas of Cusa, even at the height
of his fame, ad-

mirè in his friend
the thorough
mathematician,
as is shown by
his treatise "De
transformationi-
bus geometricis"
which was dedi-
cated " Ad Paul-
num magistro do-
minici Physicum
Florentium "
The same ad-

miration is
evident when
Cusa wrote
as a dialogue
between himself
and Tocaneli the
latter's adverse
criticism of Cus-
na's "Mathemat-
ica complementsa". In this dialogue Tocaneli
says that like Regiomontanus he found the "Mathematics
complementsa" which investigated the squaring of
the circle, obscure and lacking in positiveness.
Tocaneli's services to astronomy are shown by the
painstaking and exact observations and calculations,

preserved in manuscript, of the orbits of the comets
of 1453, 1489-50, of Halley's comet of 1456, of the com-
et of May, 1457, of June-July-August, 1457, and
that of 1472. And in his own testimony these
observations cost him immense labours and long
vigils. He could not entirely throw off the influence
of astrology, although two of his contemporaries, Mar-
silio Ficino and Giovanni Pico, disbelieved in it. A
monument to his astronomical skill still exists at the
Cathedral of Santa Maria del Fiore at Florence, in
the well-known gnomon, which he constructed about
1468 which was later improved by Cardinal
Ximenes. A marble slab having a small opening in
it was placed at a height of 277 feet in the dome over
the middle of the left transept; by the shadow he
could determine midday to a half-second, and could
also settle with much precision the altitudes of the
solstices. Tocaneli also gave much attention to
cosmography. It seems indeed that he was the most
distinguished scholar of the fifteenth century in this
branch of science, the aim of which was to gain know-
ledge of the world in its widest extent. The estima-
tion in which he was held as a cosmographer is shown
by the generally accepted belief, resting on traditions
respecting Columbus, that Columbus before under-
taking his dangerous western voyage asked Tocan-
elli's advice. Tocaneli had a thorough knowledge of
the writings of Ptolomy; he had studied the travel-
les of Marco Polo, and had gained personal information
from merchants and seamen, above all from the Italian
traveller Nicolo Conti. All that he had thus
learned had brought him to the conviction that the
transverse extent of Europe and Asia covered nearly
two-thirds of the earth, that is 290° of latitude, so

PAOLO DAL POZO TOCANELLI

From a painting by Giorgio Vasari in the
Sognora, Florence
that the western route across the ocean could only cover 130°. For a half century the Portuguese had sought to sail around Africa towards the east. Toscanelli seems to have made them repeated proposals as to the possibility of a western route, without, however, being able to convince the Portuguese of the feasibility of his theory.

If we may believe the tradition connecting Toscanelli and Columbus, then Toscanelli wrote, in answer to repeated requests of King Alfonso, the celebrated letter dated 25 June, 1474, to the confessor Canon Ferdam Martins of Lisbon whom he knew. In this letter, which was accompanied by a map, he suggested clear directions for the carrying out of his scheme. This letter had no decisive effect upon the king but probably influenced the adventurous Christopher Columbus, then in the full vigour of manhood. Columbus, who had lived in Lisbon from 1476, heard Toscanelli’s chart, however, has not been preserved, either in the original or in a copy. A successful reconstruction of this chart was made by Hermann Wagner of Göttingen which shows that Toscanelli covered the customary nautical chart of the fifteenth century with the reticulations of a square flat chart, upon which direction and distance could be correctly measured by means of the spaces. It is not surprising that Columbus was overwhelmed with delight when he saw it, that he took it with him on his first westward voyage, and had absolute confidence in it. Consequently his two biographers are right in laying so much emphasis on the controlling influence of Toscanelli over Columbus. They even praise the Florentine scholar as the actual father of the great idea of sailing to India by the western route. A diametrically opposite opinion has been expressed by the French scholar Henri Vignaud, who since the holding of the correspondence between Toscanelli and the Court. According to the tradition it was only through the intervention of the friend of Columbus, Lorenzo Giraldo, that the former obtained from Toscanelli, in answer to a personal inquiry, an explanation of his scheme of a voyage westwards. Toscanelli is said to have sent Columbus, for this purpose, a copy of his letter and chart. At the beginning and end of the letter Toscanelli added a few words addressed especially to Columbus. The two biographies of Columbus, that of his son Fernando and that of Bishop Las Casas, both include and give the text of another letter from Toscanelli in reply to a second letter sent him by Columbus. Unfortunately Toscanelli’s two letters no longer exist in an authentic form. Both apparently have been greatly altered in the Italian translation of Fernando’s “Historie”, and in the Spanish biography by the Bishop Las Casas of Chiapa. However, by good fortune, the middle part of Toscanelli’s first letter, that is a copy of the letter of 25 June, 1474, has been preserved in its original form. Harrisse discovered in the “Bibliotheca Colombina” at Seville a copy, made by Columbus himself, of the letter to Martins on the cover of an edition of the “Historia rerum adiectum gestarum” of Aeneas Silvius. This document makes it possible to determine fairly accurately Toscanelli’s opinion, which has been so variously interpreted, concerning the western route and the distance apart of the coasts of the two mainlands.

It is believed that Columbus, on his first voyage to the New World, carried a copy of this chart with him of the American Congress at Paris in 1900 has attempted to prove that Toscanelli’s correspondence with Martins and Columbus, including the accompanying chart, is a forgery. This has led to a violent controversy over the “Toscanelli question”, in which Italian, American, English, French, and German scholars have supported the traditional belief of the connexion between Toscanelli and Columbus. Notwithstanding this, Vignaud in 1905 and 1911 published monographs on the life of Columbus for the purpose of maintaining his views. Vignaud’s arguments, however, are not decisive. Even though the correspondence between Toscanelli and Columbus be proved to be apocryphal, still Toscanelli’s knowledge and ability as a cosmographer does not suffer in the slightest so long as the letter of 1474 is taken as the expression of his cosmographic ideas, and so long as the letter of Duke Ercole of Este, written to his ambassador Mantrelo on 26 June, 1494, is regarded as authentic. This letter says that Toscanelli had really occupied himself with the idea of a voyage towards the west. The titles of only three of Toscanelli’s works are known, none of them, unfortunately, have been preserved: the “Prospectiva”, the “Meteorologia agricola”, and also, according to Urselli, a translation of Ptolemy’s geography. A single manuscript is one of the treasures of the Bibliotheca Nazionale centrale of Florence; this was published in 1864 and pertains to astronomy, geodesy, and geography.
TOSEPHTA

TOSTI

FRIEDRICH STREICHER.

TOSEPHTA (טושפתה, addition, supplement) is the name of a compilation of halakhi-haggadic character, which judged by its contents belongs essentially to the era of the Tanna'im (Teachers), and which is modelled on the plan of the Mishnah; all that is lacking are the tractates “Aboth”, “Tamid”, “Middoth”, and “Qinnim”. The editors had access to authorities that are older than our Mishana. The individual Halakhot do not show the same subtlety and precision as in the Mishnah; often the development of the Halakha may be traced from the course of the discussion. The Haggadah also is fully represented. The history of the origin of the Tosephta has not yet been satisfactorily cleared up. In any case the work in its present form contains a large number of the doctrinal utterances of later rabbinical teachers (the Amoraim), and it was not edited until the late Talmudic period. W. Zuckermandel, “Tosephta, Mishana, und Boraita in ihrem Verhältn zu einander” (1 vol., Frankfort, 1908), claims to prove that the Tosephta represents the Palestinian Mishana, and that our Mishana was reedited in Babylonia.

Edition of the Tosephta by Zuckermandel (Parwewalk, 1880), supplement to it (Trier, 1882—). Thirty-one tractates, the tractates on the first three orders are to be found translated into Latin in Uolino, Theorium, XVII—XX (Venice, 1755-57).

F. SCHÜBLIN.

TOSTI

Tostado (Tortatus), Alonso, exequete, b. at Madrigal, Castile, about 1400; d. at Bonilla de la Sierra, near Avila, 3 Sept., 1455. After a course of grammar under the Franciscans he entered the University of Salamanca, where, besides philosophy and theology, he studied civil and canon law, Greek, Hebrew, and the other branches then comprised in the curriculum of a university. By great application joined to an unusually brilliant mind and an extraordinarily retentive memory he accumulated such a vast store of knowledge that his contemporaries styled him the wonder of the world. At twenty-two he began to lecture on a wide variety of subjects to large audiences attracted by his learning. Later he assisted with distinction at the Council of Basle. During a visit to the papal court at Siena in 1443, he was denounced to Eugene IV as having publicly defended an heretical and some rash propositions, but in an explanatory letter he assured the pontiff of his orthodoxy. In his “Defensorium”, written on this occasion against Torquemada’s critics, he gave the occasion to view derogatory to the authority of the pope. On his return to Spain he was appointed Grand Chancellor of Castile, and in 1449 Bishop of Avila, whence his title Abulensis. Besides a Spanish commentary on the chronicles of Eusebius and other minor works, he wrote commentaries on the historical books of the Old Testament as far as II Par., and on the Gospel of St. Matthew. These are extremely rare, containing many digressions on dogmatic and other subjects, which, though often excellent in themselves, are out of place in a commentary. An edition of his works in 13 folio volumes was published at Venice in 1507 and 1547; a more complete edition in 24 folio volumes appeared at the same place in 1615, and another in 27 folio volumes in 1728.

Tosti, Luigi, Benedictine historian, b. at Naples, 13 Feb., 1811; d. at Monte Cassino, 24 Sept., 1897. His father, Count Giovanni Tosti, descended from an ancient Calabrian family, having died young, his mother, Vittoria Corigliano, entrusted the child to its uncle, a monk at Monte Cassino. In 1819 Tosti became a pupil at the celebrated abbey, and was drawn early towards the monastic life. He was sent to Rome to complete his studies, was ordained priest in 1833, and soon returned to Monte Cassino, where for twenty years he taught the doctrines of St. Thomas. About 1839 he had begun a deep study of history; in 1842 he published his “Il Sacro Monte Cassino”, soon followed by the “Storia di Bonifacio VIII”. His “Storia della Lega Lombarda”, dedicated to Pius IX, appeared in 1848 and was a trumpet-call to the Neo-Guelph party. He laboured so assiduously that in 1851 he published the “Storia di Abelardo e dei suoi tempi”, the “Storia del Concilio di Costanza” in 1853, the “Storia dell’origine dello scisma greco” in 1856, “La Contessa Matilde e i Romani pontefici” in 1859, and in 1861 the “Prolegomeni alla storia universale della Chiesa”.

Tosti took an energetic and enthusiastic part in the national movement blessed by Pius IX. In 1844 he had planned a review, “L’Ateneo Italiano”, for the purpose of putting the papacy at the head of the Risorgimento. The Neapolitan police authorities opposed it, and forbade Tosti to take part in the projected mediation (between the pope and the triumvir of the ephemeral Roman Republic), which, as advocated by the French envoy, d’Armand, Pius IX had to intervene personally to secure the liberation of the learned monk, who had been accused, as Cardinal Capocciello relates, of belonging to a band of murderous conspirators, and put in prison. Temple, the English ambassador at Naples, also courageously opposed this defiance of persecution. Tosti sought consolation in the Holy Scriptures and his beautiful book, “Ricordi biblici”, was the fruit of this mishap. He had the sorrow of seeing his beloved convents threatened by a law of spoliation passed by the Parliament of the new Italian Kingdom, and appealed to distinguished friends, such as W. E. Gladstone, to obtain some exemption for Monte Cassino, which he likewise procured later for the Abbey of Grottaferrata, the Sacro Speco of Subiaco, etc. Pained by these persecutions Tosti refused a chair in the University of Pisa, but became later assistant archivist of the Vatican, under Leo XIII. This great patriot’s appeal in May, 1887, inviting the Italian Government to make peace, presided over by the former revolutionary, Crispi, rekindled Tosti’s patriotism. Deputed by the pope to negotiate the restoration of St. Paul’s to the Benedictines, Tosti hoped to effect an official reconciliation of the Vatican and the Quirinal. Pius IX’s personal trust in French diplomatists, thwarted his noble efforts, and the too hopeful religious had to retract publicly his brochure, “La conciliazione”. He withdrew to Monte Cassino and undertook his “Della vita di S. Benedetto”. Moved by the pope’s generous appeal to the English in 1860, he renewed his

Total Abstinence Union of America, Catholic. See Temperance Movements.

Totalism, from ote, root of, possessive form otem, in the Ojibway dialect of the Algonquin stock of American Indians; by some authorities spelled dodeme (Father de Smet), todem (Father Petitot), Toodsim, dodaim, totam (J. Long); the original signification was apparently a person's family or tribe, and in a narrower sense his belongings.

Totalism constitutes the group of superstitions and customs of which the totem is the centre. It is defined as the intimate relation supposed to exist between an individual or a group of individuals and a class of natural objects, i.e., the totem, by which the former regard the latter as identified with them in a mystical manner and in a peculiar sense their own belongings, so that they bear the name of the totem and show this belief in certain customs. The conviction of the intimate union constitutes the religious aspect of Totalism; the customs which result therefrom form its sociological aspect. If the union exists between an individual and a class of natural objects, we have individual Totalism. When it exists between a clan and a natural class we have clan Totalism. Frazer mentions sex Totalism, but that is peculiar to Australia. The totem is most frequently an animal species, more rarely a plant, occasionally an inanimate object, e.g., sun, wind, rock, etc. Totalism is widespread and developed among the American Indians and the aborigines of Australia. Traces of it are found in South Africa, in the Polynesian Islands, and among the Dyaks of India. Mauss says it does not exist in all savage races of our day (Année sociologique, IV, 1899-1900); Reinach maintains that it existed among the Greeks and Celts (Cultes, Mythes et Religions, II, Paris, 1905); Gomme, in the British Isles (Archéological Rev., III, 1889); Thomas, in Wales (Rev. de l'histoire des religions, XXXII, 1900, 269); Cuvelier, in the military orders of Rome, Lyons, 1903). It is doubtful whether Totalism existed among the Aryan races, and the facts alleged can be explained by idolatry. Lorent maintains that Totalism existed among the early Egyptians, but evidently confounds this belief with animistic worship. Robertson Smith holds that Totemism lies at the basis of the Semitic religions. Zapletal has opened up anew this problem, and questions Smith's conclusions. Evidence from animal names is now admitted to be a precarious support for the Totem theory. Frazer clearly shows that there are sacred animals and plants which are not totems, because their names are not in general the same as those in the early Hebrews. Hence the present writer rejects the opinion of A. Lang that in the education of mankind Totemism has played a part everywhere.

I. History. The phenomena of Totemism were first brought to the knowledge of the civilized world by the Jesuit missionaries to the North Americans in the 17th century. The earliest accounts in English came from J. Long (Voyages and Travels, London, 1791). Following these are accounts of Major S. H. Long (ed. by Edwin James, London, 1823), James, Warren, Morgan, Schoolcraft, and Catlin. Precursors of the same North American Indians were the traders and missionaries in Australia. The importance of Totemism in the early history of society was first pointed out by J. F. McLennan, who proposed as a working hypothesis that the ancient nations of the world had passed through a peculiar kind of Animism or Animism which finds its typical representation in the totem-tribes of Australia and of North America (“Fortnightly Rev.”, Oct.-Nov., 1869; Feb., 1870; “Articles in Ancient Britain” in Journ. de Soc. ant., 1867, 1868). In these lines Robertson Smith attempted to show that Totemism lay at the root of the Semitic religions and thus was the basis of the faith now embraced by the most civilized nations of the world (“‘Animal Worship among Arabs’ in Cambridge Jour. of Phil.”, “Kinship and Marriage in so-called ‘savage’,” London, 1900). F. B. Jevons went further and affirmed that here are found the germ of all which religion and all material progress have been evolved (Intro. to the History of Religion, London, 1896); hence Totemism was regarded as an established theory with the foundation laid by McLennan and the superstructure by Frazer, Smith, and Jevons. This theory is now rejected by scholars. Father Brun, writing of French West Africa, says that Totemism does not appear as a pronounce stage of religious evolution exclusive of all other beliefs; it is simply an element in the complex of beliefs. Mulliric criticises Jevons (Revue de l'hist. des religions, XXXVI). The investigation of Franz Boas among the Indians of North-West Canada and of Spencer and Gillen among the Australian aborigines gave the decisive blow to the theory and opened a new phase in the study of Totemism. Hence Hill-Tout says that Totemism is not the ideal and exact social or religious system of savage regimentation which some writers have tried to show. It is found among races varying much in modes of living, e.g., hunting, pastoral, agricultural, and industrial, and, becoming part of their varied beliefs and customs, has appeared to assume differing forms.

II. Origin. Totemism must be simple to the savage mind, yet it is a puzzle to anthropologists. A great mass of facts different and at times in seeming contradiction have been gathered in America and Australia, yet the resemblances are so many and so close as to justify the classification under one common name. Different explanations have been proposed, and these have varied as new data were added. There is scarcely any other class of social phenomena more difficult to explain. Fraser says a definition is only possible in an empirical sense. He classifies the “animal names” (Secret of the Totem, p. 28). The discussion has produced a wealth of literature which has served to exaggerate the real position and influence of Totemism. The difficulty is to define the nature of the relation between the individual or clan and their totem. Hence:

(a) The Name-Theory. Herbert Spencer classifies Totemism under animal-worship and says its explanation is found in the primitive custom of naming children after natural objects from some accidental circumstances or fanciful resemblance, and then in confounding these metaphorical names or nicknames with the real object. The custom has consequently paid to the animals the same reverence they paid their ancestors. Hence a phase of ancestor-worship founded on mistaking metaphors for facts (Prin. of Sociology, I, xxii). Akin to the “nickname” theory of Spencer is the explanation of Lord Avebury. He holds that names were assigned to animals from the practice of naming individuals and then their families after particular animals; the individuals would look upon the animals at first with interest, then with respect, and at length with a sort of awe (Marriage, Totemism, and Religion, London, 1881). A. Lang opposes the “animal set” theory. He adopts the opinion of de la Vega that totems were names imposed by outsiders to distinguish the individuals from one another (Secret of the
Totemism

Totemism, pref.). Hence he agrees with J. F. McLennan, Loree, and Wake that totems were not symbols of either rank or status, as A. K. Krane also holds that Totemism arose in "heraldic badges" (Ethnology, 9). Max Müller writes, "A totem is a clan mark, then a clan name, then the name of the ancestor of the clan, and lastly the name of something worshipped by the clan." (Contributions to the Science of Mythology, Ethnology, I, 461.) It holds that the name came into use before, not after, its pictorial representation, i.e., the clan mark. Piikler says the germ of Totemism is in the naming and has "its original germ not in religion but in the practical every-day needs of man." Risley also says that the totemic origin of names, "from some animal, of the supposed founder of the exogamous sept, now stripped of its personal association and remembered solely in virtue of the part it plays in giving effect to the rule of exogamy." In criticism it can be said that the name-theory fails to explain the intimate relation of the individual or clan to the totem. Hence Durkheim writes "a totem is not only a name; it is first and above all a religious principle" ("L'Annee sociologique," 1902, 119).

Lang admits that his "theory is not in accordance with any savage explanations of the origin of the totemism...if totemism is but merely a primitive form of kinship, there seems most improbable that any such nicknames would have been adopted and have given rise to Totemism, nor do I know of a single instance in which such nicknames have been adopted." Reinhack holds that animal names are an effect, not a cause of Totemism (Cultes, Mythes, et Religions, I, 22). Tyler says the theory is not vouchèd for by sufficient evidence (Primitive Marriage, II, 214). Boas distinguishes three classes of tribal and of clan names, e.g., collective forms of the name of the ancestor, names of region inhabited and names of honour. Mixtures of these with totem concepts appear in the Amaha names are classified as nikie, i.e., pertaining to the gens, "dream", "fanciful" and "borrowed" names, and nicknames, and women never had more than one name which was of nikie class. Hill-Tout declares that the commonest of Indian names in British Columbia are not nicknames, but true promonima, mostly given to infants shortly after birth before any resemblance is apparent or possible.

(b) The Transmigration Theory, advocated by G. A. Wilkin, and also by Tylor (Jour. Anth. Inst., XXVIII, 1899), regards the totem as the bridge connecting between a clan and a species of animals, so that they "become united in kinship and mutual alliance." In criticism it may be said that the notion of transmigration is not primitive, for with Tylor Totemism is regarded as primitive. Again, the belief in transmigration is found among peoples who show no trace of Totemism, while it is unknown to the African Bandia and to most of the North American Indians whose Totemism is clearly marked. Hence Frazer holds that Totemism and transmigration are distinct and independent. Finally, transmigration may enter into phases of Totemism under the form of the reincarnation of ancestors; this, however, is not the original element but a corrupted phase found only occasionally and hence a later development.

(c) The Economic Theory, proposed in accord with those anthropologists who hold that the starting-point of social organization was the necessity of producing food, objects in two forms of the same group maintains that totems originally were the animals or plants on which the local groups of people chiefly subsisted and after which they were named by the neighbouring groups ("Rep. of the British Assoc.", Belfast, 1902; "Folk Lore," XII, 339). But this theory fails to explain the existence of inanimate objects as totems. Again, Baldwin Spencer denies such specialization of diet between the local groups (Northern Tribes of Central Australia, p. 787). The "referred form" was adopted by Prof. Frazer, who, following Spencer and Gillen (Jour. Anth. Inst., XXVIII, 1899, 273), taught that Totemism is not so much a religious as an economic system, and held that it originated as a system of magic designed to supply a community with the necessities of life, especially food and drink. It is held by each totem group that the totem plant or animal. Hence the prime duty of a totem clan was to provide a supply of its totem-animal or plant for consumption by the rest of the tribe, and thus ensure a plentiful supply of food ("L'Annee sociologique," 1902). Apology, 1891. But Frazer afterwards rejected this theory as too complex, and says that probably the co-operative communities of totemic magicians in Australia are developments of Totemism rather than its germ (Totemism and Exogamy, IV, p. 57). In fact the economic theory does not account for the sense of kinship between man and animal, and the belief prevailing in places that the clan is descended from the animal.

(d) The External Soul Theory, earlier propounded by Prof. Frazer, i.e., the possibility of depositing the souls of living people for safety in external objects in the shape of totem animals and plants. In this theory an individual of the species is the receptacle of his soul, the savage spares the whole species from a fear of injuring unwittingly the individual with which his fate is bound up ("Golden Bough," II, London, 1890). Frazer rejected this theory on the ground that it was not confirmed by subsequent research.

(e) The Conception Theory is the third and last explanation of Frazer. He says Totemism has its source in the savage ignorance of paternity, and is a primitive explanation of conception and childbirth, such as animals and plants are due to a spirit which enters the body of a woman, that she associates it with the object which was nearest her when the child was first felt in the womb, and that this object is regarded as the deserted receptacle of the spirit. And since the spirits of people of one particular totem are believed to congregate in one spot, and the natives know these spots, the totem of the child can easily be determined ("Totemism and Exogamy," IV, 57).

In criticism we may say that the theory is based on the beliefs of the Arunta tribe in Australia, that, while van Gennep holds to Arunta primitiveness, A. Lang considers it a development of the "mixed society" (the group idol, e.g.), that Schneider and Gillen testify to changes in Arunta Totemism, that it does not explain Totemism in its wide extent, and finally that these beliefs find another and a much better explanation.

(f) The Manitous, or Guardian Spirit, Theory, first proposed by the Jesuit missionaries to North America in the seventeenth century and revived in our day by Dr. Franz Boas, Miss Alice Fletcher, Father Morice, Dr. Hill-Tout, and J. Owen Dorsey, teaches that the manitu of the individual has developed into the totem of the clan. This can be explained in two ways. First by real inheritance, e.g., the guardian spirit of an ancestor is transmitted to his descendants. Hence the clan totem is the hereditary manitou of a family. Dr. Boas states that the guardian spirit of the North Pacific Coast becomes hereditary. Father Brun says that the Totemism of French West Africa is essentially familial in the sense of the Roman gens. A. Lang objects to the theory of Dr. A. Lang, that the manitu by the clan on the ground that mother descent is more primitive than paternal descent. But the objection assumes that Totemism is primitive: a contention by no means established. Frazer says the clans would be stable and permanent even with mother descent, if the husband took up his abode with the wife's people or the wife remained at home
TOTEMISM

(Totemism and Exogamy, II, 103, n). Morgan states that this condition is true of the Iroquois, while other clans are permanent. Hill-Tanner says that in North-West Canada the totem is hereditary either from father to son in the paternal right, or from the man to his sister's children in the maternal right. For even under maternal right the head of the clan is invariably a man—the elder male relative on the maternal side. Thus the father was the patriarch, and received title of nobility men under matriarchy as under patriarchy; in the former, indirectly through the man's sister, in the latter, directly to his children (Trans. Roy. Soc. Canada, IX, XI; B.A.A.S., London, 1889). Fraser points out that among the Melanesians, where motherkin prevails, the nearest male relative of the individual is the mother's brother (loc. cit., II, 74). And Swanton says of the Tlingit shamans that spirits descended from uncle to nephew. The great difficulty with the real inheritance theory is that it does not explain enough. It may account in places for the change of the personal totem of an ancestor into the clan totem, but it fails to tell how or why the same totem is held by different clans or tribes or stocks not connected by ties of blood-relationship. The natural explanation is that the fauna and flora of a country are substantially the same, and individuals in different parts belonging to different tribes could transmit without a totem which they would transmit to their descendants. Thus with members of the same clan there would be the same totem with consanguinity. With members of different clans having the same totem there would not be consanguinity but a kind of relationship based in the possession of the same. Hence Dr. Fison writes of the Australians: "All men of the same generation who bear the same totem are tribally brothers, though they may belong to different and widely separated tribes" (quoted by Lang, "Secret of the Totem", 45). If therefore real inheritance be supplemented by supposed inheritance, it can be safely maintained that the clan totem, taken in its widest extent, is a development or extension of the individual totem or manitous through real or supposed inheritance. The nature of the supposed inheritance becomes clear from the following.

III. NATURE.—The basis of Totemism is the animistic conception of nature. The life revealed in living things, the forces manifested by physical objects are ascribed to spirits animating them or dwelling therein. "There is indeed nothing in nature," writes Charlevoix, "if we can believe the savages, not only not inferior, but superior to man." (Nouv. France, Paris, 1744, VI, 67). The feeling of weakness in the midst of powers and forces greater than his own leads him to seek union with one or more of these powers. It becomes his guide and support; its power is added to his; its life or "essence" or "mystery" becomes part of his very own, he is called by its name, and some part of its physical embodiment is viewed as his most valued possession, as the mark of his spirit protector and the sign of his strengthened life, i.e. his "medicine" or "mystery". Thus savages believe themselves endowed with the qualities of their totems. Thus we can understand the birth and death ceremonies of the totem tribes, the facts that in the tribal dances and ceremonies the individuals imitate in action or costume the appearance and habits of their totems. So also we can understand the respect or reverence which the individual has for his totem. The fact is the difficulty in distinguishing between them, the fact that he regards them as his kin and calls them brothers, and as far as possible identifies himself with them. Thus the savage with a totem has his own human life and strength plus the spirit-life and strength of the animal or object whose totem he possesses. For, as with the natives of British Columbia, theنعو or ىوتو, i.e. the "essence" or "mystery", becomes the totem, not the mere outward form of the animal or object. He either has this spirit-life actually and habitually and augmenting his own natural powers or at least possesses the right to invoke the spirit-life to the augmentation of his natural powers in time of need, e.g. an Indian in a canoe, seeing the enemy gaining upon him, reverently calls upon his totem, e.g. sawhitch, and receives the additional strength that he soon escapes his pursuers (Frazer, "Totemism and Exogamy", III, p. 385). In the former case the possession of the spirit-life is habitual and can be conceived as passing to his descendants; in the latter case it is occasionally present and therefore need not be hereditary. In possession intact this spirit-life may at least to keep the claim to its assistance clear and unhampered, seems to be the reason for the regular religious ceremonies practised in regard to the totem.

Furthermore, in studying the relation of the spirit-life of the totem to the natural life of the individual, we can conceive that the latter is at times more prominent and at times the spirit-life is principally considered. In the former case the members of the totemic clan are united, not only in the possession of the same common spirit-life, but through ties of consanguinity, by participation in a common human life. In the latter case the individual would not of necessity be related to one another by blood, but would consider themselves relatives by a common participation in the spirit-life of the same totem. Thus we can understand why some tribes have both clan and individual totems, and again why some clans have two or more totems. Finally, in the theory that the clan totem is the natural development of the individual totem, the contention of some scholars that the term totem should be reserved to the clan totem is of little moment. Thus van Gennep, E. B. Tylor, and Lang hold that the clan totem alone deserves the name; and Fraser now advocates the opinion of van Gennep (Totemism and Exogamy, III, 456).

Hence Totemism, like Fetishism and Shamanism, is based on Animism, but differs from them in the way the spirits are conceived to enter into the lives of men and manifest their power. Miss Kingsley, however, maintains that Totemism is a pantheistic conception of the universe, which she says was held by the American Indians. But this is not correct. The Indians always made a distinction between the spirit-life of the totem and the ordinary human life or strength of men. The former was considered sacred, mysterious, mysterious. This is shown by the terms used to designate the spirit-life, e.g. wakan of the Dakotas, orenda of the Iroquois, tlokala of the Kwakiutl Indians. Dorsay says that an Indian's wakened is considered inspired and as possessing supernatural power. Thus the Indian's "medicine bag" is his "mystery bag," writes Catlin, and Dr. Hoffmann tells us that the young Algonquin receives from the Great Mystery the particular animal form he might adopt as his guardian mystery, and this becomes his advisor, monitor, and intercessor with the superior manitou.

The real nature of Totemism, therefore, is the savage conception of a twofold power or life or strength in the individual, i.e. his human life plus the spirit-life of the totem. But the measure in which the spirit-life enters into the human life of the totemic individual varies in different tribes and races, giving rise to the difficult problem which has been studied by this subject. Thus we have the spirit-life holding a subordinate position in relation to the human life; or the spirit-life so prominent that the human life is absorbed by it and consequently ignored and forgotten; or we find both the spirit life and the human life equally recognized but at times in a confused
manner. In the first case the human element predominates and descent is reckoned by human generation. Miss Fletcher assures us that the Omahas do not hold descent from mixed races; and Father Brun says the same is true of the natives in West Sudan. Boas writes that the Kwatitutl Indians do not consider themselves to be descendants of the totem; they believe the totem came from an ancestor who had an adventure with an animal which he took as a totem. The same is true of the British; Coast Tsimshians, Tlingit, augus of Torres Straits, Aborigines of North-east Australia; setnar of West Australasia, agei of New Guinea, or -tman of Melanesia, honga of Borneo, nagual of South America, tamanou of Twana Indians, is not hereditary; it is acquired by the individual and it is his own personal property, whereas the clan totem is considered a possession of the clan. It is obtained either accidentally, as when a savage believes that he owes his life to an animal which he immediately takes as his totem; or bestowed at birth, e. g. in Central America by the parents casting a horoscope; or bestowed on the youth by wise men, e. g. Sioux; or regularly at the puberty ceremonies. Once acquired the totem is the property of the person who owns it. Indian goes off alone to the forest and wanders for days without food except roots, etc. After a time when asleep he sees in a dream the animal which is to be his guardian. It or its spirit comes to him. Ever after he hears on his person the object seen, or a part of it. The totem is a being which is known as his totem. Catlin describes this in detail. The Salish word *sulia*, from *ulia*, i. e. to dream, indicates the ordinary method by which it is obtained. Boas says that with the Kwatitutl Indians the personal totem must be selected from the totems of the clan, hence the number is limited.

V. Religious Aspect. Totemism has both a religious and a social aspect. These aspects vary; thus with the interior Australian tribes the religious aspect is predominant; with the coastal tribes the social aspect prevails. Lord Avebury and Spencer hold that Totemism began as a social system only, and that the superstitious regard for the totem is an afterthought. A. Lang, failing to grasp the religious meaning of the totem, has helped to popularize this view. McLennan and Robertson Smith teach that the religious reverence for the totem was original. Totemism is the worship of a being which is essentially and exclusively connected with their religious system. Investigation into the nature of Totemism shows this to be the true opinion. Durkheim holds the totem to be a god. This is a mistake. The respect paid to the totem is like that given to a superior. It is looked upon as a friend, as a parent, as a master, as a god. It is to be revered, obeyed in all things, and its wishes are to be carried out. Thus the totem of the child will be the totem of the spot whence the *churininga* was taken. Hence there could be children of the same parents all possessing different totems.

In the third case, where both the spirit-life of the totem and the human life of the individual are recognized but in a confused manner, we find the explanation of another class of beliefs and myths which have gathered around Totemism. Thus we can understand how the North American Indians, in explanation of their origin, can neglect the human so that in the remote past it is lost in the animal. Thus Indians of the Wolf totem say they are descended from wolves, of the Crane totem from cranes, of the Turtle totem from turtles, etc. So too we can see how they were led to believe that what was new and was endowed with superhuman powers, e. g. Salish tribes, or were transformed human or semi-human, e. g. Urabunna or creatures partaking of both human and animal natures with power of transforming themselves into animal or human shapes at will, e. g. Northern Australian tribes, or of retransforming themselves, e. g. Iroquois (Hesitt, "Iroquois Cosmology" in "21st Am. Rep. of Bur. of Ethnol.", Washington, 1904, p. 219). On this hypothesis we can grasp the beliefs and myths that are universal among totemic peoples and see also why the Haides, in venerating the killer-whale, blend in their belief the actual animal and the demon Skana supposed to be embodied in it.

IV. PERSONAL TOTEM, i. e. manitou of Algonquins, *ka* *i* of Tlingit, *augus* of Torres Straits, *uru* of British Indian; *kot* of Bora; *kania* of Australia, *atari* and *tamanii* of Melanesia, *nyarong* of Borneo, *nahual* of South America, *tamanou* of Twana Indians, is not hereditary; it is acquired by the individual and it is his own personal property, whereas the clan totem is considered a possession of the clan. It is obtained either accidentally, as when a savage believes that he owes his life to an animal which he immediately takes as his totem; or bestowed at birth, e. g. in Central America by the parents casting a horoscope; or bestowed on the youth by wise men, e. g. Sioux; or regularly at the puberty ceremonies. Once acquired the totem is the property of the person who owns it. Indian goes off alone to the forest and wanders for days without food except roots, etc. After a time when asleep he sees in a dream the animal which is to be his guardian. It or its spirit comes to him. Ever after he hears on his person the object seen, or a part of it. The totem is a being which is known as his totem. Catlin describes this in detail. The Salish word *sulia*, from *ulia*, i. e. to dream, indicates the ordinary method by which it is obtained. Boas says that with the Kwatitutl Indians the personal totem must be selected from the totems of the clan, hence the number is limited. The respect paid to the totem is like that given to a superior. It is looked upon as a friend, as a parent, as a master, as a god. It is to be revered, obeyed in all things, and its wishes are to be carried out. Thus the totem of the child will be the totem of the spot whence the *churininga* was taken. Hence there could be children of the same parents all possessing different totems.

In the third case, where both the spirit-life of the totem and the human life of the individual are recognized but in a confused manner, we find the explanation of another class of beliefs and myths which have gathered around Totemism. Thus we can understand how the North American Indians, in explanation of their origin, can neglect the human so that in the remote past it is lost in the animal. Thus Indians of the Wolf totem say they are descended from wolves, of the Crane totem from cranes, of the Turtle totem from turtles, etc. So too we can see how they were led to believe that what was new and was endowed with superhuman powers, e. g. Salish tribes, or were transformed human or semi-human, e. g. Urabunna or creatures partaking of both human and animal natures with power of transforming themselves into animal or human shapes at will, e. g. Northern Australian tribes, or of retransforming themselves, e. g. Iroquois (Hesitt, "Iroquois Cosmology" in "21st Am. Rep. of Bur. of Ethnol.", Washington, 1904, p. 219). On this hypothesis we can grasp the beliefs and myths that are universal among totemic peoples and see also why the Haides, in venerating the killer-whale, blend in their belief the actual animal and the demon Skana supposed to be embodied in it.
probably are the multiplication of the reincarnated forms of the spirits. When, e.g. the members of the Kangaroo clan perform magic ceremonies for the multiplication of Kangaroos, we are not warranted in stating that Kangaroo animals are in question, for members of this clan are also called Kangaroos. Hence, the multiplication of the human species may be intended, so that the Kangaroo spirits may be reincarnated. This seems to be confirmed by the rites having a reference to human generation performed at the puberty or Engwura ceremonies.

The main features in the religious aspect of Totemism are shown in the rites and secret objects with a view to show or to attain identity with the totem. (a) Thus at solemn totemic festivals the totem animal is sacrificed and eaten even by its own clan. In Australia the eating of the totem animal was considered essential to the rites for the multiplication of the totem. Hill-Tout says that in British Columbia these ceremonies would last through the winter and the people would be grouped according to their totems, thus changing the usual form of tribal organisation. (b) By adoption of personal names referring to the appearance or habits of the totem animal. (c) By dressing in the totem clothing, wearing badges, masks, crest-hats of the totem, arranging hair, painting face or body, tattooing and mutilating the body so as to resemble the totem; so also totems are painted or carved on weapons, canoes, huts, etc. From this custom we have the totem poles decorated with crests of clan and personal totems, and with red crosses representing the ghosts of their vanquished foes, who are to be their slaves in the other world. (d) By dances and songs as dramatic performances of the myth relating to the acquisition of the spirit protector. (e) By consulting totemic agents, e.g. the Algonquins and Narragansetts have priests. (f) The influence of Totemism is shown also in the birth, marriage, and death ceremonies. Thus, e.g. a child of the Ottawa deer clan on the fifth day after birth was painted with red spots or stripes in imitation of a fawn; the bride and groom in the Kolong red-dog clan of Java were rubbed before marriage with the ashes of a red-dog’s bone; a member of the Amaha buffalo clan was on dying wrapped in a buffalo robe, etc.

VI. SOCIAL ASPECT.—In its social aspect (a) the totem is generally taboo to the members of the clan. They could not kill it or eat its flesh. An exception is in the solemn totemic ceremonies. According to traditions the Australians in earlier times regularly killed and ate their totem. This is not now the custom. The American Indian will address an apologue to his totem before killing it. The Melanesian is supposed to have peculiar success in hunting his totem animal. Hill-Tout says the Salish tribes considered the real totem was a spirit or mystery-being, that is to say, he took the form of the animal and does not seek to kill or harm the animal, his totem, and if the animal was slain, hence the hunter did not respect the life of the totem; in fact he was considered more successful in hunting his totem's animals than other men. Again, on the African Gold Coast a hunter of the Leopard family would not hesitate to kill a tusked elephant, but he would put oil in the wounds (Harber in “Jour. Anth. Inst.”, XXXVI).

(b) Among the Iroquois and the Southern Mewaks of California the totem governs the choice of partners in games, the placing and treatment of visitors. A special feature is shown in binding together the members of the totem clans. All members of the totem clan regard one another as kinsmen and brothers, and are bound to mutual help and protection. Tylor says every Indian looked for and found hospitality in a hut where he saw his own totem figured and, if he was taken captive in war, his clan owners would ransom him. (Harner, “Sudan”, XXVIII.) Morgan shows the superiority of the totem bond over the tribal bond among the Iroquois. In the Torres Straits warfare could not affect the friendship of the totem-brethren. Yet Harper says that on the Gulf Coast a man cannot safely visit a people of a totem hostile to his own totem, nor does he hesitate to kill another having the same totem as himself,

(d) In the social phase must be viewed the secret societies so widely prevalent among the American Indians.

(e) Ford holds that in totemic obligations we are confronted with the beginnings of authority ("Annals of American Academy of Political and Soc. Science", XXXIII, Philadelphia, 1904). Jevons and Reinauc teach that the totem clan is the earliest social organisation known in the evolution of society (Folk Lore, X). Lorent sees in Totemism the explanation of the early Egyptian hieroglyphics, and says it is the parent of writing ("Musée Guimet, XX, 1904-05"). Fraser says that it had an important effect on industry, the domestication of animals and the use of metals; that its influence on economic progress appears to be little more than a shadowy conjecture, but it has done something for pictorial and plastic art, e.g. in totemic representations (Totemism and Exogamy, IV, 19-25). Father Bruin, however, warns us that although certain social institutions are placed under the protection of totemic beliefs, the social institutions as a whole are not based upon Totemism. The truth is that Totemism, like any other belief which enters into the life of a people, has an influence on their culture.

(f) The influence of Totemism is shown also in the birth, marriage, and death ceremonies. Thus, e.g. a child of the Ottawa deer clan on the fifth day after birth was painted with red spots or stripes in imitation of a fawn; the bride and groom in the Kolong red-dog clan of Java were rubbed before marriage with the ashes of a red-dog's bone; a member of the Amaha buffalo clan was on dying wrapped in a buffalo robe, etc.

VII. EXOGAMY.—The relation of exogamy to Totemism is a problem of great difficulty, and will not be completely solved until the origin of exogamy is definitely established. It is the fact that exogamy prevails in many tribes that a man cannot marry his own totem, but must seek a wife from another clan. Hence many writers inferred that Totemism and exogamy existed together as different sides of the same institution. Thus A. Lang regards exogamy as the essential feature of Totemism. Hill-Tout takes issue with him maintaining that it is accidental or secondary, that the possession of the same totem becomes a bar to marriage only because it marks kinship by blood, which is the real bar. Lang by totem means "the hereditary totem of the exogamous group, and that when the latter did arise, the totems were not affected by them. Hence the exogamous class is a social organization totally different in origin and nature from the totemic clan, and not a mere extension of it, although they have crossed and blended in many places. Again Totemism and exogamy are found existing separately. Father Bruin says the totemic and exogamous clans are not exogamous. Dr. Rivers points out that the natives of Banks Island have pure Totemism and pure exogamy existing side by side without influencing each other. Different theories have been proposed to account for the origin of exogamy. Westermak says it arose out of the aversion between two totems belonging to the same tribe, or near kin, i.e. in horror of incest. This is very probably the true solution. McLennan holds that exog-
Encouraged by Cortés, King Chichemacatitl asserted his independence by seizing the Mexican tax-gatherers then in his country, but was restrained by the Spanish commander from sacrificing them to the idols. They gave willing help in laying the foundations of the city of (Villa Rica de la Vera Cruz), which Cortés placed as the chief military post and advance upon the Mexican capital. As a final test of their friendship and obedience, Cortés commanded the destruction of the wooden images of the gods in the great pyramid temple of Cempoal, where every day human victims were sacrificed, their hearts being torn out and placed on the altars of the gods; the blood sprinkled upon the idols and the walls of the temple, and the dismembered limbs borne away to be served up in a cannibal feast. Notwithstanding the protest of the king and the fierce opposition of the priests and their retainers, the order was carried out by a detachment of Spanish soldiers. The idols were thrown down to the foot of the temple and burned. According to Bancroft (see bibl.), when their pagan temple was cleansed Olmedo preached the Christian Faith and celebrated Mass before the assembled natives. The contrast between the simple beauty of this impressive building and the great temple of Cempoal, whose worship made a deep impression on the minds of the natives, and at the conclusion those who desired were baptized. So Christianity achieved its first victory in Mexico.

In the subsequent events, culminating in the taking of the city of Mexico and the downfall of the Empire, the Totonac took active part with the Tlacasans as allies of the Spaniards, giving ready allegiance alike to the new rulers and the new religion. In 1526 their territory of Vera Cruz was combined with Tlascala, Tabasco, and Yucatan to a bishopric with seat at Tlaxcala under Bishop Blasiano Gómez, Dominican (d. 1542). The work of Cortés was given over chiefly to the Dominicans, who had convents at Vera Cruz, Puebla, and Oaxaca, and who led the fight against Indian slavery (see CASAS, BARTOLOMÉ DE LAS). Franciscans, Augustinians, and other orders were also represented in the Indian work. The Jesuits in the diocese confined their attention to whites and negroes. In 1575-77 the Totonac, in common with all the other tribes of Southern Mexico, were ravaged by the mysterious mualalzahuani epidemic, estimated to have destroyed two millions of the native race. About the year 1600, in accordance with the viceroy's first instructions for representation, the entire population of Cempoala was removed to a new site, and the ancient capital thenceforth sank to the level of a village.

The modern Totonac of Puebla and Vera Cruz are industrious farmers, their chief crop being sugar cane, from which they manufacture sugar in their own mills. They are also expert fishermen. Their houses are of pole framework plastered with clay on the outside and thatched with grass. They wear cotton garments of native pattern and weaving. They are much given to dances and festivals, both church festivals and their own, particularly the Centeobres, an interesting survival of an old sacrificial rite in which seeds and portions of earth sprinkled with the blood of fowls killed for the occasion are distributed to the various fields. Aside from this and some other folklore customs, they are all Catholics, and strongly attached to their religious teachers.

The Totonac language, although considered by Sahagún and Orozco y Berra to be connected with that of their nearest neighbours, the Huastec, of Mayan stock, is held by Brinton to be of independent stock, but with considerable borrowings from Huastec and Aztec. It is spoken in four distinct dialects and lacks the sound of r.

Of the published works in the language the most important are "Arte y Vocabulario de
of the Toctoeagi, at the end of the second century A. D. c., tried to shake off the yoke of Rome during the invasion of the Cimbri; but at the beginning of the empire it was a prosperous Roman civitas with famous schools in which the three brothers of the Emperor Constantine were pupils. In the fourth century it was reckoned the fifteenth town in importance in the empire. In 413 it was taken by Astdulf, the Goth, and in 419 under Wallia it became the capital of the Visigothic Kingdom. In 508 after conquest by Clovis it became Frankish. Legends of more or less recent

James Mooney

TOUCHE

Touche, George Anselm, b. at Stalbridge, Dorset; d. about 1689. He was second son of Mervyn, twelfth Lord Audley, second Earl of Castlehaven, and a man of profligate life; his first wife was Elisabeth Barnham. He was professed as a Benedictine at St. Gregory's, Douai, 22 Nov., 1643, taking the name Anselm in religion. Being sent on the mission in the soot of England, he was finally appointed chaplain to Queen Catherine of Braganza in 1671. In that capacity he lived at Somerset House till 1675, when he was banished. Dod's states that he was expressly excluded from the succession to the Earlom of Castlehaven by the Act of Parliament which in 1678 confirmed the earldom to his elder brother James. While living in London he published a book called "Historical Collections out of several grave Protestant Historians concerning the Changes in religion, and the strange confusions following, etc." (1674; 2nd ed. 1686), and in 1680 he issued "The Secret Paths of Divine Love," translated by him from the French of Constantine Barbason.

Edwin Burton

TOULON

See Nancy, Diocese of.

TOULOUSE

Toulouse, Archdiocese of (Tolesensis), includes the Department of Haute-Garonne. As re-established by the Concordat of 1802 it included the Departments of Haute-Garonne and Ariège, at which time the archbishop joined to his own the title of Auch, jurisdiction over Auch being given to the Diocese of Auch, as also the title of Narbonne, an archiepiscopal see which jurisdiction was conferred by the Concordat upon the Diocese of Carcassonne, and the title of Albi, over which, though formerly an archdiocese, jurisdiction went by the Concordat to the See of Montpellier. In consequence of the creation of the Archdioceses of Auch and Albi under the Restoration, the Archbishop of Toulouse only styled himself Archbishop of Toulouse and Narbonne, and when the Diocese of Pamiers was created the limits of the Archdiocese were restricted to the Department of Haute-Garonne. As thus marked off by the Bull "Paterna Caritatis", July 1822, the Archdiocese of Toulouse includes almost the whole of the ancient Dioceses of Toulouse, Rieux, and Comminges, and a few small portions of the ancient Dioceses of Montauban, Lavaur, St-Papoul, Mirepoix, and Lombez.

I. Diocese of TOULOUSE.—Toulouse, chief town date claim that it was evangelized by St. Martial (see Limoges, Diocese of), but as far as historical evidence goes the see seems to have been founded by St. Saturninus (Sernin) in the middle of the third century. The "Passio Sancti Saturnini" corroborates this date as that of his incumbency and martyrdom. Subsequent tradition claims that he was a disciple of St. Peter. St. Papoul (see Carcassonne, Diocese of) was his companion and like him a martyr. The name of St. Honoratus, given in some lists as St. Saturninus's successor, seems to have crept in through error from the fabulous legend of St. Firminus of Amiens and, according to Mgr Duchesne, ought to be omitted. Among the bishops of Toulouse may be mentioned: Rhodanius (350–58), exiled by Constantius to Phrygia because of his efforts against Arianism at the Council of Béziers in 356; St. Hilary, whom some historians place before Rhodanius, but who is placed after him by Mgr Duchesne; St. Sylvius (360–400); St. Exuperius (c. 400), who drove from his diocese in 405 the heretic Vigiliusus, saved Toulouse from the ravages of the Vandals, and was the friend of St. Jerome; St. Germerius (Germier), whose episcopate (c. 541) is questioned by Mgr Duchesne; Magnuspichus (c. 585), exiled by King贡debaud; St. Erembert (657), a monk of Fontelle who returned to his monastery to die. From being the capital of the Duchy of Aquitaine, from 631, Toulouse became in 778 the capital of the County of Toulouse created by Charlemagne, and which in the tenth century was one of the main fiefs of the crown. Raymond IV, Count of Toulouse,
known as Raymond de Saint Gilles (1042–1108), was one of the leaders of the First Crusade. Concerning the leannings of Raymond VI and Raymond VII, Counts of Toulouse, towards the Albigenas heresy, and concerning the death of Simon de Montfort in 1218 at the battle of Taillefer, reader may see an article in the History of the French troops in the First World War; Charles de Montcal (1228–51), who in 1335 upheld the decision of the Holy See, against the opinion of the majority of the Assembly of Clergy, that the marriages of princes of the blood contracted without royal consent were not null; Pierre de Marca (1562–92), who under Louis XIII and later under Louis XIV, was the Archbishop of Toulouse; in 1611 became president of the Parlement of Béarn; and woulde have written a work of Gallican tendency "De concordia Sacerdotii et Imperii", a voluminous work on Spain and especially on the Kingdom of Savoy, was made in 1609, and a commentary on the Psalms; he was secretary to the Assembly of the Clergy of France of April, 1656, which drew up a formula condemning the Five Propositions drawn from the "Augustinus", and he died in 1662 just as he was about to take possession of the See of Narbonne; Pierre de Bonny (1672–79), cardinal in 1692; Charles Antoine d’Avignon (1740–92), cardinal in 1771; Étienne Charles de Loménie (1763–89), cardinal in 1786; Jean Bénigne Boucher de Langle, 1788; Anne de Clermont Tonnerre (1800–30), cardinal in 1822; Paul d’Astros (q. v.) (1830–50), cardinal in 1850; Jules Dessure (1859–99), cardinal in 1879; François Désiré Mathieu (1866–1900), cardinal in 1890, was a member of the Paris Academy, wrote the history of Lorraine under the ancien régime, of the Concordat of 1801–2, and of the Conclave of 1903; he died in 1908.

II. DIOCESE OF COMMINGES. — The earliest Bishop of Comminges we know of is Suavis, who assisted at the Council of Agde in 506; but Sidonius Apollinaris speaks of the persecutions suffered at the hands of the Arian Goths in the fifth century by the bishops of Comminges. St. Affricus (c. 540), who died in the Rouergue, is wrongly included among the bishops of Comminges. Among the bishops of Comminges were: St. Bertrand of Comminges (1073–1123), grandson of Raymond Taillefer, Count of Toulouse, previously archdeacon of Toulouse, and who built the cathedral of Comminges and restored the town; Bertrand de Goth (1305–99), who became pope under the name of Clement V; Bertrand de Cosnac (1352–72), cardinal in 1355; Amelius de Gas (1385–99), who died in 1385; Pierre de Foix (1422–64), cardinal in 1437; John Ciò, who became pope in 1484 under the name of Innocent VIII, for a short time in 1467 held the title of Comminges; Cardinal Amanieu d’Albret, who was Bishop of Comminges in 1504 and 1507; Cardinal Carlo Carafa, strangled in the pontificate of Pius IV, was probably Bishop of Comminges about the middle of the sixteenth century; Urban de Saint-Gelais, who in 1586, without outside assistance and with the help of a cannon which he caused to be brought from Toulouse, captured the town from the Huguenots. The Council of Toulouse which was held in 1532 was administered with peculiar ceremonies: the baptismal water was kept in a large silver dove with wings displayed, and enclosed in a cupola surmounting the font; at the moment of baptising the dove was lowered, by a pulley, over the head of the child and through its open beak the baptismal water was poured over his head.

III. DIOCESE OF RIEUX. — The See of Rieux was founded in 1317, by cutting off a portion of the Diocese of Toulouse. The cathedral of Toulouse, dedicated to St. Stephen, is remarkable for the contrast between its choir and nave: the nave was begun in 1111 at the instigation of Count Raymond VI; the choir is Gothic, and was begun between 1273 and 1286 by Bishop Bertrand de la Isle, and completed in the fifteenth century. The church
of St. Sernin of Toulouse was begun by St. Sylvius at the end of the fourth century, and completed by St. Exuperius, who transferred to it the remains of St. Sernin. The church, together with the relic of the disciples of St. Sernin, and of the bishops, Saints Honoratus, Hilary, and Sylvius. St. Exuperius himself was buried there. Charlemagne gave to St. Sernin's the bodies of St. Susanna of Babylon, of St. Asciola and her sister St. Victoria, martyrs of Cor- dova. Unluckily the building relics of the Quatuor Sancti Coronati, Claudius, Niceratus, Symphorunen, Castor, and their pupil St. Simplicius, were brought from Rome. The crusaders who in 1096 accompanied Raymond de Saint Gilles to the East brought back the body of St. Barnabas, the lord of the Alexandrian church, and the heads of thirteen bishops; from the Crib or Manger, a stone from the Holy Sepulchre, and a Crucifix known as the Crusaders' Crucifix. In 1187 Guillaume Taillefer deposited there other relics acquired in the East, especially the greater portion of the body of St. George. Louis VIII brought thither the bodies of St. Edmund, King of England, and St. Gilbert, founder of the Gilbertines. The people themselves brought the body of Saint Gilles to save it from the Albignans. Alphonse, brother of Louis IX, last Count of Toulouse, on his entry to the town in 1251 deposited in the church a tunic of the Crown of Thorns, given by Baldwin II, Emperor of Constantinople, had given to St. Louis, and a portion of the True Cross. About 1386 the body of St. Thomas Aquinas, given by Urban V to the Dominicans, was brought to Toulouse, and preserved in their church until the Revolution, when it was transferred to St. Sernin's.

As early as 1100 a confraternity was formed with twelve superintendents and seventy-two bouteles-re- gens (guardians), in memory of the number of the Apostles and Disciples; they took oath to watch in turn over the relics. Urban II consecrated St. Ser- nin's on 7 July, 1097, after it had been restored by the canon, St. Raymond; Callistus II dedicated an altar there and placed in it relics of SS. Peter and Paul, SS. Simon and Jude; Urban VIII granted the same indulgences to those who visited the seven altars of St. Sernin's as could be gained by visiting the seven mountains of St. Peter's in Rome. The University of 'Toulouse was founded in 1229, under a treaty between Raymond VII, Count of Toulouse, and Blanche of Castile, regent of France; its object was to prevent by higher theological studies a recrudescence of Albignianism. Raymond VII had to undertake to maintain in Toulouse at his own expense ten masters drawn exclusively from among its former pupils, and granted the chancellor authority to confer degrees. This was the university's period of prosperity. The new revision of the statutes after 1394 by a committee nominated by the antipope Clement VII was fatal to it; from the fifteenth century to the sixteenth with Papal regime the University of Toulouse merely existed.

In 1751 the University of Cahors was merged into that of Toulouse. It was founded in 1332 by John XXII, a native of Cahors, at the instance of the municipal authorities. The pope granted the new university the rights enjoyed by that of Toulouse, and in fact commanded the latter to communicate its privileges to Cahors. The Bull of erection for Cahors was almost identical with the "Parsens Scientiarum" of the University of Toulouse founded in 1368 by Edward, Prince of Wales, the "Black Prince" and in 1370 by Louis, Duke of Anjou. The Prince also enjoyed the favour of Benedict XII, Clement VI, Urban V, Clement VII, and Benedict XIII. In 1460 Pius II ordered a revision of its statutes. The men, Licentiate in Law, and Doctor in Law, were admitted to the faculty of law which had as members such noted jurists as Peter Gregorius (1570), Guas (1554), and de Locaste (1594). Of the colleges at Cahors the first was founded by Raymond de Pèlegry, canon of London, who provided in his will (1365) for the maintenance of three scholastic. The College of the cardinals was founded in 1371 by Bernard of Redes, Archbishop of Naples, whose birthplace was Cahors. The College of St. Michel was established (1467) by Jean Rubeby, archdeacon of Tornoes. Among the students of Cahors the most illustrious was Fénélon, who entered upon his classical course there in 1663. During the eighteenth century the university declined, abuses crept in, especially in the matter of granting degrees. The Irish Seminary at Toulouse was founded in 1659 by Anne of Austria to receive twelve Irish clerical students. The Catholic Institute of Toulouse was established in 1864, and the faculty of the humanities was com- pleted in 1879 by the addition of a faculty of theology. Cardinal Mathieu suppressed the chair of law, and only retained about a dozen chairs of literary and scientific studies; but under the rectorship of Mgr Batiffol the Institute became, in the early part of the twentieth century, an important centre of sacred studies, and has remained so to this date. Its "Bulletin de littérature ecclésiastique" is highly appreciated in the scientific circles of France.

Toulouse is famous for its jeux floraux (floral games). The first meeting dates from early in May, 1524, and was organized by some troubadours. The contest was to laud the Blessed Virgin in a poem. Arnaud Vidal of Castelnau-d'Este was the first to gain a prize. In the fifteenth century the "Clemency" of the blessed Virgin was the theme of the rival poets; she was styled "Confort del monte Clemensa" (support of the world and clemency). This word "Clemens" gave rise to a bank of charity called Clerc; a woman named Clémence Isaurle had instituted the floral games. Jeanne Bontier, councillor of the Parlement of Toulouse (d. 1520), was the first to put faith in this legend. In 1527 Etienne Dolet wrote a poem on Clémence Isaurle; and the municipal magis- trates of Toulouse asked in order to suppress the poems, from taxation, declared it had been given to the city by Clémence Isaurle; they even went so far as to erect a statue to her in the capital of the town in 1557. Castel in 1633 assailed the legend in a very decisive manner, but it is died hard: an alleged poem was quoted on the Duguesclin campaign in Spain, in which during the fourteenth century reference is made to a Lady Clémence who was no other than Clémence Isaurle; then an ode appeared, said to have been recited in 1499; it has recently been proved that the poem is a seventeenth-century production, and the ode a nine-teenth-century forgery. Among the saints specially honoured in or connected with the diocese are: St. Orentius (Orens), Bishop of Auch (fourth century), to whom the inhabitants of Toulouse attribute an important victory they gained in 422; St. Gaudentius (Gaudens) (sixth century), a shepherd lad, beheaded by the Arian Visigoths, who gave his name to the town of Montalat in the canton of Saint-Vidianus (Vesian), martyred by the Arians in the middle of the sixteenth century; St. William of Lodève, or Gellon, Count of Toulouse, who died in 812; Blessed Raymond, archdeacon of Toulouse, Blessed Stephen of Narbonne, inquisitor, Blessed Bernard of
Rochefort, and Blessed William Arnauld, all of the Order of Saint Dominic; Blessed Bernard, Bl. Fontaine, and Bl. Arnauld, ecstatics. Blessed Garcia and Bl. Peter, laymen, massacred by the Albigensians at Aviron in 1242; the shepherds St. Germaine Cousin of Pibrac (1570-1601); St. John Francis Regis, who joined the Jesuits at Toulouse at the age of nineteen (1597-1640).

The chief benefactors of the diocese are: William de Nogaret, the famous legist of Philip the Fair (1260-1313), born at St. Felix de Caraman; the Jurisconsult Cujas, born at Toulouse (1522-92); Abbé Sicard (1742-1822), founder of deaf-mute instruction, born at Fousseret. The principal places of pilgrimage are: Notre Dame d’Alet at Montaigut, a shrine dating from the eleventh century; Notre Dame d’Avignonet, which dates from the wonders brought by the statue of the B. Virgin of Avignon et when the church which had been closed for forty years in consequence of the massacres committed by the Albigensians, was once more opened in the thirteenth century; Notre Dame du Bout du Puy at Valenties, a shrine dating from the sixteenth century; Notre Dame de Clary at Cassoles, dating from the tenth or eleventh century; Notre Dame de Roqueville at Montségur. Prior to the application of the Associations Law of 1901 there were in the Diocese of Toulouse: Augustinians of the Assumption, Olivetans, Capucins, Jesuits, Dominicans, Lazarists, Trappists, Missionaries of Our Lady of the Sacred Heart, Sulpicians, priests of the Sacred Heart, and various teaching congregations of Brothers. At the close of the nineteenth century, the congregations of nuns had charge of 49 nurseries, 1 school for the blind, 1 school for deaf and dumb, 2 orphanages for boys, 12 orphanages for girls, 4 detention homes, 9 houses of charity, 15 hospitals, 8 district nursing homes, 4 houses of retreat, 2 lunatic asylums. In 1905 at the breach of the Concordat, there were in the Archdiocese of Toulouse 448,481 inhabitants, 44 parishes, 3 auxiliary parishes, and 61 curacies assisted by the State.

Georges Goyau.

Tournai (Lat. Turnacum, Tornacum; Flemish, Tornuk), Diocese of (Tornacensis), in Belgium. As early as the second half of the third century St. Piat evangelized Tournai; some writers represent him as the first bishop, but this cannot be proved. Towards the end of the third century the Emperor Maximian rekindled the persecutions, and St. Piat suffered martyrdom. The great barbarian invasions began shortly afterwards, and a wave of Germanic paganism mingled with the Roman paganism, to the destruction of all Christian life. This lasted from the end of the third century till the end of the fifth. But with the rise of the Frankish race Clodion established himself at Tournai; Childeric, his successor, died there in 481. St. Remigius profited by the good will of the Frankish monarch to organize the Catholic hierarchy in the north of Gaul. He confided the Diocese of Arras and Cambrai to St. Vaast (Vedastus), and erected the See of Tournai (c. 500), appointing as its titular Eleutherius. It was probably its character of royal city which secured for Tournai this premature creation, but it soon lost its rank of capital by the departure of the Merovingian court.

Nevertheless it kept its own bishops for nearly a century; then about 626 or 627, under the episcopate of St. Achar, the sees of Tournai and Noyon were united, retaining their separate organizations. Tournai then lost the benefit of a privileged situation, and shared the condition of the neighbouring dioceses, such as Boulogne and Thérouanne, Arras and Cambrai.

The Cathedral of Notre-Dame, Tournai

where the same titular held both sees for five hundred years. It was only in 1146 that Tournai received its own bishop.

Among its bishops may be mentioned: St. Eleuthereus (beginning of sixth century); St. Achar (626-27—1 March, 637-38); St. Eloi (841-850); Simon de Vermandois (1121-46); Walter de Marvis (1219-51), the great founder of schools and hospitals; Etienne (1192-1209), godfather of Louis VII and minister of the queen; Andres Chini Malpiggia (1334-42), cardinal and papal legate; Guillaume Filastre (1450-73), chancellor of the Golden Fleece; Michel de Warenghien (1283-91), a very learned doctor; Michel d’Ene (1597-1614), the author of several works. During the Spanish domination (1521-1667) the see continued to be occupied by natives of the country, but the capture of Tournai by Louis XIV in 1667 caused to have as bishops a series of Frenchmen: Gilbert de Choiseul de Plessis-Praslain (1670-89); Francois de La Salle de Caillbot (1692-705); Louis Marcel de Coëtlogon (1705-07); Francois de Beaumureau (1708-13). After the Treaty of Utrecht (1713) the French were replaced by Germans: Johann Ernst, Count of Löwenstein-Wertheim (1713-31); Franz Ernst, Count of Salm-Reifferscheid (1731-1770); Wilhelm Florentine, Prince of Salm-Salm (1776-94).

It will be readily understood that the union of the see with Noyon and the removal thither of the see of the bishopric had favoured the growth of the power of the chapter. The privilege possessed by the chapter under the old régime of being composed only of nobles and scholars necessarily attracted to it those most distinguished for birth and learning. Illustrious names of France and Belgium are inscribed
in the registers of the archives or on the tombstones of the cathedral. The cathedral, 439 feet long by 216 feet wide, is surmounted by 5 towers 273 feet high. The nave and transept are Romanesque (twelfth century), and the choir is primary Gothic, begun in 1242 and completed in 1325. Originally the boundaries of the diocese must have been those of the Civitas Turnacensis mentioned in the “Notice des Gaules”. The prescriptions of councils and the interest of the Church both favoured these boundaries, and they were retained throughout the Middle Ages. The diocese then extended along the left bank of the Scheldt from Armentières to the North Sea, with the exception of the Viér-Ambachten (Hulst, Axel, Bouchouta, and Assenede), which seem to have always belonged to the Diocese of Utrecht. The Schelde thus formed the boundary between the Dioceses of Tournai and Cambray, cutting in two the towns of Turnonde, Ghent, Oudenarde, and Tournai itself. The shore of the North Sea between the Schelde and the Yser was wholly included within the perimeter. On the other side of the Yser was the Diocese of Térouanne, which bordered Tournai as far as Ypres. There began the Diocese of Arras, which bordered Tournai as far as the confluence of the Scarpe and the Schelde at Mortagne, France. This vast diocese was long divided into three archdeaneries and twelve deaneries. The archdeanery of Bruges comprised the deaneries of Bruges, Ardenne, and Oudenaarde; the archdeanery of Ghent, the deaneries of Ghent, Roulers, Oudenarde, and Waes; the archdeanery of Tournai, the deaneries of Tournai, Sclin, Helchin, Lille, and Courtrai.

In 1559 in order to wage more successful war against Protestantism, King Philip II of Spain obtained from Paul IV the erection of a series of new dioceses. The ancient Diocese of Tournai was divided, nearly two-thirds of its territory being taken away. The outlines of the archdeaneries of Bruges and Ghent formed the new dioceses of Bruges and Ghent, and six parishes passed to the new Diocese of Ypres. Those conditions lasted until the beginning of the nineteenth century. The French Revolution created the Department of Jemappes, which in 1815 became the Province of Hainault, whose boundaries followed those of the Diocese of Tournai, after a concordat between the pleni potentiaries of Pius VII and the consular government of the republic. The Bishop of Tournai retained only two score of the parishes formerly under his jurisdiction, but he governed on the right bank of the Scheldt a number of parishes which, prior to the Revolution, belonged to the Dioceses of Cambray (302), Namur (50), and Liège (50).

The Diocese of Tournai, with 1,240,525 inhabitants, has 537 parishes, divided into 33 deaneries: Antoing (21 parishes), Ath (12), Beaumont (17), Béolois (15), Binche (18), Bouillon (18), Celles (14), Charleroi (18), Châtelet (27), Chivres (23), Chimay (22), Dour (18), Ellezelles (6), Enghien (12), Fontaine-le-Évèque (20), France-lès-Buisnessal (14), Gosselies (20), La Louvre (15), Lens (23), Lessines (12), Leuze (17), Merbes-le-Château (17), Mons (St-Esprit), 9, Mons (St-Waudru), 10, Pâtures (17), Périves (12), Roeluis (16), Seneffe (21), Soignies (11), Templeuve (13), Thuin (16), Tournai (Notre-Dame, 14), Tournai (St-Briox, 13).

Eight diocesan colleges prepare young men for theological studies in a seminary, or for a liberal course in a university.

Tournfort, Joseph Pitton de, French botanist, b. at Aix in Provence, 5 June, 1656; d. at Paris, 28 Dec., 1708. After his school-days at a Jesuit college he studied theology at Aix, but in 1677 he turned his attention entirely to botany. He studied medicine at Montpellier and Barcelo-

Tournfort is recognized as a botanical explorer, and as the author of the artificial system of plants named after him. As a youth he travelled repeatedly through western Europe, exploring particularly the region of the Pyrenees. In 1700–2 he visited the Orient, passing through Greece. The account of this journey, “Relation d’un voyage du Levant” (Paris, 1717), appeared after his death; his work is a classic and was translated into English (1741) and German (1776). He collected 1356 species of plants during this one journey.

Tournfort’s system of classifying plants is based on the form of the corolla. Up to about 1750 the system was in high repute, being accepted even by Linnaeus, but as research advanced it lost its importance. Of permanent importance are the clear distinction Tournfort makes between genus and species, and the exhaustive analysis of generic, which was the first to draw up an elaborate. Linnaeus says of him: “Primus characteres genera conicit.” He expounded his system in his “Eléments de botanique” (3 vols. in 8°, Paris, 1694), containing 451 plates; re-written in Latin as “Institutiones rei herbariae” (3 vols., Paris, 1700), with 476 plates (1780) a supplement was issued containing a new edition by Adrien de Jussieu in 1719; English tr., London, 1735, French tr., Lyons, 1797. The “Institu-
Tournély, Honoré, theologian, b. at Antibes, Provence, 28 August, 1658; d. at Paris, 26 Dec., 1729. His parents were poor and obscure, but an uncle, a priest, at Paris invited him to that city and gave him a good education. On completing his philosophical and theological studies, he became a doctor of the Sorbonne in 1686, and two years later was sent by the king to the University of Douai to teach theology. Here he distinguished himself by the brilliance of his lectures and by his zeal in opposing the Jansenists. He was even accused of literary forgeries in order to compromise them, but the proofs of this accusation have never been forthcoming. Four years later he was recalled to Paris, appointed professor of theology at the Sorbonne, made a canon of the Sainte-Chapelle, and given the Abbey of Plainpié (Diocese of Bourges). He taught with unvarying success for twenty-four years and, as at Douai, showed himself the determined opponent of the Jansenists. In return they published pamphlets and multiplied attacks and calumnies to discredit him and his teaching, especially after the publication of the Constitution "Unigenitus", in which Clement XI condemned (8 Sept., 1713) their error as manifested in the "Réflexions morales" of Quesnel (q. v.). Tournély was actively engaged in furthering the acceptance of this Constitution by the assembly of the French clergy, of which he was consultant, and by the faculty of theology, of which he was an influential member. When, after the death of Louis XIV (1 Sept., 1715) and with the connivance of Cardinal Noailles, the Jansenists became masters of the faculty of theology, they expunged from its registers the Bull "Unigenitus" and expelled from its meetings Tournély and a score of his friends among the doctors (Jan., 1716). It was only at the earnest intervention of the regent, the Duke of Orléans, that they were reinstated five years later (Feb., 1721).

Tournély had so far published nothing, at least in his own name, but he is regarded as the author or inspirer of several anonymous works against the Jansenists which appeared at that time. On his retirement he immediately began to revise his lectures and, at the request of Cardinal de Fleury and others, to publish them in 1725. With the common title "Praelectiones theoligicae", he issued in Latin the following treatises in octavo: "On God and His Attributes" (1725); "On grace" (1726); "On the Trinity" (1726); "On the Church" (1726); "On the Sacraments in general" (1726); "On the Incarnation" (1727); "On the Sacraments of Baptism and Confirmation" (1727); "On Penance and Extreme Unction" (1728); "On the Eucharist" (1729); "On Holy Orders" (1729); "On Marriage" (1730). The work passed through several editions, among others those of Paris (16 vols., in 8vo, 1738–40), Venice (16 vols., 8vo, 1731–46), Cologne (10 vols., in fol., 1752–65). Several of these treatises have been abridged for use in seminars, and they still appear in Tournély's name, but they are in reality the work of Montagne, Robinet, and Collet. Tournély's own work is still so important in extent and value that he may be regarded as one of the most notable theologians of his age. The learned Lafitteau, Bishop of Sisteron, even then declared him "one of the greatest men who has ever been in the Sorbonne", and his works were highly esteemed by St. Alphonsus Liguori. His chief merits are clearness of explanation, elegance of style, deep learning, and orthodoxy; his one defect was Gallicanism, for, like all French theologians of that time, he was a Gallican.
